
Wuhan, China
16-18 June 2017

Table of Contents

• **Image Processing and Computer Vision**

A Multimodal Gesture-Based Virtual Interactive Piano System Using Computer Vision and a Motion Controller .......... 1  
  *Shaun van Wyk, Dustin van der Haar*

Recognition and Location of Solar Panels Based on Machine Vision ................................................................. 7  
  *Yi-yong Yao, Yu-tao Hu*

NS-SOF: A Non-feature Matching Approach for Sparse Optical Flow ................................................................. 13  
  *Gang Hu, Yan Wang, Lei Guo*

An Implementation Framework for Fast Image Processing ..................................................................................... 19  
  *J. Fegan, S. A. Coleman, D. Kerr, B. W. Scotney*

A Novel Image Retrieval Model Based on Semantic Information and Probability Rough Set Analysis Method .......... 23  
  *Yilin Zhu, Naihuan Jing, Wenquan Chen*

Superpixel Finite Element Segmentation for RGB-D Images .................................................................................... 28  
  *D. Kerr, S. A. Coleman, B. W. Scotney*

Detection of Salient Region of In-field Rapeseed Plant Images Based-on Visual Attention Model ......................... 33  
  *Lanlan Wu*

Study on the Movable Detection Method about Inland Vessels Ultra-draft Violations ........................................... 37  
  *Wenyuan Chen, Ling Dong, Wentong Yi, Xianqiao Chen*

Tongue Shape Classification Integrating Image Preprocessing and Convolution Neural Network ........................... 42  
  *Chun-Mei Huo, Hong Zheng, Hong-Yi Su, Zhao-Liang Sun, Yi-Jin Cai, Yi-Fei Xu*

Face Spoof Detection Using Light Reflection in Moderate to Low Lighting ........................................................ 47  
  *Kudzaishe Mhou, Dustin van der Haar, Wai Sze Leung*

Online Image Jacobian Identification Using Optimal Adaptive Robust Kalman Filter for Uncalibrated Visual Servoing ..................................................................................................................... 53  
  *Ren Xiaolin, Li Hongwen, Li Yuanchun*

Vision-Based Localization in Campus with a Multi-stage Framework ................................................................ 58  
  *Guochen Ni, Rui Yu, Dawei Zhao, Tao Wu, Bin Dai*
Multi-pedestrian Detection in Crowded Places on Quadrotor's View ................................................................. 62

Yang Sun, Zhenghua Liu, Baoyang Ding

Lip Detection and Adaptive Tracking .................................................................................................................. 66

Benjamin Wang, Jane X. Zhang

• Computer Science and Information Technology

Self-Adaptive Weighted Majority Vote Algorithm Based on Entropy ................................................................. 73

Rui Li, Xiaodan Wang

Classification Based on Label Semantic Characteristic Analysis ........................................................................ 78

Mingwei Zhang, Ziqi Ji, Zebo Dong

A Method for Improving Consistency of Judgment Matrix in the AHP .............................................................. 83

Qinglin Xu, Mengqi Xiong

Storing and Querying AIS Data in HBase .............................................................................................................. 88

Tiantian Liu, Shu Gao, Xiumin Chu, Cong Lu

The Fluorescence Spectroscopy Recognition of the Traditional Chinese Medicine Injection Based on the Lifting Wavelet- BP-Fuzzy Neural Network .................................................................................. 93

Yue Zhang, Chen Chen

Analysis and Application of Functional Safety Based on Modified FMEA Method ........................................ 98

Wang Yang, Li Yanwen, Li Chunshu, Wang Xiyang

Identification of Research Fronts in Artificial Intelligence ................................................................................. 104

Changshou Luo, Liying Zhou, Qingfeng Wei

Researchment of Metadata-Driven Based Informatization Strategy of Parameter’ Life Cycle Management .... 109

Zhili Pei, Jin Chen, Mingyang Jiang, Jingqing Jiang, Qinghu Wang, Yang Song, Ming Zhao

Researchment of Cloud Computing Platform Based Software Craftsmanship Pattern .................................... 114

Qinghu Wang, Mingyu Bai, Jingqing Jiang, Mingyang Jiang, Zhili Pei, Huan Ping, Jian Xu

• Communication and Information System

A New Design of Gold-Like Binary Sequences ..................................................................................................... 118

Yan Jun, Zhang Xiang-li

Application of Time-Space Complex Envelope Technique in Time-Domain Near-Field Acoustic Holography .... 125

Xiaoxia Guo, Xudong Wang, Chaofeng Lan, Chuang Han

Semi-bit Frequency Compensation Differential Combining Post-Correlation Processing for GNSS Weak Signal Environment ............................................................................................................................. 129

Zhang Xiang-li, Yan Jun
A Quad_byte Implementation of 8B10B Decoder in JESD204B Protocol ................................................................. 137

Qunqun Zhou, Wei Wang, Yafeng Yao, Zhao Chen

• **Control Theory and Technology**

A Novel Traffic Light Recognition Method for Traffic Monitoring Systems............................................................... 141

Na Wu, Hongxia Fang

A Design of Control System for Fixed Double Propellant Unmanned Surface Vehicle Based on Moos-IvP .................. 146

Lingyan Dong, Songli Jia, Hongli Xu, Wenkang Yi

Development of the Control System of a Voice-Operated Wheelchair with Multi-posture Characteristics ............. 151

Duojin Wang, Hongliu Yu

Strategy Research on Vehicle Constant Speed Downhill Control Based on Hydraulic Retarder ............................... 156

Xiao-yu Chen, Xiao-yong Liu, Zheng-long Zhu, Ke-yong Ao

Research on Vehicle Control Unit Based on Functional Safety ................................................................. 160

Boyu Liu, Yanwen Li

A Survey on sEMG Control Strategies of Wearable Hand Exoskeleton for Rehabilitation ........................................... 165

Qingyun Meng, Qiaoling Meng, Hongliu Yu, Xiaodong Wei

System Generator Model-Based FPGA Design Optimization and Hardware Cosimulation for Lorenz Chaotic Generator ...

Lei Zhang

• **UAV & Aircraft Control and System Evaluation**

State Estimation for Unmanned Underwater Vehicles with the Extreme Information Rate ........................................ 175

Fang Jin, Qing-Quan Liu

Semantical Obstacle Representation Model for Fast UAV Path Planning ................................................................. 180

Yuexing Wang, Ming Liu, Jiansu Pu, Yang Xu

Minimum Data Rate for Observability of Networked Unmanned Vehicle with the Process Disturbance ............. 185

Qing-Quan Liu, Fang Jin

Research on the UAV Multi-channel Human-Machine Interaction System ........................................................... 190

Chen Yao, Li Xiaoling, Lou Zhiyuan, Wang Huifen, Wen Pengcheng

Route Planning Based on Improved Artificial Potential Field Method ................................................................. 196

Liu Zhiyang, Jiang Tao

Research on Control Scheme of Vertical Take-off and Landing Fixed-Wing UAV ................................................. 200

Jian Zhang, Zhiming Guo, Liaoni Wu

A UAV Patrol System Based on Bluetooth Localization ....................................................................................... 205

Mengfei Zhou, Jiang Lin, Shuo Liang, Wei Du, Long Cheng
Multi-UAV Cooperative Reconnaissance Decision-Making Based on Lingo ................................................................. 210
   Zhang Yao-zhong, Xie Song-yan

**Modeling and Control of Robot Systems**

Accuracy Enhancement of Industrial Robots by On-line Pose Correction ........................................................................... 214
   Sepehr Gharraaty, Tingting Shu, Wen-Fang Xie, Ahmed Joubair, Ilian A. Bonev

HiBot: A Generic ROS-Based Robot-Remote-Control Framework ..................................................................................... 221
   Bingzheng Yan, Dianxi Shi, Jing Wei, Chen Pan

Kinematic Modeling and Simulation of Wheeled Pipe Robot in Elbow at Planar Motion Stage ........................................ 227
   Ziwei Zhang, Guoying Meng, Pengfei Sun

Research and Implementation of Master-Slave Control for Interventional Robot System .................................................. 234
   Xie Qingcheng, Chen Guo, Han Shipeng

A Robotic Simulation System Combined USARSim and RCS Library ........................................................................ 240
   Su Zhibao, Zhang Haojie, Zhu Sen

Simulation Experiment of Flexible Parallel Robot Control by RBF Neural Network Based on Sliding Mode Robust Term 
......................................................................................................................... 244
   Wang Yuqi, Lin Qi, Wang XiaoGuang, Liu Jun

Rotation Control of Silo Cleaning Robot by Flexible Drive ................................................................................................. 250
   Huige Chen, Yi Cao, Yuyu Zhu

Design and Testing of Parallel Alignment Mechanism for Space Optical Payload ......................................................... 254
   Yu Yang, Xu Zhen-Bang, Han Chun-Yang, Han Hasiaoqier, Wang Xiao-Ming, Wu Qing-Wen

**Robot Design and Performance Test**

The Design and Analysis of Variable Buoyancy System of AUV .................................................................................. 259
   Qinggang Sun, Rong Zheng, Fulin Ren, Mozhu Li, Hongguang Liang

Design and Analysis of Oil-Immersed Transformer Internal Detection Robot .............................................................. 264
   Li Xun, Huang Ronghui, Wang Yabiao, He Zhen, Li Zhigang

Design and Mode Switching of Wheel-Leg Adaptable Amphibious Robot ................................................................. 270
   Jicheng Liu, Jinshuai Yang

Error Analysis and Research on 3-DOF Coordinate Measuring Robot .................................................................. 275
   Jiliang Zhao, Yu Su, Tao Zhang, Shentian Weng, Haifeng Luo, Hongbo Li

A Robotic System for Investigation on Mis-alignment Force of Needle and Vein Needle Insertion into Blood Vessel 
......................................................................................................................... 280
   Zixing Li, Mingwei Li, Jiaqi Wei, Baiquan Su, Chuangcun Pan, Shaolong Kuang, Lihong Zhou
Anti-falling Tree Climbing Mechanism Optimization

Pengfei Gui, Liqiong Tang, Subhas Mukhopadhyay

A Natural Orifice Soft Robot with Novel Driven Method for Minimally Invasive Surgery (MIS)

Quanwei Hao, Zixing Li, Hao Yan, Guanjie Li, Baiquan Su

Towards Flexible Magnetoelectronics for Robotic Applications

Hadi Heidari, Fengyuan Liu, Ravinder Dahiya

Development a Feeding Assistive Robot for Eating Assist

Mingming Guo, Ping Shi, Hongliu Yu

Algorithm for Autonomous Navigation of Mobile Robot Measurements Based on Beidou/Laser Radar

Dan Li, Guotian He, Canfeng Wu, Tianmiao Wang

Optimal Design of Clamping Mechanism for AUV Underwater Docking Device Based on Kriging Model

Du Jun, Meng Lingshuai, Gu Haitao, Sun Kai, Zhimin Xi

Kinematics Analysis and Simulation of a Novel 2R1T Coupled Mechanism

Jiacheng Zhang, Jingfang Liu

• Mechanical Engineering and Power Systems

Parameters Matching and Simulation for the Double Planetary Hybrid Powertrain

Wei Wang, Kongjian Qin, Fei Li, Qing Wei

Research on Energy Regenerative Braking of Electric Vehicle Based on Functional Safety Analysis

Dongbin Zhu, Xiyang Wang, Yanwen Li, Yang Wang

Analysis of Transient Deformation Response for Flexible Robotic Manipulator Using Assumed Mode Method

Wei Ding, Yunian Shen

The Research of Electric Vehicle’s MCU System Based on ISO26262

Hong-Peng Li, Yan-wen Li

Research and Simulation on the Motion of Deflection Type Automaton Device

Sun Yanfu, Li Huibin, Diao Jiaqian

A Systematic Analysis of 3D Printing Technology Community

Cunjin Li, Yonggang Chen, Qianqian Zhang
