TABLE OF CONTENTS

PART 1

Design Strategy of a Compact Unglazed Solar Thermal Facade (STF) for Building Integration Based on BIM Concept .......................................................................................................................... 1
Jingchun Shen, Xinxing Zhang, Tong Yang, Llewellyn Tang, Yupeng Wu, Song Pan, Jinhua Wu, Peng Xu

Effect of Divergent Chimneys on the Performance of a Solar Chimney Power Plant .......................................................................................................................... 7
Siyang Hu, Dennis Y. C. Leung, Michael Z. Q. Chen

TEG Maximum Power Point Tracking Using an Adaptive Duty Cycle Scaling Algorithm ......................................................................................................................... 14
Trevor Hockeun Kwan, Xiaofeng Wu

Investigation of Device Performance for Recycling Double-pass V-corrugated Solar Air Collectors ........................................................................................................ 28
Chi-Dong Ho, Ching-Fang Hsiao, Hsuan Chang, Yi-En Tien

Microwave Torrefaction of leucaena to Produce Biochar with High Fuel Ratio and Energy Return on Investment ............................................................................ 35
Yu-Fong Huang, Pei-Hsin Cheng, Pei-Te Chiu, Shang-Lien Lo

Microwave Pyrolysis of Lignocellulosic Biomass .......................................................................................................................... 41
Shang-Lien Lo, Yu-Fong Huang, Pei-Te Chiu, Wen-Hui Kuan

Evaluation of CHP for Electricity and Drying of Agricultural Products in a Nigerian Rural Community ............................................................................................................. 47
Peishu Wu, Xiaoming Ma, Junping Ji, Yunrong Ma

Analysis of the Impact of Wind on Electricity Prices Based on Selected European Countries ................................................................................................................. 55
Krzysztof Badyda, Maciej Dylik

Non-catalytic Hydrothermal Liquefaction of Biomass: An Experimental Design Approach ....................................................................................................................... 75
Flabianus Hardi, Mikko Mäkelä, Kanio Yoshikawa

Direct Conversion of Bio-syngas to Gasoline Fuels over a FeOx/C Fischer-Tropsch Synthesis Catalyst .................................................................................................. 82
Junling Tu, Mingyue Ding, Tiejun Wang, Longlong Ma, Yongqiang Lu, Shimin Kang, Gang Zhang

Building Integrated Photovoltaic Thermoelectric Wall System: Balancing Simulation Speed and Accuracy ................................................................................................. 88
Yongqiang Luo, Ling Zhang, Zhonghong Liu, Jing Wu, Xiliang Wang, Lei Xie, Xiu Xu, Xiaohui Lv

Optimal Control of Hydrokinetic-powered Pumpback System for a Hydropower Plant in Dry Season: A Case Study ............................................................................. 94
Fhazhil Wamalwa, Sam Sichilalu, Xiaohua Xia

Catalytic Effects of the Typical Alkali Metal on Gaseous Products Distribution and Char Structure During Co-pyrolysis of Low Rank Coal and Lignocellulosic Biomass .......................................................................................................................... 102
Zhiquang Wu, Wang Cai Tang, Lin Chen, Haiyu Meng, Jun Zhao, Shuzhong Wang

Fuel Property Variation of Biomass Undergoing Torrefaction .......................................................................................................................... 108
Yan-Chen Chen, Wei-Hsin Chen, Bo-Jih Lin, Jo-Shu Chang, Hwai Chyuan Ong

Topological Structure of Large-scale Photovoltaic Array and its MPPT Controlling Method ................................................................................................................... 113
Bao-Li Tang, Zhou Wu, Yan-Jun Fang

Study of Static and Dynamic Performances of Miniature Savonius-type Wind Energy Harvesters ............................................................................................................. 119
Nuoamin Han, Xinyan Li

An Experimental Study of the Rheological Properties and Stability Characteristics of Biochar-Algae-Water Slurry Fuels .......................................................................................................................... 125
Pengfei Liu, Mingming Zhu, Tee-Kwong Leong, Yang Zhang, Zhezi Zhang, Donghe Zhang

Prototype of Dense-array Concentrator Photovoltaic System Using Non-imaging Dish Concentrators and Cross Parabolic Concentrator .......................................................................................................................... 131
Kok-Kaung Chong, Ting-Keat Yew, Chee-Woon Wong, Meng-Hui Tan, Woei-Chong Tan, Boon-Han Lim, An-Chow Lai

Combustion and Emission Characteristics of a Spark Ignition Engine Fuelled with Biogas from Two-Phase Anaerobic Digestion (T-PAD) .......................................................................................................................... 137
Yang Zhang, Mingming Zhu, Zhezi Zhang, Donghe Zhang

Characterisation of Asphaltenes Extracted from an Oil Sand and Two Petroleum Vacuum Residues Using HRTEM .......................................................................................................................... 143
Yuan Qin, Eric Hu

Jiyun Qin, Eric Hu

Thermogravimetric and Online Gas Analysis on Various Biomass Fuels .......................................................................................................................... 155
Wenwan Zhang, Till Henschel, Ulf Söderlind, Khanh-Quang Tran, Xu Han

A Game Theory Analysis of China’s Agri-biomass-based Power Generation Supply Chain: A Co-operation Strategy .......................................................................................................................... 168
Xingping Zhang, Kaiyuan Luo, Qinliang Tan
Thermo-economic Assessment of an Externally Fired Hybrid CSP/biomass Gas Turbine and Organic Rankine Cycle
Towards Zero Energy School Building Designs in Hong Kong
Hole Blocking Layer-Free Perovskite Solar Cells with Over 15% Efficiency
Thermal Properties and Solar Collection Characteristics of Oil-based Nanofluids with Low Graphene Concentration
Mechanical Properties of Stratified Hydrate-bearing Sediments
Effect of Wet Torrefaction on Thermal Decomposition Behavior of Microalgae Chlorella vulgaris ESP-31
Integral Performance of SRF and Carbonization Plant for Small Forestry Farms
Fast Hydrothermal Liquefaction of Native and Torrefied Wood
Influence of Porous Media on Methane Hydrate Formation from Ice Powders
CFD Simulation of an Intermediate Temperature, Two-phase Loop Thermosiphon for Use as a Linear Focus Solar Receiver
Economic Evaluation of Biodiesel Production from Palm Fatty Acid Distillate Using a Reactive Distillation
Geothermal Energy Extraction from Abandoned Wells
Numerical Studies of Methane Gas Production from Hydrate Decomposition by Depressurization in Porous Media
Mathematical Modelling and Statistical Approach to Assess the Performance of Anaerobic Fixed Bed Reactor for Biogas Production from Piyungan Sanitary Landfill Leachate
Technological Evaluation of Municipal Solid Waste Management System in Indonesia
Study of Cultivation Under Different Colors of Light and Growth Kinetic Study of Chlorella Zofingiensis Dönz for Biofuel Production
Oil Algae Extraction of Selected Microalgae Species Grown in Monoculture and Mixed Cultures for Biodiesel Production
A Model and Experimental Study of an Improved Pendulor Wave Energy Converter
Enhanced Electro-Catalytic Process on the Synthesis of FAME Using CaO from Eggshell
Hydrothermally-treated Empty Fruit Bunch Co-firing in Coal Power Plants: A Techno-Economic Assessment
Enhanced Process Integration of Entrained Flow Gasification and Combined Cycle: Modeling and Simulation
An Optimization Model for China's Emission Reduction Resulting from the Shift to Wind Power
Performance Evaluation of Vacuum Photovoltaic Insulated Glass Unit
The Synergy Mechanism of Promoting Renewable Energy Consumption in China
Termination Control Temperature Study for an Air Source Heat Pump Unit During Its Reverse Cycle Defrosting
Experimental Investigation on a Solar/Hydrogen-Based Microgrid
Computational Analysis of an Early Direct Injected HCCI Engine Using Bio Ethanol and Diesel Blends as Fuel
Early Injected PCCI Engine Fuelled with Bio Ethanol and Diesel Blends – An Experimental Investigation
Performance Simulation of a Small-scale Heliostat CSP System: Case Studies in Italy
Tower Load Analysis of Offshore Wind Turbines and the Effects of Aerodynamic Damping

Antonio M. Pantaleo, Sergio M. Camporeale, Ado Milioli, Valeria Russo, Giacomo Scarascia Mugnozza, Christos N. Markides, Nilay Shah
Siewei Lou, Ernest K. W. Tsang, Danny H. W. Li, Eric W. M. Lee, Joseph C. Lam
Lingling Zheng, Yingchuan Ma, Yuantian Wang, Lixin Xiao, Fengyun Zhang, Hongxing Yang
Ning Wang, Guoying Xu, Shuhong Li, Xiaosong Zhang
Tingting Luo, Weiguo Liu, Yanghui Li, Yongchen Song, Qi Wu, Zhaoran Wu
Quang-Yu Bach, Wei-Hsueh Chen, Shih-Cheng Lin, Heng-Raang Sheen, Jo-Shu Chang
Andrea Maria Rizzo, Marco Pescaroli, Matteo Prussi, Renato Nistri, Luigi Puri, Davide Chiaramonti
Khánh-Quang Trân, Áksei Junge Klemitsd, Wennan Zhang, Judit Sandquist, Liang Wang, Øyvind Skreiberg
Zeng Wang, Weiguo Liu, Yanghui Li, Yongchen Song, Mingyun Yang, Lei Wang
Weilong Zhang, Lin Lu, Xi Chen
Arif Darmawan, Flabianus Hardi, Kusno Yoshikawa, Muhammad Aziz, Koji Tokimatsu
Arif Darmawan, Dwika Budianto, Muhammad Aziz, Koji Tokimatsu
Hanifrahmawan Sudibyo, Yano Surya Pradana, Thoriq Teja Samudra, Arief Budiman
Yano Surya Pradana, Hanifrahmawan Sudibyo, Eko Agus Sayono, Indarto, Arief Budiman
Zhanhong Wan, Honghao Zheng, Ke Sun, Kian Zhou
Badi Syah Putra, Ardia Liyomin, Nadiia Arefia, Erlina Puspitasari, Sawalludin, Muhammad N. Hizam
Marius Røksland, Tommy A. Basmoen, Dan Sui
Minghao Yu, Weizhong Li, Mingjun Yang, Lanlan Jiang, Yongchen Song
Zhanhong Wan, Honghao Zheng, Ke Sun, Kian Zhou
Hanifrahmawan Sudibyo, Yano Surya Pradana, Thoriq Teja Samudra, Arief Budiman
Nilay Shah, Antonio M. Pantaleo, Sergio M. Camporeale, Ado Milioli, Valeria Russo, Giacomo Scarascia Mugnozza
Xiong Liu, Cheng Lu, Gangqiang Li, Ajiit Godbole, Yan Chen
M. A. Ancona, M. Bianchi, L. Branchini, A. De Pascale, F. Melino, A. Peretto
S. Natarajan, M. Akshay Kumar, A. U. Meenakshi Sundareswaran
S. Natarajan, S. Abhinav Shankar, A. U. Meenakshi Sundareswaran
Maximiliano Renzi, Lorenzo Egidi, Luca Cioccolanti, Gabriele Comodi
Xiong Liu, Cheng Lu, Gangqiang Li, Ajiit Godbole, Yan Chen
Hau-Hau Bui, Liang Wang, Khanh-Quang Tran, Øyvind Skreiberg, Anpase Luengnarumichai
Weilong Zhang, Lin Lu, Xi Chen
M. A. Ancona, M. Bianchi, L. Branchini, A. De Pascale, F. Melino, A. Peretto
S. Natarajan, M. Akshay Kumar, A. U. Meenakshi Sundareswaran
S. Natarajan, S. Abhinav Shankar, A. U. Meenakshi Sundareswaran
Maximiliano Renzi, Lorenzo Egidi, Luca Cioccolanti, Gabriele Comodi
Xiong Liu, Cheng Lu, Gangqiang Li, Ajiit Godbole, Yan Chen
Effect of Biochar Addition and Initial pH on Hydrogen Production from the First Phase of Two-Phase Anaerobic Digestion of Carbohydrates Food Waste ................................................................. 379

Qinyuan Yuan, S. Sunyoto, Mingying Zhang, Dongze Zhang

A Critical Analysis on Performance of ORC through a Modified Thermodynamic Model Based on Fluid Property ................................................................. 385

Yongzhen Wang, Jun Zhao, Yan Wang, Chao Luo, Shuai Deng, Qingsong An

Study on Gas Products Distributions During Fast Co-pyrolysis of Paulownia Wood and PET at High Temperature ................................................................. 391

Lin Chen, Shuzhong Wang, Haiyu Meng, Zhiqiang Wu, Jun Zhao

Transient Thermochemical Storage Performance of Methane Reforming in Semi-cavity Reactor Heated by Solar Dish System ................................................................. 398

Qinyuan Yuan, Jing Ding, Jianfeng Liu

An Investigation of Low Cost and Effective Tar Removal Techniques by Venturi Scrubber Producing Syngas ................................................................. 406

Siriwat Umyaan, Thanyawan Tarunpath, Fumitake Takahashi, Kunio Yoshikawa

 Woody Biomass Characterization for 100 Megawatt-hours (MW) Power Generation ........................................................................................................ 413
Norafidzilah Hamzah, Mohamad Zandi, Koji Tokimatsu, Kunio Yoshikawa

A Case Study on the Use of Harvested Rainwater to Operate Passive Cooling Water Wall (PCWW) for SEGi University Tower ........................................................................................................ 419

Vinod Kumar Venkiteswaran, Wong Dee Lern, Sureshthra Stephen Ramachanderan

Optimal Planning of High Penetration Distributed Photovoltaic with Considering Grid Reinforcement .................................................................................................................. 427

Huang Binbin, Li Qionghai, Gao Fei

Strategies toward Experimental Assessments of New Aviation Renewable Fuels and Blends: The BIOREFLY Project ........................................................................................................ 433

E. Barta-Rajnai, L. Wang, Zs. Barta, R. Khalil, Ø. Skreiberg, M. Grønli, E. Jakab, Z. Czégény

Assessment of the Energy Performance of an Air Source Heat Pump by Response Surface Methodology ................................................................. 439
Eleonora Ciarrocchi, Alexia Arcoenti, Xu Zheng, Fabio Polonara, Rizhu Wang

Thermodynamic Analysis of the Cascaded Supercritical CO₂ Cycle Integrated with Solar and Biomass Energy .................................................................................. 445
Xiaoe Wang, Qinlin Liu, Zhang Bai, Jing Lei, Hongguang Jin

Energy-efficient Conversion of Microalgae to Hydrogen and Power ................................................................................................................................. 453
Muhammad Aziz, Ilman Nur'an Zaini

Exploring Piezoelectric for Sound Wave as Energy Harvester ................................................................................................................................. 459
Liew Eui Fang, Syed Idris Syed Hassanan, Rosemizzi Ab Hadi, Bakaruddin Haji

Hydrocarbons Production from Lignin-derived Phenolic Compounds over Ni/SiO₂ Catalyst .................................................................................................................. 467
Shen Du, Ya-Ling He, Peiwen Li

Shen Du, Ya-Ling He, Peiwen Li

Multi-scale Investigation on the Optical Performance of a Concentrated Photovoltaic Thermoelectric Hybrid System by a MC-FDTD Coupled Method ........................................................................................................ 473

Yi-Peng Zhou, Yu Qiu, Ya-Ling He, Tao Xie

A Fuzzy Logic-based Tuning Approach of PID Control for Steam Turbines for Solar Applications ........................................................................................................ 480

S. Detori, V. Jansina, V. Cellì, A. Signorini

An On-site Test Method for Optical Efficiency of Large-size Parabolic trough Collectors .................................................................................................................. 486
Ruilin Wang, Wanjun Qu, Jie Sun, Hui Hong

Coordinated Operation of the Electricity and Natural Gas Systems with Bi-directional Energy Conversion .................................................................................................................. 492
Qing Zeng, Baohua Zhang, Jiaxun Fang, Zhe Chen

High Acceptance Angle Optical Fiber Based Daylighting System Using Two-stage Reflective Non-imaging Dish Concentrator ........................................................................................................ 498

Mohammed Noorul Hussain, Salem Al-Kaabi, Isam Janajreh

CFD Simulation of Devolatilization of Biomass with Shrinkage Effect .................................................................................. 505
Shu-Yu Yang, Cheng-Kuo Sung, Chih-Yung Huang

Investigation on a Photovoltaic Thermoelectric Ventilator ................................................................................................................................. 511
Tian Li, Xiaosie Ku, Teresa Lovás

Hydrocarbons Production from Lignin-derived Phenolic Compounds over Ni/SiO₂ Catalyst .................................................................................................................. 518
Zhongbing Liu, Ling Zhang, Yongqiang Luo, Jing Wu, Fangzhong Meng

Steam Turbine Models for Monitoring Purposes ................................................................................................................................. 524
Sh. Detori, V. Cellì, G. Salerno, A. Signorini

Optimization of Power Management Strategy for Parallel Air-Fuel Hybrid System .................................................................................................................. 530
Shu-Yu Yang, Cheng-Kuo Sung, Chih-Yung Huang

Investigation of Effect of Cambered Blades on Darrieus VAWTs ................................................................................................................................. 537
Sayyad Basim Qamar, Isam Janajreh

Optimizing Acoustic Energy for Better Transisterification: A Novel Sono-Chemical Reactor Design .................................................................................................................. 544
Sayyad Basim Qamar, Isam Janajreh

Effect of Temperature and Duration of Torrefaction on the Thermal Behavior of Stem Wood, Bark, and Stump of Spruce .................................................................................................................. 551
E. Bartu-Rajnai, L. Wang, Z. Sebestyén, Zs. Bartu, R. Khalil, Ø. Skreiberg, M. Grønli, E. Jakab, Z. Czégény

Catalytic Consequences of Micropore Topology on Biomass Pyrolysis Vapors over Shape Selective Zeolites .................................................................................................................. 557
Salman Raza Naqi, Yoshimi Umeda, Suzana Yuzup, N. Nishiyama, M. Naqui

Optimal Biomethane Injection into Natural Gas Grid – Biogas from Palm Oil Mill Effluent (POME) in Malaysia .................................................................................................................. 562
Norfadhilah Hamzah, Mohammad Zandi, Koji Tokimatsu, Kunio Yoshikawa

Pilot Test of Co-pyrolysis Characteristics of Wet Sewage Sludge and Sawdust in an External Heating Moving Bed .................................................................................................................. 570
Jinquan Zhu, Long Wan, Haijun Chen, Yuezhao Zhu, Li Yang

Experimental Performance of Tar Removal by a Quench Coupled with Adsorption Technology .................................................................................................................. 576
Zeqing Chen, Haijun Chen, Yuezhao Zhu, Qun Cui, Long Wan, Ruijiu Cheng
Experimental Investigation of Whole Tires and Biomass Mixed Firing in Reverse Burning Fixed-bed Gasifier ...........................................583
Kai Wu, Tianyi Ren, Haifeng Chen, Yuezhao Zhu

DFIG Based AGC of Power System Using Robust Methodology .................................................................590
Gulshan Sharma, Ibhaeem, R. C. Bansal

Variables Affecting Emission Measurements from Domestic Wood Combustion ...........................................596
Morten Seljeskog, Alexis Sevaut, Ashjorn Øntrør, Øyvind Skreiberg

Selective Synthesis of Biogasoline Precursor from Renewable Platform Molecules at Ambient Temperature ........604
Jinxing Long, Xiong Zhang, Cheng Lv, Siqie Liu, Changhua Song, Xuehui Li

Hydrothermal Treatment of Postconsumer Aseptic Packaging Material: Solid Fuel Production and Aluminum Recovery ...........................................................................................................610
Baskoro Lokahita, Kunio Yoshikawa, Fumitake Takahashi

The Impacts of PV-Wind-Diesel-Electric Storage Hybrid System on the Reliability of a Power System ......................616
T. Adeifarati, R. C. Bansal

Experimental Investigation of Slag Particles of Ligament Mode Disintegration in Spinning Disk Atomizing ..............622
Na Wang, Hao Peng, Xiang Ling, Jingqi Kang, Minghao Xu

Biocarbonization Process for High Quality Energy Carriers: Techno-economics ...........................................628
Bajesh S. Kempe, Angelo I. Aquino, Asbjørn Østnor, Khamb-Chuang Tran

Characterization of Lubricant Degeneration and Component Deterioration on Diesel Engine Fueling with Straight Plant Oil.................................................................................................................636
Abdullah Almutairi, Dawei Wu, Baichuan Guo, Anthony P. Roskilly, Chris Ottley

Gasification of High Heating-rate Biomass-derived Char at Elevated Temperatures ...........................................642
Tian Li, Yanqing Niu, Liang Wang, Terece Loviás

Hydrate-based Capture of Acidic Gases for Clean Fuels with New Synergic Additives ...........................................648
Zhiyong Xia, Xiaohao Li, Jian Chen, Ke-Feng Yan, Chun-Xiang Xu, Qiu-Ling Lv, Jing Liang

Chung-Ta Chang, Chin-Tsuei Wang, Chen-Hao Wang, Wen-Tong Chong

Effects of the ORC Operating Conditions on the Engine Performance for an Engine-ORC Combined System ..........662
Meng Zhao, Minshan Wei, Panpan Song, Zhen Liu, Zhixing Wang

Design and Early Development of a Novel Cross Axis Wind Turbine ...........................................................................668
Z. Sebestyén, E. Barta-Rajnai, J. Bozi, M. Bílszö, E. Jakab, N. Miskolczi, Zs. Czégény

Process and Techno-economic Analysis of Bio-jet Fuel-range Hydrocarbon Production from Lignocellulosic Biomass Via Aqueous Phase Deconstruction and Catalytic Conversion ........................................675
Yaping Li, Lungang Chen, Xinghua Zhang, Qi Zhang, Tiejiun Wang, Songbai Qiu, Jin Tan, Kai Li, Longlong Ma

Concept of a Technological System for Microalgae Biomass Production with the Use of Effluents from Fermentation Tanks ...........................................................................................................681
Marcin Debowski, Marcin Zielinski, Magda Dudek

Improvement of Heat and Mass Transfer Performance in a Polysilicon Chemical Vapor Deposition Reactor with Field Synergy Principle .........................................................................................688
L. S. An, Zh Yang, G. Y. Zhong, Y. W. Liu

Hydrothermal Depolymerization of Virginia Fanpetals (Sida Hermaphrodita) Biomass with the Use of Microwave Radiation as a Potential Method for Substrate Pre-treatment Before the Process of Methane Fermentation ......................................................................................................................694
Marcin Zielinski, Anna Nowicka, Marcin Debowski

A Model for the Prediction of Pollutant Species Production in the Biomass Gasification Process ..................................700
Agostino Gambarotta, Mirko Morini, Andrea Zamboni

Thermocatalytic Studies on Municipal Solid Waste ..............................................................................................706
Z. Sebestyén, N. Miskolczi, E. Barta-Rajnai, E. Jakab, Zs. Czégény

Gasification Char as a Potential Substitue of Activated Carbon in Adsorption Applications ..................................712
Vittoria Benedetti, Francesco Patané, Marco Baratti

Catalytic Pyrolysis of Biomass and Plastic Mixtures Using HZSM-5 Zeolite ...............................................................718
Z. Sebestyén, E. Barta-Rajnai, J. Bozi, M. Bílszö, E. Jakab, N. Miskolczi, Zs. Czégény

Experimental and Modelling Analysis of Char Decomposition: Experiences with Real Scale Gasification Systems .................................................................................................................................724
Elyes Z. Koubati, Francisco Patané, Marco Baratti

Coupling of Biomass Gasification and SOFC – Gas Turbine Hybrid System for Small Scale Cogeneration Applications ..........................................................................................................................730
Mariagiavonna Minutillo, Alessandra Perna, Elio Jannelli, Viviana Cigolotti, Suk Wool Nam, Sung Pil Yoon, Byeong Wan Kwon

PART 2

Urban Integration of Aeroelastic Belt for Low-Energy Wind Harvesting ..............................................................................738
Angelo I. Aquino, John Kaiser Calanit, Ben Richard Hughes

Development of Kinetics Model for Torrefaction of Empty Fruit Bunch from Palm Oil Waste ..................................744
Nur Haznah Huda Mohd Harun, Noor Amsa Fazli Abdul Samad, Sariyati Saleh

The Design, Simulation and Testing of V-shape Roof Gaide Vane Integrated with an Eco-roof System .......................750
Xiao Hang Wang, Wen Tong Chong, Kok Hou Wong, Lip Huat Saw, Sai Hin Lai, Chin-Tsuei Wang, Sin Chew Poh

Energy Performance and Thermo-economic Assessment of a Microturbine-based Dual-fuel Gas-biomass Trigeneration System ..................................................................................................................764
Antonio M. Pantaleo, Sergio M. Camporeale, Christians N. Markides, Giacomo Scarascia Mugnozza, Nilay Shah
Light and Duty Cycle Optimization of a Photo-bioreactor in Batch Mode .......................................................... 773
N. Aste, C. Del Pero, F. Leonforte

Prototype Testing of a 300kWh Solar Parabolic-trough Collector Using Rotatable Axis Tracking .......................... 780
Wanjun Qu, Rulin Wang, Hui Hong, Jie Sun, Hongguang Jin

Simultaneously Boosting the Mass and Fixed-carbon Yields of Charcoal from Forest Residue via Atmospheric 787
Carbonization
Khanh-Quang Tran, Maria Zabalo Alonso, Liang Wang, Oyvind Skreiberg

High Efficient Planar-heterojunction Perovskite Solar Cell Based on Two-step Deposition Process ................. 793
Chengzi Zhang, Weilong Lu, Yuhang Yin

Mutual Adaptability of Renewable Energy and Water-supply Systems in Islands .............................................. 799
Jiahong Liu, Chao Mei, Hao Wang, Weimei Shao, Chenyao Xiang

A Reduced Wide-temperature-range Electro-thermal Model and Thermal Parameters Determination for Lithium- 805
ion Batteries
Haijun Ruan, Jiuchuan Jiang, Quan Ju, Bingshang Sun, Gong Cheng

Airfoil Lift and Drag Extrapolation with Viterma and Montgomerie Methods .................................................... 811
Fabio Codignole Laz, Stefano Cordiner, Alessandro Manni, Vincenzo Malone, Vittorio Rocco

Analysis of Residual Biomass Fast Pyrolysis at Laboratory Scale: Experimental and Numerical Evaluation of 817
Spent Coffee Powders Energy Content .................................................................................................................. 817
Fahad Codignole Laz, Stefano Cordiner, Alessandro Manni, Vincenzo Malone, Vittorio Rocco

Biological Syngas Methanation via Immobilized Methanogenic Archea on Biochar ........................................... 823
Sebastian Schwede, Florian Bruchmann, Eva Thorin, Mandy Gerber

Biomass Charcoal Properties Changes During Storage ....................................................................................... 830

Charaterization of Different Dimensions Piezoelectric Transducer for Sound Wave Energy Harvesting ............. 837
Liew Hui Fang, Syed Idris Syed Hassaan, Rosmeli Abd Rahim, Mazumir Isra, Baharuddin Bin Ismail

Electrochemical Impedance Spectra for Lithium-ion Battery Ageing Considering the Rate of Discharge Ability 844
Jiuchuan Jiang, Zhixiong Lin, Quan Ju, Zeyu Ma, Caifa Zheng, Zhanguo Wang

Predictive Modelling and Simulation of Integrated Pyrolysis and Anaerobic Digestion Process ....................... 850
Chaudhary Atul Solomon, Sebastian Schwede, Eva Thorin, Jinyue Yan

Bio-gasoline Production by Coupling of Biomass Catalytic Pyrolysis and Oligomerization Process ................. 858
Tiejun Wang, Quan Zhang, Mingyue Ding, Chenguang Wang, Yong Li, Qi Zhang, Longlong Ma

Experimental Study on Thermal Performance of Semi-transparent PV Window in Winter in Hong Kong .... 864
Meng Wang, Jingpeng Peng, Nianping Li, Lin Lu, Hongxing Yang

Experimental Study of Constant Temperature Operation and Constant Flow Operation in Concentrating PV / T 869
System ............................................................................................................................................................................ 869

Assessment of Heat Mining Rate for Geothermal Exploitation from Depleted High-temperature Gas Reservoirs 875
via Recycling Supercritical CO2 ............................................................................................................................... 875
Guodong Cui, Liang Zhang, Shaoran Ren

Application of Typical Meteorological Years for Sizing Building Integrated PV Systems Under Zero Load 881
Rejections
K. A. Kavadias, D. Zafirakis, A. G. Pallastos

Analysis of Annual Performance of a Parabolic Trough Solar Collector ............................................................... 888
Zhangbo Liang, Chentian Zhang, Wandong Zheng, Shijian You, Huai Zhang

Microbial Community Ability to Adapt to Altered Temperatures Conditions Influences Operating Stability in 895
Anaerobic Digestion ..................................................................................................................................................... 895
Maria Westerholm, Simon Ibsen, Li Sun, Anna Schnürer

Experimental Study on the Influence of the Core Flow Heat Transfer Enhancement on the Performance of 901
Thermoelectric Generator ........................................................................................................................................... 901
Yanzhe Li, Shizue Wang, Yulong Zhao

Pyrolysis of Wood in a Rotary Kiln Pyrolyzer: Modeling and Pilot Plant Trials ...................................................... 908
Awais Chaudhary Phonglamchek, Matthias U. Bahler, Pawel Donaj, Marko Armin, Rolf Ljunggren, Klaus Engel

The Potentials for Improving Combustion Performance and Emissions in Diesel Engines by Fueling n- 914
butanol/diesel/PODE3-4 Blends
Haozhong Huang, Qingsheng Liu, Wenwen Teng, Qingsen Wang

Study of a Novel Dual-source Chemisorption Power Generation System Using Scroll Expander ................. 921
Yi Li, Anthony Paul Rockilly, Yaodong Wang, Livei Wang

Low-cost and High-efficient Extraction of Lipids from Chlorella by using Industrial Ionic Liquids ................. 927
Haitao Lu, Xinhuai Yu, Shan-Yang Tu

Ethanol Fermentation Coupled with Pervaporation by Energy Efficient Mechanical Vapor Compression 933
Senqin Fan, Zeyi Xiao, Minghai Li, Zihong Li

Experimental Study on the Performance of CO2-Based Photovoltaic-thermal Hybrid System ..................... 939
Hiroshi Yamaguchi, Takahiro Maki, Chayadit Pumaneratkul, Haruhiko Tamasaki, Yuhiro Ishimoto, Junji Arakawa

An Open-source Platform for Simulation and Optimization of Clean Energy Technologies ............................. 946
Campana Pietro Elia, Zhang Yang, Lundblad Anders, Li Haifang, Yan Jinyang

Wet Curtain Wall: A Novel Passive Radiant System for Hot and Dry Climates ...................................................... 953
F. Butera, N. Aste, R. S. Adhikari, C. Del Pero, P. Leonforte, A. Zanello

Water PVT Collectors Performance Comparison .................................................................................................. 961
N. Aste, C. Del Pero, P. Leonforte
Experimental Study of the Solubility of CO₂ in Novel Amine Based Deep Eutectic Solvents ................................................................. 1394
Economic Feasibility of Organic Rankine Cycles (ORC) in Different Transportation Sectors ................................................................. 1401
Idowu Adeyemi, Mohammad R. M. Abu-Zahra, Inas Alinaashof

ADVISOR Simulation and Performance Test of Split Plug-in Hybrid Electric Vehicle Conversion ................................................................. 1408
Muhammad Iram Mohd Rashid, Hamdan Dalian

Thermodynamic Analysis of Water Injection in a Micro Gas Turbine: Sankey and Grassmann Diagrams ......................................................... 1414
Marina Montero Carrero, Ward De Paepe, Svend Bram, Francesco Continino

Yijie Lu, Anthony Paul Roskilly, Andew Smallbone, Xiaoli Yu, Yaudong Wang

Comparison the Performance of N-heptane, N-dodecane, N-tetradecane and N-hexadecane ................................................................. 1426
Xiaxin Sun, Xingya Liang, Hanzhengnan Yu, Yajun Wang, Zhijie Zhu

Mapping of Heat and Electricity Consumption in a Medium Size Municipality in Sweden .................................................................................. 1434
Moa Swing Gustafsson, Jönn Are Myhrren, Erik Dotzauer

Design and Control of Stand-alone Combined Heat and Power Systems Using CO₂/CH₄ .......................................................................................... 1440
Shuo-Ge Chen, Wei Wu, Erdong Wu

Comparative Investigation on Thermo-economic Performance between ORC and LiBr Absorption Refrigerating Cycle in Waste Heat Recovery ........................................................................................................ 1446
Shuang-Ying Wu, Han Yang, Lan Xiao, Chun Li

Optimization of Cathode Flooding in Sealed-up Microfluidic Fuel Cells ........................................................................................................ 1454
Yifei Wang, Dennis Y. C. Leung

Visualization Study on the Methane Segregation Injection Technology in Iron Ore Sintering Process ................................................................. 1461

System Design and Thermodynamic Analysis of a Sintering-driven Organic Rankine Cycle ............................................................................. 1467
Yan Liu, Zhilong Cheng, Jingyu Wang, Jiong Yang, Qianwang Wang

Performance Study of a Double Absorption Heat Transformer .................................................................................................................. 1473
Lingbao Wang, Huashuan Li, Xianbiao Bu, Hanzhi Wang, Weibin Ma

PART 3

Reduced Chemical Mechanisms for Ammonia/Methane Co-firing for Gas Turbine Applications ................................................................. 1483
H. Xiao, M. S. Howard, A. Valera-Medina, S. Dooley, P. Bowen

Potential of Low Temperature Organic Rankine Cycle with Zeotropic Mixtures as Working Fluid ........................................................................ 1489
Muhammad Aziz

Numerical Investigation of Moisture Separators with Corrugated Plates ........................................................................................................ 1501
Yong Liu, Zhiguo Qu

Analysis of Recoverated Combined Cycle with Small Temperature Rise under Design/Off-design Conditions ......................................................... 1507
Guaoyang Zhang, Zewei Bai, Yonggang Yang

Numerical Modeling with Electrochemical Active Area (ECA) Distribution in the Lateral Direction in a PEM Fuel Cell ........................................................................................................ 1513
Shan Jia, Hongtian Liu

Control Strategies of Steam-injected Gas Turbine in CCHP System .................................................................................................................. 1520
Chun Zhang, Xusheng Wang, Cheng Yang, Zeliang Yang

A Case Study of a CHP System and its Energy use Mapping .......................................................................................................................... 1526
Jun Li, Ahmed Lareefi, Gushang Tian

Multifuel CHP HCCI Engine Towards Flexible Power-to-fuel: Numerical Study of Operating Range ........................................................................ 1532
Maxime Pochet, Véronique Dias, Hervé Jeanmart, Sébastien Verhees, Francesco Continino

Numerical Study of a Methane Jet Diffusion Flame in a Longitudinal Tube with a Standing Wave .................................................................................. 1539
Song Chen, He Zhao, Koong Yee Tay, Ashique Ahram Tarique

Cofiring Assessment of Hydrothermally-treated Empty Fruit Bunch and Low Rank Coal in a Drop Tube Furnace ......................................................... 1545
Arif Darmawan, Dwika Badianto, Muhammad Aziz, Koji Tokimatsu

The Development of a Two-stage Traveling Wave Thermoacoustic Engine ........................................................................................................ 1551
Baiman Chen, Shicheng Tian, Anying Liu, Kelvin Ho, Minlin Yang

Design Principles of Current Collectors in Microfluidic Fuel Cell with Flow-through Porous Electrodes ................................................................. 1557
Li Li, Wenguang Fan, Jin Xuan, Michael K. H. Leung, Keqing Zheng, Yiyi She
