# TABLE OF CONTENTS

## SESSION 1: RELIABILITY ENHANCEMENT/RUN LIFE

- The Quest for the Ultrareliable ESP
  - R. Lastra
  - Session 1: Reliability Enhancement/Run Life, Page 1

- High-Reliability ESP Application in the North Sea
  - A. Camacho, L. Pastre, S. Boyce, J. Macdonald
  - Session 1: Reliability Enhancement/Run Life, Page 18

- Field-Validated Models for Predicting Electric Submersible Pump Run Life in Saudi Fields
  - A. Qahtani
  - Session 1: Reliability Enhancement/Run Life, Page 36

- Mobility Management Platform Improves Management Level of Artificial Lift Systems
  - J. Shi, X. Zhang, L. Gu, D. Sun, C. Zhao, L. Su, J. Liang
  - Session 1: Reliability Enhancement/Run Life, Page 45

- Application of the Multiphase Flow Simulator to Evaluate Power Allocation Management for ESPs
  - M. Ali
  - Session 1: Reliability Enhancement/Run Life, Page 53

## SESSION 2: ARTIFICIAL LIFT IN CHALLENGING ENVIRONMENT

- Field Performance and Technology Update of All Metal Progressing Cavity Pumps Deployed in Thermal Processes
  - G. Guise, G. Crotte, M. Lehman, B. Limoges, B. Robert
  - Session 2: Artificial Lift in Challenging Environment, Page 66

- ESP Reliability Lessons Learned From Three H2S Saudi Arabian Fields
  - M. Al-Khalifa, R. Shepler, R. Cox, S. Alquwizani
  - Session 2: Artificial Lift in Challenging Environment, Page 86

- ESP Suffers Erosion Due to Sand Production in a Mature Onshore Oil Field
  - A. Boudi
  - Session 2: Artificial Lift in Challenging Environment, Page 99

- Integrated Tubing for Both Steam Injection and Oil Production of Thermal Wells Based on ESP in Offshore Oilfield China
  - X. Han, F. Zhou, H. Zhang, W. Zhang, H. Liu, H. Wang, Q. Wang, T. Branch, J. Cui
  - Session 2: Artificial Lift in Challenging Environment, Page 105

- Recommended Solutions for ESP Installed in Very High Salinity Reservoirs and Severe Corrosive Media
  - H. Brahmi
  - Session 2: Artificial Lift in Challenging Environment, Page 114

## SESSION 3: ARTIFICIAL LIFT AUTOMATION AND PERFORMANCE MANAGEMENT

- Improved Sucker Rod Pumping Systems Performance by Fully Automated Closed Loop and Control Solution
  - M. Ghareeb, N. Sadek, A. Sheih, A. Elfotouh, A. Nasser
  - Session 3: Artificial Lift Automation and Performance Management, Page 143

- Increasing ESP Run Life Using a Combination of Reliable Abrasion-Resistant Pumps and 24/7 Real-Time Surveillance
  - M. Vidrianto, M. Noviansyah, A. Rajain, F. Wang
  - Session 3: Artificial Lift Automation and Performance Management, Page 155

- The Benefits of Introducing Intelligent Gas Lift Management to Create a Smart Field
  - S. Faux, T. Glenday
  - Session 3: Artificial Lift Automation and Performance Management, Page 168

- Performance Analysis for Progressive Cavity Pump PCP Production Scenario in Sandy and Heavy Oil Wells
  - M. Alfaqih, A. Arivibowo, C. Juliana
  - Session 3: Artificial Lift Automation and Performance Management, Page 178

- Real-Time Production Optimization of a Production Network with ESP-Boosted Wells: A Case Study
  - A. Hoffmann, M. Stanko
  - Session 3: Artificial Lift Automation and Performance Management, Page 190

## SESSION 4: UNCONVENTIONAL ARTIFICIAL DEPLOYMENT AND APPLICATIONS

- Cable Concept Evaluation for ESP Rigless Deployment
  - J. Xiao, B. Roth, R. Lastra, Y. Sarawaq, J. Mack
  - Session 4: Unconventional Artificial Deployment and Applications, Page 212

- 1st Slim Line ESP Deployment in Side Track Slim 5 Inch Casing in Middle East
  - O. Aboou-Houzifa, A. Ahmed
  - Session 4: Unconventional Artificial Deployment and Applications, Page 225

- Review and Applicability of Downhole Separation Technology
  - G. Muktadir, M. Amro, A. Schraun
  - Session 4: Unconventional Artificial Deployment and Applications, Page 232
Novel Electric Submersible Pump Cable Operates in High H2S Production Environment ........................................ 245
B. Roth, J. Xiao, M. Paquette

Rigless ESP Technology: Well Control and Completion Considerations ................................................................. 262
E. Bespalov

New Solutions for Installation of Sucker Rod Pumps in Marginal Field ........................................................................ 276
S. Kadav, R. Kumar, P. Kumar, V. Kumar, A. Deo, P. Kumar, S. Kumar

The Research and Application of Carbon Fiber Rods in Deep Oil Wells of Xinjiang Oilfield, China ............................... 292

SESSION 5: NEW ARTIFICIAL LIFT CONFIGURATIONS TO ENHANCE PRODUCTION

Eliminating Scale Buildup Challenges and Lessons Learnt from the Fadhili Reservoir Awali Field ..................................... 301
R. Esbait, G. Palanisamy

Production Enhancement by Installation of Jet Pump in SSD in Pakistan Ghauri Oil Field ................................................. 307
S. Kumar, S. Kalwar, K. Farouque, S. Qureshi, Z. Anjum

Deployment of a Multiphase Progressive Cavity Pump Coupled with a Submersible Permanent Magnet Motor .................. 318
Fl. Ajeel, A. Bafakyh, M. Lehman, M. Delaville

Prediction of Bubble Point Pressure Using Artificial Intelligence AI Techniques ............................................................ 329
F. Alakbari, S. Elkhatatny, S. Baarimah

Doubled Production in Mature Sandy and Multilayers Reservoir Using Screenless and Overdesigned ESP System ............... 338
M. Alfaqih, M. Ahsari, C. Ardan, R. Seno

SESSION 6: CASE STUDIES AND BEST PRACTICES

Encapsulated ESP with Two Stages of Gas Separation ................................................................................................... 349
G. Zabala, G. Martinez

Hybrid System of ESP and Gas Lift Application from Conceptual Design Pilot Test to System Analysis ................................. 360
S. Tran, H. Vu, V. Le, T. Nguyen, L. Nguyen, P. Prajuna, H. Dong

How to Diagnose and Solve a Tripping ESP Caused by Multiphase Flow Behavior in a Horizontal Well ................................ 373
P. Bruijnjen, J. Boer

Foam Assist in a Gas-Lifted Oil Well .................................................................................................................................. 387
A. Farag, T. Robertson, J. Montero

Reviving the Production of a Dead Well by testing it with Hydraulic Jet Pump ................................................................. 403
S. Kalwar, K. Farouque, A. Awan, C. Louis

SESSION 7: NEW GENERATION OF ARTIFICIAL LIFT TECHNOLOGY

Application of New Generation Variable Speed Drive Solutions To Reduce Footprint and Operating Cost ................................ 413
T. Orlowski, A. Radcliffe, A. Lois

Gas Lift - Past & Future ...................................................................................................................................................... 420
A. Benamara

Production Optimization and Application of Combined Artificial-Lift Systems in Deep Oil Wells ........................................ 426

New Technology Reduces Flushbys & Extends PCP Run Life in Australia ................................................................. 436
R. Hicks

Advances in Completion Design to Improve Bhagyam PCP Run Life ................................................................................. 440
S. Agarwal, N. Panigrathi, A. Ranjan, S. Nekkanti, A. Bohra, P. Kumar, S. Vermani, S. Kumar, V. Agarrwal

New Artificial Lift Technology Changes the Game for Completion Design ................................................................. 457
M. Alsiemat, P. Gambier

Electric Submersible Progressing Cavity Pump Driven by Low-Speed Permanent Magnet Synchronous Motor .................. 465
J. Cui, W. Xiao, X. Zhang, P. Zhang, P. Chen, H. Huang, X. Wu
