Research Track

Traceability

Semantically Enhanced Software Traceability Using Deep Learning Techniques ........................................ 3
Jin Guo, Jinghui Cheng, and Jane Cleland-Huang
— University of Notre Dame

Can Latent Topics in Source Code Predict Missing Architectural Tactics? ................................................ 15
Raghuram Gopalakrishnan, Palak Sharma, Mehdi Mirakhorli, and Matthias Galster
— Rochester Institute of Technology; University of Canterbury

Preventing Defects: The Impact of Traceability Completeness on Software Quality ................................. N/A
Patrick Rempel and Patrick Mader
— Technische Universität Ilmenau

Imprecise Matching of Requirements Specifications for Software Services Using Fuzzy Logic .................... N/A
Marie C. Platenius, Wilhelm Schafer, Ammar Shaker, Eyke Hullermeier, and Matthias Becker
— Heinz Nixdorf Institute; Paderborn University; Fraunhofer IEM

Documentation

Analyzing APIs Documentation and Code to Detect Directive Defects ..................................................... 27
Yu Zhou, Ruihang Gu, Taoile Chen, Zhiqiu Huang, Sebastiano Panichella, and Harald Gall
— Nanjing University of Aeronautics and Astronautics; Middlesex University; University of Zurich
An Unsupervised Approach for Discovering Relevant Tutorial Fragments for APIs ................................................... 38
He Jiang, Jingxuan Zhang, Zhilei Ren, and Tao Zhang
— Dalian University of Technology; Nanjing University of Posts and Telecommunications

Detecting User Story Information in Developer-Client Conversations to Generate Extractive Summaries ................................................................. 49
Paige Rodeghero, Siyuan Jiang, Ameer Armaly, and Collin McMillan
— University of Notre Dame

Keyword Search for Building Service-Based Systems ................................................................................................. N/A
Qiang He, Rui Zhou, Xuyun Zhang, Yanchun Wang, Dayong Ye, Feifei Chen,
John Grundy, and Yun Yang
— Wuhan University; Victoria University; University of Auckland;
Swinburne University of Technology; Deakin University

Refactoring

Clone Refactoring with Lambda Expressions ................................................................................................. 60
Nikolaos Tsantalis, Davood Mazinanian, and Shahriar Rostami
— Concordia University

Characterizing and Detecting Anti-Patterns in the logging Code .............................................................. 71
Boyuan Chen and Zhen Ming (Jack) Jiang
— York University, Toronto

Automated Refactoring of Legacy Java Software to Default Methods ....................................................... 82
Raffi Khatchadourian and Hidehiko Masuhara
— City University of New York; Tokyo Institute of Technology

Using Cohesion and Coupling for Software Remodularization: Is It Enough? .......................................... N/A
Ivan Candela, Gabriele Bavota, Barbara Russo, and Rocco Oliveto
— Zikko; Free University of Bozen-Bolzano; University of Molise

Recommendation Systems

Supporting Software Developers with a Holistic Recommender System .................................................... 94
Luca Ponzanelli, Simone Scalabrino, Gabriele Bavota, Andrea Mocci,
Rocco Oliveto, Massimiliano Di Penta, and Michele Lanza
— Università della Svizzera Italiana; University of Molise; University of Sannio

Recommending and Localizing Change Requests for Mobile Apps Based on User Reviews ....................................................... 106
Fabio Palomba, Pasquale Salza, Adelina Ciurumelea, Sebastiano Panichella,
Harald Gall, Filomena Ferrucci, and Andrea De Lucia
— University of Salerno; University of Zurich

Machine Learning-Based Detection of Open Source License Exceptions ................................................. 118
Christopher Vendome, Mario Linares-Vásquez, Gabriele Bavota,
Massimiliano Di Penta, Daniel German, and Denys Poshyvanyk
— College of William and Mary; Universidad de los Andes; Free University of Bozen-Bolzano;
University of Sannio; University of Victoria
Supporting Change Impact Analysis Using a Recommendation System: An Industrial Case Study in a Safety-Critical Context

Markus Borg, Krzysztof Wnuk, Bjorn Regnell, and Per Runeson
— SICS Swedish ICT; Blekinge Institute of Technology; Lund University

Software Process

Software Development Waste

Todd Sedano, Paul Ralph, and Cécile Péraire
— Pivotal Software; University of Auckland; Carnegie Mellon University

Becoming Agile: A Grounded Theory of Agile Transitions in Practice

Rashina Hoda and James Noble
— University of Auckland; Victoria University of Wellington

From Diversity by Numbers to Diversity as Process: Supporting Inclusiveness in Software Development Teams with Brainstorming

Anna Filippova, Erik Trainer, and James D. Herbsleb
— Carnegie Mellon University

Process Aspects and Social Dynamics of Contemporary Code Review: Insights from Open Source Development and Industrial Practice at Microsoft

A. Bosu, J. Carver, C. Bird, J. Orbeck, and C. Chockley
— Southern Illinois University; University of Alabama; Microsoft Research

Studies of Software Developers

Classifying Developers into Core and Peripheral: An Empirical Study on Count and Network Metrics

Mitchell Joblin, Sven Apel, Claus Hunsen, and Wolfgang Mauerer
— Siemens; University of Passau; OTH Regensburg

Decoding the Representation of Code in the Brain: An fMRI Study of Code Review and Expertise

Benjamin Floyd, Tyler Santander, and Westley Weimer
— University of Virginia

Understanding the Impressions, Motivations, and Barriers of One Time Code Contributors to FLOSS Projects: A Survey

Amanda Lee, Jeffrey C. Carver, and Amiangshu Bosu
— University of Alabama; Southern Illinois University

The Role of Ethnographic Studies in Empirical Software Engineering

Helen Sharp, Yvonne Dittrich, and Cleidson R.B. De Souza
— Open University; IT University of Copenhagen; Vale Institute of Technology and the Federal University of Para

Search-Based Software Engineering

Search-Driven String Constraint Solving for Vulnerability Detection

Julian Thomé, Lwin Khin Shar, Domenico Bianculli, and Lionel Briand
— University of Luxembourg
A Guided Genetic Algorithm for Automated Crash Reproduction ............................................................. 209

Mozhan Soltani, Annibale Panichella, and Arie Van Deursen
— Technical University Delft

Stochastic Optimization of Program Obfuscation ..................................................................................... 221

Han Liu, Chengnian Sun, Zhendong Su, Yu Jiang, Ming Gu, and Jiaguang Sun
— Tsinghua University; University of California, Davis;

SIP: Optimal Product Selection from Feature Models Using Many-Objective Evolutionary Optimisation.........................................................................................................................N/A

Rob Mark Hierons, Miqing Li, Xiaohui Liu, Sergio Segura, and Wei Zheng
— Brunel University London; University of Birmingham; University of Seville; Northwestern Polytechnical University

Web Applications

ZenIDS: Introspective Intrusion Detection for PHP Applications .............................................................. 232

Byron Hawkins and Brian Demsky
— University of California, Irvine;

Statically Checking Web API Requests in JavaScript .............................................................................. 244

Erik Wittern, Annie T.T. Ying, Yunhui Zheng, Julian Dolby, and Jim A. Laredo
— IBM T.J. Watson Research Center

On Cross-Stack Configuration Errors ....................................................................................................... 255

Mohammed Sayagh, Noureddine Kerzazi, and Bram Adams
— Polytechnique Montreal; ENSIAS-University Mohammed V in Rabat

Finding and Evaluating the Performance Impact of Redundant Data Access for Applications Using ORM......................................................................................................................N/A

Tse-Hsun Chen, Weiyi Shang, Zhen Ming Jiang, Ahmed E. Hassan, Mohamed Nasser, and Parminder Flora
— Queen’s University, Kingston; Concordia University; York University, Toronto; BlackBerry

Concurrency

Efficient Detection of Thread Safety Violations via Coverage-Guided Generation of Concurrent Tests ......................................................................................................................... 266

Ankit Choudhary, Shan Lu, and Michael Pradel
— Technical University Darmstadt; University of Chicago

RCrassify: Classifying Race Conditions in Web Applications via Deterministic Replay ........................... 278

Lu Zhang and Chao Wang
— Virginia Tech; University of Southern California

Repairing Event Race Errors by Controlling Nondeterminism .................................................................. 289

Christoffer Quist Adamsen, Anders Møller, Rezwana Karim, Manu Sridharan, Frank Tip, and Koushik Sen
— Aarhus University; Samsung Research America; Northeastern University; University of California, Berkeley
Hierarchical Program Paths......................................................................................................................N/A
Chunbai Yang, Shangru Wu, and W.K. Chan
— City University of Hong Kong

Mobile Application Security

Making Malory Behave Maliciously: Targeted Fuzzing of Android Execution Environments ............. 300
Siegfried Rasthofer, Steven Arzt, Stefan Triller, and Michael Pradel
— Technical University Darmstadt; Fraunhofer SIT

A SEALANT for Inter-App Security Holes in Android.............................................................................312
Youn Kyu Lee, Jae Young Bang, Gholamreza Safi, Arman Shahbazian, Youxue Zhao, and Nenad Medvidovic
— University of Southern California; Kakao Corporation

An Efficient, Robust, and Scalable Approach for Analyzing Interacting Android Apps .......................324
Yutaka Tsutano, Shakthi Bachala, Witawas Srisa-An, Gregg Rothermel, and Jackson Dinh
— University of Nebraska-Lincoln

A Taxonomy and Qualitative Comparison of Program Analysis Techniques for Security Assessment of Android Apps............................................................................................................N/A
Alireza Sadeghi, Hamid Bagheri, Joshua Garcia, and Sam Malek
— University of California, Irvine; University of Nebraska-Lincoln

Mobile Application Development

LibD: Scalable and Precise Third-Party Library Detection in Android Markets......................................335
Menghao Li, Wei Wang, Pei Wang, Shuai Wang, Dinghao Wu, Jian Liu, Rui Xue, and Wei Huo
— Chinese Academy of Sciences; Pennsylvania State University

Analysis and Testing of Notifications in Android Wear Applications.......................................................347
Hailong Zhang and Atanas Rountev
— Ohio State University

Adaptive Unpacking of Android Apps .......................................................................................................358
Lei Xue, Xiapu Luo, Le Yu, Shuai Wang, and Dinghao Wu
— Hong Kong Polytechnic University; Pennsylvania State University

A Survey of App Store Analysis for Software Engineering.............................................................................N/A
William Martin, Federica Sarro, Yue Jia, Yuanyuan Zhang, and Mark Harman
— University College London

Debugging

Performance Diagnosis for Inefficient Loops ............................................................................................370
Linhai Song and Shan Lu
— Fireeye, Inc.; University of Chicago
How Do Developers Fix Cross-Project Correlated Bugs? A Case Study on the GitHub Scientific Python Ecosystem

Wanwangying Ma, Lin Chen, Xiangyu Zhang, Yuming Zhou, and Baowen Xu
— Nanjing University; Purdue University

Feedback-Based Debugging

Yun Lin, Jun Sun, Yinxing Xue, Yang Liu, and Jinsong Dong
— National University of Singapore; Singapore University of Technology and Design

A Framework for Evaluating the Results of the SZZ Approach for Identifying Bug-Introducing Changes

Daniel Alencar Da Costa, Shane McIntosh, Weiyi Shang, Uira Kulesza, Roberta Coelho, and Ahmed Hassan
— Federal University of Rio Grande do Norte; McGill University; Concordia University; Queen’s University, Kingston

Program Synthesis and Repair

Learning Syntactic Program Transformations from Examples

Reudismam Rolim, Gustavo Soares, Loris D’Antoni, Oleksandr Polozov, Sumit Gulwani, Rohit Gheyi, Ryo Suzuki, and Björn Hartmann
— Federal University of Campina Grande; University of Wisconsin-Madison; University of Washington; Microsoft; University of Colorado Boulder; University of California, Berkeley

Precise Condition Synthesis for Program Repair

Yingfei Xiong, Jie Wang, Runfa Yan, Jiachen Zhang, Shi Han, Gang Huang, and Lu Zhang
— Peking University; University of Electronic Science and Technology of China; Microsoft Research Asia

Heuristically Matching Solution Spaces of Arithmetic Formulas to Efficiently Reuse Solutions

Andrea Aquino, Giovanni Denaro, and Mauro Pezzé
— Università della Svizzera Italiana; University of Milano-Bicocca; University of Lugano

Multi-Step Learning and Adaptive Search for Learning Complex Model Transformations from Examples

Islem Baki and Houari Sahraoui
— Université de Montréal

Mining Software Repositories

Exploring API Embedding for API Usages and Applications

Trong Duc Nguyen, Anh Tuan Nguyen, Hung Dang Phan, and Tien N. Nguyen
— Iowa State University; University of Texas at Dallas

Unsupervised Software-Specific Morphological Forms Inference from Informal Discussions

Chunyang Chen, Zhenchang Xing, and Ximing Wang
— Nanyang Technological University
Generating API Call Rules from Version History and StackOverflow Posts ................................. N/A
Shams Azad, Peter Christopher Rigby, and Latifa Gerrouj
— SAP; Concordia University; École de Technologie Supérieure

Mining Sequences of Developer Interactions in Visual Studio for Usage Smells ......................... N/A
Kostadin Damevski, David Shepherd, Johannes Schneider, and Lori Pollock
— Virginia Commonwealth University; ABB Corporate Research; University of Delaware

Program Analysis I

SPAIN: Security Patch Analysis for Binaries towards Understanding the Pain and Pills ............... 462
Zhengzi Xu, Bihuan Chen, Mahinthan Chandramohan, Yang Liu, and Fu Song
— Nanyang Technological University; ShanghaiTech University

Travioli: A Dynamic Analysis for Detecting Data-Structure Traversals ........................................ 473
Rohan Padhye and Koushik Sen
— University of California, Berkeley

ProEva: Runtime Proactive Performance Evaluation Based on Continuous-Time
Markov Chains ............................................................................................................................. 484
Guoxin Su, Taolue Chen, Yuan Feng, and David S. Rosenblum
— National University of Singapore; Middlesex University London;
University of Technology Sydney

Software Numerical Instability Detection and Diagnosis by Combining Stochastic
and Infinite-Precision Testing ........................................................................................................ N/A
Enyi Tang, Xiangyu Zhang, Norbert Th. Muller, Zhenyu Chen, and Xuandong Li
— State Key Laboratory for Novel Software Technology and Software Institute of Nanjing University; Purdue University; University of Trier

Program Analysis II

Glacier: Transitive Class Immutability for Java ............................................................................... 496
Michael Coblenz, Whitney Nelson, Jonathan Aldrich, Brad Myers, and Joshua Sunshine
— Carnegie Mellon University; Hampton University

Challenges for Static Analysis of Java Reflection - Literature Review and Empirical Study ............ 507
Davy Landman, Alexander Serebrenik, and Jurgen J. Vinju
— Centrum Wiskunde & Informatica; Eindhoven University of Technology

Machine-Learning-Guided Selectively Unsound Static Analysis .................................................... 519
Kihong Heo, Hakjoo Oh, and Kwangkeun Yi
— Seoul National University; Korea University

The Value of Exact Analysis in Requirements Selection ................................................................. N/A
Lingbo Li, Mark Harman, Fan Wu, and Yuanyuan Zhang
— University College London
Security, Safety, and Privacy

How Good Is a Security Policy against Real Breaches? A HIPAA Case Study ................................. 530
Özgür Kafali, Jasmine Jones, Megan Petruso, Laurie Williams, and Munindar P. Singh
— North Carolina State University; Elon University; Appalachian State University

Adaptive Coverage and Operational Profile-Based Testing for Reliability Improvement ..................... 541
Antonia Bertolino, Breno Miranda, Roberto Pietrantuono, and Stefano Russo
— ISTI-CNR; Università degli Studi di Napoli Federico II

Mining Privacy Goals from Privacy Policies Using Hybridized Task Re-Composition .......................... N/A
Jaspreet Bhatia, Travis Breaux, and Florian Schaub
— Carnegie Mellon University; University of Michigan

Safety Evidence Change Impact Analysis in Practice ........................................................................... N/A
Jose Luis De La Vara, Markus Borg, Krzysztof Wnuk, and Leon Moonen
— Carlos III University of Madrid; SICS Swedish ICT; Blekinge Institute of Technology; Simula Research Laboratory

Development Tools and Frameworks

RADAR: A Lightweight Tool for Requirements and Architecture Decision Analysis .......................... 552
Saheed A. Busari and Emmanuel Letier
— University College London

PEoPL: Projectional Editing of Product Lines ..................................................................................... 563
Benjamin Behringer, Jochen Palz, and Thorsten Berger
— University of Luxembourg; Saarland University of Applied Sciences; Chalmers University of Gothenburg

Do Developers Read Compiler Error Messages? .................................................................................. 575
Titus Barik, Justin Smith, Kevin Lubick, Elisabeth Holmes, Jing Feng, Emerson Murphy-Hill, and Chris Parnin
— North Carolina State University; Washington and Lee University

A General Framework for Dynamic Stub Injection .............................................................................. 586
Maria Christakis, Patrick Emmisberger, Patrice Godefroid, and Peter Müller
— Microsoft Research; ETH Zurich

Testing and Debugging

An Empirical Study on Mutation, Statement and Branch Coverage Fault Revelation That Avoids the Unreliable Clean Program Assumption .......................................................... 597
Thierry Titcheu Chekam, Mike Papadakis, Yves Le Traon, and Mark Harman
— University of Luxembourg; University College London

Evaluating and Improving Fault Localization ..................................................................................... 609
Spencer Pearson, José Campos, René Just, Gordon Fraser, Rui Abreu, Michael D. Ernst, Deric Pang, and Benjamin Keller
— University of Washington; University of Porto; University of Massachusetts; University of Sheffield
A Survey on Metamorphic Testing
Sergio Segura, Gordon Fraser, Ana B. Sanchez, and Antonio Ruiz-Cortís
— Universidad de Sevilla; University of Sheffield

A Dissection of Test-Driven Development: Does It Really Matter to Test-First or to Test-Last?
Davide Fucci, Hakan Erdogmus, Burak Turhan, Markku Oivo, and Natalia Juristo
— University of Oulu; Carnegie Mellon University-Silicon Valley

Testing I

Syntactic and Semantic Differencing for Combinatorial Models of Test Designs
Rachel Tzoref-Brill and Shahar Maoz
— IBM Research-Haifa; Tel Aviv University

Balancing Soundness and Efficiency for Practical Testing of Configurable Systems
Sabrina Souto, Marcelo D’Amorim, and Rohit Gheyi
— State University of Paraíba; Federal University of Pernambuco; Federal University of Campina Grande

Automatic Text Input Generation for Mobile Testing
Peng Liu, Xiangyu Zhang, Marco Pistoia, Yunhui Zheng, Manoel Marques, and Lingfei Zeng
— IBM T.J. Watson Research Center; Purdue University; IBM Research

A Test-Suite Diagnosability Metric for Spectrum-Based Fault Localization Approaches
Alexandre Perez, Rui Abreu, and Arie Van Deursen
— University of Porto; Delft University of Technology

Testing II

Automated Transplantation and Differential Testing for Clones
Tianyi Zhang and Miryung Kim
— University of California, Los Angeles

Code Defenders: Crowdsourcing Effective Tests and Subtle Mutants with a Mutation Testing Game
José Miguel Rojas, Thomas D. White, Benjamin S. Clegg, and Gordon Fraser
— University of Sheffield

Optimizing Test Placement for Module-Level Regression Testing
August Shi, Suresh Thummalapenta, Shuvendu K. Lahiri, Nikolaj Bjomer, and Jacek Czerwonka
— University of Illinois at Urbana-Champaign; Microsoft USA; Microsoft Research

Learning to Prioritize Test Programs for Compiler Testing
Junjie Chen, Yanwei Bai, Dan Hao, Yingfei Xiong, Hongyu Zhang, and Bing Xie
— Peking University; Microsoft Research
# Defect Prediction

What Causes My Test Alarm? Automatic Cause Analysis for Test Alarms in System and Integration Testing .............................................................. 712
  He Jiang, Xiaochen Li, Zijiang Yang, and Jifeng Xuan  
  — Dalian University of Technology; Western Michigan University; Wuhan University

An Improved SDA Based Defect Prediction Framework for Both Within-Project and Cross-Project Class-Imbalance Problems........................................... N/A
  Xiao-Yuan Jing, Fei Wu, Xiwei Dong, and Baowen Xu  
  — Wuhan University

An Empirical Comparison of Model Validation Techniques for Defect Prediction Models................................................................................. N/A
  Chakkrit Tantithamthavorn, Shane McIntosh, Ahmed Hassan, and Kenichi Matsumoto  
  — Nara Institute of Science and Technology; McGill University; Queen’s University, Kingston

The Use of Summation to Aggregate Software Metrics Hinders the Performance of Defect Prediction Models.......................................................... N/A
  Feng Zhang, Ahmed E. Hassan, Shane McIntosh, and Ying Zou  
  — Queen’s University, Kingston; McGill University

# Formal Methods

Symbolic Model Extraction for Web Application Verification ................................................. 724
  Ivan Bocic and Tevfik Bultan  
  — University of California at Santa Barbara

UML Diagram Refinement (Focusing on Class-and Use Case Diagrams)................................. 735
  David Faitelson and Shmuel Tyszberowicz  
  — Afeka Tel-Aviv Academic College of Engineering; Academic College of Tel-Aviv Yaffo

Impact-Driven Process Model Repair................................................................................... N/A
  Artem Polyvyanyy, Will van der Aalst, Arthur Ter Hofstede, and Moe Wynn  
  — Queensland University of Technology; Eindhoven University of Technology

GK-Tail+ — An Efficient Approach to Learn Precise Software Models................................ N/A
  Leonardo Mariani, Mauro Pezze, and Mauro Santoro  
  — University of Milano-Bicocca; Università della Svizzera Italiana

# Software Evolution

Fuzzy Fine-Grained Code-History Analysis........................................................................... 746
  Francisco Servant and James A. Jones  
  — Virginia Tech; University of California, Irvine

To Type or Not to Type: Quantifying Detectable Bugs in JavaScript..................................... 758
  Zheng Gao, Christian Bird, and Earl T. Barr  
  — University College London; Microsoft Research
Approaches to Co-Evolution of Metamodels and Models: A Survey
Regina Hebig, Djamel Khelladi, and Reda Bendraou
— Chalmers University of Gothenburg; Sorbonne Universités

The Evolution of Continuous Experimentation in Software Product Development:
From Data to a Data-Driven Organization at Scale
Aleksander Fabijan, Pavel Dmitriev, Helena Holmström Olsson, and Jan Bosch
— Malmö University; Microsoft; Chalmers University of Technology
