TABLE OF CONTENTS

VOLUME 1

SESSION 1: CASE STUDIES

Case Study of Section Milling Run in Abrasive Salt Dome Formation and Technological Development for Multi-String Section Milling ................................................................. 1
Smalley, Michael T.; Hay, Christopher; Teale, David W.; Haq, Mohammed A.

Case History: How to Enable the Horizontal Development of Shallow Reservoirs ........................................ 9
Mathis, Wolfgang; Strand, Harald; Hollinger, Gerald

A Case History of the First Drilling with Liner Application in Romania .......................................................... 26
Qureshi, Ali M.; Rosenberg, Steven M.; McGrath, Martyn; Tan, Ming Zo

Application of Deep Directional Resistivity Reservoir Mapping Tool on Arctic Field Development – Case Studies from the Goliat Field in the Barents Sea ......................................................... 42
Gianbattista, Tosi; Wang, Haiheng; Denichou, Jean-Michel

SESSION 2: RIGS AND RIG TECHNOLOGY

A Real-Time Well-Site Based Surveillance and Optimization Platform for Drilling: Technology, Basic Workflows and Field Results ................................................................. 56

Tripping Operations Optimized Through Closed-Loop Vision Technology ......................................................... 75
Vintervold, Y. S.; Holmstrom, M.; Rosano, H.

The Floating Factory Concept: Engineering Efficiencies Up Front to Reduce Deepwater Well Delivery Cost ................................................................. 92
Hebert, James

Rethinking the Typical Line-Item DWOP Exercise: Does it Present a Complete Picture? .................................. 101
Nwokoma, Precious; Knobben, Xander

SESSION 3: INNOVATIVE BREAKTHROUGHS IN PLUG AND ABANDONMENT TECHNOLOGY

Improved Through-Christmas-Tree P&A Plug Placement with New Innovative Cementing Methodology ................................................................. 112
Olsen, M.; Sætre, T.; Hanssen, R.; Waagen, M.; Sirevaag, B.; Lindanger, C.; Gustafsson, J. R.

Successful Multi-Well Deployment of a New Abandonment System for a Major Operator ................................ 119
Stokkeland, Thore Andre; McNicol, Jim; McWilliam, Gary

True Self-Healing Geopolymer Cements for Improved Zonal Isolation and Well Abandonment ................................................................. 130
Liu, Xiangyu; Ramos, Matthew J.; Nair, Sivarama D.; Lee, Hanna; Espinoza, D. Nicolas; van Oort, Eric

Development of Experimental Equipment and Procedures to Evaluate Zonal Isolation and Well Abandonment Materials ........................................................................................................................ 142
van Eijden, Jip; Cornelissen, Erik; Ruckers, Frank; Wolterbeek, Tim

SESSION 4: DRILL BITS

Drill Bit Connections: A Time for Change ................................................................. 158
Anderle, Seth; Arfele, Rob; Hinz, Brandon; Shafer, Eric

Assuring Efficient PDC Drilling .......................................................................................................................... 168
Curry, D.; Pessier, R.; Spencer, R.; Al Alawi, M.; Wingate, J.; Kuesters, A

Mitigating Drilling Dysfunctions and Enhancing Performance with Self-Adjusting Bit Technology:
Analytical and Experimental Case Studies .................................................................................................................. 185
Jain, Jayesh R.; Ricks, Gregory; Ledgerwood, L. W.; Phillips, Anthony

Drilling Dynamics Data Recorders Now Cost-Effective for Every Operator - Compact Embedded Sensors in Bit and BHA Capture Small Data to Make the Right Decisions Fast ................................................................. 201
Jones, Steve; Sugitara, Junichi; Rose, Karl; Schnuriger, Matthew
From Laboratory High-Pressure, High-Temperature Technology to Field Success: A Case Study on New Anti-Balling Coating Development

PDC Bit with Industry's Largest Cutter Achieves Breakthrough Performance and Savings in Kuwait
Grimes, Bobby; Omar, Marwa; Lee, Roger; Mayyan, H. Al; Sharhan, A. Al; Malik, A.

SESSION 5: TUBULARS

The Role of Phosphate Conversion Coatings in Make-Up of Casing Connections
Ernens, D.; Riet, E. J. van; de Rooij, M. B.; Pasaribu, H. R.; van Haaften, W M.; Schipper, D. J.

Tubular Connection Integrity: A Comparison of Pipe Makeup Methods
Amezago, Federico; Liess, Martin

Improving Casing Integrity by Induction Brazing of Casing Connections
Ernens, D.; Hariharan, H.; van Haaften, W M.; Pasaribu, H. R.; Jabs, M.; McKim, R.

Innovative Drill Stem Rotary Shoulder Connection Designed for Cost Efficient Operations in the Most Challenging Drilling Environments
Lafuente, Marta; Carrois, Fabien

Maximizing Tubular Capacity and Well Integrity Under Near-Yield Loading
Nowinka, J.; Meijer, G.; Miller, S.

Development of New Pitting Acceptance Criteria Using Axi-Assymmetric Thread Models to Improve Service Life and Reduce Repair Costs of Rotary Shouldered Connections
Gokhale, Samit; Oak, Sushil; Lee, Kang

SESSION 6: DATA ANALYTICS

Human Factors Engineering in the Design and Deployment of a Novel Data Aggregation and Distribution System for Drilling Operations
Behounek, Michael; Thetford, Taylor; Yang, Lisa; Hofer, Evan; White, Matthew; Ashok, Pradeepkumar; Ambras, Adrian; Ramos, Dawson

Future Workforce Education through Big Data Analysis for Drilling Optimization
Zhou, Y.; Baumgartner, T.; Saint, G.; Ashok, P.; Oort, E. van; Ishell, M. R.; Trichel, D. K.

Real-Time Drilling Optimization and Rig Activity-Based Models Deliver Best-In-Class Drilling Performance: Case History
Kumar, Dev; Jarrett, Cameron; Smith, Gregory; Smith, Mark; Cheatham, Curtis; Kolstad, Eric; Brooks, Scott

Use of Quantitative Risk Analysis Methods to Determine the Expected Drilling Parameter Operating Window Prior to Operation Start: Example From Two Wells in the North Sea
Daireaux, Benoit; Cayeux, Eric; Haavardstein, Stein; Stokland, Leif Magne

Statistical Method for Error Prediction in Decision Support and Control Systems
Aghito, Manuel

Taking a Different Approach to Drilling Data Aggregation to Improve Drilling Performance
Behounek, Michael; Hofer, Evan; Thetford, Taylor; White, Matthew; Yang, Lisa; Taccolini, Marcos

SESSION 19: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 1

A Study of the Dynamics of Lateral Fastline Vibrations
Kyllingstad, Aage

Recorded Dynamics Measurements While Coring Enhances Performance and Recovery
Jones, Steve, Sugita, Junichi; Wood, Howard

New Innovative Underreamer Technology Simultaneously Drilled and Reamed with Two Activated Reamers
Grymalyuk, S.; Schimanski, M.

SESSION 20: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 2

Ensuring Zonal Isolation During Abandonment with an Innovative Coiled Tubing Placement Technique
Tanoto, E.; Jaffert, M. F.; Pasteris, M.; Habeehan, P. T. P.
Improving the Structural Integrity and Scalability of Float Valves With Optimized Float Bore Design ........................................... 450
Holcomb, Spenser R.; Gokhale, Samit; Lee, Kang

SESSION 21: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 3

Curved Nozzle Design for PDC Bits Enhances Hydraulics for Bit Cleaning and Cooling Improvements ............................................................................................................................... 459
Schneuberger, Matthew; Cuillier, Bruno; Tilleman, Danny; Rose, Karl

Efficiency Improvement in the Bakken Realized Through Drilling Data Processing Automation and the Recognition and Standardization of Best Safe Practices ............................................................................................................................... 477
Duffy, W.; Rigg, J.; Maidla, E.

Developing Remote Operations Capabilities in the US Land Market ............................................................................................................................... 487
Huckebey, Joshua

SESSION 7: MANAGING MAJOR ACCIDENT RISK

Well Collision Avoidance Management and Principles ............................................................................................................................... 499
Sawaryn, S. J.

Real Time Engineering-Based Simulation Training Addresses Risk in Managed Pressure Drilling ............................................................................................................................... 520
Rommetveit, Rolf; Davidson, Ian; Svendsen, Morten

An Offshore Drilling Company's Approach to Process Safety Management ............................................................................................................................... 536
Gidley, John K.; Campbell, Dustin L.

SESSION 8: CEMENTING AND ZONAL ISOLATION I

Permeability Study of API Class G and B Cements Considering Seawater and WBM Contamination ............................................................................................................................................................................................... 546
Le-Minoux, Jean Christophe; Matti, Didier; Bouvet, Alexandre; Unamne-Rodriguez, Iker; Chang, Andy; Massie, Iain; Xiao, Erin; Schnell, Ernst

A Novel Rheological Hierarchy Optimization Methodology with Artificial Intelligence and Inverse Technique Improves Spacer Design ............................................................................................................................................................................................... 556
Xie, Liangjun; Chen, Zhongning; Chaudhary, Saleem; Alegria, Adriana Estela

Specially Customized System for Cementing Glass Reinforced Epoxy GRE Casings - Development and Field Trials in a Geothermal Project ............................................................................................................................................................................................... 564
Lummer, N. R.; Block, R.; Yadigarov, Y.

SESSION 9: PRESSURE AND FLOW

Interventionless Reservoir Isolation Valve Removes the Requirement for an Intermediate Completion: A Case Study ............................................................................................................................................................................................... 571
Edwards, Andrew; Murdoch, Euan; Munro, Christopher

Challenges in Elastomer Technology for Drill-Through Equipment ............................................................................................................................................................................................... 576
Berckenhoff, Mike; Hack, Richard J.

Predicting Gas Loading Capability in Oil-Based Drilling Fluids ............................................................................................................................................................................................... 581
Skogestad, Jan Ole; Linga, Harald; Bjerkevoll, Knut S.; Saasen, Arild

SESSION 10: DRILLING DYNAMICS AND MECHANICS

Improving Reliability and Performance of Under-Reaming Operations ............................................................................................................................................................................................... 592
Valbuena, Franklin; Belloso, Andres; Pessier, Rolf; Oueslati, Hatem

Torsional Drillstring Vibration Modelling and Mitigation with Feedback Control ............................................................................................................................................................................................... 611
Pehlivan, Can; Chen, Dongmei; van Oort, Eric

A Comparison of Stick-Slip Mitigation Tools ............................................................................................................................................................................................... 619
Kyllingstad, Aage

Challenges and Solutions to the Correct Interpretation of Drilling Friction Tests ............................................................................................................................................................................................... 635
Cayeux, Eric; Skadsem, Hans Joakim; Daivreax, Benoit; Holand, Remi

Improving Torque and Drag Prediction Using the Advanced Spline Curves Borehole Trajectory ............................................................................................................................................................................................... 674
Aboughabab, Mahmoud F.; Eustes, Alfred W.; de Wardt, John P.; Willerth, Marc

SESSION 23: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 2

Improved Primary Cement Jobs and Mitigation of Sustained Casing Pressure through the Use of Foamed Spacer Design Technology .......................................................... 925
Kumar, Animesh; Gillies, James; Mehra, Rohit; Pardeshi, Mahendra; Wilke, Andrew; Li, Jason

Minimization of Downhole Tool Failures Using Nash Equilibrium and Downhole Data .......................................................... 944
Jiang, Wanyi; Samuel, Robello

A New Analytical Model for Jarring Analysis .......................................................................................................................... 954
Zhang, Yuan; Samuel, Robello

Drilling the World’s Longest 6-1/8 in. Offshore Sidetrack Completed With ICD Screen Partially Cemented System .......................................................... 964
Aljubran, M. J.; Al-Yami, A. S.

Successful Deep Water Drilling MPD, Early Kick Detection and Performing Managed Pressure Cementing With CML Controlled Mud Level System in GOM and North Sea .................................................................................. 979
Elahifar, Behzad

SESSION 24: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 3

Changing the Chalk Drilling Paradigm in the Netherlands .......................................................................................................................... 988
Brands, S.; Bocquet, R.; Matviykiv, T.; van der Pouw Kraan, A.

Inducing Axial Vibrations in Unconventional Wells: New Insights through Comprehensive Modeling ........................................................................... 1005
Wilson, J. K.; Noyanert, S. F.

How Experience Transfer and Learning Can Lift Knowledge From Individuals to the Organizational Level ........................................................................... 1026
Mathisen, Petter; Andersen, Mats

Saving a Hole Section by Using Real-Time Wellbore Stability Analysis .......................................................................................................................... 1036
Odunlami, Tosin; Amorocho, Claudia

SESSION 13: DRILLING FLUIDS AND GEOMECHANICS

Novel Techniques for Modelling Re-Fracturing in Tight Reservoirs .......................................................................................................................... 1048
Shaikh, Hamza; Iwuoha, Sochi; Islam, Arshad

Improved Wellbore Stability in Tor/Ekofisk Wells Through Shale-Fluid Compatibility Optimization ........................................................................... 1057
Oort, Eric van; Pasturel, Christian; Bryla, Jedzej; Ditllesen, Frederik

Geomechanics of Wellbore Strengthening Revisited: A Combined Theoretical and Experimental Approach with Field Case Studies ........................................................................... 1081
Mehrabian, Amin; Savari, Sharath; Whitfill, Donald; Abouelzimen, Younane

A Simple Method for Identifying Fracture Initiation Pressure .......................................................................................................................... 1101
Naidu, R. N.; Rylance, M.

Nonlinear Regression Analysis and System Stiffness Approach for Formation Integrity Test Interpretation .......................................................................................................................... 1125
Moi, Sonja; Carlsson, Liv Almas; Skadsen, Hans Joakim; Islam, Aminul; Helstrup, Ole Anders

4D Geomechanics to Predict Compaction and Subsidence for Development of Unconsolidated Sandstone Reservoirs: Fortuna Project Case Study, Offshore Equatorial Guinea .......................................................................................................................... 1143
French, Simon; Puspatasari, Ratih; Isherwood, Alison; Cox, Phil; Marsden, Rob; Edo Mbang, Manuel Ndong; Tan, Chee Phuat; John, Zachariah

SESSION 14: WELL CONTROL

Blowout Control Challenges of Pad Drilling and Production: A Case History with Lessons Learned ........................................................................... 1162
Haghshenas, A.; Cuthbert, A.; Portillo, L.

Integrating Human Factors into Well Control .......................................................................................................................... 1169
Odgaard, Jacob; Morton, Tim

A Systems Approach to Well Control Barrier Management During Drilling Operations .......................................................................................................................... 1179
Thorogood, John L.

Gas Influx into Drilling Fluids During Flow Check Operations as Affected by Gas Absorption Characteristics of the Drilling Fluid .......................................................................................................................... 1195
Linga, Harald; Bjørkevoll, Knut Steinar; Skogestad, Jan Ole; Saasen, Arild
Kick Tolerance and Frictional Pressure Losses, Added Safety or Added Risk? .......................................................... 1206
Mosti, I.; Morrell, D.; Anfinsen, B. T.; Vielma, W. E. Szemat; Nergaard, K.

Improved Thixotropic Barrier Fluid ............................................................................................................................ 1214
Turner, Jay; Shumway, Bill; Ramirez, Jessica; Lovorn, Randy; Cedeno, Freddy; Mendez, Gerardo

SESSION 15: DOWNHOLE TOOLS

Horizontal Drilling with Dual Channel Drill Pipe ........................................................................................................ 1220
Vestavik, O. M.; Thorogood, J.; Bourdelet, E.; Schmalhorst, B.; Roed, J. P.

RED: Revolutionary Drilling Technology for Hard Rock Formations ........................................................................ 1234
Wiercigroch, Marian; Vaziri, Vahid; Kapitaniak, Marcin

Real-Time Borehole Condition Monitoring Using Novel 3D Cuttings Sensing Technology ........................................ 1242
Han, Runqi; Ashok, Pradeepkumar; Pryor, Mitchell; Oort, Eric van; Scott, Paul; Reese, Isaac; Hampton, Kyle

New Optical Sensor System for Improved Fluid Identification and Fluid Typing During LWD Sampling Operations .......................................................... 1260
Cartellieri, Ansgar; Kischkat, Tobias; Sroka, Stefan; Meister, Matthias

Predicting Rotor-Stator Fit in Positive Displacement Motors PDMs ............................................................................ 1278
Alvarez, Alfredo A.; Boscan, Jorge

New Gas-Tight V0 Packoff Stage-Cementing Equipment Provides Reliable Solution for Wellbore Integrity and Significant Reduction in Rig Time .......................................................... 1291
Abdel Al Aziz, Mahmoud; Khallaf, Ahmed; Urdaneta Nava, Luis; Jacob, Jobby; Farley, Doug; Shaker, Sherif

SESSION 16: DIRECTIONAL DRILLING

Transformation of Mindset - Cost-Effective Collaborative Well Engineering & Operation Deliverers Record Horizontal Appraisal Well in the Barents ........................................................................................................ 1297
Hollinger, Gerald; Trauner, Stephan; Dupuis, Christophe; Wendi, Anke Simone; Breivik, Dag H.; Myrvoll, Odd Helge

Introduction of New Drilling Technology Provides Continuous High Build Rate Capability in Complex Corkscrew Well Trajectory, Accessing Unswept Reserves in the North Sea ........................................................................................................ 1309
Krueger, Stefan; Sharpe, Robert; Attridge, William; Ruszka, Jon

Reliable Mud-Pulse Telemetry System for High-Resolution Real-Time Logs .................................................................. 1322
Greten, Alexander; Brahim, Imed Ben; Emmerich, Wojciech; Akimov, Oleg

Successful Application of a New Inertial Steering Mode of Point-the-Bit RSS in Middle East Oilfield .......................................................... 1333
Li, F.; Balka, M.; Al-Ghazzawi, A.

Quantification of Wellbore Collision Probability by Novel Analytic Methods ................................................................ 1341
Bang, J.

Maximizing Extended Reach Drilling Efficiency with Unconventional Thinking .......................................................... 1373
Hooff, Gerritt; Hinke, Sean

SESSION 17: ADVANCEMENTS IN COMPLETION AND INTERVENTION TECHNOLOGY LOWERS WELL COSTS

Case History: A Decade of Experience Using Intelligent Completions for Production Optimization and Water Shut-Off in Multilateral Wells in the World's Largest Oilfield ........................................................................................................ 1382
Dulaijan, Auda; Shengtji, Mohammad; Ufondu, Kenechukwu; Zahran, Bader; Abouelinaaj, Khaleed; Shafiq, Muhammad

Modeling and Simulation of Annular Pressure Buildup APB in a Deepwater Wellbore with Vacuum-Insulated Tubing ........................................................................................................ 1391
Kang, Yongtong; Gonzalez, Adolfo; Liu, Zhengchun; Samuel, Robello

Reducing Well Costs and Extending Field Life with Intelligently Controlled Trilateral and Quadrilateral TAML Level-5 Multilaterals ................................................................................................. 1409
Glaser, Mark; Butler, Ben; Liland, Gorm

Subsea Installation of an Interventionless Annular Safety Valve Reduces Operational Time A Case Study ........................................................................................................ 1420
Sirevåg, Espen; Torsteinbø, Orjan; Murdoch, Euan

Innovative Testing of Mills and Wellhead Freeze Implemented on Offshore High-Rate 10,000 PSI Gas Well ........................................................................................................ 1426
Haymes, Robert Dixie; Imtiaz, Khalid; Mazzella, Carlo
An Industry-First 7-5/8 in. Drill Pipe Like Tubular Facilitates Deep Offshore Completions and Interventions by Saving Time and Reducing Cost. Corbin, Kevin; Begnaud, Taylor; Elliott, Greg; Sanclemente, Leianne; Babineaux, Joshua; Brock, Jim; Plessis, Guillaume; Muradov, Andrei

SESSION 18: DRILLING AUTOMATION

Development to Delivery - A Collaborative Approach to Implementing Drilling Automation Israel, Riaz; Farthing, Julian; Walker, Hamish; Covarrubias, Rodrigo Gallo; Bryant, Jason; Vahle, Christian

World First Closed Loop Downhole Automation Combined with Process Automation System Provides Integrated Drilling Automation in the Permian Basin Pink, Tony; Cuku, Duane; Pink, Stephen; Chittoor, Venkat; Goins, Atwell; Facker, Ben; Hanford, Ryan

Transitioning the Directional Driller Off the Rig Hildebrand, Ginger; Torre, Ariel; Hopewell, Joseph; Olesen, Lars

Pragmatic Analytics of Control System Alarms for Improved Drilling Performance and Equipment Maintenance Goetz, Christopher

Improved Bottomhole Pressure Control with Wired Drillpipe and Physics-Based Models Park, Junho; Webber, Thomas; Shishavan, Reza Asgharzadeh; Hedengren, John D.

A Synchronized Rigsite-to-Office Approach to the Management of Automated Torque and Drag Data Borjas, Ricardo; Creegan, Andrew; Perdomo, Angel; Caraway, Jennings

SESSION 25: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 1

Degassing Rate of Drilling Fluid Base Oils as Exposed to Depressurisation and Drill String Rotation Grimstad, Alv-Arne; Linga, Harald; Haave, Øyvind; Saasen, Arild

CFD Modelling of Observed Cuttings Transport in Oil-Based and Water-Based Drilling Fluids Sayindla, Sneha; Lund, Bjørnar; Ytrehus, Jan David; Saasen, Arild

SESSION 26: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 2

Integrated and Longest Directional Casing While Drilling Mitigates Hole Problems and Improves Drilling Performance While Saving Drilling Time Radhakrishnan, Venkataramanan; Gonzalo, Hevia Garcia; Borge, Diego Barrero; Pickup, Duncan Ian; Anggraini, Faauza Dwi; Kongoun, Chortip

Remote Toe Isolation in ERD Wells Using an RFID-Actuated Circulating Toe Sleeve CTS A case study Vázquez, Karina; Murdoch, Euan

Characterization and Mitigation of Mud Motor Vibrations Hohl, Andreas; Hohl, Carsten; Herbig, Christian; Oueslati, Hatem; Reckmann, Hanno

SESSION 27: KNOWLEDGE SHARING EPOSTER PRESENTATIONS – STATION 3

MWD Surveying Enhancement Techniques and Survey Management Workflows Applied at a Barents Sea Field for Accurate Wellbore Positioning Monterrosa, Leida C.; Rego, Marina Ferreira; Blackburn, Jason D.

The Value of High-Definition Wellbore Surveys in an Arctic Land Environment Bevzenko, Vladimir; Chatar, Crispin; Gorichka, Marian; Kuznetsov, Aleksey; Albatov, Zairif

Experimentally Validated First-Principles Multivariate Modeling for Rheological Study and Design of Complex Drilling Nanofluid Systems Gerogiorgis, Dimitrios I.; Reilly, Simon; Vryzas, Zisis; Kelessidis, Vassilios C.
