## Technical Research

### Android

- **PRADA: Prioritizing Android Devices for Apps by Mining Large-Scale Usage Data** ........................................... 3
  - Xuan Lu, Xuanzhe Liu, Huoran Li, Tao Xie, Qiaozhu Mei, Dan Hao, Gang Huang, and Feng Feng
    - Peking University, China; University of Illinois at Urbana-Champaign, USA; University of Michigan, USA; Wandoujia Lab, China
- **Release Planning of Mobile Apps Based on User Reviews** .................................................................................. 14
  - Lorenzo Villarroel, Gabriele Bavota, Barbara Russo, Rocco Oliveto, and Massimiliano Di Penta
    - Free University of Bozen-Bolzano, Italy; University of Molise, Italy; University of Sannio, Italy
- **Toward a Framework for Detecting Privacy Policy Violations in Android Application Code** .............................. 25
  - Rocky Slavin, Xiaoyin Wang, Mitra Bokaei Hosseini, James Hester, Ram Krishnan, Jaspreet Bhatia, Travis D. Breaux, and Jianwei Niu
    - University of Texas at San Antonio, USA; University of Texas at Dallas, USA; Carnegie Mellon University, USA
- **Mining Sandboxes** ........................................................................................................................................ 37
  - Konrad Jamrozik, Philipp von Styp-Rekowski, and Andreas Zeller
    - Center for IT-Security, Privacy and Accountability (CISPA), Germany

### Performance

- **Generating Performance Distributions via Probabilistic Symbolic Execution** ................................................. 49
  - Bihuan Chen, Yang Liu, and Wei Le
    - Nanyang Technological University, Singapore; Iowa State University, USA
Performance Issues and Optimizations in JavaScript: An Empirical Study ................................. 61
Marija Selakovic and Michael Pradel
— TU Darmstadt, Germany

Reliability of Run-Time Quality-of-Service Evaluation Using Parametric Model Checking .................. 73
Guoxin Su, David S. Rosenblum, and Giordano Tamburrelli
— National University of Singapore, Singapore; BESTSELLER E-commerce, The Netherlands

Optimizing Selection of Competing Services with Probabilistic Hierarchical Refinement .................. 85
Tian Huat Tan, Manman Chen, Jun Sun, Yang Liu, Étienne André, Yinxing Xue,
and Jin Song Dong
— Singapore University of Technology and Design, Singapore;
National University of Singapore, Singapore; Université Paris 13, France;
Nanyang Technological University, Singapore

Empirical

The Emerging Role of Data Scientists on Software Development Teams ..................................... 96
Miryung Kim, Thomas Zimmermann, Robert DeLine, and Andrew Begel
— UCLA, USA; Microsoft Research, USA

Belief & Evidence in Empirical Software Engineering ................................................................. 108
Premkumar Devanbu, Thomas Zimmermann, and Christian Bird
— University of California, Davis, USA; Microsoft Research, USA

Klaas-Jan Stol, Paul Ralph, and Brian Fitzgerald
— Lero — The Irish Software Research Centre, Ireland; University of Auckland, New Zealand

Symbolic Execution

On the Techniques We Create, the Tools We Build, and Their Misalignments: A Study of KLEE .......... 132
Eric F. Rizzi, Sebastian Elbaum, and Matthew B. Dwyer
— Grammatech Inc., USA; University of Nebraska - Lincoln, USA

Guiding Dynamic Symbolic Execution toward Unverified Program Executions ......................... 144
Maria Christakis, Peter Müller, and Valentin Wüstholz
— ETH Zurich, Switzerland

Synthesizing Framework Models for Symbolic Execution ......................................................... 156
Jinseong Jeon, Xiaokang Qiu, Jonathan Fetter-Degges, Jeffrey S. Foster,
and Armando Solar-Lezama
— University of Maryland, USA; Massachusetts Institute of Technology, USA

Type-Aware Concolic Testing of JavaScript Programs .............................................................. 168
Monika Dhok, Murali Krishna Ramanathan, and Nishant Sinha
— Indian Institute of Science, India; IBM Research, India
Compilers and Emerging Trends

An Empirical Comparison of Compiler Testing Techniques ................................................................. 180
Junjie Chen, Wenxiang Hu, Dan Hao, Yingfei Xiong, Hongyu Zhang, Lu Zhang, and Bing Xie
— Peking University, China; Microsoft Research, China

Termination-Checking for LLVM Peephole Optimizations ................................................................. 191
David Menendez and Santosh Nagarakaatte
— Rutgers University, USA

Finding and Analyzing Compiler Warning Defects ............................................................................ 203
Chengnian Sun, Vu Le, and Zhendong Su
— University of California, Davis, USA

iDice: Problem Identification for Emerging Issues ............................................................................ 214
Qingwei Lin, Jian-Guang Lou, Hongyu Zhang, and Dongmei Zhang
— Microsoft Research, China

Energy and Videos

Energy Profiles of Java Collections Classes..................................................................................... 225
Samir Hasan, Zachary King, Munawar Hafiz, Mohammed Sayagh, Bram Adams, and Abram Hindle
— Auburn University, USA; Polytechnique Montreal, Canada; University of Alberta, Canada

An Empirical Study of Practitioners’ Perspectives on Green Software Engineering ......................... 237
Irene Manotas, Christian Bird, Rui Zhang, David Shepherd, Ciera Jaspan, Caitlin Sadowski, Lori Pollock, and James Clause
— University of Delaware, USA; Microsoft Research, USA; IBM Research - Almaden, USA; ABB Corporate Research, USA; Google, Inc., USA

Automated Energy Optimization of HTTP Requests for Mobile Applications ................................... 249
Ding Li, Yingjun Lyu, Jiaping Gui, and William G. J. Halfond
— University of Southern California, USA

Too Long; Didn’t Watch! Extracting Relevant Fragments from Software Development Video Tutorials ................................................................................................................................. 261
Luca Ponzanelli, Gabriele Bavota, Andrea Mocci, Massimiliano Di Penta, Rocco Oliveto, Mir Hasan, Barbara Russo, Sonia Haiduc, and Michele Lanza
— Università della Svizzera Italiana, Switzerland; Free University of Bozen-Bolzano, Italy; University of Sannio, Italy; University of Molise, Italy; Florida State University, USA

Open Source

Overcoming Open Source Project Entry Barriers with a Portal for Newcomers .................................. 273
Igor Steinmacher, Tayana Uchoa Conte, Christoph Treude, and Marco Aurélio Gerosa
— Federal University of Technology – Paraná, Brazil; Federal University of Amazonas, Brazil; Institute of Mathematics and Statistics University of Sao Paulo, Brazil
Work Practices and Challenges in Pull-Based Development: The Contributor’s Perspective
Georgios Gousios, Margaret-Anne Storey, and Alberto Bacchelli
— Radboud University Nijmegen, The Netherlands; University of Victoria, Canada;
Delft University of Technology, The Netherlands

Defect Prediction

Automatically Learning Semantic Features for Defect Prediction
Song Wang, Taiyue Liu, and Lin Tan
— University of Waterloo, Canada

Cross-Project Defect Prediction Using a Connectivity-Based Unsupervised Classifier
Feng Zhang, Quan Zheng, Ying Zou, and Ahmed E. Hassan
— Queen’s University, Canada

Automated Parameter Optimization of Classification Techniques for Defect Prediction Models
Chakkrit Tantithamthavorn, Shane McIntosh, Ahmed E. Hassan, and Kenichi Matsumoto
— Nara Institute of Science and Technology, Japan; McGill University, Canada;
Queen’s University, Canada

AntMiner: Mining More Bugs by Reducing Noise Interference
Bin Liang, Pan Bian, Yan Zhang, Wenchang Shi, Wei You, and Yan Cai
— Renmin University, China; Chinese Academy of Sciences, China

Synthesis

Program Synthesis Using Natural Language
Aditya Desai, Sumit Gulwani, Vineet Hingorani, Nidhi Jain, Amey Karkare, Mark Marron,
Sailesh R, and Subhajit Roy
— IIT Kanpur, India; MSR Redmond, USA

SWIM: Synthesizing What I Mean - Code Search and Idiomatic Snippet Synthesis
Mukund Raghothaman, Yi Wei, and Youssef Hamadi
— University of Pennsylvania, USA; Microsoft Research, United Kingdom;
École Polytechnique, Palaiseau, France

Cross-Supervised Synthesis of Web-Crawlers
Adi Omari, Sharon Shoham, and Eran Yahav
— Technion - Israel Institute of Technology, Israel; Academic College of Tel Aviv Yaffo, Israel

Automatic Model Generation from Documentation for Java API Functions
Juan Zhai, Jianjun Huang, Shiqing Ma, Xiangyu Zhang, Lin Tan, Jianhua Zhao,
and Feng Qin
— Nanjing University, China; Ohio State University, USA

API

Augmenting API Documentation with Insights from Stack Overflow
Christoph Treude and Martin P. Robillard
— University of Adelaide, Australia; McGill University, Canada
From Word Embeddings to Document Similarities for Improved Information Retrieval in Software Engineering ................................................................. 404
Xin Ye, Hui Shen, Xiao Ma, Razvan Bunescu, and Chang Liu
— Ohio University, USA

Learning API Usages from Bytecode: A Statistical Approach .......................................................... 416
Tam The Nguyen, Hung Viet Pham, Phong Minh Vu, and Tung Thanh Nguyen
— Utah State University, USA

Code Smells
On the "Naturalness" of Buggy Code........................................................................................................ 428
Baishakhi Ray, Vincent Hellendoorn, Saheel Godhane, Zhaopeng Tu, Alberto Bacchelli,
and Premkumar Devanbu
— University of Virginia, USA; University of California, Davis, USA;
Huawei Technologies Co. Ltd., China; Delft University of Technology, The Netherlands

Code Anomalies Flock Together: Exploring Code Anomaly Agglomerations
for Locating Design Problems ............................................................................................................. 440
William Oizumi, Alessandro Garcia, Leonardo da Silva Sousa, Bruno Cafeo,
and Yixue Zhao
— Pontifical Catholic University of Rio de Janeiro, Brazil; University of Southern California, USA

Using (Bio)Metrics to Predict Code Quality Online ........................................................................... 452
Sebastian C. Müller and Thomas Fritz
— University of Zurich, Switzerland

CUSTODES: Automatic Spreadsheet Cell Clustering and Smell Detection Using Strong
and Weak Features ................................................................................................................................. 464
Shing-Chi Cheung, Wanjun Chen, Yepang Liu, and Chang Xu
— The Hong Kong University of Science and Technology, China; Nanjing University, China

Architecture
Disseminating Architectural Knowledge on Open-Source Projects: A Case Study
of the Book "Architecture of Open-Source Applications" ..................................................................... 476
Martin P. Robillard and Nenad Medvidovic
— McGill University, Canada; University of Southern California, USA

Identifying and Quantifying Architectural Debt ................................................................................... 488
Lu Xiao, Yuanfang Cai, Rick Kazman, Ran Mo, and Qiong Feng
— Drexel University, USA; University of Hawaii & SEI/CMU, USA

Decoupling Level: A New Metric for Architectural Maintenance Complexity .................................... 499
Ran Mo, Yuanfang Cai, Rick Kazman, Lu Xiao, and Qiong Feng
— Drexel University, USA; University of Hawaii & SEI/CMU, USA
Testing 1

On The Limits of Mutation Reduction Strategies ................................................................. 511
  Rahul Gopinath, Mohammad Amin Alipour, Iftekhar Ahmed, Carlos Jensen, 
  and Alex Groce
  — Oregon State University, USA

Comparing White-Box and Black-Box Test Prioritization ......................................................... 523
  Christopher Henard, Mike Papadakis, Mark Harman, Yue Jia, and Yves Le Traon
  — University of Luxembourg, Luxembourg; University College London, United Kingdom

How Does Regression Test Prioritization Perform in Real-World Software Evolution? ............... 535
  Yafeng Lu, Yiling Lou, Shiyang Cheng, Lingming Zhang, Dan Hao, Yangfan Zhou, 
  and Lu Zhang
  — University of Texas at Dallas, USA; Peking University, China

The Impact of Test Case Summaries on Bug Fixing Performance: An Empirical Investigation .......... 547
  Sebastiano Panichella, Annibale Panichella, Moritz Beller, Andy Zaidman, 
  and Harald C. Gall
  — University of Zurich, Switzerland; Delft University of Technology, The Netherlands

Testing 2

Reducing Combinatorics in GUI Testing of Android Applications ............................................. 559
  Nariman Mirzaei, Joshua Garcia, Hamid Bagheri, Alireza Sadeghi, and Sam Malek
  — George Mason University, USA; University of California, Irvine, USA

MobiPlay: A Remote Execution Based Record-and-Replay Tool for Mobile Applications ............. 571
  Zhengrui Qin, Yutao Tang, Ed Novak, and Qun Li
  — The College of William and Mary, USA

VDTest: An Automated Framework to Support Testing for Virtual Devices ................................. 583
  Tingting Yu, Xiao Qu, and Myra B. Cohen
  — University of Kentucky, USA; ABB Corporate Research, USA;
  University of Nebraska - Lincoln, USA

Automated Test Suite Generation for Time-Continuous Simulink Models ................................. 595
  Reza Matinnejad, Shiva Nejati, Lionel C. Briand, and Thomas Bruckmann
  — University of Luxembourg, Luxembourg; Delphi Automotive Systems, Luxembourg

Effort Estimation and Search

Missing Data Imputation Based on Low-Rank Recovery and Semi-Supervised Regression
for Software Effort Estimation ..................................................................................................... 607
  Xiao-Yuan Jing, Fumin Qi, Fei Wu, and Baowen Xu
  — Wuhan University, China; Nanjing University of Posts and Telecommunications, China;
  Nanjing University, China

Multi-objective Software Effort Estimation .................................................................................. 619
  Federica Sarro, Alessio Petrozziello, and Mark Harman
  — University College London, United Kingdom; University of Portsmouth, United Kingdom
A Practical Guide to Select Quality Indicators for Assessing Pareto-Based Search Algorithms in Search-Based Software Engineering ................................................................. 631
  Shuai Wang, Shaukat Ali, Tao Yue, Yan Li, and Marius Liaaen
  — Simula Research Laboratory, Norway; University of Oslo, Norway;
  Beihang University, China; Cisco Systems, Norway

Product Lines

A Comparison of 10 Sampling Algorithms for Configurable Systems ....................................................... 643
  Flávio Medeiros, Christian Kästner, Márcio Ribeiro, Rohit Gheyi, and Sven Apel
  — Federal University of Campina Grande, Brazil; Carnegie Mellon University, USA;
  Federal University of Alagoas, Brazil; Universität Passau, Germany

Featured Model-Based Mutation Analysis ................................................................................................ 655
  Xavier Devroey, Gilles Perrouin, Mike Papadakis, Axel Legay, Pierre-Yves Schobbens,
  and Patrick Heymans
  — University of Namur, Belgium; University of Luxembourg, Luxembourg; INRIA Rennes, France

Feature-Model Interfaces: The Highway to Compositional Analyses
of Highly-Configurable Systems................................................................................................................ 667
  Reimar Schröter, Sebastian Krieter, Thomas Thüm, Fabian Benduhn,
  and Gunter Saake
  — University of Magdeburg, Germany; TU Braunschweig, Germany

How Does the Degree of Variability Affect Bug Finding? ................................................................. 679
  Jean Melo, Claus Brabrand, and Andrzej Wasowski
  — IT University of Copenhagen, Denmark

Repair and Model Synthesis

Angelix: Scalable Multiline Program Patch Synthesis via Symbolic Analysis ........................................... 691
  Sergey Mechtaev, Jooyong Yi, and Abhik Roychoudhury
  — National University of Singapore, Singapore

An Analysis of the Search Spaces for Generate and Validate Patch Generation Systems .............. 702
  Fan Long and Martin Rinard
  — MIT EECS & CSAIL, USA

PAC Learning-Based Verification and Model Synthesis ........................................................................ 714
  Yu-Fang Chen, Chiao Hsieh, Ondrej Lengál, Tsung-Ju Lii, Ming-Hsien Tsai,
  Bow-Yaw Wang, and Farn Wang
  — Academia Sinica, Taiwan; National Taiwan University, Taiwan; Brno University of Technology,
  Czech Republic

StubDroid: Automatic Inference of Precise Data-Flow Summaries for the Android Framework .......... 725
  Steven Arzt and Eric Bodden
  — Technische Universität Darmstadt, Germany; Paderborn University & Fraunhofer IEM, Germany
Languages

Exploring Language Support for Immutability ......................................................... 736
Michael Coblenz, Joshua Sunshine, Jonathan Aldrich, Brad Myers, Sam Weber,
and Forrest Shull
— Carnegie Mellon University, USA; Software Engineering Institute, USA

Diomidis Spinellis, Panos Louridas, and Maria Kechagia
— Athens University of Economics and Business, Greece

An Empirical Study on the Impact of C++ Lambdas and Programmer Experience ......................... 760
Phillip Merlin Uesbeck, Andreas Stefik, Stefan Hanenberg, Jan Pedersen,
and Patrick Daleiden
— University of Nevada, Las Vegas, USA; University of Duisburg-Essen, Germany

Understanding and Fixing Multiple Language Interoperability Issues: The C/Fortran Case ........... 772
Nawrin Sultana, Justin Middleton, Jeffrey Overbey, and Munawar Hafiz
— Auburn University, USA

Debugging

BigDebug: Debugging Primitives for Interactive Big Data Processing in Spark ......................... 784
Muhammad Ali Gulzar, Matteo Interlandi, Seunghyun Yoo, Sai Deep Tetali, Tyson Condie,
Todd Millstein, and Miryung Kim
— UCLA, USA

Debugging for Reactive Programming ............................................................................. 796
Guido Salvaneschi and Mira Mezini
— Technical University of Darmstadt, Germany

Revisit of Automatic Debugging via Human Focus-Tracking Analysis ......................................... 808
Xiaoyuan Xie, Zicong Liu, Shuo Song, Zhenyu Chen, Jifeng Xuan, and Baowen Xu
— Wuhan University, China; Nanjing University, China

RETracer: Triaging Crashes by Reverse Execution from Partial Memory Dumps ......................... 820
Weidong Cui, Marcus Peinado, Sang Kil Cha, Yanick Fratantonio,
and Vasileios P. Kemerlis
— Microsoft Research, USA; KAIST, South Korea;
University of California, Santa Barbara, USA; Brown University, USA

Requirements

Are "Non-functional" Requirements really Non-functional? An Investigation of Non-functional
Requirements in Practice .............................................................................................. 832
Jonas Eckhardt, Andreas Vogelsang, and Daniel Méndez Fernández
— Technische Universität München, Germany
Probing for Requirements Knowledge to Stimulate Architectural Thinking .............................................. 843
Preethu Rose Anish, Balaji Balasubramaniam, Abhishek Sainani, Jane Cleland-Huang,
Maya Daneva, Roel J. Wieringa, and Smita Ghaisas
— TATA Consultancy Services Ltd., India; DePaul University, USA;
University of Twente, The Netherlands

Risk-Driven Revision of Requirements Models................................................................................................. 855
Dalal Alrajeh, Axel van Lamsweerde, Jeff Kramer, Alessandra Russo,
and Sebastian Uchitel
— Imperial College London, United Kingdom; Université catholique de Louvain, Belgium;
Universidad de Buenos Aires and CONICET, Argentina

Discovering "Unknown Known" Security Requirements ....................................................................................... 866
Awais Rashid, Syed Asad Ali Naqvi, Rajiv Ramdhany, Matthew Edwards,
Ruzanna Chitchyan, and M. Ali Babar
— Lancaster University, United Kingdom; University of Adelaide, Australia

Dynamic Analysis

Behavioral Log Analysis with Statistical Guarantees .............................................................................................. 877
Nimrod Busany and Shahar Maoz
— Tel Aviv University, Israel

Efficient Large-Scale Trace Checking Using MapReduce ...................................................................................... 888
Marcello M. Bersani, Domenico Bianculli, Carlo Ghezzi, Srdan Krstic,
and Pierluigi San Pietro
— Politecnico di Milano, Italy; University of Luxembourg, Luxembourg

Feedback-Directed Instrumentation for Deployed JavaScript Applications ............................................................. 899
Magnus Madsen, Frank Tip, Esben Andreasen, Koushik Sen, and Anders Møller
— University of Waterloo, Canada; Samsung Research America, USA;
Aarhus University, Denmark; University of California, Berkeley, USA

DoubleTake: Fast and Precise Error Detection via Evidence-Based Dynamic Analysis........................................ 911
Tongping Liu, Charlie Curtsinger, and Emery D. Berger
— University of Texas at San Antonio, USA; Grinnell College, USA;
University of Massachusetts, Amherst, USA

Security

Automated Partitioning of Android Applications for Trusted Execution Environments .............................................. 923
Konstantin Rubinov, Lucia Rosculete, Tulika Mitra, and Abhik Roychoudhury
— Politecnico di Milano, Italy; Application Threat Intelligence - Ixia, Romania;
National University of Singapore, Singapore

"Jumping Through Hoops": Why do Java Developers Struggle with Cryptography APIs? ................................. 935
Sarah Nadi, Stefan Krüger, Mira Mezini, and Eric Bodden
— Technische Universität Darmstadt, Germany; Universität Paderborn & Fraunhofer IEM, Germany;
Lancaster University, United Kingdom

Finding Security Bugs in Web Applications Using a Catalog of Access Control Patterns ...................................... 947
Joseph P. Near and Daniel Jackson
— University of California, Berkeley, USA; Massachusetts Institute of Technology, USA
Reference Hijacking: Patching, Protecting and Analyzing on Unmodified and Non-rooted Android Devices ................................................................. 959
Wei You, Bin Liang, Wenchang Shi, Shuyang Zhu, Peng Wang, Sikefu Xie,
and Xiangyu Zhang
— Renmin University of China, China

Collaborative

Building a Theory of Job Rotation in Software Engineering from an Instrumental Case Study ......... 971
Ronnie E. S. Santos, Fabio Q. B. da Silva, Cleyton V. C. de Magalhães,
and Cleviton V. F. Monteiro
— Universidade Federal de Pernambuco, Brazil;
Universidade Federal Rural de Pernambuco, Brazil

The Challenges of Staying Together While Moving Fast: An Exploratory Study............................... 982
Julia Rubin and Martin Rinard
— Massachusetts Institute of Technology, USA

The Sky Is Not the Limit: Multitasking Across GitHub Projects ......................................................... 994
Bogdan Vasilescu, Kelly Blincoe, Qi Xuan, Casey Casalnuovo, Daniela Damian,
Premkumar Devanbu, and Vladimir Filkov
— University of California, Davis, USA; University of Auckland, New Zealand;
Zhejiang University of Technology, China; University of Victoria, Canada

Quantifying and Mitigating Turnover-Induced Knowledge Loss: Case Studies of Chrome
and a Project at Avaya ........................................................................................................................... 1006
Peter C. Rigby, Yue Cai Zhu, Samuel M. Donadelli, and Audris Mockus
— Concordia University, Canada; University of Tennessee, USA

Software Quality

Quality Experience: A Grounded Theory of Successful Agile Projects without Dedicated Testers....... 1017
Lutz Prechelt, Holger Schmeisky, and Franz Zieris
— Freie Universität Berlin, Germany

Code Review Quality: How Developers See It.................................................................................... 1028
Oleksii Kononenko, Olga Baysal, and Michael W. Godfrey
— University of Waterloo, Canada; Carleton University, Canada

Revisiting Code Ownership and Its Relationship with Software Quality in the Scope
of Modern Code Review .................................................................................................................. 1039
Patanamon Thongtanunam, Shane McIntosh, Ahmed E. Hassan, and Hajimu Iida
— Nara Institute of Science and Technology, Japan; McGill University, Canada;
Queen’s University, Canada
Program Analysis

IntEQ: Recognizing Benign Integer Overflows via Equivalence Checking across Multiple Precisions ................................................................. 1051
Hao Sun, Xiangyu Zhang, Yunhui Zheng, and Qingkai Zeng
— Nanjing University, China; University, Purdue University, USA;
IBM T.J. Watson Research Center, USA

Nomen est Omen: Exploring and Exploiting Similarities between Argument and Parameter Names ............................................................................................................................ 1063
Hui Liu, Qiurong Liu, Cristian-Alexandru Staicu, Michael Pradel, and Yue Luo
— Beijing Institute of Technology, China; TU Darmstadt, Germany

Floating-Point Precision Tuning Using Blame Analysis ............................................................................................................................ 1074
Cindy Rubio-González, Cuong Nguyen, Benjamin Mehne, Koushik Sen, James Demmel,
William Kahan, Costin Iancu, Wim Lavrijsen, David H. Bailey, and David Hough
— University of California, Davis, USA; University of California, Berkeley, USA;
Lawrence Berkeley National Laboratory, USA; Oracle Corporation, USA

Crowdsourcing Program Preconditions via a Classification Game ............................................................................................................... 1086
Daniel Fava, Dan Shapiro, Joseph Osborn, Martin Schäef, E. and James Whitehead Jr.
— University of California, Santa Cruz, USA; SRI International, USA

Concurrency

Scalable Thread Sharing Analysis .......................................................................................................... 1097
Jeff Huang
— Texas A&M University, USA

Fixing Deadlocks via Lock Pre-Acquisitions ........................................................................................... 1109
Yan Cai and Lingwei Cao
— Chinese Academy of Sciences, China

Coverage-Driven Test Code Generation for Concurrent Classes ............................................................................................................. 1121
Valerio Terragni and Shing-Chi Cheung
— The Hong Kong University of Science and Technology, China

Locking Discipline Inference and Checking ............................................................................................ 1133
Michael D. Ernst, Alberto Lovato, Damiano Macedonio, Fausto Spoto, and Javier Thaine
— University of Washington, USA; Università di Verona, Italy; Julia Srl, Italy

Maintenance

Improving Refactoring Speed by 10X ..................................................................................................... 1145
Jongwook Kim, Don Batory, Danny Dig, and Maider Azanza
— University of Texas at Austin, USA; Oregon State University, USA;
University of the Basque Country (UPV/EHU), Spain

SourcererCC: Scaling Code Clone Detection to Big-Code ..................................................................... 1157
Hitesh Sajnani, Vaibhav Saini, Jeffrey Svajlenko, Chanchal K. Roy, and Cristina V. Lopes
— University of California, Irvine, USA; University of Saskatchewan, Canada
Understanding Asynchronous Interactions in Full-Stack JavaScript ...................................................... 1169
Saba Alimadadi, Ali Mesbah, and Karthik Pattabiraman
— University of British Columbia, Canada

Shadow of a Doubt: Testing for Divergences between Software Versions .................................................. 1181
Hristina Palikareva, Tomasz Kuchta, Cristian Cadar
— Imperial College London, United Kingdom

Author Index
