11th International Symposium on the Science and Technology of Light Sources

Shanghai, China
20 – 24 May 2007

Editors:

M.Q. Liu
R. Devonshire

ISBN: 978-1-5108-4083-6
List of Invited, Landmark and Contributed Papers

Special Session
IL01  The Light Source Industry in China 3
      Y.S. Chen
IL02  Latest Performance of GaN-based Solid State Lighting 7
      S. Nakamura

Session One
IL03  A Survey of Fabrication Methods for Ceramic Metal Halide Arc Tubes 11
      J. T. Neil and G. C. Wei
IL04  Temperature determination from self-reversed spectral lines 23
      St. Franke and H. Schneidenbach
LL01  Studying dimming characteristics of HID model lamps 33
      M. Kettlitz, M. Wendt, S. Peters, H. Schneidenbach and A. Kloss
LL02  Some Aspects of Medium Wattage Ceramic Metal Halide Lamps 35
      J. Tu, J. van der Eyden and C. Daemen
CP001 A Study of the in situ Kinetics of Halogen Lamp Dose Activation 37
      R. Jeans, M. van Rijswick, G. Siddons and R. Devonshire
CP002 High Watt Ceramic Metal Halide Lamps with Improved Reliability 39
      R. Ramaiah
CP003 Spatial Illuminance Distribution as a Tool for the Study of Flashlamp Plasma Dynamics 41
      M.S. Chen and I. J. Rasiah
CP004 Characterization of Getter Materials for HID Lamps 43
      A. Corazza, B. J. de Maagt and S. Ceulemans
CP005 Characterization of Ba atom emission from fluorescent lamp filament by Laser-Induced Fluorescence technique 45
      Y. Manabe, T. Ueda, A. S. Alyhendy, G. Yamashita, Y. Yamagata and K. Uchino
CP006 Computer Simulations on Hg–free Flat Fluorescent Lamp (FFL) 47
      S. M. Lee, Y. S. Seo, S. J. You and J. K. Lee
CP007 Electrode Temperature and Cathode Fall of Dimmed Fluorescent Lamps 49
      J.J. de Groot
CP008 Determination of Barium Loss in Fluorescent Lamps by Laser-induced Fluorescence supported by Modeling 51
CP009 Study of Direct Current (DC) Fluorescent Lamps (FL) without Flicker 53
      Z.P. Lu, W. Xu and Z.M. Zhao
CP010 Influence of the arc bowing on the frequency shift of the first azimuthal mode of a CMH lamp in horizontal operation 55
      S. Bhosle, L. Dabringhausen and G. Zissis
The effect of dimming ceramic metal halide lamps on lamp efficacy, reliability & lifetime

E.C. Guest, M.H. Girach, S.A. Mucklejohn and U. Rast

Investigations on Preparing TiO₂ Coatings for halogen lamps with Tetrabutyl Titanate in Microwave Discharge Plasma

D.L. Lu, B. Lafitte, J.R. Chen, G. Zissis and Z.G. Lu

Wide band gap amorphous silicon carbide films deposited by PECVD

J. Huran, I. Hotový, J. Pezoldt, N. I. Balalykin and A.P. Kobzev

Nanosecond Pulsed Discharge (NPD) and Applications in Light Sources

K.F. Liu, Z. Liu and J. Qiu

Visible continuum emission with high color rendering index from CO inductively coupled plasma

T. Takeda, A. Nazri, A. Kondo, H. Motomura and M. Jinno

New High Yield Mercury dispenser for Cold Cathode Fluorescent Lamps

P. Gallina, G. Santella, D. Di Giampietro and V. Massaro

Simulation on Electronic Ballast for High Intensity Discharge Lamps by PSIM

Y.Z. Zhou, D.Q. Guo and Y.J. Sun

Fabrication and Luminescence Increasing Efficiency of OLED with AZO anode

E.M. Jin, K.M. Kim, D.K. Kim and C.B. Park

Fundamental Processes in Modeling Fluorescent Lamps

G.G. Lister, A. Rahman, V. Sheverev, J.E. Lawler, D. Fursa and I. Bray

Current crest factor and barium emission on fluorescent lamp electrodes at high and low frequency operation

W. Kaiser, R. P. Marques and A. F. Correa

About measuring EEDF and electron concentration in the Hg-Ar discharge

M.A. Malkov

The effects of the electronic environment on the operating parameters of the Tungsten Halogen Automotive Lamps

L. Makai

Surface analytical study of the ceramic-metal bond in the electrical feed-trough of high pressure sodium lamps

G. Dobos, K. V. Josepovits, Z. Tóth, I. Csányi and L. Kocsányi

VUV light sources based on a barrier discharge

M.I. Lomaev, D.V. Schitz, V. S. Skakun and V.F. Tarasenko

First experiments with net electrodes in high voltage fluorescent tubes

W. Lehmann

Session Two

Translucent Ceramic Envelope for HID Lamps

K. Watanabe

Thermochemical data for light sources

T. Markus
Session Three

IL07  Transient spots on thermionic arc cathodes I. Modeling
      M.S. Benilov and M.D. Cunha

IL08  Metallurgical mechanism for HID lamp electrodes
      G. Leichtfried, I. Wesemann, W. Spielmann and T. Walde
LL08 Mercury dosing solutions used in Fluorescent Lamps
A. Corazza and C. Boffito

LL09 New dispenser electrodes for high pressure sodium lamp

LL10 Nanocrystalline poly-silicon based ballistic electron emitter and its application to novel mercury-free light sources
T. Ichihara, T. Hatai, K. Kamada, T. Komoda and N. Koshida

LL11 Mercury Free Metal Halide Lamp
Z.M. Yang, G.S. Chai, G.Y. Gao and M. Zhang

CP054 Ignition of mercury-free high intensity discharge lamps
M. Czichy, J. Mentel and P. Awakowicz

CP055 Development of a new Getter Alloy with high sorption performances for HID lamps
V. Massaro, A. Corazza and S. Giorgi

CP056 High Efficient 2.5 MHz RF Generator for Inductively Coupled Electrodeless Lamps
E. Statnic and F. Franck

CP057 The next generation of low pressure discharge lamps: Lighting after mercury
S. Kitsinelis and E. Fokitis

CP058 Plasma diagnosis of xenon fluorescent lamp using laser induced fluorescence spectroscopy
Y. Toda, S. Iwaki, Y. Imai, H. Kurokawa, H. Motomura and M. Jinno

CP059 Study on the Relationship between the electrode materials and the characteristics of CCFL
T. Ohira, T. Uetsuki, Y. Takeda and O. Fukumasa

CP060 Identification of 35-W and 70-W metal halide lamps
S.Y. Tang, W.T. Tsai, C.S. Moo, C.R. Lee and L. L. Lee

CP061 A bibliography of (Alkali iodide - Lanthanide iodide) phase diagrams
A.T. Dinsdale and S.A. Mucklejohn

CP062 Annealing experiments with different SiO2-Glasses
E. Arnold, F.J. Schilling and H.D. Witzke

CP063 Electric field and 254 nm radiation of T2 low pressure Ar-Hg discharge positive column
Q.Y. Han, H. Jiang, S.L. Zhu and S.D. Zhang

CP064 Measuring the pressure in ultra-high-pressure mercury lamps

CP065 A direct method to determine the inner values and plasma charge of a DBD
K. E. Trampert, M. Paravia and W. Heering

CP066 Emission spectra of compact super-high-pressure mercury discharge lamps using antenna-excited microwave discharge
T. Mizojiri, M. Kando and Y. Morimoto
Development of a new type CO2 coherent light source using DBD
K. Koyama, T. Akazawa, H. Motomura and M. Jinno

White OLEDs for Lighting Applications
H. Boerner and P. Loebl

Electrode stabilized Xe filled Flash Lamp as a DUV and VUV Point Source
F. Oda, M. Ikeuchi and Y. Morimoto

A New S model of Mesopic Photometry for Evaluating Luminous Efficacy
W.C. Chen, Y.D. Lin and D.H. Chen

Determination of the gas-phase emitter effect in ceramic metal halide lamps
O. Langenscheidt, J. Reinelt, M. Westermeier, J. Mentel and P. Awakowicz

X-ray induced fluorescence measurement of the additive and Hg densities in a metal-halide lamp

Progress in Basic Spectroscopic data for Rare Earth atoms and ions

Basic modeling of an Organic Semiconductor junction

The Characteristics of Electrode-less Lamp’s Plasma
M. Ueda and T. Uetsuki

Dynamics of the plasma/electrode interface in fluorescent lamps
R. Garner

Radiation characteristics of xenon-iodine gas mixture excited by pulse-modulated ICP
T. Kadota, M. Watanabe, M. M. Guivan, H. Motomura and M. Jinno

Current waveform optimization of AC-operated short arc ultra high pressure mercury lamps for projection applications
T. Tsukamoto, Y. Horikawa and A. Sugitani

Quantification of HCl, HBr and HI in halogen lamps by FTIR spectroscopy
M. van Rijswick and A. Koerber

Bulb Discoloration due to Gaseous Impurities
T. Gallagher and M. Yang

Plasma Parameters in Cylindrical Type Low-pressure Xenon ICP Lamp
A. Nazri, A. Kondo, T. Takeda, H. Motomura and M. Jinno

Dependence of Discharge and Radiation of Small Pulse Xenon Lamp On Starting Conditions
C. Lin

Behaviour of PFC-equipped Ballasts in Lighting System
J. Václavík and M. Novák

Investigation on various approximations for multi-fluid plasma models of the near-cathode region in thermal plasmas
CP085 Measurement of Koedam $\beta$ factors of 254 nm radiation in T3 low pressure Ar-Hg discharge positive column

H. Jiang, Q.Y. Han, S.L Zhu and S.D. Zhang

CP086 Lamp Diagnostics via Electrodeless Excitation of Fill Gases

K. Takahashi and R. Devonshire

CP087 Material Transport in Halogen Lamps

R.J. Jeans, M. van Rijswick and R. Devonshire

Session Four

IL09 An Experimental and Modeling Study of Efficiency for a 253nm Xenon Iodide Lamp Excited by Dielectric Barrier Discharge

R.J. Carman, B.K. Ward, R.P. Mildren and D.M. Kane

IL10 Development of Highly Efficient Mercury-free Flat Fluorescent Lamp (MFFL) for the Backlighting System of Liquid Crystal Display

LL12 Modeling of glow like discharge in DBD Xe excimer lamp

H. Akashi, A. Oda and Y. Sakai

LL13 Radial Segregation and Helical Instabilities in Metal Halide HID Lamps Studied under Microgravity Conditions in the International Space Station

LL14 The Calculation of Thermochemical Data for Light Source Modelling: Methods and Examples

G. Siddons, V. Ramos, S.A. Mucklejohn, J.C. Camacho, R. Devonshire and H. Davies

LL15 Digital control for improved UHP lamp performance

D.H.J. van Casteren and R.L. Tousain

LL16 Pulsed Xenon Discharge Lamps

U. Chittka, S. Gruhlke, S. Schwan, M. Sorokin and J. Vorachen

CP088 Tomographic reconstruction of the spatial profiles of emitting mercury atoms in the vertically and horizontally operating capillary discharge lamp

N. Denisova, Z. Gavare, G. Revalde and A. Skudra

CP089 Influence of the pulsed-current power supply on the 254 nm radiation flux emitted by a germicidal ultra-violet lamp

B. Mrabet, A. Chamman, H. Ellouni, M. Stamboulia and G. Zissis

CP090 Spectra of rare-earth iodide-cesium iodide systems in low-wattage metal halide lamps

CP091 An Electrodeless HID Sulfur Lamp System Using a Nonrotating Bulb Excited by Circularly Polarized Microwave Discharges

J.J. Kim, K.S. Kim, K.S. Oh, D.H. Won and H.S. Yoon

CP092 X-ray absorption tomography of a high-pressure metal-halide lamp with a bended arc due to Lorentz-forces

N. Denisova, M. Haverlag, E. J. Ridderhof, T. Nimalasuriya and J.J.A.M. van der Mullen
Excitation temperature measure in a microwave induced Ar-Hg plasma
Y. Chen and D. Chen

Simulating the Absorption of the Objects inside the Integrating Sphere for Measuring LED’s Luminous Flux
X.L. Zhou, W.Y. Li, Y. Qian and M.Q. Liu

Optimal current regulation strategy used for white LED in illumination applications
W. Yan and J.M. Zhou

Barrier discharge excilamps steady state formation
M.I. Lomaev, V.F. Tarasenko and D.V. Schitz

Investigation of antenna excited high-pressure microwave discharge lamp
M. Kando, T. Fukaya and Y. Ohishi

Improvement of VUV efficiency in Low pressure Xe discharge by N2 mixing
K.W. Park, H.S. Hwang, M.H. Han and T.I. Lee

Realization of N-doped P-type ZnO Thin Films in the Mixture of N2 and O2 by RF Magnetron Sputtering
H.J. Jin, S.H. Oh, S.J. So and C.B. Park

Suppression of Devitrification Using Chlorine Containing Silica Glass
N. Horii, M. Kamide, A. Inouye and N. Kuzu

Propagation of ionization waves in Compact Fluorescent Lamps

Influence of power balance and radiation transport on temperature distributions of HID discharges
B. Schalk, G. Hartel, M. Käning and L. Hitzschke

First steps of white LEDs in the General Lighting Market
X. Zhang, Y. Li, D. Janssen and G. van Tartwijk

A study of a high pressure mercury lamp during the warm-up phase
Z. Araoud, R. Ben Ahmed, S. Kaziz, K. Charrada and G. Zissis

Double Envelope Effect of Electrodeless Bulb for Microwave Sulfur Lamp
B.J. Park

Evaluation of Plant Growth Lamps and its Application Prospect in China
Y.D. Lin, J.Q. Ju, W.H. Shi and C.X. Bu

Model of hot cathodes for fluorescent lamps
D. Buso, G. Zissis and S. Bhosle

Development of mercury free electrode less UV light for water purification
B.K. Pramanik, K. Yanai and A. Hatta

End Darkening of MP Mercury Arc Lamps and Its Effect on Water Disinfection
G. Fang, J. Houghton, D. Olson and W. Verhulst

Electrokinetic characteristics of the Hg-Ar discharge in super narrow tubes
M.A. Malkov

Alternative approach to mercury-free HID lamps
St. Franke, H. Hess, R. Methling, H. Schneidenbach, H. Schöpp, L. Hitzschke, M. Käning and B. Schalk

</table>
CP122 Optical study of breakdown phenomenology in HID lamps
F. Manders, P. Aben and M. Haverlag 393

CP123 A Study on Ultrathin Diameter Fluorescent Lamps at High Frequency Performance
Z.L. Chen and X.X. Li 395

CP124 Influence of heating process on phosphor efficacy for mercury free lamp
T. Beaudette, P. Guillot and B. Caillier 397

CP125 Reflector optimisation for low wattage metal halide lamps
G. Van De Poel, R.Geens and L. Derhaeg 399

CP126 Novel plasma diagnostic system applicable for RF light sources
I.J. Choi and C.W. Chung 401

CP127 Improvement of the luminous run-up characteristics in ballast-integrated compact fluorescent lamps covered with outer globes
T. Yasuda and M. Kando 403

CP128 Self-reversed line estimates of Hg2 absorption in ultra-high pressure mercury lamps
D.O. Wharmby 405

CP129 Small Signal Modelling of DC Super High Performance (SHP) Lamp
W.Q. Zhang, Y.Q. Jin and J.P. Ying 407

CP130 Radial segregation in metal halide lamps; a critical analysis of the validity of the LTE approach
M.L. Beks, T. Nimalasuriya and J.J.A.M. van der Mullen 409

CP131 Criterion for the uniformity of atmospheric pressure glow discharge
Y. Zhang, X.Z. Deng, S.L. Zhu and S.D. Zhang 411

CP132 Standby mode study of dimmable electronic ballast in a street lighting application
R. Ruscassié, G. Beaufils and C. Glaize 413

CP133 A characteristic shortening of a positive column during continuous operation of a low pressure Hg discharge lamp
S. Gotoh, S. Nishiuchi, T. Kasuya and M. Wada 415

CP134 Manufacture the Induction Fluorescent Lamp
Y. Chen, D. Chen and W. Li 417

CP135 Study of HID lamp by a 3-D and time-dependent model: determination of temporal distributions of electrode temperatures
K. C. Paul, T. Takemura, T. Hiramoto and T. Igarashi 419

CP136 Species in the Arc Centre of an Operating Metal Halide Lamp: A Coherent Raman Scattering and Modelling Study
D.S. Payne, G.J. Wilson, S.A. Mucklejohn, G. Siddons and R. Devonshire 421

CP137 Investigations on low-pressure indium mono-halide discharges
R. Hilbig, A. Koerber, D. Hayashi, S. Schwan and R. Scholl 423

CP138 AC electrode diagnostics in HID lamps

CP139 Analysis of Horizontal Distribution in the Xe based ICP for Lighting source
I.S. Her, J.C. Lee and D.H. Park 427

xxxii
CP140 Amalgam used to control the mercury-vapor pressure in a steady state
Z.M. He

CP141 In-situ Temperature Measurement for Ceramic HID Lamps
W.P. Lapatovich

CP142 High performance CO-Xe microwave discharge for VUV emission
J.S. Oh, K. Yanai, K. Kawamura, and A. Hatta

CP143 Multi-function of a Novel Ignitor for HID Lamps
G.X. Zheng and X.J. Xu

CP144 Development of 360 watts high-efficiency ceramic metal halide lamp
A. Maehara, T. Shimomura and H. Hayakawa

CP145 UHP for fiber optic applications with high demands on colour rendering
P. Pekarski and U. Weichmann

CP146 Temperature control of the electrodes in metal halide lamps by superimposed current operation
Y. Takahara and M. Kamata

CP147 Study of tubular high power compound quartz-envelope xenon flashlamp
J.J. Liu, B.C. Jiang, H.B. Li, J.H. Yu

CP148 Reaction times under mesopic conditions
P. Raynham, M.H. Girach, S.A. Mucklejohn and B. Preston

Session Six

IL13 Dimming Fluorescent Systems Life Experiment
M. Duffy, R. Erhardt, P. Hakkarainen, R. Hunt, T. Leyh, R. Nachtrieb, C. O’Rourke, T. Poehlman, R. Runkles and H. Wolfman

IL14 Measuring color quality of light sources
W. Davis and Y. Ohno

IL21 The ignition characteristic of an electrodeless induction lamp
Q. Long, Y.M. Chen and D.H. Chen

IL22 Considerations and dominant interactions between low pressure fluorescent lamp and electronic ballast in dimming mode
M. Mayrhofer and S. Zudrell-Koch

Session Seven

IL15 Worldwide National Solid State Lighting Programs and Standardization Efforts. An Overview From Industry’s Perspective
H. Nikol, D. Work, F. Tang, C. Hoelen and G. Heusler

IL16 National SSL Program in CHINA
L. Wu

IL23 With ThinGaN to 1000lm white
V. Härle, B. Hahn and J. Baur

IL24 High stable color tunable LED standard source
H.P. Shen, J.G. Pan and H.J. Feng

</table>
CP165  Estimation of Solarisation in Glass in Fluorescent Lamp
J. Abe and T. Akai

CP166  Electrode Behavior in XenEco D4 Hg-free Automotive Headlight Lamps
L. Dabringhausen, U. Hechtfscher, T. Vos, W. van Erk and M. Haacke

CP167  VUV radiation from xenon excimer in He-Xe dielectric barrier discharge excited by piezoelectric transformer
D. Inada, K. Teranishi, S. Suzuki, and H. Itoh

CP168  Nb HT 1600, a new developed Nb alloy, to be used as construction wire in discharge lamps
B. Spaniol

CP169  Optical characteristics of Xe:Ne mixture for electrodeless ICP lamp

CP170  A Thermal Model of an High Pressure Mercury Discharge Lamp
J.C. Camacho, G. Siddons, M. Kai and R. Devonshire

CP171  Cathode and anode research
M.S. Benilov

CP172  UV light source of water vapor discharge excited by microwave
K. Kawamura, K. Yanai, B.K. Pramanik, J.S. Oh and A. Hatta

CP173  Comparison of metal halide lamp performance on electronic versus magnetic ballasts
A. Lamouri, A. Naruka and J. Sulcs

CP174  The structure of vapor complexes in metal halide discharge lamps
G.N. Papatheodorou and A.G. Kalampounias

CP175  Flat rare gas - iodine excimer lamp driven by surface barrier discharge
M.M. Guivan, P. St’ahel, A. Brablec, J. Janca, H. Motomura and M. Jinno

CP176  Parametric study of the performance of Hg free fluorescent signs
S. Point, E. Robert, S. Dozias, C. Cachoncinlle, R. Villadrosa and J-M. Pouvesle

CP177  High Frequency Efficacy of Metal Halide Lamps
V. Roberts

CP178  A new thermionic cathode based on carbon nanotubes with a thin layer of low work function barium strontium oxide surface coating
F. Jin, Y. Liu, S. Little and C.M. Day

CP179  The development of high power discharge produced plasma EUV sources for next generation of the semiconductor chip manufacturing

CP180  About colour rendition and light sources, the balance between simplicity and accuracy
P.J.M. van der Burgt and J.T.C. van Kemenade

CP181  Dysprosium Oxide Ceramic Arc Tube for HID Lamps
G.C. Wei, W.P. Lapatovich and J. Browne
CP182  The optical characteristics of the pulse-modulated Hg-Ar discharge  
V.P. Kalanov and M.A. Malkov

Session Eight

IL17  Organic Light-Emitting Devices for Lighting Applications  
J. Kido

IL18  Recent progress and future prospect in white LED lighting technologies for general illumination  
T. Taguchi

IL19  Progress in high-power light-emitting diodes for solid-state lighting  
M. Krames

IL27  Present Status of the Efficacy and Light Quality of White LEDs: Potential for Energy Conservation and Environmental Preservation  

IL28  Total flux measurement of LEDs with a narrow beam luminous flux standard  

CP183  Transient spots on thermionic arc cathodes II. Experiment and comparison  
P.G.C. Almeida, M.S. Benilov and M.D. Cunha

CP184  Dependence of low watt metal halide lamp parameters on supply wave shape and frequency  
B. Vanbrabant and R. Geens

CP185  Radiation spectra of microcavity as a light source for incandescent lamp  
H. Kamata and H. Ohkawa

CP186  First experiments with net electrodes in high voltage fluorescent tubes  
W. Lehmann

CP187  Characteristic analysis of Blue-LED  
H.C. Yen, G.R. Wang, S.Z. Wei and H.X. Chen

CP188  Electrode heat-up in HID-lamps - model and experiment  
A. Kloss and B. Schalk

CP189  The measurement of temporal spectrum for HID lamps  
J.D. Yu, T.S. Mou and J.P. Wang

CP190  Comparison on operating characteristics of metal halide lamps with different ballasts  
S.Y. Tang and C.S. Moo

CP191  High intensity VUV spontaneous light source based on plasma emission of nanosecond high current inert gases discharge  
M.I. Lomaev, D.V. Rybka, E.H. Baksht and V.F. Tarasenko

CP192  Simplex optimization of metal halide lamp dose composition  

CP193  Spatially and Spectrally Resolved Emission from Compact High Pressure Xenon Lamps  
D. Doughty, O. Minayeva, and S. Yeralan
CP194  Pressure threshold for uniform air glow discharge
X.Z. Deng, Y. Zhang, S.L. Zhu and S.D. Zhang 601

CP195  The candidness of CRI and CCT in describing the light quality of light sources
A.M. Dugar 603

CP196  Luminance Characteristics of Planar Type Surface Wave Plasma Microwave Fluorescent Lamp
A. Nazri, A. Kondo, T. Takeda, H. Motomura and M. Jinno 605

CP197  TiO2 coating on metal halide discharge lamp arc tubes by charged liquid spray
J. Gao and D.B. DeHaven 607

CP198  Quality assurance of light-emitting diodes
M. Bürmen, F. Permuš and B. Likar 609

CP199  Fluorescent lighting fixtures without flicker and EMI
D.Y. Fang 611

CP200  Waveform analysis of HID lamps using driving signal with “resting period”
P. Kovács, A. Böröczki and G. Hárs 613

CP201  Mercury plasma sources for Hg atomic analyser
E. Bogans, G. Revalde, A. Skudra, S. Sholupov and A. Svagere 615

CP202  Plasma Analysis of Bulbous Electrodeless Fluorescent Lamps by Finite Element Method
A. Sato, A. Yonemaru, H. Fukunaga and H. Kakehashi 617

CP203  Profiling the starting transient of metal halide lamps

CP204  Development of a high-color-rendering white LED lighting system for Japanese antique art
K. Kobashi and T. Taguchi 621

CP205  Ujoy lamp for personal projection

CP206  Transient State Mercury Transport during the Run-Up phase of Inductively Coupled Fluorescent Lamps
R. Speer, P. Moskowitz and J. Holt 625
