2nd International RILEM Conference on Strain Hardening Cementitious Composites (SHCC2-Rio)

RILEM Proceedings Pro 81

Rio de Janeiro, Brazil
12 – 14 December 2011

Editors:

R.D. Toledo Filho       E.A.B. Koenders
F.A. Silva             E.M.R. Fairbairn

Preface
Author(s): R.D. Toledo Filho, F.A. Silva, E.A.B. Koenders and E.M.R. Fairbairn

Task Group A Sessions - Mechanical characterization and test methods:

Development of high strength high ductility concrete
Author(s): R. Ranade, M.D. Stults, V.C. Li, T.S. Rushing, J. Roth and W.F. Heard  
Pages: 1 - 8

Evaluation of standardized test methods to characterize fiber reinforced cement composites
Author(s): I. Paegle and G. Fischer  
Pages: 9 - 16

Half a century of progress leading to ultra-high performance fiber reinforced concrete: part 1 - overall review
Author(s): A.E. Naaman  
Pages: 17 - 26

Half a century of progress leading to ultra-high performance fiber reinforced concrete: part 2-tensile stress-strain response
Author(s): A.E. Naaman  
Pages: 27 - 36

Damage mechanisms analysis of a multi-scale fibre reinforced cement-based composite subjected to impact loading conditions
Author(s): P. Rossi  
Pages: 37 - 44

Strain hardening behavior of textile reinforced concrete (TRC)
Author(s): A. Peled  
Pages: 45 - 52

Flexural design of strain hardening cement composites
Author(s): B. Mobasher and C. Barsby  
Pages: 53 - 60

Simulation of mechanical tests on SHCC by fem with stochastic fields
Author(s): M. Prinosil and P. Kabele  
Pages: 61 - 68

Crack growth resistance of concrete-HPFRCC interface
Author(s): C. Zanotti, N. Banthia and G. Plizzari  
Pages: 69 - 77

The role of fiber orientation on strain hardening/softening FRCCS:  
Pages: 79 - 87
continuum damage modeling
Author(s): L. Ferrara and M. di Prisco

Evaluation of the TRC (Textile Reinforced Concrete) solutions in the case of RC beams shear strengthening
Author(s): R. Contamine, A. Si Larbi and P. Hamelin

Chemo/piezoresistive hpfrcc carrying carbon fiber and carbon nanotubes for sensing
Author(s): N. Banthia and F. Azhari

Pigmentable engineered cementitious composites
Author(s): En-Hua Yang, E.O. Garcez and V.C. Li

Design of ductile wood fibre cement based material
Author(s): M. Guadalupe Sierra Beltran and E. Schlangen

Mechanical behavior of strain hardening sisal fiber cementitious composites under quasi static and dynamic tensile loading
Author(s): F. A. Silva, B. Mobasher and R.D. Toledo Filho

Mechanical performance of ductile cement mortar composites reinforced with nanofibrillated cellulose
Author(s): J. Claramunt, M. Ardanuy, R. Arévalo, F. Parés and R.D. Toledo Filho

Near-tip analysis of crack propagation in cementitious composites
Author(s): E.B. Pereira, G. Fischer and J.A.O. Barros

Task Group B Sessions - Durability performance:

Crack distribution characterisation towards a framework for durability design of SHCC
Author(s): G.P.A.G. van Zijl

Integrated probabilistic life cycle assessment and durability design for sustainable SHCC infrastructure
Author(s): M.D. Lepech, H. Stang and M. Geiker

Capillary absorption and chloride penetration into neat and water
Pages: 165 - 172
repellent shcc under imposed strain
Author(s): F.H. Wittmann, P. Wang, P. Zhang, T.J. Zhao and F. Beltzung

Application of HPFRCC as a patching repair material for RC members exposed to chloride attack
Author(s): K. Kobayashi, Y. Asano and K. Rokugo

On the water permeability of cracked strain hardening cement-based composites
Author(s): C. Wagner and V. Slowik

Thermal properties and resistance to thermal shock of strain hardening cement-based composites
Author(s): M. S. Magalhães, R.D. Toledo Filho and E.M.R. Fairbairn

Tensile crack widths of strain hardening cement-based composites
Author(s): W.P. Boshoff and P.D. Nieuwoudt

Durability design for steel reinforced shcc members exposed to chlorides – a fuzzy-probabilistic concept
Author(s): F. Altmann and V. Mechtcherine

Evolution of crack patterns on shcc as function of imposed strain
Author(s): P. Wang, F.H. Wittmann, T.J. Zhao and W.L. Huang

Verification of strength durability models for glass fibre textile reinforced cement
Author(s): J. Wastiels and P. Van Itterbeeck

Study of the bending behaviour of textile reinforced cementitious composites when exposed to high temperatures
Author(s): J. Blom, J. Van Ackeren and J. Wastiels

Simulation of the multiaxial loading behavior of fiber reinforced concrete
Author(s): E.A. Schauffert and G. Cusatis

Control of cracking direction of Shcc under principal stress rotation with coarse aggregate
Author(s): K. Nagai, B. Suryanto, K. Maekawa and T. Kanda
Fracture process zone extent and energy dissipation in silicate composites with different cohesive behaviour
Author(s): V. Veselý, T. Pail, P. Frantík and S. Seitl

Pages: 259 - 267

Stochastic cracking of composites with micromechanical formulation of crack bridges
Author(s): R. Rypl, R. Chudoba, M. Vořechovský and J. Hegger

Pages: 269 - 276

Task Group C Sessions - Structural design and practical applications:

On the bearing capacity of frc structures: is the material characteristic value the “right” choice?
Author(s): M. di Prisco, D. Dozio and M. Colombo

Pages: 279 - 287

New high-rise R/C structure using ECC coupling beams
Author(s): T. Kanda, S. Nagai, M. Maruta and Y. Yamamoto

Pages: 289 - 296

Characterization of multiple fine cracks in SHCC by probability distribution analysis
Author(s): H. Takada, Y. Asano, K. Kobayashi and K. Rokugo

Pages: 297 - 304

Damage resistance of reinforced concrete structures that utilize High Performance Hybrid Fiber Reinforced (HYFRC) Composites
Author(s): C.P. Ostertag

Pages: 305 - 312

Fresh properties and mechanical performance of hand-mixed small-batch SHCC
Author(s): K. Rokugo, K. Kobayashi, Y. Asano, N. Morii, S.-C. Lim, K. Shinya and H. Hirai

Pages: 313 - 321

The feasibility of engineered cementitious composites with local compositions
Author(s): Z. Zhang and S. Qian

Pages: 323 - 328

Impacts of principal stress rotation on the nonlinearity of strain-hardening cementitious composites with fibers
Author(s): K. Maekawa, K. Nagai and B. Suryanto

Pages: 329 - 337

Computational durability mechanics of fiberreinforced cement

Pages: 339 - 346
composites
Author(s): J.E. Bolander and A.S. Joshi

TRC masonry retrofitting against in-plane seismic solicitations
Author(s): A. Si Larbi and P. Hamelin

Reproduction of the 3D bond microstructure from sem micrographs as a basis for the modeling of the representative behavior of a crack bridge in TRC
Author(s): R. Chudoba, I. Focke, B.-G. Kang, V. Sadilek and M. Vořechovský

Tensile performance of sprayed SHCC with hollow particles for keeping air content
Author(s): N. Morii, S.-C. Lim, Y. Yamada, Y. Asano and K. Rokugo

Structural behavior of SHCC cement sheath in oil well submitted to steam injection: experimental analysis
Author(s): R.F. Correia, E.M.R. Fairbairn, R.D. Toledo Filho and C.R. Miranda

Flexural strengthening of masonry members using advanced cementitious materials
Author(s): J.A.O. Barros, E. Esmaeeli, E. Manning, D. Häßler

Drainage concrete pipes with hybrid reinforcement
Author(s): A.D. de Figueiredo and R. Campos Escariz

Applicability of composite charpy impact method for strain hardening textile reinforced cementitious composites
Author(s): J. Van Ackeren, J. Blom, D. Kakogiannis, J. Wastiels, D. Van Hemelrijck, S. Palanivelu, W. Van Paepegem, J. Vantomme

Limit strength of sandwich pipes filled with strain hardening cementitious composites
Author(s): C. An, X. Castello, R.D. Toledo Filho and S.F. Estefen

Application potential of textile reinforced concrete
Author(s): J. Hegger, A. Shams, C. Kulas and M. Horstmann
