Geotechnical Frontiers 2017

Walls and Slopes

Selected Papers from Sessions of Geotechnical Frontiers 2017

Geotechnical Special Publication Number 278

Orlando, Florida, USA
12 – 15 March 2017

Editors:

Thomas L. Brandon
Richard J. Valentine

ISBN: 978-1-5108-3949-6
Contents

MSE Retaining Walls

V-Shaped Failure Surfaces in Bearing Capacity Type Limit Equilibrium Analyses ................................................................. 1
Daniel R. VandenBerge

A Case Study on Evaluating the Performance of a Geosynthetic Reinforced Soil Integrated Bridge System (GRS-IBS) ................................................... 12
Murad Abu-Farsakh, Milad Saghebfar, Allam Ardah, and Qiming Chen

Passive Force-Deflection Behavior of Geosynthetic-Reinforced Soil Backfill Based on Large-Scale Tests ................................................................. 23
Amy Fredrickson, Kyle M. Rollins, and Jennifer Nicks

Yewei Zheng, Patrick J. Fox, and John S. McCartney

3D Deformation Behavior of Geosynthetic-Reinforced Soil Bridge Abutments ................................................................................... 44
Wenyong Rong, Yewei Zheng, John S. McCartney, and Patrick J. Fox

Experimental Design for a Half-Scale Shaking Table Test of a Geosynthetic-Reinforced Soil Bridge Abutment ........................................... 54
Yewei Zheng, Andrew C. Sander, Wenyong Rong, John S. McCartney, Patrick J. Fox, and P. Benson Shing

Time-Dependent Load Redistribution in Geosynthetic-Reinforced Soil Walls Considering the Strain Softening of Backfill Soils ........................................ 64
Huabei Liu

Column-Supported Embankments and MSE Walls in Grapevine, Texas ........ 74
Hosam Salman, John Jenkins, and Ravi Vedantham

Thermal Interaction of a Geosynthetic Reinforced Soil Integrated Bridge System in St. Lawrence County, NY .................................................. 84
Jennifer E. Nicks, Michael T. Adams, Thomas Stabile, and Andrew E. Willard

Development of a Risk Assessment for MSE Wall Projects .......................... 94
Michael T. Adams and Jennifer E. Nicks

© ASCE
16-Year Performance Update: Geosynthetic Reinforced Soil Walls as Integral Bridge Abutment Walls ................................................................. 102
Michael R. Simac and David J. Elton

Effect of Reinforcement Spacing on the Behavior of Geosynthetic-Reinforced Soil ................................................................. 112
Amr M. Morsy, Dov Leshchinsky, and Jorge G. Zornberg

Rigid Walls and Nongravity Walls

Use of Lightweight Fill for Landslide Repair: Media via Stabilization Project, the Cuenca-Molleturo Roadway, Ecuador .... 126
Carlos M. Sevilla and Jaime Idrovo

A Case Study: Observed Deformation Characteristics and Internal Force of Pile-Anchor Retaining Excavation ........................................ 136
Jicheng Shu and Dingwen Zhang

Robust Geotechnical Design of a Retaining Wall Subjected to Earthquake Loads ............................................................................................ 149
Parishad Rahbari, Nadarajah Ravichandran, and C. Hsein Juang

Investigation of Active Soil Pressures on Retaining Walls Using Finite Element Analyses .................................................................................. 159
Imad Elchiti, George Saad, Shadi Najjar, and Nader Nasreddine

Sheet Pile Interlocks and Ring Beam Installation Effects on the Performance of Urban Cofferdams ......................................................... 170
A. Felipe Uribe-Henao and Luis G. Arboleda-Monsalve

Practical Robust Geotechnical Design of Supported Excavations—A Case History of Excavation in Taiwan ...................................................... 181
Sara Khoshnevisan, Lei Wang, and C. Hsein Juang

Slope Stability and Stabilization

Effect of Infiltration from Retrofit Rain Gardens on Slope Stability ........... 194
Zachary Zukowski and Andrea L. Welker

Cleveland Harbor, Ohio, Interim Dredge Disposal Plan: Geotextile Reinforcement of Raised Dredged Disposal Containment Dikes ........... 203
Eugene N. Lenhardt

Stability Analysis and Support Assessment in a Rockfall Zone .............. 214
A. Usmani, C. Kumar, A. Nanda, and A. Mandal
Resilience of a Transportation Network from a Geotechnical Perspective
Mina Lee and Dipanjan Basu

Geological, Topographical, and Seismological Control on the Co-Seismic Landslides Triggered by the 2015 Gorkha Earthquake
Binod Tiwari, Beena Ajmera, and Smriti Dhital

Dam Failures from a 1000-Year Rainfall Event in South Carolina
Inthuorn Sasanakul, Sarah L. Gassman, Charles E. Pierce, William Ovalle, Ryan Starcher, Emad Gheibi, and Mostaqur Rahman

Ultimate Bearing Capacity near Slopes: Transition from a Bearing Capacity Problem to a Slope Stability Problem
Yonggui Xie and Ben Leshchinsky

Mining in a Landslide—Is It Possible? Geotechnical Investigation and Analysis
Steiaakakis Chrysanthos, Agioutantis Zacharias, Apostolou Evangelia, and Papavgeri Georgia

A Note on Deep Seated Failures in Supported Vertical Cuts in Sands below the Groundwater Table by a Coupled Numerical-Analytical Method
Mehdi Veiskarami and Sina Fadaie

Importance of Side Resistance in a 3D Stability Analysis
Kamran Akhtar and Timothy D. Stark

Effect of Soil Relative Density and the Inclination Angle on the Impact Force from a Granular Sliding Mass on a Rigid Obstruction
Amir Ahmadipur and Tong Qiu

Consequences of Seismic Excitation on Slopes in Soils with a Tensile Strength Cutoff
Dowon Park, Zhijie Wang, and Radoslaw L. Michalowski

Slope Liquefaction Failure of a Rip-Rap Slope during Springtime in a Northern Climate
Amaneh E. Kenarsari and Stanley J. Vitton

Emergency Stabilization of the White Point Landslide
R. Travis Deane, Daniel Pradel, and Jason M. Buenker

Ground Deformation at Lokanthali, Kathmandu, Due to the Mw 7.8 2015 Gorkha Earthquake
Binod Tiwari and Daniel Pradel
Effects of Deflector Orientation on Dry Granular Overflow .........................343
George R. Goodwin, Clarence E. Choi, Charles W. W. Ng, and W. W. Cheung

Fragility Curves of Earthen Levees under Extreme Precipitation ..................353
Firas H. Jasim and Farshid Vahedifard

Probabilistic Slope Stability Analyses: Effects of the Coefficient of Variation and the Cross-Correlation of Shear Strength Parameters .........................363
Emir Ahmet Oguz, Yagizer Yalcin, and Nejan Huvaj

An Explanation for the Delayed Failures of Natural Slopes and Earth Dams .................................................................372
Luis E. Vallejo and Mahiru Shettima

Feasibility Analyses of Using Renewable Wind Energy for Landslide Mitigation ..................................................................................................................382
Jiale Li and Xiong (Bill) Yu

Performance-Based Slope Stability Analysis and the Pseudo-Static Factor of Safety ...........................................................................................................390
Bogart Mendez, Erdem O. Tastan, and Juan Gutierrez

Numerical Modeling of a Blast-Induced Landslide ........................................400
Gökhan Saygınlı, Christian Madshus, Steinar Nordal, and H. Kürşat Engin

Numerical Study of an Anchor Reinforced Vegetation System .......................406
Ali Ebrahimi, Ming Zhu, Drew Loizeaux, and Scott Manning

Geotechnical Stability Analysis for Anchored Reinforced Vegetation Systems Assuming Shallow Potential Failure Paths .................................................416
Stanley M. Miller and Drew Loizeaux

Numerical Simulation of Pier Scouring Applying a Eulerian Multi-Phase Model ....................................................................................................................426
Aneseh Alborzi and Abdolreza Osooli

A Prediction Model for Overtopped Levee-Floodwall Erosion Rates Based on the Plasticity Index and Compaction Level ........................................437
Seyed Sina Nassiri, Parham Safarian Bahri, David Molohon, Julian Chastain, and Abdolreza Osooli

Probabilistic Slope Stability Analyses—A Case Study .....................................444
Rabindra Chaulagai, Abdolreza Osooli, and José Clemente

© ASCE
Use of Recycled Drill Pipes for Soldier Piles and Anchored Walls for Roadway Embankment Reconstruction ...............................................................453
Chris Sneddon and Steven Manuel

Application of Terrestrial Lidar and Photogrammetry to the As-Built Verification and Displacement Monitoring of a Segmental Retaining Wall.....461
Michael P. McGuire, Michael B. S. Yust, and Barton J. Shippee

Total Failure Probability of a Slope at a Given Site in a Seismic-Prone Zone in a Specified Exposure Time.................................................................472
Wenping Gong, C. Hsein Juang, James R. Martin II, Wenxin Liu, and Sara Khoshnevisan

Fiber Optic and Remote Sensing

Performance Evaluation of a Multi-Span Geosynthetic Reinforced Soil-Integrated Bridge System (GRS-IBS).................................................................482
Ashley MacMillan, Joseph C. Goode III, and Martin Hawkes

Wireless Subsurface Sensors Supporting Remote Roadway Management......491
Paul J. Fortier, Ramprasad Balasubramanian, Heather Miller, Benjamin Viall, Philip Igoe, and Somayeh Eftekhari

Quantifying Streambank Erosion Using Unmanned Aerial Systems at Site-Specific and River Network Scales ..........................................................499
Scott D. Hamshaw, Thomas Bryce, Jarlath O’Neil Dunne, Donna M. Rizzo, Jeff Frolik, Taylor Engel, and Mandar M. Dewoolkar

Structure Mapping through Spatial and Temporal Deformation Monitoring Using Persistent Scatterer Interferometry and Geographic Information Systems..............................................................................509
El Hachemi Y. Bouali, Thomas Oommen, and Rüdiger Escobar-Wolf

The Use of Unmanned Aerial Vehicles and Structures from Motion to Measure the Volume Change at a Deep Dynamic Compaction Site........520
Kevin W. Franke, Thang Nguyen, Lisheng Shao, Christopher Bender, Derrick Wolfe, John D. Hedengren, and Brandon Reimschiissel

Monitoring and Modeling of Peat Decomposition in Sacramento Delta Levees........................................................................................................528
Amr Helal, Victoria Bennett, Mo Gabr, Roy H. Borden, and Tarek Abdoun
