2016 IEEE Radiation Effects Data Workshop (REDW 2016)

Portland, Oregon, USA
11-15 July 2016
Table of Contents

Guide to the 2015 IEEE Radiation Effects Data Workshop Record ................................................................. 1
David M. Hiemstra, MDA Corporation, Canada

Collation of the Electronic Components Intended to Spacecraft Equipment Critical to SEE ........................................ 7
Vasily S. Anashin, Aleksandr E. Koziukov, Konstantin Zh. Faradian, Sergey A. Yakovlev, Aleksey V. Perebeynos, Artur V. Vlasov, Branch of Joint - Stock Company “United Rocket and Space Corporation” - “Institute of SpaceDevice Engineering” (Branch of JSC URSC - ISDE), Moscow, Russia; Pavel A. Chubunov, Branch of Joint - Stock Company “United Rocket and Space Corporation” - “Institute of SpaceDevice Engineering” (Branch of JSC URSC - ISDE), Moscow, Russia, National Research Nuclear University MEPhI (NRNU MEPhI), Moscow, Russia; Alexey S. Borisov, and Alexey A. Kryukov, Scientific production Center “ElTest”, S. Petersburg, Russia

Compendium of Total Ionizing Dose and Displacement Damage Results from NASA Goddard Spaceflight Center ........................................................................................................................................ 10

Compendium of Single Event Effect Results from NASA Goddard Space Flight Center .................................................................................................................................................................................. 19

Compendium of Ball Aerospace TID and SEE Test Results .................................................................................. 31
T.R. Oldham and J.H. Lee, Ball Aerospace, USA

Recent Gallium Nitride Power HEMT Single-Event Testing Results ................................................................ 36
Leif Z. Scheick, Jet Propulsion Laboratory, California Institute of Technology, USA

SEE and TID Effects in Transistors and Voltage Reference Devices ..................................................................... 42
J. S. George, J. R. Srour, M. Tockstein, B. Kwan, A. Wright, J. Bonsall, R. Koga, and S. C. Davis, The Aerospace Corporation, USA

Displacement Damage Testing of Intersil Analog and Power Management Parts ............................................. 50
N. W. van Vonno, L. G. Pearce, J. S. Gill, and F. Ballou, Intersil Corporation, Precision Products, USA; K. A. Scott, Boeing Satellite Systems, USA

Measurements of Proton Displacement Damage in Several Commercial Optocouplers .................................. 58
Farokh Irom, Gregory R. Allen, and Bernard G. Rax, Jet Propulsion Laboratory, California Institute of Technology, USA

Heavy Ion Induced Single-EventLatchup Screening of Integrated Circuits Using Commercial Off-the-Shelf Evaluation Boards ...................................................................................................................... 63
Gregory R. Allen, Farokh Irom, Leif Scheick, Sergeh Vartanian, and Michael O’Connor, Jet Propulsion Laboratory, California Institute of Technology, USA
Radiation Evaluation of the TPS7H3301-SP Linear Regulator for Double Data Rate (DDR) Applications
J. Cruz-Colon, Thang Trinh, Texas Instruments, USA; M. Hamlyn, V. Zhu, B. A. Dahl, and R. C. Baumann

Radiation Tolerance of Commercial-Off-The-Shelf Components Deployed in an Underground Nuclear Decommissioning Embedded System
M. Nancekievill, S. Watson, P. R. Green, and B. Lennox, Department of Electrical and Electronic Engineering, UK

Proton and Heavy Ion Sensitivity of Commercial Instrumentation and Precision Operational Amplifiers
S. Davis, R. Koga, and J. George, The Aerospace Corporation, USA

Multifunctional Equipment and Test Results for Total Ionizing Dose Testing of Analog Integrated Circuits
Alexander S. Bakerenkov, Alexander S. Rodin, Vladislav A. Felitsyn, National Research Nuclear University MEPhI (Moscow Engineering Physics Institute), Moscow; Russia; Pavel A. Chubunov, National Research Nuclear University MEPhI (Moscow Engineering Physics Institute), Moscow, Russia, Branch of Joint Stock Company United Rocket and Space Corporation – Institute of Space Device Engineering (Branch of JSC URSC – ISDE), Moscow, Russia; Vasily S. Anashin, Branch of Joint Stock Company United Rocket and Space Corporation – Institute of Space Device Engineering (Branch of JSC URSC – ISDE), Moscow, Russia

ELDRS Characterization to 300 krad of Texas Instruments High Speed Amplifier LMH6702
Kirby Kruckmeyer and Thang Trinh, Texas Instruments, USA

Heavy-Ion Testing Results for Several Commercial and Military Grade Parts
Benjamin Buck, Kyle Bojanowski, and Andrew Cunningham, MIT Lincoln Laboratory, USA

Heavy Ion and Proton Induced Radiation Effects on Commercial Analog Switch Microcircuits
R. Koga, J. George, S. Davis, The Aerospace Corporation, USA; B. Buck, K. Bojanowski, A. Cunningham, MIT Lincoln Laboratory, USA

Michael Campola, NASA GSFC, USA; Carolyn Thayer, MKI, USA; John Doty, Noqsi Aerospace Ltd, USA; Edward Wilcox, AS&D, Inc., NASA GSFC, USA

Single Event Effects Characterization of TI ADS1282-SP High Resolution ADC
Sriram Narayanan, Wade VonBergen, Joel Cruz-Colon, and Veera Narayanan, Texas Instruments, USA

The Use of 14-Mev Monoenergetic Neutrons to Improve the Single Event Latch-Up Response of the Texas Instruments VSP1221
Adalin Benedetto, Colorado State University, USA; James Salzman, Texas Instruments, USA; Michael Tostanoski, Radiation Test Solutions, USA; Joseph Benedetto, Cobham RAD Solutions, USA
Radiation Hardness of the CLARO8 ASIC: A Fast Single-Photon Counting Chip for the LHCb Experiment at CERN

Mirco Andreotti, Wander Baldini, Roberto Calabrese, Angelo Cota Ramusino, Massimiliano Fiorini, Eleonora Luppi, Roberto Malaguti, Luca Minzoni, Luciano Libero Pappalardo, Luca Tomassetti, Universita degli Studi di Ferrara and INFN Sezione di Ferrara, Italy; Mateusz Baszczyk, Piotr Dorosz, Wojciech Kucewicz, AGH University of Science and Technology and INP, Poland; Andrea Candelori, Serena Mattiazzo, Luca Silvestrin, Universita degli Studi di Padova, INFN Sezione di Padova, Italy; Paolo Carniti, Lorenzo Cassina, Andrea Giachero, Claudio Gotti, Matteo Maino, Gianluigi Pessina, Universita degli Studi di Milano Bicocca and INFN Sezione di Milano Bicocca, Italy

Total Ionizing Dose Characterization of an 8-bit 200-MSps Switched-Capacitor Pipeline A-to-D Converter in 32nm SOI CMOS

Alfio Zanchi, Mark Yao, Solid-State Electronics Development, The Boeing Company, USA; Manuel Cabanas-Holmen, Barry Meaker, Anthony Amort, Solid-State Electronics Development, The Boeing Company, USA

Single Event Effects in 14-nm Intel Microprocessors

Adam R. Duncan, Matthew J. Gadlage, Austin H. Roach, Aaron M. Williams, Matthew J. Kay, James D. Ingalls, Casey H. Hedge, Dobrin P. Bossev, NASA/CRANE, USA; Carl M. Szabo, AS&D, Inc., supporting NASA/GSFC, USA; Kenneth A. LaBel, NASA/GSFC, USA

Single Event Effects Testing of the Hardened Texas Instruments MSP430FR5739 Microcontroller on with Embedded Ferroelectric Memory

James Aarestad, David Alexander, COSMIAC R&D Center of the University of New Mexico, USA; Paul Eaton, Will Burke, Microelectronics Research & Development Corp, USA; James Salzman, Texas Instruments, Inc., USA; Keith Avery, Air Force Research Laboratory, USA

Input Size Effects on the Radiation-Sensitivity of Modern Parallel Processors

Daniel Oliveira, Caio Lunardi, Philippe Navaux, Luigi Carro, Paolo Rech, Instituto de Informatica, Federal University of Rio Grande do Sul (UFRGS), Brazil; Laercio Pilla, Departamento de Informatica e Estatistica, Federal University of Santa Catarina (UFSC), Brazil; Israel Koren, Department of Electrical & Computer Engineering, University of Massachusetts, USA; Fernando Fernandes

Single-Event Effects and Total Dose Testing of the Intersil ISL72027SEH CAN Bus Transceiver

N. W. van Vonno, A. G. Robinson, L. G. Pearce, and E. J. Thomson, Intersil Corporation, Precision Products, USA

SEL and TID Test Results on a Radiation Hardened Bus Switch Family

Matt Von Thun, Scott Sapp, Dale Walz, Rex Anderson, and Teresa Farris, Cobham Semiconductor Solutions Colorado Springs, USA

SEL and TID Test Results of a Hardened CAN Transceiver

Matt Von Thun, Derek Bass, Dale Walz, Rex Anderson, and Teresa Farris, Cobham Semiconductor Solutions Colorado Springs, USA

Single Event Upset Characterization of the Kintex UltraScale Field Programmable Gate Array Using Proton Irradiation

David M. Hiemstra, Valeri Kirishchian, and Jakub Breinski, MDA Corporation, Canada
An Analysis of High-Current Events Observed on Xilinx 7-Series and UltraScale Field-Programmable Gate Arrays................................................................................................................................. 175
David S. Lee, Sandia National Laboratories, USA; Gary Swift, Swift Engineering & Radiation Services, LLC, USA; Michael Wirthlin, Center for High Performance Reconfigurable Computing, Brigham Young University, Department of Electrical and Computer Engineering, USA

Design and Test of Xilinx Embedded ECC for MicroBlaze Processors................................................................................................................................. 180
Zachary K. Baker, Los Alamos National Laboratory, CCS-7 Advanced Co-Design Laboratory, USA; Heather M. Quinn, Los Alamos National Laboratory, ISR-3 Space Data Systems, USA

Single Event Effects Testing on the SERDES, Fabric Flip-Flops and PLL in a Radiation-Hardened Flash-Based FPGA—RT4G150 ........................................................................................................................................ 187
Jih-Jong Wang, Nadia Rezzak, Stephen Varela, Microsemi-SoC, USA; Durwyn Dsilva, Microsemi-SoC, Susquehanna International Group, USA; Sean Cui, Microsemi-SoC, University of Toronto, USA, Canada

SEL Site Localization Using Masking and PEM Imaging Techniques: A Case Study on Xilinx 28nm 7-Series FPGAs ........................................................................................................................................ 193
William Rudge, Cody Dinkins, William Boesch, Dave Vail, Josh Bruckmeyer, Space and Intelligence Segment of Harris Corporation, USA; Gary Swift, Swift Radiation and Engineering Services, LLC, USA

Total Ionizing Dose Response of SDRAM, DDR2 and DDR3 Memories ........................................................................................................................................ 199
Mehran Amrbar and Steven M. Guertin, Jet Propulsion Laboratory, California Institute of Technology, USA

Single Event Testing of SDRAM, DDR2 and DDR3 Memories ........................................................................................................................................ 205
Steven M. Guertin and Mehran Amrbar, Jet Propulsion Laboratory, California Institute of Technology, USA

TID/SEE Tests of the Radiation Hardened DDR2 SDRAM Memory Solution ........................................................................................................................................ 212
Pierre-Xiao Wang, Charles Sellier, 3D PLUS SAS, France; Pierre Southiratn, SODETEST, France; Duc Nguyen, ManTech International Corp, USA; Kai Grumann, DSI GmbH, Germany

Radiation Hardness Performance of 2 Gbit LPDDR SDRAM Fabricated on Epitaxial Wafer for Space Applications ........................................................................................................................................ 216
Mi Young Park, Jang–Soo Chae, Chol Lee, Jungsu Lee, Im Hyu Shin, and Sinae Ji, Satellite Technology Research Center, Korea Advanced Institute of Science and Technology, South Korea

SEE Testing of the 4 Gb Samsung and Spansion Flash NAND ........................................................................................................................................ 220
D. L. Hansen, R. Hillman, F. Meraz, J. Montoya, and G. Williamson, Data Device Corporation, USA

Heavy Ion and Proton Test Results for Micron 4 Gb NAND Flash Memory ........................................................................................................................................ 224
James S. Hack, Kodie Alvater, Deas Brown, Paul Dudek, Douglas Jaeger, Ellwood Lane, John Lindley, Brainton Song, and Thomas Tittel, Northrop Grumman Mission Systems, USA

Heavy Ion, Proton and Electron Single-Event Effect Measurements of a Commercial Samsung NAND Flash Memory ........................................................................................................................................ 231
Farokh Irom, Gregory R. Allen, and Douglas J. Sheldon, Jet Propulsion Laboratory, California Institute of Technology, USA

3MeV Proton Irradiation of Commercial State of the Art Photonic Mixer Devices ........................................................................................................................................ 237
Martin Grimm, Burkart Vob, Department of Electrical Engineering, University of Applied Sciences Jena, Germany; Elke Wendler, Institute of Solid State Physics, University of Jena, Germany
Effect of Gamma Exposure on Chalcogenide Glass Films for Microphotonic Devices .................................................241
Spencer Novak, Kathleen Richardson, Department of Materials Science and Engineering, Clemson University, USA, CREOL, College of Optics and Photonics, USA; Vivek Singh, Corentin Monmeyran, Zhaohong Han, Hongtuo Lin, Neil Patel, Qingyang Du, Juejun Hu, Department of Materials Science and Engineering, Massachusetts Institute of Technology, USA; Adam Ingram, Institute of Mathematics and Physics, Opole University of Technology, Poland; Nikolay Borodinov, Igor Luzinov, Department of Materials Science and Engineering, Clemson University, USA; Roman Golovchak, Department of Physics and Astronomy, Austin Peay State University, USA; Anuradha Agarwal, Department of Materials Science and Engineering and Material Processing Center, Massachusetts Institute of Technology, USA

On-Orbit measurements of TID and Dose Rate from Two RADFETs on Board NANOSAT-1B Satellite ...........................................................................................................................................245
Maite Alvarez, P. Manzano, D. Escribano, C. Hernando, J.J. Jimenez, S. Sampedro, and I. Arruego, National Institute for Aerospace Technology (INTA), Spain

Laser Single Event Effects Response of Optek and Infineon Hall Effect Sensors ..........................................................................................................................249
Michael Newton, Haibin Wang, Li Chen, Department of Electrical and Computer Engineering, University of Saskatchewan, Canada; David M. Hiemstra, Valeri Kirischian, MDA Corporation, Canada

Two Photon Absorption Laser Facility for Single Event Effect Testing ...............................................................................................................................254
Michael Newton, Haibin Wang, Li Chen, Department of Electrical and Computer Engineering, University of Saskatchewan, Canada; Brook Danger, Structural Sciences Centre, University of Saskatchewan, Canada; David M. Hiemstra, Valeri Kirischian, MDA Corporation, Canada

TID Irradiation Facility Utilizing Novel Alanine Dosimetry .................................................................................................259
Ardio M. Sanchez, Victor Brisan and Anthony Difonzo, VPT Rad, Inc, USA

IC SEE Comparative Studies at UCL and JINR Heavy Ion Accelerators ..................................................................................264
Alexey O. Akhmetov, Dmitry V. Bobrovsky, Alexander S. Tararaksin, Andrey G. Petrov, Leonid N. Kessarinskiy, Dmitry V. Boychenko, Alexander I. Chumakov, National Research Nuclear University (NRNU MEPhI), Russia; Alexandre Rousset, Christian Chatry, TRAD Test & Radiation Company, France

COTS Components Radiation Test Activity and Results at MSSL ...............................................................................................268
Daohua Hu, Mullard Space Science Laboratory, University College London, UK

Single-event Upsets Characterization & Evaluation of Xilinx UltraScale™ Soft Error Mitigation (SEM IP) Tool ........................................................................275
Pierre Maillard, Michael Hart, Jeff Barton, Paula Chang, Michael Welter, Robert Le, Restu Ismail, and Eric Crabill

Design Baseline Considerations for a High Dose Rate Irradiator for Total Dose Effects Testing ........................................................................................................279
Michael Shannon, Hopewell Designs Inc., USA, Georgia Tech Research Institute, USA; Spencer Mickum, Hopewell Designs Inc., USA; Zachary Hope, Hopewell Designs Inc, USA

Cumulative Index .......................................................................................................................................................................285

Author Index ..................................................................................................................................................................................315
