# TABLE OF CONTENTS

## SESSION 2: ADVANCING DRILLING RISER AND WELHEAD INTEGRITY BY ANALYSIS, DESIGN, AND MONITORING

### Validation of Global Riser/Wellhead Analysis Using Data from a Full-Scale Measurement Campaign

Agarwal, Puneet; McNeill, Scot; Bhalla, Kenneth; Walker, Karen

### Introducing Reactive Flex-Joint: 10–15 Times Prolonged Wellhead Life

Borgård, Ove; Sanåsen, Knut Olav; Ellefsen, Øystein

### Estimation of BOP Stack Drag and Added Mass Using Computational Fluid Dynamics

Lopez, Carlos F.; Poral, Harbinder; Bhalla, Kenneth; Stahl, Matthew J.

### Drilling Riser Integrity Assurance for Deepwater Floating Drilling

Neidhardt, D.; Ziegler, R. F.; Lancaster, J.

### Enabling Drilling Operations Using Structured Data and Measured Response

Holden, Harald; Marre, Ignacio; Holm, Heidi Gryteland; Næs, Randi

### Cross Sectional Flow Modelling of a Drilling Riser System for Hydrodynamic Drag Consideration

Lai, Lawrence S. H.

### Wellhead Design for Fatigue Optimization

Muttey, A. J.; Ionenco, M.; Olsen, P.; Banas, P.; Saether, M.

## SESSION 3: RISERS: REDUCING UNCERTAINTY

### DeepStar® Study on Effect of Coupled Horizontal and Vertical Interaction of Steel Catenary Risers with the Seabed within the Touchdown Region

Sancio, Rodolfo B.; Clukey, Edward C.; Lekkakis, Dimitris; Aubeny, Charles

### Improving the Fatigue Performance of SCRs via a Special Touchdown Zone Pipe Section

Mansour, G.; Forbes, W.; Theghi, R.; Hays, P. R.

### How the Application of LGS Technology for Drilling Risers Reduces Drilling Costs Through Improved Operability

Kuett, P.; Marquesillo, H.; Pets, A. E.; Johnstone, D.

### Digitizing Flexible Riser Anulus Testing by Automated Portable Test Equipment

Amundsen, Torbjørn; Nilsson-Aas, Christoffer; Kanestrom, Øystein; Tveit, Ørvind

### HORA Hinge-Over Riser Assembly Riser System

Martins, S. B. C.; Harris, S. W.; Nakajima, E.

### Mechanically Joined Pipes for HPHT Risers and Flowlines

Chandhury, Gautam

### Time-Domain Research on Integrated Coupling Model of MODU, Drilling Riser and Wellhead

Lei, Sheng; Lai, Jing; Zhao, Jingui; Zhou, Xinjiang

## SESSION 4: HP/HT APPLICATIONS AND TECHNOLOGY

### Next Generation HP/HT Wellhead Seal System Validation

Brown, Lucas; Witwer, Bruce

### HPHT Well Integrity: Load-Resistance Monitoring and Predictive Analysis

Das, Biik; Samuel, Rubello

### Adequate Fatigue Design for HPHT

Patel, Harish; Ji, Jing; Merava, Satya; Lin, Jessie

### Design Margins for Normal, Extreme, and Survival HPHT Applications

Grohmann, Andrew J.; Selvey, Jordan; Ellisor, Scott

### Strengths and Weaknesses in the HP/HT Design Verification Process within Gulf of Mexico

Patel, Harish; Ji, Jing; Merava, Satya; Lin, Jessie

### Verification Analysis and Validation Testing of Subsea Connectors

Peralles, Stephen A.; Kaculti, Jim T.

### Ultra HP/HT Removable Production Packer for Deep Water Applications

Suarez, Agustin Velasco; Young, Chris; Urban, Larry; Anderson, Gary; Bisset, Stephen

## SESSION 5: COST-EFFECTIVE SOLUTIONS FOR A NEW OIL AND GAS SCENARIO

### The Benefits and Limits of FPSO Standardisation

Weijle, Michael; Newport, Andrew; Mastrangelo, Carlos

### Combining FPSO and Subsea Processing for Optimized Field Development

Gyllenhammar, E.; Duvall, S.; Gabelloni, M.

### Reducing Subsea Technology Development Lead - Times – A Case Study

Albert, J.; Bay, L.; Portman, L.
Cost Effective Solutions: Less is More .......................................................................................................................... 352
New Umbilical Manufacturing Method Eliminates Weight Limitation ............................................................ 364
Subsea Projects Cost Reduction - Petrobras Approach, Results and Next Steps ...................................................... 379
Moreira Matoso Ribeiro Gomes, F.; Dal Pont, A.; Maia Arantes, F.; Cavalcanti Freitas, G. A.; Rodrigues Marques, M. A.; Souza Salvador, M. de; Santos Poli, P. R.; Oliveira, R. Caldeira de; Laquini, S.; Santos, T. Duarte Fonseca dos; Gasparetto, V.
Introducing Single Deck Topside Concept for Large New-Build FPSOs in West Africa ...................................... 392
Kim, S. E.; Kim, S. H.; Chung, B. Y.; Lee, I. H.; Jung, J. J.

SESSION 6: RESERVOIR MONITORING AND CHARACTERIZATION

Advances in 4D Seismic and Geophysical Monitoring of Deepwater Fields ...................................................... 398
Wang, Kanglin; Hatchell, Paul; Kukstas, David; Loke, Jorge
Fluid-Front Tracking in a Mature Jurassic Carbonate Reservoir using Innovative Pulsed Neutron Solutions for the First Time Offshore Abu Dhabi ......................................................................................... 406
Serry, Amr Mohamed; Espinassou, Marianne; Bilbeisi, Jawdat; Saldungaray, Pablo; Zhou, Tong; Rose, David; Davgupta, Suvodip
Lithology and Fluid Facies Identification from Post-Stack Seismic Inversion ...................................................... 423
Spikes, Kyle T.
Application of Raman Spectroscopy for Real Time Speciation Monitoring and Quantification ......................... 428
Kosacki, Igor; Srinivasan, Srídhar
Diagnosing Production Problems in Highly Deviated Wells Using Oil and Gas Geochemical Fingerprinting .......... 436
McCaflrey, Mark A.; Al-Khamiss, Awsaf; Jensen, Marc D.; Baskin, David K.; Laughrey, Christopher D.; Rodgers, Wade M.
A New Quantitative Predicting Method for Water-Sensitivity Damage .................................................................. 444
Yang, Benfeng

SESSION 7: SEISMIC DESIGN OF OFFSHORE FACILITIES

Residual Strength Pushover Analysis: Enhanced Assessment of Seismic Platform Performance .......................... 454
Litton, Richard; Ku, Albert; Chen, Jian-Yih; Fraser, Ramsay; Beck, Richard
Seismic Site Response Analyses of Bay of Campeche Clay Using Predicted Dynamics Soil Properties ................. 470
Taboada, Victor M.; Flores Lopez, Francisco A.; Dantial, Vishal; Roque, Diego Cruz; Nabor, Procoro Barrera
A Practical and Interdisciplinary Framework to Develop Post-Earthquake Evacuation and Inspection Thresholds for Offshore Platforms ........................................................................................................ 490
Chen, Jian-Yih; Chen, Ching-Hsiang; Ku, Albert; Sheppard, Robert
Preparing Offshore Facilities for Seismic Events ................................................................................................. 500
Sheppard, Robert; Carson, Patrick
Seismic Design of Subsea Pipeline Systems: Evaluation Study ............................................................................. 507
Al-Showater, A.; Kulkarni, S.; Shi, H.; Sun, J.; Abdalla, B.
Assessment of Subsea Pipes Crossing Seismic Fault .......................................................................................... 518
Azimov, Umid; Sari, Ali; Arablouei, Amir
Hazard Quantification of Seismically Induced Tsunamigenic Subaerial/Submarine Mass Movements .................. 533
Sancio, Rodolfo; Rao, Pramod; Hunt, Christopher; Umberg, David; Greene, Alexander; Misra, Shubhra

SESSION 10: MATERIALS AND INNOVATIONS FOR DEEPWATER RELIABILITY AND AFFORDABILITY

Impact of H₂S Consumption and Anti-H₂S Layer on Flexible Pipe Design ......................................................... 556
Vidigal, J.; Taravel-Condat, C.; Meira, J.; de La Tour, P.
Effect of Hydrogen Bake-Out on Copper Plated Alloy 718 ............................................................................... 567
Kumar, Deepak; Xu, Zhiyue; Agosta, Paul; Bailey, Bill
Enabling Materials and Corrosion Technologies for Optimizing Offshore Developments ................................ 574
Wright, Eric J.
Nano-Enhanced Elastomers for Oilfield Applications .......................................................................................... 583
Dosleg, Rostislav; Ventura, Darrel; Khubhasheker, Valery; Daragar, Qusai
Development of Advanced Seal Material and Downhole Packer for High Temperature Applications ................. 594
Yu, Chengjian; Xu, Zhiyue; Shuy, Guoang-Ding; Prieto, Carlos
Exploration of Applications of Metallic Additive Manufacturing for the Oil and Gas Industry ......................... 604
Zhong, Allan; Orneltaz, Richard; Krishnan, Karthik
API 6A and 17D Bolting Stress Analysis and Fatigue Consideration ................................................................. 618
Lim, J. I.; Bunch, P.; Han, Y.

SESSION 11: PRODUCTION CHEMISTRY: MANAGING PHYSICO-CHEMICAL CHALLENGES TO UNLOCK VALUE

The Importance of Periodic Reassessment of Operational Strategies for Wax Management ................................ 645
Lavenson, David M.; Venkatesan, Rama; Young, Michelle K.; Keber, Neal
SESSION 12: STANDARDIZATION: A NEW WAY TO ACHIEVE PROJECT COST AND PLANNING

How Classification Societies Can Be Efficiently Involved in the Current Offshore Industry Cost Reduction Era .......................................................... 746
Jung, J. J.; Lee, I. H.; Chung, B. Y.; Kim, S. E.; Kim, S. H.

VOLUME 2

Standardization Benefits for Megaprojects, Illustrated by Motor and Drive Case Studies ...................................................................................... 784
Ward, Stephen; Jackson, Steve

Case Study: Fast Track Tieback Using Standardized Retrievable Modules For Subsea Enhanced Production Throughout Field Life ........................................................................... 795
Clukey, Edward C.; Zakeri, Arash

Improving Cost Efficiency in Floating Production Facilities: Semi-Submersible Design Standardization ........................................................................... 811
Hodapp, David; Ma, Wei; Wisch, David; Lee, Ming-Yao

Offshore Standardization Process and Criteria Development for EPC Project .............................................................................................. 821
Lee, Hoseong Daniel; Son, Jin-Seong; Kim, In-Ho; Jeong, Hak-Nam

SESSION 13: AUV SURVEYS: CASE STUDIES AND METHODOLOGIES

Project Cost Reduction and De-Risking with Large-AUVs for Hydrographic and Pipeline Surveys ........................................................................... 828
Ricketts, Leonard; Ordanze, Christopher

Record-Setting AUV Pipeline Inspection in Deepwater West Africa ................................................................................................................................. 832
Ghislis, S.; Fischer, E.

Time-Lapse Attempt Using AUV Survey Data in Geohazards Prone Area, Results and Lessons Learned ...................................................... 839
Unterseh, Stephan; Letatief, Walid

Time Lapse 4d Assessment of Shallow Water Seabed with Repeated Multi-Beam Hydrographic Surveys .......................................................... 847
Geldof, J. B.; Naankeu-Wati, G.; Labanne, C.

Bow-tie Analysis of Underwater Robots in Offshore Oil and Gas Operations .............................................................................................................. 858
Yu, M.; Venkidasaslapathy, J. A.; Shen, Y.; Quddus, N.; Mannan, S. M.

Effects of Data Resolution on Early-Stage Pipeline Route Selection ....................................................................................................................... 867
Tiffany, Justin M.; Devine, Christine A.

SESSION 14: RECENT ADVANCES IN OFFSHORE GEOTECHNICS

Recent Advances in Nonlinear Soil Models for Fatigue Evaluation of Steel Catenary Risers SCRs ..................................................................................... 875
Clukey, Edward C.; Zakeri, Arush

A Perspective on the State of Knowledge Regarding Soil-Pipe Interaction for SCR Fatigue Assessments ................................................................................. 891
Clukey, E. C.; Aubeny, C. P.; Zakeri, A.; Randolph, M. F.; Sharma, P. P.; White, D. J.; Sancio, R.; Cerkovnik, M.

Soil Model Assessment for Subsea Wellhead Fatigue Using Monitoring Data ........................................................................................................ 920
Mercan, Bulent; Chandra, Yenny; Campbell, Mike; Ge, Michael Long

A Toolbox for Optimizing Geotechnical Design of Subsea Foundations ............................................................................................................... 930
Gourvenec, S. M.; Feng, X.; Randolph, M. F.; White, D. J.

The State of Knowledge of Pipe-Soil Interaction for On-Bottom Pipeline Design ............................................................................................................. 969
White, D. J.; Clukey, E. C.; Randolph, M. F.; Boylan, N. P.; Bransby, M. F.; Zakeri, A.; Hill, A. J.; Jareck, C.

Plastic Limit Analysis of Laterally Loaded Piles and Wells Conductors in Soil Profiles with Crust ................................................................................. 996
Grajales-Saavedra, Francisco J.; Aubeny, Charles P.; Jeanjean, Philippe; Drew, Dane
Integrated Study of a Complex Seabed For the Stones FPSO..........................1017
Hadley, C.; Bradford, K.; Young, A.; Trundafir, A. C.; Bruce, B.

SESSION 57: OTC POSTER LOUNGE

Two-Stage De-Oiling Testing for Qualification with MEG Presence ..........................................................1030
Riesenberg, J. M.; Biega, Brandon; Tienhaara, Mike; Lammers, Bart; van Duren, Bent
Impact of Ultrafiltration on Sulfate Removal Unit Recovery, Availability and Cleaning Frequency ..................1041
Alam, Zamir; Boczkowski, Maciej; Khoo, Su Ann; Udhayarajavan, Perumal; Chaudhuri, Bhishna
Experimental Study on the Separator Performance With Various Droplet Distribution in High Watercut ..........1065
Kim, Sungwoo; Han, Junhee; Kim, Sunggyu; Im, Hyunam; Lee, Heesung; Choi, Jaesung
Modeling of a Full-Scale Horizontal Liquid-Liquid Separator under Conditions of Varying Flow Rate, Water Cut, and Viscosity with Experimental Validation..........................................................1080
McClenny, A. B.; Oriston, R. A.; Green, S. T.; Yiana, F.; Nelson, S. M.
Topside Engineering by Modular Simulation Models..............................................................................1090
Felorzabihi, Neda; Feng, Jeffrey; Shariat, Huss; Wilson, Michael
General Design of Lean MEG Storing in the Jacket Legs on Liwan Gas Field of South China Sea..................1098
Xia, Zhi; Jinlin, Hou; Li, Zhijun; Zhou, Xiaohong
Hybrid Compression Facility: Low Cost Unmanned Gas Compression.........................................................1108
Sage, Drew; Piegatskii, Michael; Grant, Andrew
HP/HT Sensor for Real-Time Downhole Density Measurement of Wellbore Drilling Mud............................1119
Hall, J. E.; Tilikos, N.; Worst, T.; Foster, R. B.; Pappas, J. M.; Long, B.
Recent Improvements in Subsea Wellhead Fatigue Monitoring Algorithm and Accuracy Using Verification and Calibration Techniques............................................................1126
Ge, Michael Long; Kehadze, Bubba; Henderson, John; Zakert, Arash
Development of Oil-In-Water Sensors for Subsea Produced Water Discharge and Re-Injection.....................1139
Zhang, Jeff; Yang, Ming; Seaton, Mark
The Application of Fibre Optic Instrumentation for HPHT Pipeline Bundle Health Monitoring.....................1156
Hendawy, Mostafa M.
Condition Monitoring Comes of Age for Subsea Production..............................................................................1181
Smedstad, Eric; Nilsen, Geir Werner; Bressaud, Jean-Yves
Qualitative Fault Tree Analysis of Blowout Preventer Control System for Real Time Availability Monitoring.......................1187
Matha, Mete; Arnold, Zev; Franchek, Matthew A.; Meraz, Jose

SESSION 17: WELL COMPLETIONS

Optimizing Proppant Surface Properties to Improve Formation Flow in Offshore Frac-Packs.............................1198
Bostanoui-Spurt, Naima; Stanley, David; Williams, Vanessa; Uwe, Marty; Nguyen, Hahm; Hoffmann, Erik
Concentric Fluid Loss Control Devices Increase Reliability of Subsea Dual-Zone Selective Intelligent Completions in the Deepwater GoM........................................................................................................1209
Ramnath, Lavrence; Gutierrez, William; White, Christine
Experimental Investigation of Propellant Fracturing in a Large Sandstone Block.............................................1229
Malhotra, Sahil; Rijken, Peggy; Sanchez, Alicia
The Qualification Methodology Behind an Integrated Multizone Frac Pack and Intelligent Completion for the Lower Tertiary...........................................................................................................................................1245
Jannise, Ricki; Ivany, Jonathan; Coffin, Maxime; Techtien, Bruce; Gregory, Gary; Craig, Steve; Perez, Eddie
Innovation in Reservoir-Driven Shaped Charges Enhances Productivity..........................................................1263
Zahlic, Stephen; Satt, Rajani; Betancourt, David; Harvey, William; White, Ryan; Sampson, Tim; Myers, William
Testing of a Novel Autonomous ICD with Low-Viscosity Multiphase Fluids.....................................................1280
Corona, Georgina; Yin, Weiqi; Fripp, Michael; Coffin, Maxime; Shahreyar, Noman
Riserless Light Well Intervention Restores Production on Oyo - 8 Subsea Well..................................................1294
Adenikekan, Adeokun; Marinho, Gregory; Ugboaja, Chidi; Batshe, Ayogbe; Nnebocha, Eziemhe; Ade-Aina, Oladeji

SESSION 18: THE STONES TURRITELLA FPSO

Stones Development: Turritella FPSO - Design and Fabrication of the World’s Deepest Producing Unit ..................1304
Moore, Blake; Easton, Andrew; Cabbara, Jonathan; Webb, Carl; George, Babu
Design of the Disconnectable Buoy Turret Mooring for the Turritella FPSO....................................................1319
Leverete, Steve; Carrico, Todd
The Stones Buoy Turret Mooring BTM: The Evolution of Design Leading to the Delivery of the Largest Buoy Ever Built........................................................................................................................................1335
Salem, A. G.; Connaulte, X. S.; Webb, C.
Model Test Campaign Overview for the Turritella FPSO for the Stones Field.....................................................1351
Carrico, Todd; Leverete, Steve
Ultra-Deepwater Production System: Model Test Study of Cylindrical FPSO in GoM Hurricane Conditions........1363
Vidic-Pernovic, J.; Lee, L.; Glommes, E. B.; Mercier, R. S.; Head, W. J.
Effect of Coupling of Mooring and Riser Systems and FPSO Roll Motions on the Design of Flexible Risers........1385
Rezende, Flavia; Vivas, Laiz; Carré, Allan
SESSION 19: HYDRATE MITIGATION METHODS: HEAT OR INHIBIT?

Pushing Conventional Boundaries of Hydrate Management in a Dry Tree Facility ................................................................. 1415
Kurup, Anjashri S.; Hernandez, Oris; Iken, Timothy; Tamora, Chris A.; Greenly, Leah; Anderson, Joseph

Hydrate Formation and Transportability Investigations in a High-Pressure Flowloop During Transient Shut-in / Restart Operations .......................................................................................................................... 1428
Srivastava, Vishal; Majid, Ahmad A.; Warrier, Pramod; Grasso, Giovanni; Chaudhari, Piyush; Dendy Sloan, E.; Koh, Carolyn A.; Wu, David T.; Zerpa, Luis E.

Mitigation of Hydrates Using Continuous KHI Injection in Deepwater GoM .................................................................................. 1440
Swank, L.; Kapadia, K. P.; Webber, P. A.; Jones, R.

Hydrate Management for Systems with High Salinity Brines at Ultra-High Pressures ................................................................. 1452
Sam, Amadou K.; Hu, Yue; Lee, Bo Ram; Karanjkar, Prasad; Gomes, Joseph; Kusinski, Greg

Gas Hydrate Management Strategies Using Anti-Agglomerants: Continuous & Transient Large-Scale Flowloop Studies ............................................................................................................................. 1463

A Novel Hydrate Strategy in a High Risk Hydrate Environment for a Fast Track Tie-in GoM Development ........................................ 1479
Uribe, Oscar; McDermott, Chris; Hudson, Adam

New Criteria of Hydrate Inhibitor Requirements in Tropical Shallow Waters .................................................................................. 1493
Meng, Weihong; Kak, Ashutosh

SESSION 20: INTEGRATED GEOPHYSICAL: ADVANCES IN METHODOLOGIES AND TECHNOLOGIES

Marine Seismic Acquisition Using Autonomous Marine Vehicles Towing 3D Sensor Arrays ................................................................. 1501
Pai, S.; Yandon, E.; Moldoveanu, N.

Use of Multibeam Echo Sounder MBES Backscatter and Bathymetry Data to Reveal New Insights into the Campeche Escarpment ........................................................................................................... 1516

Advances in GIS-Based 3-D Predictive Geotechnical Soil Model Tools ........................................................................................... 1525
Bruce, Brittany A.; Campbell, Kerry J.; Dean, Cornelia

A Submarine Full of Mercury ......................................................................................................................................................... 1533
Sparrevik, P. M.; Eek, E.; Klinkvort, R. T.; Eiksund, G. R.

VOLUME 3

Finding Safe Ground for Deepwater Development; Integrated Probabilistic Geohazard Assessment iPGA for Pipeline Routing and Facilities .............................................................................................................. 1550
Moore, Roger; Davis, Geoff

New Generation of Ultrasonic Technology for Cement Evaluation in Complex Environments .......................................................... 1560
Shaposhnikov, Pavel; Thierry, Sylvain; Lake, Patrick

Water Column Velocity Function for the Gulf of Mexico .................................................................................................................. 1575
Pryne, Daniel; Kacera, Michael; Gharib, Jamshid

SESSION 21: METOCEAN ADVANCES

Comparison of Current Measurements from Oceanographic Mooring and Unmanned Surface Vehicle .............................................. 1582
Yazarov, Maxim; Pai, Sudhir; Quinnow-Ramos, Valerie

Offshore Trinidad AWAC Wave Data Assessment .......................................................................................................................... 1591
Mendelsohn, D. L.; Fratantoni, R.; Hanson, J.; Bangs, A. S.; Whall, T.; Crosby, A. R.

Resolving the API RP 2MET Crest Conundrum for Wave-in-Deck Loading ................................................................................... 1607
Santal, Markka J.

Assessment of the Combined Hurricane and Loop Current/Loop Current Eddy Risk on Existing Mooring System .......................... 1623
Zhu, J.; Driver, D.; Petruska, D.; Xia, D.

Extrapolation of Subsurface Current Observations to the Sea Surface: Applicability and Limitations of Basic Algorithms ................................................................................................................................................ 1633
Agarwal, Puneet; Forristall, George

Non-Parametric Method for Estimating Extreme N-Year Profiles for Loop Current and Eddies .......................................................... 1646
Magne, B. A.; Ivanov, L. I.; Morrison, A. T.; Ramos, B. J.

Development of a Probabilistic Tropical Cyclone Track Uncertainty Cone Using Multi-Model Ensembles ........................................ 1658
Ort, Derek; Hebert, Chris; Weinzaepfel, Bob; Eyre, Devin
SESSION 22: BRINGING UPSTREAM PROJECTS TO FINAL INVESTMENT DECISION (FID)

Bringing Upstream Projects to Final Investment Decision................................................................. 1664
Kharuna, Sandeep; D'Souza, Richard; Yanocek, Kassie; Christ, Florian; Meeks, Parker

SESSION 24: COLLABORATIVE DEEPSTAR® GLOBAL OFFSHORE TECHNOLOGY

Gomes, Joseph; Kusinski, Greg; Shamshy, Shakir; Zimmerman, Evan

Asphaltene Deposition and Fouling in Reservoirs ....................................................................... 1681
Tavakoli, Mohammad; He, Peng; Lin, Pei-Hsuan; Rezaee, Sara; Puerto, Maura; Doherty, Rocio; Creek, Jefferson; Wang, Jianzhe; Kusinski, Greg; Gomes, Joseph; Chapman, Walter; Biswal, Sibani Lisa; Vargases, Francisco M.

Study of Anti-Agglomerant Low Dosage Hydrate Inhibitor Performance ...................................... 1695
Salmim, Davi Costa; Majid, Ahmad A. A.; Wells, Jonathan; Sloan, E. Deny; Estanga, Douglas; Kusinski, Greg; Rivera, Mayela; Gomes, Joseph; Wu, David T.; Zerpa, Luis E.; Koh, Carolyn A.

Methodology For Materials Selection Basis of Design, and Equipment Testing Criteria .................. 1712
Hausler, Rudolf H.; Krishnamurthy, Ravi; Gomes, Joseph; Kusinski, Greg

DeepStar® Global Offshore Technology Development Program 12504: Real-time Monitoring for Critical Barriers ................................................................. 1724
Mason, S. L.; Barnett, W. T.; Lewis, D. B.; Gomes, Joseph; Kusinski, Greg

DeepStar® Global Offshore Technology Development Program 12505 Analysis of Current Technology and Capabilities for Shearing ................................................................. 1733
Gomes, J.; Kusinski, G.; Freitas, F.

Deepwater Collaboration – DeepStar® Global Offshore Technology Development Program 12800 Metocean Committee ................................................................. 1740
Stear, James; Kusinski, Greg; Gomes, Joseph

SESSION 25: THE STONES DEEPWATER PROJECT: THE WORLD'S DEEPEST

Stones Development: World Class Safety Performance in Singapore ............................................ 1751
Lohr, Curtis; Penney, Ian

Offshore Construction – Installing the World's Deepest FPSO Development .................................. 1765
Webb, Carl M.; Yag, Marco van

Optimized Field Development Planning in the Frontier Paleogene .............................................. 1787
Varner, Marc; Pena, Maria

Stones Development: Best in Class Risk Reduction and Cost Improvement During Project Execution ................................................................. 1796
Pena, Maria; Lohr, Curtis

The Stones Project: Subsea, Umbilical, Riser and Flowline Systems ........................................... 1801
Hoffman, Joe; Clausing, Katrina; Robinson, Stuart; Subramanian, Pravin; Zummo, Ashley

Stones Development: A Pioneering Management Philosophy for Enhancing Project Performance and Safety ................................................................. 1821
Lohr, Curtis; Pena, Maria

Driving for Competitive and Affordable Projects in the Gulf of Mexico ........................................ 1837
Pledge, David De; Pereiras, Andrew; Bryson, Bill; Orlean, Robert

SESSION 26: IMPACT OF US SHALE SWING PRODUCTION ON DEEPWATER DEVELOPMENT AND THE GLOBAL ENERGY LANDSCAPE

Case Histories: Improved Hydraulic Fracturing Design in a Constrained Oil Price Environment ................................................................. 1845
Johnson, Matthew

The Value of Pressure Relief in Hydraulic Fracturing Operations ................................................ 1850
House, Ryan; Pry, Mike; Pletcher, Jason

Degradable Thermoset Polymer Composite for Intervention-Less Downhole Tools .................... 1865
Khatiwada, Suman; Duan, Ping; Garza, Ramon; Sadana, Anil K.

Novel Degradable Polymeric Composite Balls for Hydraulic Fracturing ..................................... 1871
Garza, Ramon; Sadana, Anil; Khatiwada, Suman; Duan, Ping

Unconventional Shale Gas Development in Saudi and Algeria - Assessment Using USA Key Success Factors Framework .................................................................................. 1882
Zeil, A.; Lee, J.

Interaction between Proppant Packing, Reservoir Depletion, and Fluid Flow in Hydraulic Fractures ................................................................. 1913
Fan, Ming; McClure, James; Han, Yanhai; Li, Zhe; Chen, Cheng

SESSION 27: HEALTH, SAFETY, AND ENVIRONMENT APPROACHES AND ASSESSMENTS

Risk-Based Asset Management: Global Implementation .................................................................. 1932
Supry, J.; Schwartz, T.
The Impact of Lubrication on Safety ................................................................. 1939
A Holistic Approach to Sustainable Operational Risk Assessments in Oil and Gas Industry ............................................................ 1950
Laskar, Sandipan
HSE Management System Effectiveness – A New Approach to Realize Continuous Improvement .............................................................. 1958
Eseddin, H. Sam
An Innovative Regional Approach to the Analysis of Hurricane Impact on Offshore Platforms .......................................................... 1967
Dubois, R.; Cuny, J.; Kervella, Y.
ER: Are We Really Keeping People Safe? ................................................................. 1980
Edwards, Richard; Skiba, Albert
Making the Most of Probabilistic Marine Forecasts on Timescales of Days, Weeks and Months Ahead ......................................................... 1985
Steene, Edward; Neal, Robert; Bunney, Christopher; Evans, Benjamin; Fournier, Nicolas; Gill, Philip; Mylne, Kenneth; Sautier, Andrew

SESSION 28: NEW DEVELOPMENTS IN MARINE MINING

Data Mining the Red Sea Atlantis II Deep ................................................................. 1993
Brueckmann, W.; Kraetschell, A.; Augustin, W.
Development of a Flexible Pipe for Deep Sea Mining .............................................. 2003
Bongas, J.; Viale, S.
Long-Term Abrasion Test for Seabed Mining Hose Liners ....................................... 2016
Neale, Peter; Nagy, Tibor; Grepal, Istvan; Toth, Peter; Kristof, Gergely; Csoe, Atilla
Numerical Simulation of Water and Sand Blowout When Drilling through Shallow Water Flow Sediments During Deepwater Drilling .............................................. 2025
Gong, Zhizh; Ren, Shaoran; Zhang, Liang; Zhang, Panfeng; Xu, Yan; Yu, Lu
Shallow Gas and Shallow Water Flow Induced by Natural Gas Hydrate Dissociation in Deep Water Sediments ............................................................... 2037
Creation of an ARM Cortex-M Based Microcontroller for Downhole Electronic Systems ................................................................. 2048
Bannatyne, R.; Gifford, D.; Klein, K.; Merritt, C.; Neddermeyer, S.

SESSION 58: OTC POSTER LOUNGE

Adding Thousands of Barrels for Little Cost in a Gulf of Mexico HPHT Deepwater Field, an Effective System Modelling & Optimization Case Study ................................................................. 2056
Ogugbue, Chineye; Pietrobon, Marney; Stewart, Charles; Davivier, Giles; Macnamara, Robert; Bishop, Simon
Design Verification and Load Estimation of Subsea Wellhead in HPHT Applications ................................................................. 2064
Chang, Gao-Ang; Liu, Meng-Liang; Song, Hao
Cost-Effective HPHT Design Methods Using External and Seawater Depth Pressures ................................................................. 2073
Pathak, Parth D.; Ponnamput, Padmanabhan
Material Characterization Procedure for High Pressure High Temperature Applications Using API 17TR8 Criteria ................................................................. 2084
Bunch, Paul; Chadek, Steven; Bajvani, Arshad
Managed Pressure Cementing in HPHT Utilizing Real Time Pressure Estimation and Control Software – A Case Study ................................................................. 2096
Sawlesi, Piotr; Lu, Jenny Yan; Hoffmeeen, Thomas B.
Horizontal Wave Impact Loads for Column-Stabilized Units Operating in Harsh Environment ................................................................. 2109
Seale, Piotr; Lu, Jenny Yan; Hoffmeeen, Thomas B.
Air Gap on Semisubmersible MODU Under DNVGL Class - Current & Future Design Practice ................................................................. 2122
Pessoa, J. M.; Moe, A. M.
Determination of Rational Robustness Criteria for FPSO Design ................................................................. 2136
Carra, C.; Potts, A. E.; Johnstone, D.; Kilner, A. A.
Seismic Response Spectrum in Lieu of Time History Analysis for Subsea Structure Design ................................................................. 2152
Wang, George; Loh, Michelle; Peng, Yen-Tun; Shen, Joanne; Genesis, P. E.; Malachowsky, Jim
Underwater Precast Reinforced Concrete Silo For Oil Drilling and Production Applications ................................................................. 2162
Mahmoud, Mostafa H.
Assessing the Variability in Intensity and Width of the Loop Current Eddy High Speed Band from Airborne Ocean Surface Current Measurements ................................................................. 2170
Schiller, R. V.; Zhang, M.; Smith, R.; Medina, M.; Williams, B.
Technology Development Journey of Deepwater Technologies Portfolio ................................................................. 2181
Batra, Rajan; Miranda, Crystal; Ozawa, Ichiro
Majed, Aryan; Yu, Flora; Chinello, Luca; Cooke, Nathan; Gomes, Joseph; Kusinski, Greg
Development of Sour Service Corrosion Resistant High Strength Steel Pipe Grades at TMK ................................................................. 2220
Fandu, D.; Luoh, T.; Mohrske, R.; Minckley, D.
Nanotechnology-Based Solution for Offshore Zinc Removal Water Treatment Technology ................................................................. 2229
Yen, Nan; Murugan, Sankaran; Kuznetrov, Oleksandr; Mazayr, Oleg; Khabasheshko, Valen; Daragar, Qasai
Gas Hydrate Formation in High Water Content Systems Containing Anti-Agglomerant and Salt ................................................................. 2235
A Majid, Ahmad A; Branniff, Martin; Creek, Jefferson; Koh, Carolyn A; Kusinski, Greg; Gomes, Joseph
SESSION 30: WELL ABANDONMENT AND DECOMMISSIONING CHALLENGES

Flow Assurance During Deepwater Gas Well Testing: Addressing Hydrate Associated Problems at Reduced Cost
Zhao, Yang; Wang, Zhiyuan; Zhang, Jianbo; Pan, Shaoxue; Yu, Jing; Sun, Baojiang

SESSION 31: ADVANCEMENTS IN OFFSHORE DRILLING TECHNOLOGY

Johan Sverdrup. Creating a Unique Environment for Successful Drilling Operations in an Accelerating Spotlight
Project
Tønnessen, Tor; Jones, Barry; Henrikson, Knut; Gloppen, Trond

SESSION 32: UNCERTAINTY OF LABORATORY MEASUREMENTS: CHALLENGES FOR OFFSHORE FIELD DEVELOPMENT

Characterization of Wet Gas Flows
Subramani,Hariprasad J.; Sambath, Krishnaraj; Rhyne, Lee D.; Nadge, Pankaj; Vedapuri, Damodaran

Kinetics of Fluid Phase Behavior Changes: A Critical Uncertainty for Offshore Field Development
Levenson, David M.; Kelkar, Aniruddha V.; Joshi, Nikhil; Portman, Lance

H2S Losses in Reservoir Fluid Sample Chambers – A Case Study
Khan, Iftikhar; Nighswander, John; Pommintysey, Joseph; Stankiewicz, Artur; Okoh, Bruno; Ashokkar, Sunil; Pollard, Richard

The Relevance of Chemistry in Deepwater Design and Operations
Joshi, Nikhil B.; Li, Qiwei; Kapadia, Kashyap

Gaseous Calibration Standards: Manufacturing, Stability, Traceability and Uncertainty
Jacksier, A Tracey; Weterings, Werner

Asphaltene Onset Pressure Uncertainty and Other Asphaltene Issues in Field Development Planning
Damont, Hadrien; Garcia, German; Mullins, Oliver C.; Nighswander, John; Mishra, Vinay K.; El-Khoory, Yutes; Chen, Li; Lake, Patrick

Evaluation of Flowloop Uncertainty with Live Hydrocarbon Process Fluids for Multiphase Flowmeters Validation
Amin, A.; Harsono, E.; Kamies, E.; Heyen, G.; Vox, G. De
**SESSION 34: MORRING SYSTEM RELIABILITY AND INTEGRITY MANAGEMENT**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>

</table>
SESSION 45: WELL CEMENTING

Development of Nanotechnology Pipe Treatment to Improve Acoustic Cement Evaluation
Heathman, James; Fuller, George; Taylor, Rebecca; Arumugam, Ganesh; Sullivan, Patrick; Thapa, Sumil; Veedu, Vinod

Development and Validation of a Hydraulics Simulator for Estimating Subsurface Reverse Cementing Placement Pressures
Wreden, C.; Simpkins, D.; Sharma, R.; Deshpande, K. M.; Patkar, V.; Fuller, G. A.; Jee, B.; Mercado, S.

Systematic Use of Real Time Data Analysis for Primary Cementing and Cement Job Verification
Gomes, Paulo J.; James, Mark; Therond, Emmanuel

Defining the Difference Between Laboratory and Field-Generated Foamed Cement
Cunningham, Eric; Heathman, James; Kutcho, Barbara; Benge, Glenn; Masson, Joe; DeBruijn, Gunnar; Biford, Charles

Smart Bentonite Drilling Muds Modified with Iron Oxide Nanoparticles and Characterized Based on the Electrical Resistivity and Rheological Properties with Varying Magnetic Field Stresses and Temperatures
Vpulpanadan, C.; Mohammed, A.; Samuel, R. G.

Use of Surfactant in Cement Slurry to Mitigate Incompatibility with Synthetic-Based Drilling Fluids
Pereira, R.; Cardozo, J.; Bogaerts, M.; McNulty, J.; Lehr, J.; Santos, L.

Low-Temperature Dispersant Improves Cement Slurry Properties in Deepwater Operations
Diarra, R.; Bogaerts, M.; Andrews, H.; Lehr, J.; Osteen, N.; Cammarata, R.

SESSION 46: BIG DATA ANALYTICS

Assessment of Data-Driven, Machine Learning Techniques for Machineries Prognostics of Offshore Assets
Lu, Ping; Liu, Haitao; Serratella, Christopher; Wang, Xiaochi

A Class Based Approach for Utilizing Existing Data to Demonstrate Compliance and Equipment Availability
Torstensen, Arne John, Michael

Applying Real Time Data Analytics to Early Detecet Underreamer Failure During Hole Enlargement While Drilling at Deepwater Gulf of Mexico
Wu, Xianping; Liu, Yu; Martinez, Manny
Coast Case Study of a Customized Solution for Intervention Operations to Increase Well Production

Transforming Decommissioning Planning

SESSION 49: ADVANCES IN ABANDONMENT AND DECOMMISSIONING TECHNOLOGIES

Intervention and Abandonment - Riserless Productive Zone Abandonment Using Epoxy Resin

We're Stuck: Efficient Casing Removal for Well Abandonment Applications

Heavy Lift Dynamics, Sewol Ferry Offshore Salvage

A Practical Approach to Multiwell Decommissioning

Transforming Decommissioning Planning

SESSION 47: TECHNOLOGY DEVELOPMENT AND MATURATION

Comparison of Technology Qualification Approaches

A More Holistic Approach to Oilfield Technology Development

Industry Applications for Additive Manufacturing

Accelerated Innovation as the Great Enabler for Well Completions - Tools for Cheaper, Safer and Faster Ways of Completing Wells

A New Salinity Measurement System for Formation Water Detection - Test Results from the Qualification Process

Piloting the ADNOC Group Process for New Technology Development and Qualification

Low-Adhesion Coatings as a Novel Gas Hydrate Mitigation Strategy

SESSION 48: MARINE RENEWABLE ENERGY

Wave Energy Converters and Tidal Energy Converters Road to Commercial Viability

Cost Effective Offshore Concepts - Compact Semi-Submersible - A New Concept of Windfarm Service Operations Vessel

SESSION 49: ADVANCES IN ABANDONMENT AND DECOMMISSIONING TECHNOLOGIES

Intervention and Abandonment - Riserless Productive Zone Abandonment Using Epoxy Resin

Wellhead Fatigue Monitoring During Subsea Well Plug and Abandonment Activities

We're Stuck: Efficient Casing Removal for Well Abandonment Applications

Heavy Lift Dynamics, Sewol Ferry Offshore Salvage

A Practical Approach to Multiwell Decommissioning

Transforming Decommissioning Planning

Case Study of a Customized Solution for Intervention Operations to Increase Well Production
SESSION 50: FLOW ASSURANCE IN PROJECTS: THE KEY DISCIPLINE FOR SUB USD 50 OIL PRICE WORLD

A Review of Hydrate Formation for Partially Dispersed Systems in Multiphase Flow Conditions and the Detection of Hydrate Deposits .................................................................................................................................................................................. 4026
Majid, Ahmad A. A.; Grasso, Giovanni; Creek, Jefferson L.; Qin, Hao; Charloon, Thomas; Estanga, Douglas; Rivero, Mayela; Bhosa, Ben.; Watarruscha, Amaka; Volk, Mike; Koh, Carolyn A.

Managing Liquid Accumulation in Large Diameter Gas-Condensate Pipelines ................................................................................................................................................................................................................................................. 4038
Zakarian, E.; Morgan, J. E. P.

Workflow to Evaluate Wax Deposition Risk Along Subsea Production Systems ........................................................................................................................................................................................................................................ 4053
Coronado, O.; Kak, A.

Comprehensive Experiments and Modelling Reduces Uncertainties in Liquid Management for the Tanzania Gas Project ........................................................................................................................................................................................................................................ 4061
Bibiano, R.

Optimization of Flow Assurance Applications Through Life-of-Field: An Integrated Approach to Production Engineering and Chemical Management Across Gulf of Mexico Deepwater Assets ........................................................................................................................................................................................................................................... 4083
Arceiro, B.

Development of Low-Corrosivity Scale Inhibitors for Low Alloys Steels ........................................................................................................................................................................................................................................ 4101
Bhandari, Manojkumar; Littlehales, Ian; Linares-Samaniego, Sandra; Christmas, Renaldo; Mancunto, Sebastian

Technical Feasibility Study of Advanced Tomography Sensor for Inspection in Piggable Flowlines ........................................................................................................................................................................................................................................ 4111

SESSION 51: ALTERNATIVE OFFSHORE GAS MONETIZATION

cMIST™: Novel, Compact Dehydration System for Reducing Size and Weight ........................................................................................................................................................................................................................................... 4121
Ramkumar, Shweta; Grave, Edward J.; Larthon, Per-Reidar; Therens, Danny

Liquefaction Technologies and Mechanical Drive Considerations for Floating LNG ........................................................................................................................................................................................................................................ 4135
Tierling, Shane; Attaway, Doug

Comparative Economic and Technical Evaluation of AG FGTL Floating Gas to Liquid Vessel vs. AG FLNG ........................................................................................................................................................................................................................................ 4146
Nguyen, Xuan Chi; Mihayee, Komla; Shim, Woolyong; Lee, Charles

Application of Gas Industrial Technologies Offshore .............................................................................................................................................................................................................................................. 4166
Saavedra, Carlos G.

Optimization of Nitrogen Liquefaction Cycle for Small/Medium Scale FLNG ........................................................................................................................................................................................................................................ 4192
Kim, Munypus; Mihayee, Komla; Min, Junho; Lee, Donghun; Park, Hyunki; Lee, Jonghun; Nguyen, Xuan Chi; Rees, Cees de; Kim, JungHoon; Jang, Jungmoon

A Revolutionary Hybrid Solution to the Grand Challenge of Developing Deepwater Stranded Gas ........................................................................................................................................................................................................................................ 4203
Moore, Richard

Driver Selection for Refrigerant Compressor for Small Scale FLNG .............................................................................................................................................................................................................................................. 4211
Kumar, Balesh; Jang, Jungmoon

SESSION 52: WELL LOGGING

Advanced Petrophysical Evaluation of a Low-Resistivity Laminated Shaly Sand Formation Showed Significant Increase in Reserves Calculations .............................................................................................................................................................................................................................................. 4220
Kotharkarch, Atlas; XiaoXuan, An; Duss, Eric

Development of Transducer and Electronics Technology for an LWD Ultrasonic Imaging Tool ........................................................................................................................................................................................................................................ 4235
Leonard, Z. S.; Rahman, S.; Steiniesiek, R. R.

Petro-Physically Driven Quality Control of Dielectric Logging ........................................................................................................................................................................................................................................... 4254
Kouchmeshkly, Babak; Fanini, Otto

Selective Perforation and Design of Multi-Pattern Infill Wells in Field Development Planning and Optimization Under Geological Uncertainty .............................................................................................................................................................................................................................................. 4265

Kscheisndyer, Peter; Guillory, Gordon; Hodges, Claire; Carroll, Landon; Wilson, Matthew

New Dual Digital On-Command Under Reamer Solution Performed Multiple Activation Cycles in Challenging Exploration Well Not Compromising Acoustic Measurements .............................................................................................................................................................................................................................................. 4290
Grymadowsk, S.; Heritzius, J.; Schimanski, M.

Real-Time Monitoring and Diagnoses on Deepwater Cement Barrier Placement: Case Studies from the Gulf of Mexico and Atlantic Canada .............................................................................................................................................................................................................................................. 4302
Contreras, Jose; Bogaerts, Martijn; Griffin, Dave; Rodriguez, Faiber; Sianipar, Sakti; Filliar, Vitor; Taoutoua, Salim

SESSION 53: LOWERING FIELD DEVELOPMENT COSTS

US Shale Revolution Impacts on Deepwater and Global Energy Landscape .............................................................................................................................................................................................................................................. 4313
Chin, Y. Doreen; Roark, Terren
Cost Savings Associated with Improved VIM Prediction Accuracy........................................................................................................4333
Antony, A.; Paramabath, A.; Yue, B.; Man, K.; Theios, R.

Construction Management – A Simplified Approach.........................................................................................................................4350
Cohen, Jexica; Obi, Chuwuemeka

Case Studies of Industrial Standardizing and Cost Efficient Offshore Concept........................................................................................................4358
Wang, Ainin; DaSilva, Otto; Trelemnich, Owen

Great Australian Bight: New Offshore Frontiers, Challenges and Potential Solutions..........................................................................................4369
Woodham, C. A.; Heshmati, E.; Raskin, A. C.

A Low Motion FPSO Design Hosting SCR and TTR in Harsh Environment................................................................................................4388
Mansour, Ali; Wu, Chanfei; Peng, Cheng; Zuccolo, Riccardo; Bagaria, Ashish; Bhat, Shankar; Yu, Jin; Sung, Hong Gun

SESSION 54: LIFE EXTENSION CHALLENGES AND CASE STUDIES

Reliable and Accurate Determination of Life Extension for Offshore Units.................................................................................................4399
Boutrot, Jonathan; Giorgiutt, Yann; Rezende, Flavia; Barras, Steven

SCR Life Extension through Managed Shape Change.............................................................................................................................4413
Santala, M. J.; Constantinides, Y.; Koska, R.; Krapf, C.; Walters, D. S.

Thriving in a Low-Oil Price Environment - Ursa Asset..............................................................................................................................4427
Fairburn, Mike; Henson, Troy

Neptune Spar Life Extension Assessments........................................................................................................................................4446
Hua, David; Paradkar, Mayuresh; Garcia, Sharon; Young, Sam; Hegelin, Pui; Webb, Tyler; Farmakakis, Kim

Genesis Spar Continued Service - A Case Study.................................................................................................................................4461
Gallagher, Daniel J.; Abadin, Jose A.; Madden, Daniel J.

Collective Summary of DeepStar® Accomplishments within Continued Service...........................................................................................4475
Gomes, Joseph; Kusinski, Greg

Obsolescence Management: Adopting a Risk-Based Approach to optimizing Equipment Availability and Asset Lifecycle Extension........................................................................................................4482
Memletison, D. T.; Zemghoum, J. T.; Nsajuba, C. E.; Aiyerogun, A. A.; Eshkohb, B. I.; Erubetine, A. V.

SESSION 55: OFFSHORE WIND ENERGY

Estimating Natural Frequencies of Monopile Supported Offshore Wind Turbines Using Alternative P-Y Models........................................4497
Senanayake, Ashitha; Gilbert, Robert B.; Manuel, Lance

Response of Vertically Loaded Centrifuge Suction Caisson Models in Soft Clay..........................................................................................4508
Wallace, J. F.; Rutherford, C. J.

Mooring System Considerations for Renewable Energy Standards........................................................................................................4516
Cribs, A. R.; Kärsten, G. R.; Shelton, J. T.; Nicol, R. S.; Stewart, W. P.

Quantification and Modelling of the Dynamic Wake Effect for Floating Offshore Wind Turbines..................................................................4534
Singapore Wala, Abdulquddar Aziz; Ng, Eddie Yin-Kwee; Buhagani, Anand; Srikanth, Narasimalu

Top 10 Alternative Technologies for Offshore Power Generation: How Viable Are They?........................................................................4546
Srivastava, Ashesh; Chin, Y. Doreen

Fixed Platforms at Ageing Oil Fields - Feasibility Study for Reuse to Wind Farms..................................................................................4564
Barros, J. C.; Fernandes, G. C.; Silva, M. Miguel; Da Silva, R. P.; Santos, B.

Applying Risk Management Principles to the CVA Process in Offshore Wind Farm Projects.................................................................4582
Adams, Thomas G.; Byars, Rain

SESSION 56: MARINE ARCHAEOLOGY

Chemical Mapping in Marine Archaeology: Defining Site Characteristics from Passive Environmental Sensors..............................................4589
Swanson, Eric

Geomagnetic Storms in Marine Magnetometer Data at Low Latitudes......................................................................................................4596
Carrier, B. M.; Heinz, M.

Managing Missteps: Complications with Marine Magnetometer Surveys and Data Interpretation..........................................................4604
Haddock, Daniel A.

Towards a Global Public-Private Protection Model...............................................................................................................................4610
Faulk, Kimberly L.; Fucik, Ken; Varmer, Ole; Wachtman, Shelley

Supplying Additional Power Subsea Through Intervention ROV Systems.................................................................................................4615
Restivo, A.; Glenn, C.; Williams, L.

Design and Installation Monitoring Experience of Large Diameter Monopiles for Offshore Wind Farm in Highly Variable North Sea Soil Conditions..................................................................................................4623
Thumann, V. M.; Yetginer-Tjelta, T.; Van Foeken, R. J.

Soil Sensitivity Studies for Fixed Offshore Platforms..........................................................................................................................4642
Akinci, N. Onder; Wang, Wensong; Kumar, Abhisaynu; Proietto, Alban; Simoni, Steve

Author Index
