Message from SECM 2017 Workshop Chairs......................................................................................... vii
SECM 2017 Program Committee .............................................................................................................. ix
ICSE 2017 Sponsors and Benefactors........................................................................................................ x

SECM 2017 Workshop Summary .............................................................................................................. 1
    Hakan Erdogmus and Cécile Péraire
    — Carnegie Mellon University

Keynote

Tales from an Agile Journey: Designing Curricula for Millennials in Industry and Academia................................................................. 2
    Diego Fontdevila
    — Universidad Nacional de Tres de Febrero & Grupo Esfera

Experience Reports

An Empirical Study on Teaching Formal Methods to Millennials.............................................................. 3
    Néstor Cataño
    — Innopolis University

Deploying Team-Based Learning at Undergraduate Software Engineering Courses.......................... 9
    Santiago Matalonga, Gastón Mousqués, and Alejandro Bia
    — Universidad ORT Uruguay; Universidad Miguel Hernandez

A Flipped Classroom Experience Teaching Software Engineering....................................................... 16
    Nicolás Martín Paez
    — Universidad Nacional de Tres de Febrero

Integrating Serious Games as Learning Resources in a Software Project Management Course: The Case of ProDec......................................................... 21
    Alejandro Calderón, Mercedes Ruiz, and Elena Orta
    — University of Cadiz
Interdisciplinary Software Projects as an Active Methodology to Practice for the Profession

Maria Augusta Vieira Nelson, Rommel Vieira Carneiro, and Marco Rodrigo Costa
— Pontifícia Universidade Católica de Minas Gerais

A Hands-On Cross-Platform Mobile Programming Approach to Teaching OOP Concepts and Design Patterns

Pinar Muyan-Özçelik
— California State University, Sacramento

Research Papers

Reflections on Cyberethics Education for Millennial Software Engineers

Claudia De O. Melo and Thiago C. De Sousa
— University of Brasilia; State University of Piauí

Agile for Millennials: A Comparative Study

Marcello Missiroli, Daniel Russo, and Paolo Ciancarini
— University of Bologna

On the Presence of Green and Sustainable Software Engineering in Higher Education Curricula

Damiano Torre, Giuseppe Procaccianti, Davide Fucci, Sonja Lutovac, and Giuseppe Scanniello
— Carleton University; Vrije Universiteit Amsterdam; University of Hamburg; University of Oulu; University of Basilicata

Everything Is Possible to Structure—Even the Software Engineering Body of Knowledge

Mira Kajko-Mattsson, Anders Sjögren, and Leif Lindbäck
— KTH Royal Institute of Technology

Position Paper

“Tell Me and I Forget, Teach Me and I May Remember, Involve Me and I Learn”: Changing the Approach of Teaching Computer Organization

Matias Lopez-Rosenfeld
— Universidad de Buenos Aires
