2017 IEEE Winter Applications of Computer Vision Workshops (WACVW 2017)

Santa Rosa, California, USA
24-31 March 2017
2017 IEEE Winter Conference on Applications of Computer Vision Workshops

WACVW 2017

Table of Contents

Message from the General and Program Chairs ........................................................................................................vii
Organizing Committee and Area Chairs ....................................................................................................................viii
Sponsors ........................................................................................................................................................................ix

Large-Scale Soft Biometrics

Soft Biometrics in Online Social Networks: A Case Study on Twitter User Gender Recognition ................................................................. 1
   Li Geng, Ke Zhang, Xinzhou Wei, and Xin Feng

Online Cost Efficient Customer Recognition System for Retail Analytics ........................................................................ 9
   Yilin Song, Yuanyi Xue, Chenge Li, Xuan Zhao, Sixuan Liu, Xiaona Zhuo, Kangjin Zhang, Bo Yan, Xiaoran Ning, Yao Wang, and Xin Feng

An Intelligent Building Occupancy Detection System Based on Sparse Auto-Encoder ...................................................... 17
   Zhi Liu, Jie Zhang, and Li Geng

Automatic Video Annotation System for Archival Sports Video .................................................................................. 23
   Yuanyi Xue, Yilin Song, Chenge Li, An-Ti Chiang, and Xiaoran Ning

A Phase Field Variational Model with Arctangent Regularization for Saliency Detection .............................................. 29
   Meng Li, Xing Liu, and Liming Tang

A Variable Exponent P-Laplace Variational Model Preserving Texture for Image Interpolation .................................. 36
   Zhan Yi and Yongxin Ge

Human Activity Analysis with Highly Diverse Cameras

Measuring Grasp Posture Using an Embedded Camera ........................................................................................................ 42
   Naoaki Kashiwagi, Yuta Sugiura, Natsuki Miyata, Mitsunori Tada, Maki Sugimoto, and Hideo Saito

Gaze Estimation Based on Eyeball-Head Dynamics .......................................................................................................... 48
   Ikuhisa Mitsugami, Yamato Okinaka, and Yasushi Yagi

Speaker Identification Based on Integrated Face Direction in a Group Conversation .................................................. 53
   Naoto Ienaga, Yuko Ozasa, and Hideo Saito
Action Recognition in Still Images Using Word Embeddings from Natural Language
Descriptions ..........................................................................................................................................................58
Karan Sharma, Arun CS Kumar, and Suchendra M. Bhandarkar

Investigation of Customer Behavior Analysis Based on Top-View Depth Camera ...........................................67
Jumpei Yamamoto, Katsufumi Inoue, and Michifumi Yoshioka

Measurement of Eyeball Rotational Movements in the Dark Environment .......................................................75
Kiyoshi Hoshino and Nayuta Ono

Author Index .........................................................................................................................................................81
