19th Process Plant Safety Symposium (PPSS)

Topical Conference at the 2017 AIChE Spring Meeting and 13th Global Congress on Process Safety

San Antonio, Texas, USA
26 - 30 March 2017

TABLE OF CONTENTS

(1a) AGILE Award Keynote Address ............................................................................................................. 1
John Televantus

(1a) Pressure Relief Analysis - It's About More Than Just Compliance ......................................................... 2
Palaniswam Chidambaram

(1b) When the Fail Open Valve Fails Closed: Lessons from Investigating the "Impossible" ........................... 35
Sean J. De, Russell Ogle, Brenton L. Cox

(1c) Process Hazard Analysis - Are Studies in Itself Good Enough to Reduce Risk? ................................. 50
Simon Roberts, TJ Larkin

(3a) Last Line of Defense - Improving Our Step Back 5x5 ......................................................................... 58
John Televantus

(3b) Studying the Relationship Between Inherently Safer Design and Equipment Reliability .................. 59
Prerna Jain, Efstratios N. Pistikopoulos, Sam Mannan

(3c) Dynamic Modeling of Inbreathing Requirements for Low-Pressure Storage Tanks ............................ 222
Robert Siml, Alysson Ferreira

(3d) Review and Analysis of Recent Cyber Security Attacks ......................................................................... 74
John Televantus

(3e) Managing Risk Associated w/ Electrical Energy Ignition Sources .................................................... 80
Michael E. Robertson

(4a) Human Error. A Myth Eclipsing Real Causes .................................................................................... 98
John Televantus

(4b) Study of Factors That Affect Dust Explosion Characteristics of Fibrous Dust Materials ........................ 107
John Televantus

(4c) Thermal Decomposition of Mono-Nitrated Toluene (MNT) with Additives ....................................... 130
John Televantus

(4d) A Leading Indicators Based Decision Support Tool to Predict Blowout Events ................................ 152
John Televantus

(5a) Process Safety Management: It's Not Just for Chemical Plants! ........................................................... 187
John Televantus

(5b) Best Practices for Writing Operating Procedures and Trouble-Shooting Guides ............................... 198
John Televantus

(5c) Major Accidents: Managing the First 96 Hours .................................................................................... 211
John Televantus

(5d) Managing Change Impact on Relief System Design ............................................................................. 220
John Televantus

(5e) Process Change Impact on Relief System Design ................................................................................ 230
John Televantus

(5f) Consequence Modeling at the Eastman Kingsport Site ....................................................................... 241
John Televantus

(5g) High Integrity Pressure Protection System (HIPPS) and Implementation Challenges ........................... 252
John Televantus

(6a) Relief Systems Design: The Importance of Accounting for Static Head ............................................. 262
John Televantus

(6b) Study of Factors That Affect Dust Explosion Characteristics of Fibrous Dust Materials ........................ 273
John Televantus

(6c) Process Hazard Analysis - Are Studies in Itself Good Enough to Reduce Risk? ................................. 284
John Televantus

(6d) Dynamic Modeling of Inbreathing Requirements for Low-Pressure Storage Tanks ............................ 295
John Televantus

(6e) Studying the Relationship Between Inherently Safer Design and Equipment Reliability .................. 306
John Televantus

(6f) Pressure Relief Analysis - It's About More Than Just Compliance ....................................................... 317
John Televantus
(57ba) How to Leverage Limited Design Data Along with Historical Incident Data to Assess Inherent Process Safety During Early Stage of Design? .................................................. 247
  Fadwa T. Eljouj, Monzure-Khoda Kazi, Ahmed AlNouss

(57bb) Inherently Safer Design from Overpressure Protection Viewpoint .................................................. 248
  Nancy Faulk, Christopher Ng, Sachin Kanade

(57bc) Three Reasons Major Event Risk Management Fails on Capital Project .................................................. 257
  Denise Chastain-Knight

(57bd) Safety Rating System Based on Current Situation of China Petrochemical Enterprises .......................... 270
  Linlin Wang

(57be) The Difficulty and Prospect of the Development of Quantitative Assessment Technology in the Field of Chemical Safety in China .................................................. 279
  Jiu Jiangbo

(57bg) Recipe for a Sizzling HAZOP Chair .................................................................................................. 280
  Angus Keddie

(57bi) Bridging the Divide - OHS and Process Safety ............................................................................... 289
  Trish Kerin

(57bk) 20 Years of Personal Process Safety Lessons ............................................................................... 290
  Steve Streblow

(57bl) Identifying Opportunities of Enhancing Safeguard Stewardship through IPL Rationalization ........... 301
  SreeRaj Nair, Bernadette Thornton

(57bm) Process Safety Site Assessment Program (PSSAP) - 5 Years of Assessments ............................... 310
  Andrew Broadbent

(57bn) Alarm Management Meets SIS .................................................................................................. 319
  Darwin Legerott

(57bo) Enhancing Process Safety Management Integration to Improve Process Safety and Profitability in the Fuels and Petrochemicals Industry .............................................. 320
  Thomas D. Watson, Harold Phillipps, Ronald Fuchs

(57br) Reactive Hazards Management: Lessons Learnt from Major Incidents ............................................... 329
  Robert Weber, Sonny Sachdeva

(57bu) The Study of Safety Evaluation Technique for High Temperature Process ........................................ 330
  Donatx Oiwauma

(57bv) Handling Uncertainty in LOPA and SIL Design ............................................................................. 331
  Arjan Abeynaike, Venkatesh Sourirajan, Akshat Khirwal

(57bw) Fundamental Research at Purdue Process Safety Research Center ................................................. 344
  Ray A. Mentzer

(57by) Bringing New Life to Process Safety ............................................................................................ 345
  Faarshad Hendi, Steve Elliott

(57ch) Developing an Effective System for Action Item Resolution ............................................................ 346
  Zabin Kamara, Jason F. White

(57ce) Where Does Management of Change (MOC) Begin? .................................................................... 347
  Juliana Schmitz, Patti Jones, Gabriel Drummond

(57cd) Effectively Utilizing Calarp/RMP/PSM Contractors to Assist in Optimizing Process Safety Culture, Compliance with Standards, and Workforce Involvement .............................................. 357
  Ivan Cheng, Timothy Lee, Steven T. Maher, Michael Saura

(57cc) A Streamlined Approach for Full Compliance with SIL Implementation Standard ........................... 358
  William Bridges, Art Dowell III

(57cg) The Art of the Audit: Being Audit Ready, Everyday ........................................................................ 370
  Amanda Scalza, Brady Brown

(57ck) Economic Justification for Better Maintenance in a Safety System .................................................. 371
  William M. Goble, Loren Stewart

(57cl) How Important Is Realistic Failure Rates for Safety Instrumented Functions? .................................... 372
  John Day, Loren Stewart

(57cn) Enabling Sustainable Relief System Management Programs through Independent Reviews .......... 373
  Aniket Patankar, Norberto Pineda

(57f) The Jack Rabbit II: 2015-2016 Chlorine Release Field Trials ............................................................... 374
  Shannon B. Fox, Thomas O. Spicer III, Leo Stockham, Mark Whitmire, Ronald Meris, Thomas Mazzola, Joseph Chang, Steven Hanna, Michael Sohn, Damon Nicholson, Andy Byrnes

(57g) Functional Safety – Pitfalls and Good Practices ............................................................................. 381

(57h) General Method for Uncertainty Evaluation of Safety Integrity Level (SIL) Calculations - Part 2 Analytical Methods ........................................................................................... 382
  Raymond "Randy" Freeman

(57j) Comparison of Batch Versus Continuous Process in Pharmaceutical Industry Based on Safety Consideration ........................................... 432
  Shiqi Chen, Yogesh Koirala, M. Sam Mannan

(57k) Risk Based Decision Making Methods for Evaluating Complex Technologies, a Comparative Analysis on Pipelines and Railroad for Crude Oil Transport ................................................................ 456
  Pranav Kannan, M. Sam Mannan, Martin A. Wortman

(57m) Key Modeling Parameters and Process Safety Information for Effective Atmospheric Dispersion Modeling ................................................................. 457
  Srihari K Maganti
