PAPG/SPE Pakistan Section
Annual Technical Conference
and Exhibition 2015

Islamabad, Pakistan
24 – 25 November 2015

ISBN: 978-1-5108-4489-6
TABLE OF CONTENTS

Application of Underbalanced Drilling in Conventional Reservoirs And Its Prospects .................................................. 1
S. Raza, S. Lashari

A Case Study of Improved Oil Recovery through Successful Application and Effective Management
of Dumpflood Water Injection Technique .................................................................................................................. 9
M. Noman, F. Mehmood, W. Majeed, M. Mufti

Deployment of High Performance Packer for Extreme Gradients Hydraulic Fracturing Operations .................. 23
V. Mittiga, S. Ahmed, M. Adnan, N. Raja, A. Rashid

Design and Analysis of Laboratory Experiment on Surfactant-Flooding with Software Protocol .................. 27
M. Hassan, S. Channa, S. Qazi, S. Ali, S. Kumar

Drilling Optimization of Kohat/Potohar Region by Mathematical Model (Using Matlab) and
Comparative Method-A Case Study .................................................................................................................. 41
Q. Amjad, S. Waheed, M. Jadoon, F. Tariq

Evolution of Coiled Tubing Electric Line Plug and Perf Technology for Multistage Hydraulic
Fracturing in Pakistan ........................................................................................................................................... 53

First Application of New Conveyance Technique to Acquire Electric Log Data in Complex Hole
Conditions in Margala North and Tal Blocks of Northern Potwar Deform Zone and Kohat Basin,
Pakistan ............................................................................................................................................................... 59

Health, Safety and Environment – A Comparison: What Should Be the Priority for Upstream Oil
Industry in Pakistan? ........................................................................................................................................ 68
N. Sabhani, M. Khan

High Precision Temperature - Spectral Noise Logging (HPT-SNL) at Well ‘X’ to Identify Zonal
Contribution & Behind Casing Communication - A Case Study .............................................................................. 74

Method To Optimally Produce Wells Having Salt Precipitation Issues ............................................................ 84
A. Soomro, A. Hadi, A. Awase, N. Koon, Dhar, N. Ahmed

Pressure Transient Testing and Fluid Profiling using Wireline Formation Tester Helps Optimizing
Completion Strategies: Pakistan Tal Block Case Study ............................................................................................... 91

Production Enhancement By Installation of Jet Pump in SSD in Pakistan- Ghauri Oil Field.......................... 109
S. Kumar, K. Farouque, S. Ahmed, S. Qureshi, M. Awan, Z. Anjum

Production Optimization of Foam Assisted Lift (FAL) Wells and Evaluation of Good and Bad
Practices to Ensure Maximum Production ........................................................................................................... 121
M. Uddin, I. Tayyab, N. Koon, Dhar, Q. Ahmed, A. Soomro

Flexural Attenuation With SLG (Solid Liquid Gas) Mapping - A New Technology To Evaluate Light
and Contaminated Cements First Case Study in Pakistan ...................................................................................... 128
A. Hussain, M. Khan, R. Gilani, U. Dar, M. Mughal, A. Khalid, Q. Javed

Reaming with Casing Technology Reduces Rig Time by 50% in Challenging Limestone and Shale
Formation in Pakistan ............................................................................................................................................. 137
S. Khan, K. Berghofer, A. Prinz, K. Khan, B. Ifitkahr, M. Rashid, A. Ishaq, B. Mir, S. Mushtaque

Stakeholder Management – Ensuring Social License To Operate for Oil & Gas Industry ............................... 141
R. Munir, T. Janjua, R. Khajjuk, I. Janjua, M. Jadoon

Stress Testing in Shale with Advanced Wireline Formation Tester: First Case Study in Pakistan .................. 148
M. Khan, M. Samir, H. Mughal, A. Khalid, U. Dar, T. Zubair, Q. Javed

Study of Asphaltene Precipitation during CO2 Injection in Light Oil Reservoirs ........................................ 161
M. Ali, N. Dahir, S. Halder

Successful Execution of First Coiled Tubing “Shoot and Pull” Underbalance Perforation in Pakistan .......... 170
S. Fahim, H. Raja, S. Latif, M. Akbar

Very First Application of Nitrified Stiff Foam along with the Near- Balanced Drilling Technology to
Mitigate the NPT Associated with Highly Fractured, Low Pressure Hydrocarbon Bearing Sui Main
Limestone Formation in Pakistan – A Case History ......................................................................................... 176
Q. Ashraf, M. Hussain, M. Nusair, K. Luqman

Very First Application of Weatherford Rotating Control Diverter (RCD) to Reduce the NPT
Associated With Loss and Kick Scenario Well in Pakistan – A Case History ............................................... 188
Q. Ashraf, T. Rehman, M. Nusair, K. Luqman
