20th International Conference on HYDROTRANSPORT
Melbourne, Australia: 3 – 5 May 2017

CONTENTS

FOREWORD

HYDROTRANSPORT AWARD RECIPIENTS

DESIGN, OPERATION & TROUBLE-SHOOTING

The design of slurry pipelines – historical aspects
A D Thomas, N T Cowper (Snr), Slurry Systems Pty Limited, Australia

Ageing assets – long distance pipeline integrity and defect assessment
M Turney, J Jacobs, Paterson & Cooke USA, Ltd, USA

Operational pigging of slurry pipelines
F Salt, OSD Pty Ltd, Western Australia

Transient flow analysis – considering the effect of fluid property variations along the pipeline
M Fehrsen, N Russouw, Paterson and Cooke, South Africa;
A G T J Heinsbroek, M Tukker, Deltares, The Netherlands

Preliminary design of 200mm and 300mm NB distribution pipelines for phosphate slurry at the Jorf Lasfar terminal facilities in Morocco
N Heywood, P Ioannou, BHR Group, UK; D Hevia, J Garcia, IMASA Ingenieria y Proyectos SA, Spain; N Alderman, Private Consultant, UK

Troubleshooting a 556m sand slurry pipeline
N Heywood, BHR Group, UK; N Alderman, Private Consultant, UK;
P Harris, Sibelco Ltd, UK

Design of the Sar Cheshmeh gravity flow tailings pipeline, Iran
A D Thomas, Slurry Systems Pty Ltd, Australia; R Rieschieck, A Roshdieh, ATC Williams Pty Ltd, Australia

Hydro test of HDPE lined steel pipe
M Turney, J Jacobs, Paterson & Cooke USA, Ltd, USA
EROSION
Case Studies: Internal high performance erosion and corrosion protection coatings in hydrotransport pipelines
M Magerstaedt, ROSEN Swiss AG, Switzerland; T Raeth, L K Lai, D Plourde, ROSEN Canada Ltd, Canada; S Forster, R Altmeppen, H Rosenbleck-Schmidt, ROSEN Technology and Research Center GmbH, Germany

Characterization of wear-resistant materials for handling abrasive/erosive slurries
Y Xie, J Jiang, Md Aminul Islam, National Research Council Canada, Canada

An investigation of large solids particle degradation on wear rate in a horizontal pipeline
M Huard, K F Adane, A Fuhr, B Fotty, InnoTech Alberta Inc., Devon Research Centre, Canada

Slurry pump selection based on particle size
C I Walker, Weir Minerals Australia Ltd, Australia

Predicting flow regimes of settling slurries flowing in horizontal pipelines
H D'Souza, K F K Adane, A Fuhr, B Fotty, InnoTech Alberta Inc., Devon Research Centre, Canada

Determination of erosion rate characteristic for particles of different sizes suspended in liquid
C Solnordal, L Graham, G Short, C Wong, J Wu, CSIRO Mineral Resources, Australia

Making erosion spots prediction affordable for Euler/Lagrange computations
J Boulanger, C Wong, CSIRO Mineral Resources, Australia; A Zamberi, A Shaffee, Z Johar, Petronas, Malaysia; M Jadid, Uzma Group, Malaysia

TAILINGS, TRANSPORT AND PLACEMENT
Non-Newtonian flow in small channels and their relevance to tailings beach
A G Chryss, L Graham, K Mohanaranagam, CSIRO Mineral Resources, Australia

Analytical and experimental investigation of non-Newtonian thickened tailings slurry flow through open channels
S Javadi, P Slatter, B Pirouz, ATC Williams Rheology and Slurry Engineering Group, Australia; S Bhattacharya, RMIT University, Rheology and Material Processing Centre, Australia

A hydraulic model for predicting the slopes of alluvial deposits
T G Fitton, Fitton Tailings Consultants, Australia

Effect of coarse solids concentration on the yield stress of non-Newtonian kaolin clay slurries
R B Spelay, S A Hashemi, Saskatchewan Research Council, Pipe Flow Technology Centre™, Canada; M H Rahman, A E Olayode, R S Sanders, University of Alberta, Canada
### SLURRY FLOW MODELLING

- **Slurry transport of very large particles at high line speeds**
  - S A Miedema, Delft University of Technology, The Netherlands
  - Page 269

- **Distribution of stresses over depth of partially stratified flow above granular bed**
  - V Matoušek, Czech Technical University in Prague, Czech Republic
  - Page 285

- **Pick up functions for highly concentrated flows**
  - C van Rhee, Delft University of Technology, The Netherlands
  - Page 295

- **Comprehensive loop testing of a broadly graded (4-component) slurry**
  - R Visintainer, J Furlan, G McCall II, GIW Industries, USA; A Sellgren, Lulea University of Technology, Sweden; V Matoušek, Czech Technical University in Prague, Czech Republic
  - Page 307

- **Kinematic friction of concentrated suspensions of neutrally buoyant coarse particles**
  - R B Spelay, R G Gillies, S A Hashemi, Saskatchewan Research Council, Pipe Flow Technology Centre™, Canada; R S Sanders, University of Alberta, Canada
  - Page 325

- **CFD-DEM modelling of hydraulic transport of coarse solids in vertical pipelines**
  - E Abbaszadeh Molaei, S B Kuang, Z Y Zhou, A B Yu, Monash University, Australia
  - Page 341

- **A comparison of graded PSD methods in slurry transport**
  - S A Miedema, Delft University of Technology, The Netherlands
  - Page 355

### INSTRUMENTATION

- **Flow regime detection in coarse particle slurry pipe flow using Pulsed Ultrasound Doppler Velocimetry and Electrical Resistive Tomography**
  - R Kotzé, J Shamu, A Sutherland, Cape Peninsula University of Technology, Flow Process & Rheology Centre, South Africa
  - Page 373

- **Absolute 2.5D Electrical Resistance Tomography in pipe systems**
  - L Graham, A Chryss, CSIRO Mineral Resources, Australia; L Pullum, Private Consultant, Australia
  - Page 387

### PUMPING AND PUMP PERFORMANCE

- **Centrifugal slurry pump performance deratings – a coherent approach**
  - A Sellgren, Lulea University of Technology, Sweden; R Visintainer, J Furlan, GIW Industries, USA
  - Page 401

- **Pump phase shift control in world’s largest iron ore concentrate pipeline**
  - R van Rijswick, E Vlot, Weir Minerals Netherlands b.v., The Netherlands
  - Page 415
NON-NEWTONIAN

Wall effects on the sedimentation of a sphere in power-law fluids
T Vidya Sagar, R P Chhabra, Indian Institute of Technology, Kanpur, India;
S A Patel, New Jersey Institute of Technology, USA 429

Turbulent flow of shear thinning slurries in a flume
M Rudman, J Singh, H M Blackburn, Monash University, Australia 443

High concentration particle transport in a laminar pseudo plastic fluid flow:
pipeline friction losses
G Montserrat, Instituto Nacional de Hidráulica, Chile; A Tamburrino, C Ihle,
Universidad de Chile, Chile 457
