2016 European Intelligence and Security Informatics Conference (EISIC 2016)

Uppsala, Sweden
17-19 August 2016
2016 European Intelligence and Security Informatics Conference

EISIC 2016

Table of Contents

Message from the General Chairs ............................................................................................................. ix
Message from the Program Chairs ............................................................................................................. x
Organization ................................................................................................................................................ xi
Program Committee ................................................................................................................................... xii

Long Papers

Quality Assurance for Security Applications of Big Data .................................................................................. 1

Roger Clarke

On Interoperability of Security Document Reading Devices .............................................................................. 9

Svorad Štolc, Peter Wild, Kristián Valentín, Franz Daubner, and Markus Clabian

Location, Location, Location: Mapping Potential Canadian Targets in Online Hacker Discussion Forums ......................................................................................................................... 16

Richard Frank, Mitch Macdonald, and Bryan Monk

The Role of Internet Service Providers in Botnet Mitigation ............................................................................ 24

Jeroen Pijpker and Harald Vranken

Risk Kit: Highlighting Vulnerable Identity Assets for Specific Age Groups .................................................... 32

Razieh Nokhbeh Zaeem, Monisha Manoharan, and K. Suzanne Barber

How to Support the Decision Making in Crisis Context? ................................................................................. 39

Bénédicte Goujon

Providing Extensibility to Threat Modelling in Cloud-COVER’s Underlying Analysis Model ................................. 45

Mustafa Aydin and Jeremy Jacob

Methodology and Tool to Facilitate Structured Analysis of Multiple Hypotheses ........................................... 52

Magdalena Granåsen and Maja Karasalo

Towards Designing a Multipurpose Cybercrime Intelligence Framework ....................................................... 60

Mariam Nouh, Jason R. C. Nurse, and Michael Goldsmith

How Analysts Think: Think-steps as a Tool for Structuring Sensemaking in Criminal Intelligence Analysis ......................................................................................................................... 68

Nallini Selvaraj, Simon Attfield, Peter Passmore, and B. L. William Wong
Short Papers

Compression Effects on Security Document Images .................................................................76
  Peter Wild, Svorad Štolc, Kristián Valentín, Franz Daubner, and Markus Clabian

Cards, Money and Two Hacking Forums: An Analysis of Online Money Laundering Schemes .................................................................80
  Alexander Mikhaylov and Richard Frank

The Effectiveness of Counter-terrorism Policies Based on the Terrorism Decision .................................................................N/A
  Chaomin Ou and Wenyao Yang

Information Security Aspects of the Public Safety Data Interoperability Network .................................................................88
  Blaž Ivanc and Borka Jerman Blažič

Filtering Estimated Crime Series Based on Route Calculations on Spatio-temporal Data .................................................................92
  Martin Boldt and Jaswanth Bala

Disaster Risk Reduction for International Residents in Japan: Barriers and Facilitators to Knowledge Sharing in Times of Disaster .................................................................96
  Jiro Usugami

Discovering Knowledge in Online Drug Transactions Using Conceptual Graphs and Formal Concept Analysis .................................................................100
  Constantinos Orphanides, Babak Akhgar, and Petra Saskia Bayerl

Sentiment-based Classification of Radical Text on the Web .................................................................104
  Ryan Scrivens and Richard Frank

My Name is Legion: Estimating Author Counts Based on Stylistic Diversity .................................................................108
  Johanna Björklund and Niklas Zechner

Key Player Identification in Terrorism-Related Social Media Networks Using Centrality Measures .................................................................112
  Ilias Gialampoukidis, George Kalpakis, Theodora Tsikrika, Stefanos Vrochidis, and Ioannis Kompatsiaris

Confidential Crisis Information Sharing through an Interoperability Framework among First Responders: A Discussion and a Preliminary Solution .................................................................N/A
  Michele Fiorini, Vincenzo Esposito, Marcello Cinque, Christian Esposito, Mario Fiorentino, Domenico Cotroneo, and Stefano Russo

QUIN: Providing Integrated Analysis Support to Crime Investigators .................................................................120
  Selmar Smit, Bob van der Vecht, Freek van Wermeskerken, and Jan Willem Streefkerk

But I did not Mean It!—Intent Classification of Racist Posts on Tumblr .................................................................124
  Swati Agarwal and Ashish Sureka
Missing Solutions in the Fight against Cybercrime and Cyberterrorism—The New EU Research Agenda ...............................................................128
Borka Jerman Blažič and Tomaz Klobučar

How Analysts Think: Decision Making in the Absence of Clear Facts .................................................132
Matylda Gerber, B. L. William Wong, and Neesha Kodagoda

Personal Information Leakage During Password Recovery of Internet Services .....................................136
Mordechai Guri, Eyal Shemer, Dov Shirtz, and Yuval Elovici

Design for Intelligence Analysis of Complex Systems: Evolution of Criminal Networks .........................................................140
Patrick Seidler, Johanna Haider, Neesha Kodagoda, B. L. William Wong, Margit Pohl, and Richard Adderley

A Post-Mortem Empirical Investigation of the Popularity and Distribution of Malware Files in the Contemporary Web-Facing Internet ......................................................................................144
Jukka Ruohonen, Sanja Šćepanović, Sami Hyrynsalmi, Igor Mishkovski, Tuomas Aura, and Ville Leppänen

A Framework for Cognitive Bias Detection and Feedback in a Visual Analytics Environment .................................................................148
Alexander Nussbaumer, Katrien Verbert, Eva-Catherine Hillemann, Michael A. Bedek, and Dietrich Albert

Critical Review of Analytic Techniques .....................................................................................................152
Mandeep K. Dhami, Ian K. Belton, and Kathryn E. Careless

Modified Graphstega Based on Chart Scale Modification ........................................................................156
Aprianti Nanda Sari and Ari Moesriami Barmawi

A Security Analysis on Apple Pay .............................................................................................................160
Ashay S. Jawale and Joon S. Park

Enhancing Risk-Based Decisions by Leveraging Cyber Security Automation ........................................164
Tina AlSadhan and Joon S. Park

Text Authorship Verification through Watermarking .................................................................................168
Stefano Giovanni Rizzo, Flavio Bertini, and Danilo Montesi

On Privacy and Security Challenges in Smart Connected Homes ..........................................................172
Joseph Bugeja, Andreas Jacobsson, and Paul Davidsson

An Argumentative-Narrative Risk Assessment Model ..............................................................................176
Floris Bex and Bas Hovestad

A Quantitative Approach to Risk and Cost Assessment in Supply Chain Management .................................180
Linus Gisslén and Andreas Horndahl

A Behavioral Biometrics User Authentication Study Using Motion Data from Android Smartphones .................................184
Javid Maghsoudi and Charles C. Tappert
Random Delays to Limit Timing Covert Channel ................................................................. 188
  Anna Belozubova, Anna Epishkina, and Konstantin Kogos

A Framework and Prototype for A Socio-Technical Security Information
and Event Management System (ST-SIEM) .............................................................................. 192
  Bilal AlSabbagh and Stewart Kowalski

Poster Papers

Forecasting the Underlying Psychological Forces to Political Violence
through Big Data Symbol Mining .................................................................................................. 196
  Niklas Hageback

Role of Author Personality Traits for Identifying Intent Based Racist Posts .................................. 197
  Swati Agarwal and Ashish Sureka

Towards Efficient Law Enforcement Decision Support Systems in the Area
of Community Policing: The Use of Mobile Applications ......................................................... 198
  George Leventakis, George Papalexandratos, George Kokkinis,
  Elisavet Charalambous, and Nikolaos Koutras

Multilayer Analysis of Online Illicit Marketplaces ........................................................................ 199
  Michael Ashcroft, Matteo Magnani, Davide Vega, Danilo Montesi, and Luca Rossi

The IPATCH System for Maritime Surveillance and Piracy Threat
Classification ...................................................................................................................................... 200
  Maria Andersson, Ronnie Johansson, Karl-Göran Stenborg, Robert Forsgren,
  Thomas Cane, Grzegorz Taberski, Luis Patino, and James Ferryman

Present Status and Challenges in Cloud Monitoring Framework: A Survey .................................... 201
  Aws Naser, Mohamed Fadli Zolkipli, Shahid Anwar,
  and Muna Sulieeman Al-Hawawreh

A Dedicated Crawling Engine to Reduce Apps Distribution Risks .................................................. 202
  Marc Michel Pic

Harnessing Crowds to Avert or Mitigate Acts Terrorism: A Collective Intelligence Call for Action .................................................. 203
  Haibo Li and Anders Hedman

Author Index ........................................................................................................................................ 204
