Table of Contents

Target word prediction and paraphasia classification in spoken discourse
Joel Adams, Steven Bedrick, Gerasimos Fergadiotis, Kyle Gorman and Jan van Santen ........... 1

Extracting Drug-Drug Interactions with Attention CNNs
Masaki Asada, Makoto Miwa and Yutaka Sasaki ................................................................. 9

Insights into Analogy Completion from the Biomedical Domain
Denis Newman-Griffis, Albert Lai and Eric Fosler-Lussier .............................................. 19

Deep learning for extracting protein-protein interactions from biomedical literature
Yifan Peng and Zhiyong Lu .................................................................................................. 29

Stacking With Auxiliary Features for Entity Linking in the Medical Domain
Nazneen Fatema Rajani, Mihaela Bornea and Ken Barker .................................................. 39

Results of the fifth edition of the BioASQ Challenge
Anastasios Nentidis, Konstantinos Bougiatiotis, Anastasia Krithara, Georgios Paliouras and Ioannis Kakadiaris ......................................................................................................................... 48

Tackling Biomedical Text Summarization: OAQA at BioASQ 5B
Khyathi Chandu, Aakanksha Naik, Aditya Chandrasekar, Zi Yang, Niloy Gupta and Eric Nyberg

Macquarie University at BioASQ 5b – Query-based Summarisation Techniques for Selecting the Ideal Answers
Diego Molla ............................................................................................................................... 67

Neural Question Answering at BioASQ 5B
Georg Wiese, Dirk Weissenborn and Mariana Neves ......................................................................... 76

End-to-End System for Bacteria Habitat Extraction
Farrokh Mehrurray, Kai Hakala, Suwisa Kaewphan, Jari Björne, Tapio Salakoski and Filip Ginter

Creation and evaluation of a dictionary-based tagger for virus species and proteins
Helen Cook, Rudolfs Berzins, Cristina Leal Rodriguez, Juan Miguel Cejuela and Lars Juhl Jensen

Representation of complex terms in a vector space structured by an ontology for a normalization task
Arnaud Ferré, Pierre Zweigenbaum and Claire Nédellec .......................................................... 99

Improving Correlation with Human Judgments by Integrating Semantic Similarity with Second-Order Vectors
Bridget McInnes and Ted Pedersen ....................................................................................... 107

Proactive Learning for Named Entity Recognition
Maolin Li, Nhung Nguyen and Sophia Ananiadou ...................................................................... 117

Biomedical Event Extraction using Abstract Meaning Representation
Sudha Rao, Daniel Marcu, Kevin Knight and Hal Daumé III .................................................. 126

Detecting Personal Medication Intake in Twitter: An Annotated Corpus and Baseline Classification System
Ari Klein, Abeed Sarker, Masoud Rouhizadeh, Karen O’Connor and Graciela Gonzalez ....... 136
Unsupervised Context-Sensitive Spelling Correction of Clinical Free-Text with Word and Character N-Gram Embeddings
Pieter Fivez, Simon Suster and Walter Daelemans .................................................. 143

Characterization of Divergence in Impaired Speech of ALS Patients
Archna Bhatia, Bonnie Dorr, Kristy Hollingshead, Samuel L. Phillips and Barbara McKenzie . 149

Deep Learning for Punctuation Restoration in Medical Reports
Wael Salloum, Greg Finley, Erik Edwards, Mark Miller and David Suendermann-Oeft ........ 159

Unsupervised Domain Adaptation for Clinical Negation Detection
Timothy Miller, Steven Bethard, Hadi Amiri and Guergana Savova ............................... 165

BioCreative VI Precision Medicine Track: creating a training corpus for mining protein-protein interactions affected by mutations
Rezarta Islamaj Dogan, Andrew Chatr-aryamontri, Sun Kim, Chih-Hsuan Wei, Yifan Peng, Donald Comeau and Zhiyong Lu ................................................................. 171

Painless Relation Extraction with Kindred
Jake Lever and Steven Jones ........................................................................................... 176

Noise Reduction Methods for Distantly Supervised Biomedical Relation Extraction
Gang Li, Cathy Wu and K. Vijay-Shanker ................................................................. 184

Role-Preserving Redaction of Medical Records to Enable Ontology-Driven Processing
Seth Polsley, Atif Tahir, Muppula Raju, Akintayo Akinleye and Duane Steward .......... 194

Annotation of pain and anesthesia events for surgery-related processes and outcomes extraction
Wen-wai Yim, Dario Tedesco, Catherine Curtin and Tina Hernandez-Boussard .......... 200

Identifying Comparative Structures in Biomedical Text
Samir Gupta, A.S.M. Ashique Mahmood, Karen Ross, Cathy Wu and K. Vijay-Shanker ................................................................. 206

Tagging Funding Agencies and Grants in Scientific Articles using Sequential Learning Models
Subhradeep Kayal, Zubair Afzal, George Tsatsaronis, Sophia Katrenko, Pascal Coupet, Marius Doornenbal and Michelle Gregory ................................................................. 216

Deep Learning for Biomedical Information Retrieval: Learning Textual Relevance from Click Logs
Sunil Mohan, Nicolas Fiorini, Sun Kim and Zhiyong Lu ........................................ 222

Detecting Dementia through Retrospective Analysis of Routine Blog Posts by Bloggers with Dementia
Vaden Masrani, Gabriel Murray, Thalia Field and Giuseppe Carenini ......................... 232

Protein Word Detection using Text Segmentation Techniques
Devi Ganesan, Ashish V. Tendulkar and Sutanu Chakraborti ................................... 238

External Evaluation of Event Extraction Classifiers for Automatic Pathway Curation: An extended study of the mTOR pathway
Wojciech Kusa and Michael Spranger ................................................................. 247

Toward Automated Early Sepsis Alerting: Identifying Infection Patients from Nursing Notes
Emilia Apostolova and Tom Velez ................................................................. 257

Enhancing Automatic ICD-9-CM Code Assignment for Medical Texts with PubMed
Danchen Zhang, Daqing He, Sanqiang Zhao and Lei Li ........................................... 263
Evaluating Feature Extraction Methods for Knowledge-based Biomedical Word Sense Disambiguation
Sam Henry, Clint Cuffy and Bridget McInnes ................................................................. 272

Investigating the Documentation of Electronic Cigarette Use in the Veteran Affairs Electronic Health Record: A Pilot Study
Danielle Mowery, Brett South, Olga Patterson, Shu-Hong Zhu and Mike Conway .............. 282

Automated Preamble Detection in Dictated Medical Reports
Wael Salloum, Greg Finley, Erik Edwards, Mark Miller and David Suendermann-Oeft ........ 287

A Biomedical Question Answering System in BioASQ 2017
Mourad Sarrouti and Said Ouatik El Alaoui ................................................................. 296

Adapting Pre-trained Word Embeddings For Use In Medical Coding
Kevin Patel, Divya Patel, Mansi Golakiya, Pushpak Bhattacharyya and Nilesh Birari ........ 302

Initializing neural networks for hierarchica multi-label text classification
Simon Baker and Anna Korhonen .................................................................................. 307

Biomedical Event Trigger Identification Using Bidirectional Recurrent Neural Network Based Models
Rahul V S S Patchigolla, Sunil Sahu and Ashish Anand ............................................... 316

Representations of Time Expressions for Temporal Relation Extraction with Convolutional Neural Networks
Chen Lin, Timothy Miller, Dmitriy Dligach, Steven Bethard and Guergana Savova .......... 322

Automatic Diagnosis Coding of Radiology Reports: A Comparison of Deep Learning and Conventional Classification Methods
Sarvnaz Karimi, Xiang Dai, Hamedh Hassanzadeh and Anthony Nguyen ...................... 328

Automatic classification of doctor-patient questions for a virtual patient record query task
Leonardo Campillos Llanos, Sophie Rosset and Pierre Zweigenbaum ............................ 333

Assessing the performance of Olelo, a real-time biomedical question answering application
Mariana Neves, Fabian Eckert, Hendrik Folkerts and Matthias Uflacker ......................... 342

Clinical Event Detection with Hybrid Neural Architecture
Adyasha Maharana and Meliha Yetisgen ...................................................................... 351

Extracting Personal Medical Events for User Timeline Construction using Minimal Supervision
Aakanksha Naik, Chris Bogart and Carolyn Rose ....................................................... 356

Detecting mentions of pain and acute confusion in Finnish clinical text
Hans Moen, Kai Hakala, Farrokh Mehryary, Laura-Maria Peltonen, Tapio Salakoski, Filip Ginter and Sanna Salanterä ................................................................. 365

A Multi-strategy Query Processing Approach for Biomedical Question Answering: USTB_PRIR at BioASQ 2017 Task 5B
Zan-Xia Jin, Bo-Wen Zhang, Fan Fang, Le-Le Zhang and Xu-Cheng Yin ......................... 373
