Coastal Structures and Solutions to Coastal Disasters 2015

Resilient Coastal Communities

Proceedings of the Coastal Structures and Solutions to Coastal Disasters Joint Conference 2015

Boston, Massachusetts, USA
9 – 11 September 2015

Editors:

Louise Wallendorf
Daniel T. Cox

ISBN: 978-1-5108-4456-8
Contents

Beaches

Climate Change and Gravel Beach Responses: Hawke’s Bay, New Zealand ...................1
Paul D. Komar and Erica Harris

A Study on the Estimation of Sediment Discharge from the Naka River by
Using the Hybrid Method ........................................................................................................12
M. Takahashi, K. Uzaki, and M. Yoneyama

Terminal Groin and Beach Restoration at Folly Beach County Park,
South Carolina ..........................................................................................................................18
Haiqing Liu Kaczkowski, Steven Traynum, Tim Kana, and Mike Rentz

Impact Assessment of Climate Change on a Sandy Beach—Case Study of the
Kaike Coast of Japan ....................................................................................................................29
Y. Shibutani, K. Hayashi, M. Kuroiwa, N. Mori, and H. Mase

Winthrop Beach: Utilizing a Mixed Sediment Nourishment Regime to Restore
an Urban Beach ..........................................................................................................................37
John S. Ramsey, Joseph R. Orfant, and Rachel J. Burckardt

General Model for Longshore Transport at Any Coastal Body .............................................48
G. R. Tomasicchio, E. Musci, and F. D’Alessandro

Application of an Equilibrium Shoreline Model to the New Jersey Coast .........................55
C. J. LaPann-Johannessen and J. K. Miller

Coastal Dunes Performance and Modelling

Conceptual Design and Physical Model Study of Core-Enhanced Dunes as
Hybrid Coastal Defence Structures ........................................................................................65
Jens Figlus, Nicholas A. West, Badreyah Almarshed, and Sebastiaan N. Jonkman

Numerical Investigation of Developed and Undeveloped Barrier Island Response
to Hurricane Sandy .................................................................................................................74
S. M. Smallenge, J. L. Irish, A. R. van Dongeren, and J. P. den Bieman

Comparison of Damage Mechanisms to Oceanfront Structures Protected
by a Beach and Dune System with vs. without a Rock Seawall during
Hurricane Sandy .....................................................................................................................80
K. R. Walling, T. O. Herrington, and J. K. Miller

Coastal Flooding at the Gulf of Maine during the Patriot’s Day Storm ........................................295
Dongmei Xie, Qing-Ping Zou, and John W. Cannon

Coastal Zone Management

Inlet Management in Massachusetts with an Aim to Address Shoreline Erosion ..............302
S. W. Kelley, J. S. Ramsey, and H. E. Ruthven

Social Vulnerability eXplorer (SV-X) ......................................................................................311
D. P. Lanter, S. Durden, C. Baker, and C. M. Dunning

Use of Agent-Based Modelling to Validate Hurricane Evacuation Planning..............321
D. M. Lumbroso, J. D. Simm, M. Davison, K. D. White, and S. Durden

Urban Shorelines

Solstice Creek Restoration: Sustainability of Fisheries in Southern California ..........330
Ben Willardson, Tsou Jaw, and Peter Champion

Rockaways Boardwalk Reconstruction ..............................................................................340
Jonathan Goldstick, Domenica Stasiak, and Nicholas Cutting

Rehabilitating Boston’s Aging Seawalls for Sea Level Rise and Coastal Resiliency ....349
Charles M. Robert and Rebecca P. Skalaski

Balancing Shore Protection and Public Access Concerns: Engineering a Solution for an AMTRAK Track Realignment .................................................................355
J. Ramsey, S. Kelley, and B. Scheer

Structural Evaluation of Multifunctional Flood Defenses Using Generic Element Types ..........................................................................................................................365
M. Z. Voorendt, J. K. Vrijling, and H. G. Voortman

Evaluation of Nature-Based Options and Performance

Bridging the Gap between Engineering and Ecology: Towards a Common Framework for Conventional and Nature-Based Coastal Defenses ........................................375
Siddharth Narayan, Borja G. Reguero, Bregje van Wesenbeeck, Kelly A. Burkes-Copes,
Inigo J. Losada, Michael W. Beck, and Jane C. Ingram

Wave Impacts on Rock Lighthouses ......................................................................................385
Alison Raby, Davide Banfi, and David Simmonds

The Performance of Ecologically-Enhanced Urban Shorelines in NYC during Superstorm Sandy .................................................................392
J. K. Miller and A. Rella
A Forensic Analysis of the Performance of Ecologically-Enhanced Shorelines along the Hudson River and the Bronx, New York .................................................................401
A. Rella and J. Miller

Nature-Based Breakwaters

Engineering of an Island-Style Breakwater System for the Ft. Pierce Marina ................412
Jack C. Cox

Effects of Low-Crested Living Shoreline Breakwaters on Wave Setup .....................421
Kari P. Servold, Bret M. Webb, and Scott L. Douglass

Wave Transmission through Artificial Reef Breakwaters ........................................432
Bret M. Webb and Richard Allen

CFD Modeling for the Analysis of Living Shoreline Structure Performance .............442
Josh Carter, Scott Fenical, Craig Harter, and Joshua Todd

Nature-Based Shore Protection

Evaluation of Berm Shape for Wave Energy Reduction in Restored Tidal Wetlands .......................................................................................................................451
Jane McKee Smith, Elizabeth O. Murray, Thad C. Pratt, and S. Jarrell Smith

A Series of Experiments Investigating Wave Attenuation through Artificial Marsh Grass ...........................................................................................................463
Mary Anderson Bryant and Jane McKee Smith

Performance-Based Design

The Effect of a Dragging Anchor on a Horizontal Layer of Rockfill: A Prototype and a Scale Model Test .............................................................469
S. Cram, M. L. E. B. van der Hoeven, L. P. H. C. Krouwel, and H. J. Verhagen

Probabilistic Design of a Secondary Breakwater in the New Harbour Basin of the Port of La Coruña ..................................................................................482
Enrique Maciñeira, Enrique Peña, Victoria Bajo, José Sande, and Fernando Noya

Verification of Rock Toe Stability Applying the Hydraulic Performance Curves .....491
M. Vílchez, M. Clavero, and M. A. Losada

Technical Advances in the Development of a Floating WEC: MICO ....................498
Erick Iván García Santiago, Edgar Mendoza Baldwin, Rodolfo Silva Casarín, Sara Izquierdo-Albero, José A. González Escrivá, Miguel Ortega García, and Francisco Ortega Garcia
Resilience

Case Study: Village of Surfside, TX, Design, Performance, and Adaptive Management of Coastal Structures ................................................................. 507
C. Connor, M. Campbell, J. Carter, T. Durnin, and K. Frenzel

Improving the Representation of the Fragility of Coastal Structures .......... 518

A Review of the Methods Used to Improve the Resilience of Communities in Low-Income Countries to Coastal Floods and Their Relevance to the U.S.A .......... 529
D. M. Lumbroso, K. D. White, J. D. Simm, and S. Durden

Estimating the Inland Flood Risk and Mitigation Effects for Central Europe and the United States ............................................................. 535
Y. Gao and R. Wojtkiewicz

Development of a Tool for Assessing the Vulnerability of Rhode Island’s Marinas to Sea Level Rise and Storm Surge ........................................ 543
Wendy K. Laurent, Nicholas Brown, Bradford Carvalho, Frank Giles, Benjamin Lodge, Kelley McBride, Charles McGann, Darien McLaughin, Jason Peck, Dennis Tierney, Craig Swanson, Malcolm Spaulding, and Christopher D. P. Baxter

Quantification of Safety Standards for Small Islands in the Wadden Sea ........ 552
Theide Wöffler, Birgit Matelski, and Holger Schüttrumpf

Resilience and Assessment of Protection Structures

Engineered Shoreline Protection Case Study from the Jersey Shore ............... 562
A. J. Chew

Selection of Appropriate Coastal Protection Strategies for Caribbean Coastlines .......... 570
Jamel Banton, Philip Warner, David Smith, and Veronique Morin

Quantifying Resilience: Coastal Structures and Nourished Beaches............... 582
John R. Headland

Wave Loads

Conjectures on the Failure of the OWC Breakwater at Mutriku ..................... 592
Encarnacion Medina-Lopez, William Allsop, Aggelos Dimakopoulos, and Tom Bruce

Experimental Study of Horizontal Wave Forces on a Double Chamber Perforated Caisson ................................................................. 604
Sang-Ho Oh, Chang-Hwan Ji, Young Min Oh, and Dal Soo Lee

Structural Deflections from Wave Forces ............................................... 610
Garland P. Pennison

© ASCE
Lateral Restraining Stiffness Effects on the Bridge Deck-Wave Interaction under Hurricane Waves .................................................................619
Guoji Xu and C. S. Cai

Effects of the High-Order Non-Linearity of Random Waves on Wave Pressures Acting on Breakwaters .........................................................630
Hiroaki Kashima, Katsuya Hirayama, and Nobuhito Mori

Wave Overtopping and Wave-Induced Loads on Coastal Sea Walls ..................638
A. Kortenhaus, D. Gallach-Sánchez, M. Streicher, C. Hohls, K. Trouw, C. Altomare,
T. Suzuki, D. Thoon, P. Troch, and J. De Rouck

Force Measurements on Storm Walls Due to Overtopping Waves: A Middle-Scale Model Experiment .........................................................650
Koen Van Doorslaer, Alessandro Romano, Giorgio Bellotti, Corrado Altomare,
Iván Cáceres, Julien De Rouck, Leopoldo Franco, and Jentsje van der Meer

Numerical Study on Breakwaters by the Accurate Particle Method .......................661
Naoki Tsuruta, Kojiro Suzuki, Kenichiro Shimosako, and Hitoshi Gotoh

Investigation on Uplift Dynamic Pressures in Crown Wall Breakwaters ................670
Edgar Mendoza, Manuel Verduzco, and Rodolfo Silva

Estimation of the Impulsive Pressure Acting on an Upright Wall on a Steeply Sloping Sea Bottom .................................................................678
Kenichiro Shimosako, Shigeo Takahashi, Naoki Tsuruta, and Kojiro Suzuki

Wave Runup and Overtopping

Numerical Modelling of the Stability of Breakwater Armour Systems ..................687
John-Paul Latham, Jiansheng Xiang, and Pablo Higuera

Individual Overtopping Volumes for Steep Low-Crested Structures ....................699
David Gallach-Sánchez, Jeroen Platteeuw, Peter Troch, and Andreas Kortenhaus

Hydraulic Parameters of Overtopping Wave Volumes ....................................710
Steven A. Hughes

An Advanced and Improved Artificial Neural Network for the Prediction of Wave Overtopping .................................................................719
Barbara Zanuttigh, Sara Mizar Formentin, and Jentsje W. van der Meer

Validation of the Cumulative Overload Method Based on Tests by a New Wave Run-Up Simulator ...............................................................731
J. W. van der Meer, G. J. Steendam, and A. van Hoven
Wave Overtopping Prediction for Sloping Coastal Structures with Overspill Basins at the Crest .................................................................743
Adriana Grossi, Andreas Kortenhau, Alessandro Romano, and Leopoldo Franco

Extreme Wave Runup in a Coastal Zone: Experimental and Numerical Modelling ..............................................................754
C. N. Whittaker, C. J. Fitzgerald, P. H. Taylor, and A. C. Raby

Wave Soil Structures

Exploring the Need for Geotextile Filters for Rubble Bunds Retaining Sand-Fill Islands.................................................................763
Andrea Polidoro, William Allsop, and Tim Pullen

Sliding and Floating of Wooden Houses Due to Storm Surge and Waves .................774
Xavier Chavez Cardenas, Nobuhisa Kobayashi, and Rebecca Quan

Breakwater Innovation Design Using a Geotextile Tube as a Core .....................787
Daoxian D. Shen, Edward Albada, Ron Beardsley, Liang He, and Padhraic O’Connor

Wave-Induced Seabed Instability around a Breakwater ....................................799
Dong-Sheng Jeng

Laboratory Modelling of Scour on Seawalls ..........................................................809
Ravindra Jayaratne, Edgar Mendoza, Rodolfo Silva, and Francisco Gutiérrez

Armor Stability

Rock Slopes on Top of Sand: Modelling of Open Filters under Wave Loading ....817
Marcel R. A. van Gent, Maria P. Herrera, Jorge Molines, and Niels G. Jacobsen

Design of the Western Breakwater for the Outer Port at Punta Langosteira, A Coruña, Spain .............................................................828
Josep R. Medina, M. Esther Gómez-Martín, Enrique Peña, and Antonio Corredor

Physical Modelling and Design Optimizations for a New Port in Brazil ..................838
S. Baker, N. Sultan, A. Cornett, and W. Gunderson

Scour Protection, Terminal Groin/Jetty Construction, and Beach Replenishment at Amtrak’s New Niantic River Bridge ........................................848
J. Richard Weggel, Craig M. Benedict, Ara G. Mouradian, and John Brun

Design and Construction Aspects of Berm Breakwaters ....................................864
Sigurður Sigurdarson and Jentsje van der Meer

Numerical Modelling of Wave Reflection and Transmission in Vertical Porous Structures ........................................................................876
Jeroen van den Bos, Henk Jan Verhagen, and Coen Kuiper

© ASCE
A New Symmetrical Unit for Breakwater Armour: First Tests..........................891
M. Salauddin, A. Broere, J. W. van der Meer, H. J. Verhagen, and E. Bijl

Concrete-Enhanced Synthetic Turf Revetment System—An Innovative Technology for Protecting Coastal Structures.................................................902
Bradford Cooley, Christopher Thornton, and Steven Hughes

Numerical Evaluation of Stability Methods for Rubble Mound Breakwater Toes ..........915
S. P. K. Verpoorten, W. J. Ockeloen, and H. J. Verhagen

Stability Tests and Damage on Breakwaters Armoured with Tetrapods...............................925
Otavio J. Sayao and Renan F. da Silva
