21st International Congress on Acoustics

Held in conjunction with the 165th Meeting of the Acoustical Society of America and 52nd Meeting of the Canadian Acoustical Association

Montreal, Canada
2 - 7 June 2013

Volume 1 of 15

# TABLE OF CONTENTS

## VOLUME 1

### ACOUSTICAL OCEANOGRAPHY

#### 1AAO: ESTUARINE ACOUSTICS

1AAO1: THE IMPACT OF ACOUSTIC OCEANOGRAPHIC METHODS ON ESTUARINE DYNAMICS RESEARCH ................................................................. 1  
W. Rockwell Geyer, Peter Traykovski, Andone Lavery  
1AAO2: THE SPATIAL PROPERTIES OF BREAKING WAVE GENERATED AND BEDLOAD TRANSPORT GENERATED NOISE IN THE SEDIMENT LAYER OF A SHALLOW WATER WAVE GUIDE ........................................ 7  
David R. Barclay, Len Zedel, Alex E. Hay, Matthew G. Hatcher  
1AAO3: ACOUSTIC MEASUREMENTS OF THE SPATIAL DISTRIBUTION OF SUSPENDED SEDIMENT AT A SITE ON THE LOWER MEKONG RIVER ................................................... 14  
Stephanie A. Moore, Guillaume Dramais, Philippe Dussouillez, Jérôme Le Coz, Colin Rennie, Benoît Camenen  
1AAO4: ACOUSTIC PROPAGATION CHARACTERISTICS OF THE ESTUARINE SALT WEDGE .............................................................. 23  
D. B. Reeder  
1AAO5: QUANTIFICATION OF STRATIFIED TURBULENCE USING ACOUSTIC PROPAGATION AND BROADBAND SCATTERING TECHNIQUES ....................................................................................... 29  
Andone Lavery, W. Rockwell Geyer, Malcolm E. Scully  
1AAO6: ACOUSTICS AND ESTUARINE ECOLOGY: USING ACTIVE AND PASSIVE METHODS TO SURVEY THE PHYSICAL ENVIRONMENT, VEGETATION AND ANIMALS IN NORTH CAROLINA'S COASTAL ESTUARIES ........................................................................................................ 35  
Joseph Luczkovich, Mark Sprague, Cecilia S. Krathfoer, John Walsh, Dean Carpenter  
1AAO7: INVESTIGATION OF LOW-FREQUENCY ACOUSTIC TISSUE PROPERTIES OF SEAGRASS ........................................................................ 44  
Gregory Enenstein, Craig Dolder, Preston S. Wilson, Jean-Pierre Hermand

#### 2AAO: SEISMIC OCEANOGRAPHY

2AAO1: UNCERTAINTY OF TRANSMISSION LOSS DUE TO SMALL SCALE FLUCTUATIONS OF SOUND SPEED IN TWO ENVIRONMENTS ............................................................................................................. 50  
J. P. Fabre, Warren T. Wood  
2AAO2: INVERSION OF DENSITY IN THE OCEAN FROM SEISMIC REFLECTION DATA ...................................................................................... 61  
Berta Biescas Gorriz, Barry R. Ruddick, Valentí Sallares  
2AAO3: SEISMIC OCEANOGRAPHY IMAGING OF THERMAL INTRUSIONS IN STRONG FRONTAL REGIONS ................................................................................................................................. 70  
2AAO4: EXPLORING THE SHELF-SLOPE DYNAMICS IN THE ADRIATIC SEA USING NUMERICAL MODELS AND SEISMIC OCEANOGRAPHY (SO) ........................................................................................................... 75  
Andrea Bergamasco, Francesco M. Falcioli, Jeffrey W. Book, Sandro Carniel, Warren T. Wood, Mauro Sclavo, Richard W. Hobbs  
2AAO5: MAPPING TURBIDITY LAYERS USING A COMBINATION OF HIGH RESOLUTION SEISMIC OCEANOGRAPHIC AND PHYSICAL OCEANOGRAPHIC DATA ........................................................................ 81  
Ekaterina A. Vsemirnova, Richard W. Hobbs  
2AAO6: CHARACTERIZATION OF THERMOHALINE STAIRCASES IN THE TYRRHENIAN SEA USING STOCHASTIC HETEROGENEITY MAPPING ................................................................................................. 87  
Grant G. Buffett, Richard W. Hobbs, Ekaterina A. Vsemirnova, Dirk Klaeschen, Charles A. Hurich, César Ranero, Valentí Sallarès  
2AAO7: MAPPING NON-LOCAL TURBULENT BREAKDOWN OF OCEANIC LEE WAVES OFFSHORE COSTA RICA THROUGH SEISMIC OCEANOGRAPHY ............................................................................................................. 94  
Will F. Fortune, W. Steven Holbrook, Raymond Schmidt, Scott Smith  
2AAO8: CURRENT-EDDY INTERACTION IN THE AGULHAS RETURN CURRENT REGION FROM THE SEISMIC OCEANOGRAPHY PERSPECTIVE ........................................................................... 101  
Ana E. Rice, Jeffrey W. Book, Warren T. Wood, Tim Fischer

#### 3AAO: ACOUSTICAL OCEANOGRAPHY PRIZE LECTURE

3AAO1: ACOUSTICAL TOMOGRAPHY IN THE SHALLOW WATER OCEAN: DREAM OR REALITY? ........................................................................ 106  
Philippe Roux

### 3PAO: OCEAN ACOUSTICAL TOMOGRAPHY

3PAO1: INFLUENCE ON SOUND SPREAD CONSIDERING THE FLOW VELOCITY IN A HORIZONTAL LAYER MEDIA ................................................................................................................................. 112  
Yang Song, Zhen-Qi Zhao
### 3PAO: BIOLIGIC AND NON-BIOLOGIC SCATTERERS

<table>

- **Title and Page numbers**
1PAB12: GIRAFFE HELMHOLTZ RESONANCE ..............................................................................................................................264

Frédéric Theunissen, Solveig Mouterde, Nicolas Mathevon

2PAB1: THREE DIRECTIONS IN RESEARCH ON AUDITORY SCENE ANALYSIS ..................................................................................................................329

Albert S. Bregman

2PAB2: MECHANISMS OF PERCEIVING COMMUNICATION SOUNDS IN SCENES ..................................................................................................................337

Sarah M. Woolley

2PAB3: THE SEARCH FOR A NEURAL BASIS OF COMMUNICATION: LEARNING, MEMORY, PERCEPTION AND PERFORMANCE OF VOCAL SIGNALS ....................................................................................342

Jonathan Pratt

2PAB4: CALL PERCEPTION IN MICE ..................................................................................................................................................349

Erikson Neilans, David Holfoth, Kelly E. Radziwon, Christine V. Portfors, Micheal Dent

2PAB5: AUDITORY PROCESSING FOR CONTRAST ENHANCEMENT OF SALIENT COMMUNICATION VOCALIZATIONS ........................................................................................................................................................353

Alex G. Dunlap, Frank Lin, Robert Liu

2PAB6: INFLUENCES OF PERCEPTUAL CONTINUITY ON EVERYDAY LISTENING ..................................................................................................................................................357

Barbara Shinn-Cunningham, Golbarg Mehruei, Scott Bressler, Salwa Masud

2PAB7: BUGS AND BATS: NEURAL ANALYSIS OF BEHAVIORALLY RELEVANT SOUNDS IN CRICKETS ..................................................................................................................361

Gerald Pollack

2PAB8: NEW OBSERVATIONS AND MODELING OF AN UNUSUAL SPATIOTEMPORAL PATTERN OF FISH CHORUSING OFF THE SOUTHERN CALIFORNIA COAST ..................................................................................................................366

Gerald D'Spain, Heidi Batchelor, Tyler A. Hellbre, Peter McCarty

2PAB9: BEHAVIORAL RESPONSES OF ANURAN AMPHIBIANS TO BIOTIC, SYNTHETIC AND ANTHROPOGENIC NOISE ..................................................................................................................................................373

Peter Narins

2PAB10: ACTIVE LISTENING IN A COMPLEX ENVIRONMENT ........................................................................................................................379

Melville Wohlgemuth, Cynthia Moss

2PAB11: YOUR ATTENTION, PLEASE! DETERMINING SALIENCY OF COMPETING AUDIO STIMULI IN NATURAL SCENARIOS ..................................................................................................................................................386

Francesco Tordini, Albert S. Bregman, Amupriya Ankolekar, Thomas E. Sandholm, Jeremy R. Cooperstock

2PAB12: A NEUROETHOLOGICAL ANALYSIS OF THE INFORMATION IN PROPAGATED COMMUNICATION CALLS ..................................................................................................................................................395

Frédéric E. Theunissen, Solveig Mouterde, Nicolas Mathevon

2AABB: CONDITIONING, SEGMENTATION, AND FEATURE EXTRACTION IN BIOACUSTIC SIGNALS

2AAB1: A FRAMEWORK FOR ANALYZING BIOACUSTICS AUDIO RECORDINGS AS MULTIPLE INSTANCE MULTIPLE LABEL DATA ..................................................................................................................272

Raviv Raich, Forrest Briggs, Qi Lou, Xiao Li Fern, David Mellinger

2AAB2: JOINT CLASSIFICATION OF WHISTLES AND ECHolocation CLICKS FROM ODONTOCETES ..................................................................................................................................................277

Yong Lu, David Mellinger, Holger Klincek

2AAB3: SPARSE CODING FOR LARGE SCALE BIOACUSTIC SIMILARITY FUNCTION IMPROVED BY MULTISCALE SCATTERRING ..................................................................................................................285

Herve Glotin, Joseph Razik, Sébastien Puris, Xanadu Halkias

2AAB4: BAT SPECIES IDENTIFICATION FROM ZERO CROSSING AND FULL SPECTRUM ECHolocation CALLS USING HIDDEN MARKOV MODELS, FISHER SCORES, UNSUPERVISED CLUSTERING AND BALANCED WINNOW PAIRWISE CLASSIFIERS ..................................................................................................................................................292

Ian Agrenat

2AAB5: CONDITIONING FOR MARINE BIOACUSTIC SIGNAL DETECTION AND CLASSIFICATION ..................................................................................................................................................301

David Mellinger

2AAB6: ROBUSTNESS OF PERCEPTUAL FEATURES USED FOR AUTOMATIC AURAL CLASSIFICATION TO PROPAGATION EFFECTS ..................................................................................................................................................309

Carolyn M. Binder, Paul Hines, Sean P. Pecknold, Jeff Scrutton

2AAB7: ODONTOCETE CLICK TRAIN DEINTERLEAVING USING A SINGLE HYDROPHONE AND RHYTHM ANALYSIS ..................................................................................................................................................316

Olivier Le Bo, Julien Bonnel, Jérôme I. Mars, Cédric Gervaise

2AAB8: COMPLEXITY INDEX AND PROPORTIONAL VARIABILITY TO STUDY DOLPHIN WHISTLES ..................................................................................................................................................324

Carmen Bazúa Durán, E. Julieta Sarmiento Ponce, Brenda P. González Leal, Camila Rodríguez Bohorquez

2PAB: LISTENING IN THE NATURAL ENVIRONMENT

2PAB1: THREE DIRECTIONS IN RESEARCH ON AUDITORY SCENE ANALYSIS .................................................................329

Albert S. Bregman

2PAB2: MECHANISMS OF PERCEIVING COMMUNICATION SOUNDS IN SCENES ..................................................................................................................................................337

Sarah M. Woolley

2PAB3: THE SEARCH FOR A NEURAL BASIS OF COMMUNICATION: LEARNING, MEMORY, PERCEPTION AND PERFORMANCE OF VOCAL SIGNALS ..................................................................................................................................................342

Jonathan Pratt

2PAB4: CALL PERCEPTION IN MICE ..................................................................................................................................................349

Erikson Neilans, David Holfoth, Kelly E. Radziwon, Christine V. Portfors, Micheal Dent

2PAB5: AUDITORY PROCESSING FOR CONTRAST ENHANCEMENT OF SALIENT COMMUNICATION VOCALIZATIONS ..................................................................................................................................................353

Alex G. Dunlap, Frank Lin, Robert Liu

2PAB6: INFLUENCES OF PERCEPTUAL CONTINUITY ON EVERYDAY LISTENING ..................................................................................................................................................357

Barbara Shinn-Cunningham, Golbarg Mehruei, Scott Bressler, Salwa Masud

2PAB7: BUGS AND BATS: NEURAL ANALYSIS OF BEHAVIORALLY RELEVANT SOUNDS IN CRICKETS ..................................................................................................................................................361

Gerald Pollack

2PAB8: NEW OBSERVATIONS AND MODELING OF AN UNUSUAL SPATIOTEMPORAL PATTERN OF FISH CHORUSING OFF THE SOUTHERN CALIFORNIA COAST ..................................................................................................................................................366

Gerald D'Spain, Heidi Batchelor, Tyler A. Hellbre, Peter McCarty

2PAB9: BEHAVIORAL RESPONSES OF ANURAN AMPHIBIANS TO BIOTIC, SYNTHETIC AND ANTHROPOGENIC NOISE ..................................................................................................................................................373

Peter Narins

2PAB10: ACTIVE LISTENING IN A COMPLEX ENVIRONMENT ........................................................................................................................379

Melville Wohlgemuth, Cynthia Moss

2PAB11: YOUR ATTENTION, PLEASE! DETERMINING SALIENCY OF COMPETING AUDIO STIMULI IN NATURAL SCENARIOS ..................................................................................................................................................386

Francesco Tordini, Albert S. Bregman, Amupriya Ankolekar, Thomas E. Sandholm, Jeremy R. Cooperstock

2PAB12: A NEUROETHOLOGICAL ANALYSIS OF THE INFORMATION IN PROPAGATED COMMUNICATION CALLS ..................................................................................................................................................395

Frédéric E. Theunissen, Solveig Mouterde, Nicolas Mathevon

2AAB: CONDITIONING, SEGMENTATION, AND FEATURE EXTRACTION IN BIOACUSTIC SIGNALS

2AAB1: A FRAMEWORK FOR ANALYZING BIOACUSTICS AUDIO RECORDINGS AS MULTIPLE INSTANCE MULTIPLE LABEL DATA ..................................................................................................................272

Raviv Raich, Forrest Briggs, Qi Lou, Xiao Li Fern, David Mellinger

Francesco Tordini, Albert S. Bregman, Amupriya Ankolekar, Thomas E. Sandholm, Jeremy R. Cooperstock

2PAB12: A NEUROETHOLOGICAL ANALYSIS OF THE INFORMATION IN PROPAGATED COMMUNICATION CALLS ..................................................................................................................................................395

Frédéric E. Theunissen, Solveig Mouterde, Nicolas Mathevon
3AAB: PERCEIVING OBJECTS I

3AAB1: HUMAN PERFORMANCE IN AURAL CLASSIFICATION OF SONAR ECHOES
Nancy Allen, Paul Hines

3AAB2: RECOGNIZING OBJECTS FROM MULTIPLE ORIENTATIONS USING DOLPHIN ECHOES
Caroline M. Delong, Amanda L. Heberle, Kayla Mata, Heidi E. Harley, Whitlow W. Au

3AAB3: EXPLORING THE CAPACITY OF NEURAL NETWORKS TO RECOGNIZE OBJECTS FROM DOLPHIN ECHOES ACROSS MULTIPLE ORIENTATIONS
Matthew G. Wisniewski, Caroline M. Delong, Amanda L. Heberle, Eduardo Mercado III

3AAB4: OBJECT SELECTION BY HEAD AIM AND ACOUSTIC GAZE IN THE BIG BROWN BAT
James Simmons, Jason Gaudette, Laura Kloepper

3AAB5: TEMPORAL SIGNAL PROCESSING OF DOLPHIN BIOSONAR ECHOES FROM FISH PREY
Whitlow W. Au, Hui Oo

3AAB6: DOLPHIN STRATEGIES FOR LONG-RANGE OBJECT DETECTION AND CHANGE DETECTION
James J. Finneran

3AAB7: DOLPHIN ECHOLOCATION IS NOT SEEING WITH SOUND
Heidi E. Harley, Wendi Fellner, Barbara A. Losch

3AAB8: AUDITORY OBJECT FORMATION IN COPE’S GRAY TREEFROGS (HYLA CHRYSOSELIS)
Mark Bee, Katrina M. Schrode

3AAB9: AUDITORY SCENE ANALYSIS IN BUDGERIGARS (MELOPSITTACUS UNDULATUS) AND ZEBRA FINCHES (TAENIOPYGIA GUTTATA)
Micheal Dent, Erikson Neilans, Mary M. Flaherty, Amanda K. Martin

3PAB: PERCEIVING OBJECTS II

3PAB1: CATEGORIES, CONCEPTS, AND CALLS: AUDITORY PERCEPTUAL MECHANISMS AND COGNITIVE ABILITIES ACROSS DIFFERENT TYPES OF BIRDS
Allison H. Hahn, Lauren M. Guillette, Marta Hoeschele, Robert G. Cook, Christopher Starzy

3PAB2: REVERBERLOCATION IN CHICKADEES?
Eduardo Mercado, Matthew G. Wisniewski, Brittany McIntosh, Lauren M. Guillette, Christopher Starzy

3PAB3: LOCALIZATION OF FLYING INSECTS BY ECHOLOCATION
Ikuo Matsuo, Takuma Takenashi

3PAB4: ANALYSIS OF NORTHERN BOTTLENOSE WHALE PULSES AND ASSOCIATED REFLECTIONS RECORDED FROM THE GULLY MARINE PROTECTED AREA
Bruce Martin, Hilary Moors-Murphy

3PAB5: PRELIMINARY RESULTS FROM COLLABORATIVE REFERRING TO IMPULSIVE SONAR SOUNDS
Charles F. Gaumond, Derek Brock, Christina Wasylyshyn

3PAB6: AN AUDITORY PERCEPTION OF CHANGES IN THE INTENSITY OF PULSES, PRESENTED IN COMPLICATED SOUND COMPLEX
Liudmila K. Rimskaya-Korsakova

4AAB: MODELING AND MEASUREMENT OF ANTHROPOGENIC NOISE IN MARINE ENVIRONMENTS

4AAB1: COMPUTING CUMULATIVE SOUND EXPOSURE LEVELS FROM ANTHROPOGENIC SOURCES IN LARGE DATA SETS
Bruce Martin

4AAB2: SPECTRAL PROBABILITY DENSITY AS A TOOL FOR MARINE AMBIENT NOISE ANALYSIS
Nathan D. Merchant, Tim R. Barton, Paul M. Thompson, Enrico Pirrotta, D. Tom Dukin, John Dorocić

4AAB3: GLOBAL OCEAN SOUNDSCAPES
Michael Porter, Laurel Henderson

4AAB4: THE EFFECTS OF SOUND IN THE MARINE ENVIRONMENT (ESME) WORKBENCH: A SIMULATION TOOL TO PREDICT THE IMPACT OF ANTHROPOGENIC SOUND ON MARINE MAMMALS

4AAB5: BEHAVIORAL RESPONSES OF HUMPBACK WHALES TO SEISMIC AIR GUNS
Douglas H. Cato, Michael Nood, Rebecca Dunlop, Robert D. McCaul, Hendrik Kniest, David Paton, Chandra P. Salgado Kent, Curt S. Jenner

4AAB6: PREDICTION OF NOISE OF MOORED SHIPS
Antonino Di Bella, Francesca Remigi

4PAB: ANIMAL VOCAL MODIFICATION IN NOISE

4PAB1: CALLING IN GRAY TREEFROG CHORUSES: MODIFICATIONS AND MYSTERIES
Mark Bee, Joshua J. Schwartz

4PAB2: ANTHROPOGENIC NOISE CONSTRAINS ACOUSTIC COMMUNICATION IN URBAN-DWELLING FROGS
Kirsten Parrish
ARCHITECTURAL ACOUSTICS

1AAAA: ADVANCED ANALYSIS OF ROOM ACOUSTICS: LOOKING BEYOND ISO 3382 I

1AAAA1: AN OBJECTIVE MEASURE FOR THE SENSITIVITY OF THE ROOM IMPULSE RESPONSE ................................................. 584
   Raj Prasad, Jonas Brunsø, Finn Jacobsen, Cheol Ho Jeong

1AAAA2: ROOM ACOUSTIC TRANSITION TIME BASED ON REFLECTION OVERLAP ............................................................................. 593
   Cheol Ho Jeong, Jonas Brunsø, Finn Jacobsen

1AAAA3: WHAT IS "CLARITY", AND HOW IT CAN BE MEASURED? .................................................................................................. 598
   David H. Griesinger

1AAAA4: PERCEPTUAL LIMITS FOR DETECTING INTERAURAL-CUE MANIPULATIONS MEASURED IN REVERBERANT SETTINGS ........................................................................................................ 607

1AAAA5: ACCURACY IN THE ACOUSTICAL PARAMETERS EVALUATION ACCORDING TO ISO-3382 ................................................. 614
   Miguel Arana, Ricardo San Martin, Jorge Machín, Abel Arregui

1AAAA6: ON THE EFFECTS OF PRE-PROCESSING OF IMPULSE RESPONSES IN THE EVALUATION OF ACOUSTIC PARAMETERS ON ROOM ACOUSTICS .................................................................. 621
   Andrea Venturi, Angelo Farina, Lamberto Tromchini

1AAAA7: THE INFLUENCE OF NOISE ON MONOAURAL ROOM ACOUSTIC PARAMETERS UTILIZING DIFFERENT EVALUATION METHODS ...................................................................................... 630
   Martin Gorst, Michael Vorländer

1AAAA8: INCLUDING DIRECTIVITY PATTERNS IN ROOM ACOUSTICAL MEASUREMENTS ................................................................. 639

VOLUME 2

1PAA08: A NUMERICAL AND EXPERIMENTAL VALIDATION OF THE ROOM ACOUSTICS DIFFUSION THEORY INSIDE LONG ROOMS ................................................................. 753

Chiara Visentin, Nicola Prodi, Vincent Valeau, Judicaël Picaut

1PAA09: ENERGY EVOLUTION IN ENCLOSURE GEOMETRIES AS EXHIBITED BY A FINITE DIFFERENCE TIME DOMAIN METHOD ................................................................. 762

Zackery Belanger

1PAA1: VIBRATION IN MUSIC PERFORMANCE

1PAA11: PERCEPTUAL EVALUATION OF VIOLIN VIBRATIONS AND AUDIO-TACTILE INTERACTION ................................................................. 766

M. Ercan Altinoz, Sebastian Merchel, Sebastian Tilsch

1PAA12: TELEHAPTIC INTERFACES FOR INTERPERSONAL COMMUNICATION WITHIN A MUSIC ENSEMBLE ................................................................................................................................. 770

Jonas Braasch, Doug Van Nort, Pauline Oliveros, Ted Krueger

1PAA13: STAGE FLOOR VIBRATIONS AND BASS SOUND IN CONCERT HALLS ................................................................................................................................. 777

Anders Askenfelt, Knut Guettler

1PAA14: RECENT EXPERIENCES WITH VIBRATION OF STAGE AND AUDIENCE FLOORS IN CONCERT HALLS ................................................................................................................................. 785

Thomas Wulfrank, Igor Lyon-Caen, Yann Jurbieszewicz, Johan Brudez, Eckhard Kahle

1PAA15: AUDITORY-TACTILE MUSIC PERCEPTION ................................................................................................................................. 793

Sebastian Merchel, M. Ercan Altinoz

2AAA: ADAPTING, ENHANCING, AND FICTIONALIZING ROOM ACOUSTICS I

2AAA01: ELECTRONICALLY VARIABLE ROOM ACOUSTICS - MOTIVATIONS AND CHALLENGES ................................................................................................................................. 800

K. Anthony Hoover, Steve Ellison

2AAA02: SOUND SYSTEM IN A SMALL COLLEGE AUDITORIUM ................................................................................................................................. 805

Sergio Beristain

2AAA03: ACTIVE ACOUSTICS AND SOUND REINFORCEMENT AT TUI OPERETTENHAUS, HAMBURG: A CASE STUDY ................................................................................................................................. 810

Roger Schwenke

2AAA04: THE RAW AND THE COOKED IN ARCHITECTURAL ACOUSTICS ................................................................................................................................. 814

William Martens, Dagmar Reinhardt
2AAA5: ADAPTING SPACIOUSNESS OF ARTIFICIAL, ENVELOPING REVERBERATION IN MULTICHANNEL RENDERING BASED ON CODED SEQUENCES .................................................................823
Ning Xiang, Uday Trivedi, Juseong Oh, Jonas Brausch, Bo-Sun Xie
2AAA6: E-VENUE - AFFORDABLE ELECTRONIC ACOUSTIC ENHANCEMENT FOR SMALL VENUES .................................................................829
Steve Barbar
2AAA7: INTERACTION BETWEEN CRITICAL LISTENING ENVIRONMENT ACOUSTICS AND LISTENER REVERBERATION PREFERENCE .................................................................833
Brett Leonard, Richard L. King, Grzegorz Sikora
2AAA9: ELECTRIC GUITAR - A BLANK CANVAS FOR TIMBRE AND TONE ........................................................................................................841
Alexander U. Case, Agnieszka Boginska, Justin D. Mathew, Jim Anderson

2AAAB: NEW MATERIALS FOR ARCHITECTURAL ACOUSTICS

Pedro A. Forero, Paul A. Basley

4PUW2: APPLICATION OF STATISTICAL REDUCED ISOMETRY PROPERTY TO DESIGN OF LINE ARRAYS FOR COMpressive BEAMFORMING ...........................................................................................................................................11098
Charles F. Gaumond, Geoffrey Edelmann

4PUW3: TIME-FREQUENCY LOCALIZATION ISSUES IN THE CONTEXT OF SPARSE PROCESS MODELING ................................................................................................................................................11102

4PUW4: PERFORMANCE LIMITS OF A COMPRESSIVE SENSING APPLICATION TO BEAMFORMING ON A LINE ARRAY .................................................................................................................................11108
Jeffrey A. Ballard

4PUW5: SENSITIVITY OF CO-PRIME ARRAYS TO SHAPE PERTURBATION ........................................................................................................................11117
Andrew Pudzdek, R. Lee Culver

4PUW6: EFFECTS OF MULTIPATH DISTORTION ON SPARSE SIGNAL PARAMETER ESTIMATION .................................................................................................................................11124
Sung-Hoon Byun, Sea-Moon Kim, Hyun-Taek Choi, Woojae Seong

4PUW7: NUMERICAL SIMULATIONS OF COMpressive BEAMFORMING WITH A VERTICAL LINE ARRAY IN THE DEEP OCEAN ..................................................................................................................................11131
Geoffrey F. Edelmann, Ian M. Rooney, Charles F. Gaumond

4PUW8: A HIERARCHICAL MIXTURE MODEL FOR SPARSE BROADBAND SCATTERING FUNCTIONS BETWEEN MOVING PLATFORMS ................................................................................................................11136
Paul J. Gerndron

4PUW9: BAYESIAN SEQUENTIAL SPARSE SAMPLING ........................................................................................................................................................11141
Peter Gerndt, Christoph Mecklenbrauker
4PUW10: HIGH RESOLUTION BEAMFORMING USING L1 MINIMIZATION
Ravi Menon, Peter Gerstoft
 ................................................................. 11146

5AUW1: LARGE-SCALE VIRTUAL ACOUSTICS SIMULATION AT AUDIO RATES USING THREE
DIMENSIONAL FINITE DIFFERENCE TIME DOMAIN AND MULTIPLE GRAPHICS PROCESSING UNITS
Craig Webb, Alan Gray ................................................................. 11150

5AUW2: ADAPTING THE MINIMUM VARIANCE BEAMFORMER TO A GRAPHICS PROCESSING UNIT
FOR ACTIVE SONAR IMAGING SYSTEMS
Jo Inge Buskenes, Jon Petter Åsen, Carl-Inge C. Nilsen, Andreas Austeng ......................................................... 11159

5AUW3: EXPLOITING DATA PARALLELISM AND POPULATION MONTE CARLO ON MASSIVELY-
PARALLEL ARCHITECTURES FOR GEOACOUSTIC INVERSION
Jan Dettmer, Stan E. Dosso, Charles W. Holland ................................................................. 11167

5AUW4: EFFICIENT BAYESIAN MULTI-SOURCE LOCALIZATION USING A GRAPHICS PROCESSING
UNIT
Stan E. Dosso, Jan Dettmer ................................................................. 11175

5AUW5: COMPUTING THE SINGULAR VALUE DECOMPOSITION IN PARALLEL ON GRAPHICS
PROCESSING UNITS USING A ONE-SIDED JACOBI METHOD
Michael V. Romer ................................................................. 11181

5AUW6: INTERACTIVE GPU-BASED ACOUSTIC WALKTHROUGH IN DYNAMIC SCENES
Qi Mo, Micah Taylor, Anish Chandak, Christian Lauterbach, Carl Schissler, Dinesh Manocha ................................................................. 11189

5AUW7: SOME COMMENTS ABOUT GRAPHIC PROCESSING UNIT (GPU) ARCHITECTURES APPLIED
TO FINITE-DIFFERENCE TIME-DOMAIN (FDTD) ROOM ACOUSTICS SIMULATION: PRESENT AND
FUTURE TRENDS
Jose J. Lopez, Juan M. Navarro, Diego Carnicero, Jose Escolano ................................................................. 11193

5AUW8: EFFICIENT IMPLEMENTATION OF POWER-LAW ATTENUATION OF ELASTIC WAVES IN
TIME-DOMAIN NUMERICAL SIMULATIONS
David Calvo, Gaetano Canepa ................................................................. 11202

5AUW9: THE USE OF GRAPHICAL PROCESSING UNIT PROCESSING IN ROUGH SURFACE
SCATTERING
Ahmad T. Abawi, Paul Hursky ................................................................. 11209

5AUW10: REVERBERATION MODELING ON GRAPHICS PROCESSING UNITS (GPUS)
Paul Hursky, Ahmad T. Abawi ................................................................. 11214
