## Keynote

**UNVEIL: A Large-Scale, Automated Approach to Detecting Ransomware (Keynote)**  
Engin Kirda — *Northeastern University, USA*  

**Main Research**

## MSR and Open Source

**An Empirical Comparison of Dependency Issues in OSS Packaging Ecosystems**  
Alexandre Decan, Tom Mens, and Maëlick Claes — *University of Mons, Belgium*  

**Detecting Similar Repositories on GitHub**  
Yun Zhang, David Lo, Pavneet Singh Kochhar, Xin Xia, Quanlai Li, and Jianling Sun — *Zhejiang University, China; Singapore Management University, Singapore; University of California at Berkeley, USA*  

**Code of Conduct in Open Source Projects**  
Parastou Tourani, Bram Adams, and Alexander Serebrenik — *Polytechnique Montréal, Canada; Eindhoven University of Technology, Netherlands*  

**Socio-Technical Evolution of the Ruby Ecosystem in GitHub**  
Eleni Constantinou and Tom Mens — *University of Mons, Belgium*  

## Features and Knowledge

**StiCProb: A Novel Feature Mining Approach using Conditional Probability**  
Yutian Tang and Hareton Leung — *Hong Kong Polytechnic University, China*  

**HDSKG: Harvesting Domain Specific Knowledge Graph from Content of Webpages**  
Xuejiao Zhao, Zhenchang Xing, Muhammad Ashad Kabir, Naoya Sawada, Jing Li, and Shang-Wei Lin — *Nanyang Technological University, Singapore; Australian National University, Australia; Charles Sturt University, Australia; NTT, Japan*  

**Analyzing Closeness of Code Dependencies for Improving IR-Based Traceability Recovery**  
Hongyu Kuang, Jia Nie, Hao Hu, Patrick Rempel, Jian Lü, Alexander Egyed, and Patrick Mäder — *Nanjing University, China; JKU Linz, Austria; TU Ilmenau, Germany*  

**STRICT: Information Retrieval Based Search Term Identification for Concept Location**  
Mohammad Masudur Rahman and Chanchal K. Roy — *University of Saskatchewan, Canada*  

## Apps and Energy

**Analyzing Reviews and Code of Mobile Apps for Better Release Planning**  
Adelina Ciurumelea, Andreas Schaufelbühl, Sebastiano Panichella, and Harald C. Gall — *University of Zurich, Switzerland*  

**Software-Based Energy Profiling of Android Apps: Simple, Efficient and Reliable?**  
Dario Di Nucci, Fabio Palomba, Antonio Prota, Annibale Panichella, Andy Zaidman, and Andrea De Lucia — *University of Salerno, Italy; Delft University of Technology, Italy; University of Luxembourg, Luxembourg; Delft University of Technology, Netherlands*
Investigating the Energy Impact of Android Smells
Antonin Carette, Mehdi Adel Ait Younes, Geoffrey Hecht, Naouel Moha, and Romain Rouvoy — Université du Québec à Montréal, Canada; Inria, Canada; University of Lille, France ........................................ 115

Software and Model Analysis
Automated Generation of Consistency-Achieving Model Editors
Patrick Neubauer, Robert Bill, Tanja Mayerhofer, and Manuel Wimmer — Vienna University of Technology, Austria . 127
Historical and Impact Analysis of API Breaking Changes: A Large-Scale Study
Laerte Xavier, Aline Brito, Andre Hora, and Marco Tulio Valente — Federal University of Minas Gerais, Brazil . . 138
Reducing Redundancies in Multi-revision Code Analysis
Carol V. Alexandru, Sebastiano Panichella, and Harald C. Gall — University of Zurich, Switzerland ............. 148

Code and Data Transformations
Recommending Source Code Locations for System Specific Transformations
Gustavo Santos, Klérisson V. R. Paixão, Nicolas Anquetil, Anne Etien, Marcelo de Almeida Maia, and Stéphane Ducasse — University of Lille, France; Federal University of Uberlândia, Brazil ........... 160
Extracting Executable Transformations from Distilled Code Changes
Reinout Stevens and Coen De Roover — Vrije Universiteit Brussel, Belgium . .............................................. 171
Automatic Generation of Opaque Constants Based on the K-Clique Problem for Resilient Data Obfuscation
Roberto Tiella and Mariano Ceccato — Fondazione Bruno Kessler, Italy ......................................................... 182
The Dark Side of Event Sourcing: Managing Data Conversion
Michiel Overeem, Marten Spoor, and Slinger Jansen — AFAS Software, Netherlands; Utrecht University, Netherlands 193

Program Comprehension
Automatically Generating Natural Language Descriptions for Object-Related Statement Sequences
Xiaoran Wang, Lori Pollock, and K. Vijay-Shanker — University of Delaware, USA .............................................. 205
Shorter Identifier Names Take Longer to Comprehend
Johannes Hofmeister, Janet Siegmund, and Daniel V. Holt — University of Passau, Germany; University of Heidelberg, Germany ................................................................. 217
Lexical Categories for Source Code Identifiers
Christian D. Newman, Reem S. AlSuhaibani, Michael L. Collard, and Jonathan I. Maletic — Kent State University, USA; University of Akron, USA .............................................................. 228
Computing Counter-Examples for Privilege Protection Losses using Security Models
Marc-André Laverdière and Ettore Merlo — Tata Consultancy Services, Canada; Polytechnique Montréal, Canada . 240

Software Development Support
Enriching In-IDE Process Information with Fine-Grained Source Code History
Sebastian Proksch, Sarah Nadi, Sven Amann, and Mira Mezini — TU Darmstadt, Germany; University of Alberta, Canada .............................................................................................................. 250
How to Gamify Software Engineering
Tommaso Dal Sasso, Andrea Mocci, Michele Lanza, and Ebrisa Mastrodicasa — University of Lugano, Switzerland . 261
Scalable Tag Recommendation for Software Information Sites
Pingyi Zhou, Jin Liu, Zijiang Yang, and Guangyou Zhou — Wuhan University, China; Western Michigan University, USA; Central China Normal University, China ............................................................................................. 272
Stack Overflow: A Code Laundering Platform?
Le An, Ons Mlouki, Foutse Khomh, and Giuliano Antoniol — Polytechnique Montréal, Canada ..................... 283

Code Smells and Refactoring
An Empirical Study of Code Smells in JavaScript Projects
Amir Saboury, Pooya Musavi, Foutse Khomh, and Giuliano Antoniol — Polytechnique Montréal, Canada .......... 294
Antipatterns Causing Memory Bloat: A Case Study
Kamil Jezek and Richard Lipka — University of West Bohemia, Czech Republic

Variant-Preserving Refactorings for Migrating Cloned Products to a Product Line
Wolfram Fenske, Jens Meinicke, Sandro Schulze, Steffen Schulze, and Gunter Saake — University of Magdeburg, Germany; University of Magdeburg, USA

Efficient Method Extraction for Automatic Elimination of Type-3 Clones
Ran Ettinger, Shmuel Tyszberowicz, and Shay Menaia — Ben-Gurion University of the Negev, Israel; Academic College of Tel Aviv-Yaffo, Israel

Testing and Fault Localization

Spreadsheet Testing in Practice
Sohon Roy, Feliene Hermans, and Arie van Deursen — Delft University of Technology, Netherlands

Dynamic Patch Generation for Null Pointer Exceptions using Metaprogramming
Thomas Durieux, Benoit Cornu, Lionel Seinturier, and Martin Monperrus — University of Lille, France

Improving Fault Localization for Simulink Models using Search-Based Testing and Prediction Models
Bing Liu, Lucia, Shiva Nejati, and Lionel C. Briand — University of Luxembourg, Luxembourg

An Empirical Investigation into the Cost-Effectiveness of Test Effort Allocation Strategies for Finding Faults
Yiyang Feng, Wanwangying Ma, Yibiao Yang, Hongmin Lu, Yuming Zhou, and Baowen Xu — Nanjing University, China

Early Research Achievements

Learning from and Providing Help to Developers

What Information about Code Snippets Is Available in Different Software-Related Documents? An Exploratory Study
Preetha Chatterjee, Manziba Akanda Nishi, Kostadin Damevski, Vinay Augustine, Lori Pollock, and Nicholas A. Kraft — University of Delaware, USA; Virginia Commonwealth University, USA; ABB Corporate Research, USA

Harnessing Twitter to Support Serendipitous Learning of Developers
Abhishek Sharma, Yuan Tian, Agus Sulisty, David Lo, and Aiko Fallas Yamashita — Singapore Management University, Singapore; Oslo and Akershus University College of Applied Sciences, Norway

Why Do We Break APIs? First Answers from Developers
Laerte Xavier, Andre Hora, and Marco Tulio Valente — Federal University of Minas Gerais, Brazil

An Arc-Based Approach for Visualization of Code Smells
Marcel Steinbeck — University of Bremen, Germany

Towards Continuous Software Release Planning
David Ameller, Carles Farré, Xavier Franch, Danilo Valerio, and Antonino Cassarino — Universitat Politècnica de Catalunya, Spain; Siemens, Austria

Evolution of Open Source Systems

An Exploratory Study on Library Aging by Monitoring Client Usage in a Software Ecosystem
Raula Gaikovina Kula, Daniel M. German, Takashi Ishio, Ali Ouni, and Katsuro Inoue — Osaka University, Japan; University of Victoria, Canada; Osaka University, United Arab Emirates

Trends on Empty Exception Handlers for Java Open Source Libraries
Ana Filipa Nogueira, José C. B. Ribeiro, and Mário A. Zenha-Rela — University of Coimbra, Portugal; Polytechnic Institute of Leiria, Portugal

Analyzing the Evolution of Testing Library Usage in Open Source Java Projects
Ahmed Zerouali and Tom Mens — University of Mons, Belgium

On the Evolution of Exception Usage in Java Projects
Haidar Osman, Andrei Chiş, Jakob Schaefer, Mohammad Ghafari, and Oscar Nierstrasz — University of Bern, Switzerland; Feenk, Switzerland
Statically Identifying Class Dependencies in Legacy JavaScript Systems: First Results
Leonardo Humberto Silva, Marco Tulio Valente, and Alexandre Bergel — Federal Institute of Northern Minas Gerais, Brazil; Federal University of Minas Gerais, Brazil; University of Chile, Chile ............................ 427

CodeCritics Applied to Database Schema: Challenges and First Results
Julien Delplanque, Anne Etien, Olivier Auverlot, Tom Mens, Nicolas Anquetil, and Stéphane Ducasse — University of Mons, France; University of Lille, France; University of Mons, Belgium .......................................................... 432

Patterns and Optimization

Cloud-Based Parallel Concolic Execution
Ting Chen, Youzheng Feng, Xiaopu Luo, Xiaodong Lin, and Xiaosong Zhang — University of Electronic Science and Technology of China, China; Hong Kong Polytechnic University, China; University of Ontario Institute of Technology, Canada .................................................. 437

Under-Optimized Smart Contracts Devour Your Money
Ting Chen, Xioaoqi Li, Xiapu Luo, and Xiaosong Zhang — University of Electronic Science and Technology of China, China; Hong Kong Polytechnic University, China .......................... 442

Pluggable Controllers and Nano-Patterns
Yossi Gil, Ori Marcovitch, and Matteo Orrù — Technion, Israel .................................................. 447

Query Construction Patterns in PHP
David Anderson and Mark Hills — East Carolina University, USA ............................................. 452

Supporting Schema Evolution in Schema-Less NoSQL Data Stores
Loup Meurice and Anthony Cleve — University of Namur, Belgium ........................................ 457

Tool Demonstrations

Static Analysis and Refactoring

XCore: Support for Developing Program Analysis Tools
Alexandru Ştefănică and Petru Florin Mihancea — Politehnica University of Timisoara, Romania .................................................. 462

srcQL: A Syntax-Aware Query Language for Source Code
Brian Bartman, Christian D. Newman, Michael L. Collard, and Jonathan I. Maletic — Kent State University, USA; University of Akron, USA .................................................. 467

UAV: Warnings from Multiple Automated Static Analysis Tools at a Glance
Tim Buckers, Clinton Cao, Michiel Doesburg, Boning Gong, Sunwei Wang, Moritz Beller, and Andy Zaidman — Delft University of Technology, Netherlands .................................................. 472

The Spartanizer: Massive Automatic Refactoring
Yossi Gil and Matteo Orrù — Technion, Israel .................................................. 477

c-JRefRec: Change-Based Identification of Move Method Refactoring Opportunities
Naoya Ujihara, Ali Ouni, Takashi Ishio, and Katsuro Inoue — Osaka University, Japan; United Arab Emirates University, United Arab Emirates .................................................. 482

Lightweight Detection of Android-Specific Code Smells: The aDoctor Project
Fabio Palomba, Dario Di Nucci, Annibale Panichella, Andy Zaidman, and Andrea De Lucia — Delft University of Technology, Italy; University of Salerno, Italy; University of Luxembourg, Luxembourg; Delft University of Technology, Netherlands .................................................. 487

Binaries and Evolution

scat: Learning from a Single Execution of a Binary
Franck de Goër, Christopher Ferreira, and Laurent Mounier — LIG, France; VERIMAG, France .................................................. 492
dynStruct: An Automatic Reverse Engineering Tool for Structure Recovery and Memory Use Analysis
Daniel Mercier, Aziem Chawdhary, and Richard Jones — University of Kent, UK .................................................. 497

InsDal: A Safe and Extensible Instrumentation Tool on Dalvik Byte-Code for Android Applications
Jierui Liu, Tianyong Wu, Xi Deng, Jun Yan, and Jian Zhang — Institute of Software at Chinese Academy of Sciences, China .................................................. 502
Columbo: High Performance Unpacking
Jason Raber — MalwareBytes, USA ................................................................. 507

Hindsight: Revealing the Evolution of Dependencies to Developers
George Ganea — Politehnica University of Timisoara, Romania ...................... 511

Replan: A Release Planning Tool
David Ameller, Carles Farré, Xavier Franch, Antonino Cassarino, Danilo Valerio, and Valentin Elvassore — Universitat Politècnica de Catalunya, Spain; Siemens, Austria ......................................................... 516

Industrial Research

Bringing Back-in-Time Debugging Down to the Database
Arian Treffer, Michael Perscheid, and Matthias Uflacker — HPI, Germany; SAP, Germany ................................. 521

Performance Tuning for Automotive Software Fault Prediction
Harald Altinger, Steffen Herbold, Friederike Schneemann, Jens Grabowski, and Franz Wotawa — Audi Electronics Venture, Germany; University of Göttingen, Germany; Graz University of Technology, Austria .................. 526

Business Process Recovery Based on System Log and Information of Organizational Structure
Ryota Mibe, Tadashi Tanaka, Takashi Kobayashi, and Shingo Kobayashi — Hitachi, Japan; Tokyo Institute of Technology, Japan; Japan Expert Clone, Japan ............................................................. 531

Multi-language Re-documentation to Support a COBOL to Java Migration Project
Bernhard Dorninger, Michael Moser, and Josef Pichler — Software Competence Center Hagenberg, Austria ........... 536

Proactive Reviews of Textual Requirements
Vard Antinyan and Miroslaw Staron — University of Gothenburg, Sweden ............ 541

Data Access Visualization for Legacy Application Maintenance
Keisuke Yano and Akihiko Matsuo — Fujitsu Labs, Japan ............................... 546

Posters

An Empirical Study of Clone Density Evolution and Developer Cloning Tendency
Brent van Bladel, Alessandro Murgia, and Serge Demeyer — University of Antwerp, Belgium ......................... 551

Towards Reverse Engineering of Intermediate Code for Documentation Generators
Michael Moser, Michael Pfeiffer, and Josef Pichler — Software Competence Center Hagenberg, Austria .............. 553

A Framework for Classifying and Comparing Source Code Recommendation Systems
Mohammad Ghafari and Hamidreza Moradi — University of Bern, Switzerland; University of Texas at San Antonio, USA 555

Self-Adaptive Systems Framework Based on Agent and Search-Based Optimization
Liu He, Qingshan Li, Lu Wang, and Jiewen Wan — Xidian University, China ......................... 557

The Importance of Program Design Patterns Training
Viggo Holmstedt and Shegaw A. Mengiste — University College of South-East Norway, Norway ............... 559

Conventionality Analysis of Array Objects in JavaScript
Astrid Younang and Lunjin Lu — Oakland University, USA ........................................ 561

Two Improvements to Detect Duplicates in Stack Overflow
Yuji Mizobuchi and Kuniharu Takayama — Fujitsu Labs, Japan ......................... 563

Modernizing Domain-Specific Languages with XMLText and IntellEdit
Patrick Neubauer, Robert Bill, and Manuel Wimmer — Vienna University of Technology, Austria ..................... 565

Lost Comments Support Program Comprehension
Takayuki Omori — Ritsumeikan University, Japan ............................................. 567

Does the Release Cycle of a Library Project Influence When It Is Adopted by a Client Project?
Daiki Fujibayashi, Akinori Ihara, Hirohiko Suwa, Raula Gaikovina Kula, and Kenichi Matsumoto — NAIST, Japan; Osaka University, Japan .................................................. 569

Which Review Feedback Did Long-Term Contributors Get on OSS Projects?
Takuto Norikane, Akinori Ihara, and Kenichi Matsumoto — NAIST, Japan ................... 571
Frame-Based Behavior Preservation in Refactoring
Katsuhisa Maruyama, Shinpei Hayashi, Norihiro Yoshida, and Eunjong Choi — Ritsumeikan University, Japan; Tokyo Institute of Technology, Japan; Nagoya University, Japan; NAIST, Japan

Log Generation for Coding Behavior Analysis: For Focusing on How Kids Are Coding Not What They Are Coding
Ra-Jeong Moon, Kyu-Min Shim, Hae-Young Lee, and Hyung-Jong Kim — Seoul Women’s University, Korea; Entry Labs, Korea

Towards Understanding an Open-Source Bounty: Analysis of Bountysource
Tetsuya Kanda, Mingyu Guo, Hideaki Hata, and Kenichi Matsumoto — NAIST, Japan; University of Adelaide, Australia
