
Buenos Aires, Argentina
20 – 28 May 2017
Keynote

Physical Computing for Everyone ................................................................. 3
  Thomas (Tom) Ball
  — Microsoft Research

Online Learning

Using and Collecting Fine-Grained Usage Data to Improve Online Learning Materials .......................... 4
  Leo Leppänen, Juho Leinonen, Petri Ihantola, and Arto Hellas
  — University of Helsinki; Tampere University of Technology

Teaching Software Engineering Principles to K-12 Students: A MOOC on Scratch .......................... 13
  Felienne Hermans and Efthimia Aivaloglou
  — Delft University of Technology

Flipping a Graduate-Level Software Engineering Foundations Course ........................................ 23
  Hakan Erdogmus and Cécile Péraire
  — Carnegie Mellon University

Teaching Software Testing Concepts Using a Mutation Testing Game ........................................... 33
  Benjamin S. Clegg, José Miguel Rojas, and Gordon Fraser
  — University of Sheffield
Emerging Topics in SE Education

Assessing IOT Projects in University Education—A Framework for Problem-Based Learning ................................................................. 37
  Hanna Mäenpää, Samu Varjonen, Arto Hellas, Sasu Tarkoma, and Tomi Männistö
  — University of Helsinki

DataLab: Introducing Software Engineering Thinking into Data Science Education at Scale ........................................................................ 47
  Yang Zhang, Tingjian Zhang, Yongzheng Jia, Jiao Sun, Fangzhou Xu, and Wei Xu
  — Tsinghua University

Parallelizing Audio Analysis Applications—A Case Study ........................................ 57
  Ali Jannesari, Zia Ul Huda, Rohit Atre, Zhen Li, and Felix Wolf
  — University of California, Berkeley; Technical University Darmstadt

A Case Study: Injecting Safety-Critical Thinking into Graduate Software Engineering Projects .................................................... 67
  Jane Cleland-Huang and Mona Rahimi
  — University of Notre Dame

Creativity and Collaboration

The Students’ Perspectives on Applying Design Thinking for the Design of Mobile Applications ............................................................... 77
  Natasha M. Costa Valentim, Williamson Silva, and Tayana Conte
  — Federal University of Amazonas

Chaordic Learning: A Case Study ........................................................................ 87
  Stephan Krusche, Bernd Bruegge, Irina Camilleri, Kirill Krinkin, Andreas Seitz, and Cecil Wöbker
  — Technische Universität München; Saint Petersburg Electrotechnical University

Effects of Facilitation on Collaborative Modeling Sessions with a Multi-Touch UML Editor ................................................................. 97
  Anke Dittmar, Gregor Buchholz, and Mathias Köhn
  — University of Rostock

E-Mentoring for Software Engineering: A Socio-Technical Perspective .................. 107
  Erik H. Trainer, Arun Kalyanasundaram, and James D. Herbsleb
  — Carnegie Mellon University

Teaching Agile

Lean Learning—Applying Lean Techniques to Improve Software Engineering Education .......... 117
  Robert Chatley and Tony Field
  — Imperial College London

Teaching Agile Model-Driven Engineering for Cyber-Physical Systems .................. 127
  Jan Oliver Ringert, Bernhard Rumpe, Christoph Schulze, and Andreas Wortmann
  — Tel Aviv University
What Can Students Get from a Software Engineering Capstone Course? .............................................. 137
   María Cecilia Bastarrica, Daniel Perovich, and Maira Marques Samary
   — Universidad de Chile

Do High and Low Performing Student Teams Use Scrum Differently in Capstone Projects? ............................................................................................................................... 146
   Maria Paasivaara, Jari Vanhanen, Ville T. Heikkilä, Casper Lassenius, Juha Itkonen, and Eero Laukkanen
   — Helsinki University of Technology; Aalto University; Massachusetts Institute of Technology

Games and Gamification

Quality of Games for Teaching Software Engineering: An Analysis of Empirical Evidences of Digital and Non-Digital Games ................................................................. 150
   Giani Petri, Christiane Gresse Von Wangenheim, and Adriano Ferreti Borgatto
   — Federal University of Santa Catarina; RWTH Aachen University

Game Elements in a Software Engineering Study Group: A Case Study ............................................. 160
   Patricia Gomes Fernandes Matsubara, and Caroline Lima Corrêa Da Silva
   — Federal University of Mato Grosso do Sul

Games for Learning: Bridging Game-Related Education Methods to Software Engineering Knowledge Areas ........................................................................................................ 170
   Mauricio Ronny De Almeida Souza, Lucas Furtini Veado, Renata Teles Moreira, Eduardo Magno Lages Figueiredo, and Heitor Augustus Xavier Costa
   — Federal University of Minas Gerais; Federal University of Lavras

A Large-Scale Evaluation of a Model for the Evaluation of Games for Teaching Software Engineering ................................................................. 180
   Giani Petri, Christiane Gresse Von Wangenheim, and Adriano Ferreti Borgatto
   — Federal University of Santa Catarina

Author Index ............................................................................................................................................ 190
