29th Ethylene Producers Conference 2017

Topical Conference at the 2017 AIChE Spring Meeting and 13th Global Congress on Process Safety

San Antonio, Texas, USA
26 - 30 March 2017

# TABLE OF CONTENTS

(1a) AGILE Award Keynote Address ................................................................. 1
   John Televantos

(2a) Artificial Intelligence and Machine Learning for Ethylene Plant Operation ........................................... 2
   Ryan McClarron, John W. Adams

(2b) Tailoring Big Data Analytics for Optimizing Ethylene Plant Asset Performance .................................. 11
   Pratap Nair

(2c) Model-Based Real-Time Monitoring of Ethylene Cracking Furnaces .................................................. 28
   Abduljelil Iliyas, Koji Tomida, Tareg Mohammed Alsoudani, Stepan Spatenka, Sreekumar Maroor, Ying-Sheng
   Cheng, Constantinos C. Pantelides, Stephen Hall, Mark Matzopoulos, Filipe Calado

(2d) Rigorous Non-Linear Optimization in Dow’s Hydrocarbons Business .................................................. 35
   Edo Kingma

(3a) Cooling Water Injection and Monitoring System to Efficiently Prevent Fouling in Centrifugal
Compressors ........................................................................................................... 41
   Sergio Ghezzi, Daniele Panara, Francesca Monti, Simone Salvadori, Massimiliano Insinna

(3b) Turnaround Planning for Turbomachinery in Petrochemical Service - A Successful Approach .......... 58
   Tomas Sanchez

(3c) Piping Forces and Moments on Compressors and Steam Turbines (MHI) ............................................. 65
   Satoshi Yoshida, Atsushi Higashio, Satoshi Hata

(36a) Enhancing Strategies for Feedstock Quality Management ................................................................ 84
   Cristina Orta, Marie-Claire Campbell, Vasily Simanzhenkov

(36b) Compressor Fouling Monitoring Methods Identify Changes in Fouling Mechanism to Direct
Mitigation Performance Improvement ............................................................................ 95
   Roger Metzler, Hua Mo

(36e) Oxygen-Containing Contaminants and Steam Cracking: Understanding Their Impact Using
COILSIM1D ............................................................................................................... 113
   Ismael Amghizar, Andres E. Muñoz, Kevin M. Van Geem, Guy B. Marin, Marko R. Djokic

(36d) Feedstock Contaminants in Ethylene Plants - 2017 Update ................................................................. 126
   Mark Brayden, Art Baumgartner, Steve Coleman, David Smith, Lee Ann Narin, Andre Bernard, Joe Lally

(36f) Carbon Disulfide Removal to Help Meet New Specifications for Petrochemical Grade Naphtha .......... 231
   Jay Gorawara, Steve Caskey, John Griffiths

(37a) Large Steam Turbine Overspeed Trip Mitigation in Large Olefins Plans ............................................. 248
   Steve Sykes, Sam Snively, Michael Martys

(37b) Technical Challenge of Compressors and Steam Turbines for Efficient and Sustainable
Operations in Mega Ethylene Plants ........................................................................ 268
   Satoshi Hata, Matt Walton, Kyoichi Ikeda, Akinori Tasaki

(37c) Steam Turbine 101/201 .................................................................................. 305
   Bill Poppe, Atsushi Nakajima, Satoshi Hata

(37d) Oil-Free Screw Compressors in Ethylene Storage Boil Off Gas Service .............................................. 318
   Sven Straché, Ali Vakili

(81a) Operating an Unstable Acetylene Hydrogenation Reactor after a Runaway ........................................ 337
   Jane Liang-Weissgerber, Jonathan Lunn

(81b) Safe Operation in Trickle Phase Reactors .......................................................................................... 349
   Kaspar Vogt

(81c) Improving Overall Ethylene Plant Performance By Optimising C2 Hydrogenation ............................. 350
   Nattawat Tensai, Kritsada Chotiviriyaikan, Hattachat Aewjurooentlap, Alejandro Cano, Stepan Spatenka,
   Sreekumar Maroor, Amit Goda

(81d) FHR Air Dryout after 2015 Major Outage ....................................................................................... 357
   Joseph Bell

(81e) To Err Is Human: Mitigating the Hazards of Dryer Switching Operations ........................................... 358
   Rob D. Fox

(81f) Decoking and Cracking in a Twin CELL Furnace - Design and Operational Considerations ............ 368
   Harry Wang, Bruce Evans, Joel Guillaume

(122a) Tray Operating Window - Description and Applications .................................................................... 384
   Andre Bernard
(122b) Hidden Ties! - An Explanation for O'Connell's Success
Markus Duss, Ross Taylor

(122c) Bubble Cap Tray Vapor Turndown
Daniel R. Summers

(122d) Marinalization of Mass Transfer Columns for FLNG Applications
Michael Schultes, Jeremy Brauer, Pengfei Chen, Shain Doong

(122e) Flow-Induced Tray Vibration and Its Prevention
Tony Cai, T.Y. Lin

(122f) High Performance Trays for a Fractionator in an Aromatics Plant
Siuang Hua Lee, Ang Chew Peng, Senthil Krishnamoorthy, Mario Roza

(122g) Advance in High Performance Spray Tray Design and Their Industrial Applications
Yan Zhuang, Li Ming Zhang, Zhuixiang Wang, Enxia Shang, Hong Ma

(123a) Case Study Evaluation of End of Life Condition of Cracking Tubes with Anticoking Barrier
Technology
Michael Gyorffy, Matthew Webb, Eric Hendriks, Harvey Fraser

(123b) Lifecycle Analysis of Brazed Aluminum Plate Fin Heat Exchangers (BAHX)
Bruce Harle, Steven J. Vallee, Jonathan Miller

(123c) Aging Assets: More than Just Mechanical Integrity
Theodorus G. Knijff

(123d) The Impact of Moving to Gas Feeds on the Maintenance & Reliability of the Ethylene Plant
John Weikel, Keyton D. (Dane) DeRouen

Panel Session - Impact of Lighter Feeds and Plant Age on Maintenance & Reliability
Sanjeev Kapur, Theo Knijff, John Weikel, Jimmy Cleavinger, Mike Pelton, Rene Kalik, Michael Gyorffy, Bruce Harle

(124a) Building with Natural Gas
Guido Radaelli, Rahul Iyer, Humera Rafique

(124b) Improof: Integrated Model Guided Process Optimization of Steam Cracking Furnaces

(124c) Impact of Impurities on Carbon Molecular Sieve Membranes for Applications in Olefins Units
Mark Brayden, Liren Xu, Greg Burbay, W.J. Koros

(124d) Olefin-Paraffin Separation with Customized Amorphous Fluoropolymer (CAF) Facilitated Transport Membranes
Sudip Majumdar, Yosske Koizumi, Ken Loprete, Kenneth J. Pennisi, Stuart Nemser, Andrew Feiring, Ning Shangguan, Hannah Murmen, Dan Lousenberg

(124e) Computational Fluid Dynamics Based Design of a Novel Reactor Technology for the Oxidative Coupling of Methane
Laurien A. Vandewalle, Kevin M. Van Geem, Patrice Perreault, Guy B. Marin

(124f) Kinetic Study of Thermal Decomposition of N,N-Diethylhydroxylamine (DEHA) in Steam Crackers
Hangyao Wang, Georgios Bellos, Stefan Korf, Liwei Li, Viet Pham, Mark Siddoway, Mark Brayden, Marcos Martinez, Brien Stears

(124g) Molecular Simulations for Developing New Ethane/Ethylene Separation Processes
Mansi S. Shah, Michael Tsapatsis, J. Ilja Siepmann

(160a) Process Safety Training for Operators
Geert Vercruysse

(160b) Process Event Avoidance: Using Identification of Process Faults to Avoid Abnormal Process Events
Mark Nixon, Thomas R. Kindervater

(160c) Safe Start-up of Chemical Plants - 25 Years Lessons Learned Start-up and Non-Routine Operation of a Cracker Plant
Geert Vercruysse, Geert Boogaerts

(160d) Low Temperature Safety Management Practices - An Industry Perspective
Micheal Smith, Bala Devakottai, Mark Whitney

(160e) Furnace Isolation for Steam Air Decoking
Bert Johnson, Timothy M. Zyguila, David Sankey, Zach Givens

(160f) Managing Hazardous Chemical Safety Knowledge
Maruti Bhandarkar, James Hillier, Ralph Price

(187a) How Big a Future Cracker Should You Consider?
Sanjeev Kapur
(187b) Building Tomorrow’s Mega-scale Ethylene Plants - General Criticality Criteria and Selected Design Aspects for Plate-fin Heat Exchangers and Cracking Furnaces
Mark Whitney, Alexander Kromp, Gunther Kracker, Robert Stegemann, Axel Lehmann

(187c) Key Technology Challenges for Megacrackers
Dennis Maifield

(187d) Turbomachinery Capacity for Super Mega Ethylene Plant
Atsushi Higashio, Satoshi Hata

(187e) Safely Overcoming Capacity Constraints Challenges Using UOP Process Equipment and Callidus Flares
Bryan Beck, Peter McGuire

(187f) Superfractionator Tower Internals Designs for Megacrackers
Neil A. Sandford

(188a) SIS Fundamentals and Implementation in Ethylene Plants
Steve Gandy, Denise Chastain-Knight

(188b) Impact of Testing Frequency on the Reliability of SIS for Flare Load Mitigation
Brian K Sullivan, Peter Kazma Jr., Stephen De Haan

(188c) Modeling Ethylene Plant Cracking Heater Burner Light-Off Safety Instrumented Functions
David K. Levis

(188d) Successful Automation Strategies to Prevent Brittle Fracture in a Bimetallic Demethanizer
Erin Daly

(194a) Overview of Current and Future Environmental Challenges
Amy Marshall

(194b) Environmental Challenges in Meeting Ambient Air Quality Standards
Arijit Pakrasi

(194c) Flare Emissions Regulatory Update
Kevin Leary

(194d) Challenges in SCR Operation
Robert Alvers, Klavs Beldring

(194e) Flameless Thermal Oxidizer Operating Experience at DOW Chemical Freeport, TX VCM Plant
Gene Irrgang, Arturo Lopez, Jon A. Sachs

(194f) The Impact of Discharge Criteria on Spent Caustic Treatment Options
William Celenza

(194g) Scarcity of Emission Reduction Credits (ERCs) and Potential Effects on Expansions in Petrochemical and Refinery Sector
Mike Taylor
