## Table of Contents

*Preface*  

### Chapter 1  
**Sensors, Actuators, and Device Fabrication**

- Metal-Semiconductor-Metal Directly Illuminated Electron Detector and Secondary Electron Detector with Metal Nano-Rod Array and Trench Structure to Enhance the Performance  
  *M. Lee, K. Ho, and C. Kuan*  
  3

- Fabrication Process for Electromagnetic Actuators Compatible with Polymer Based Microfluidic Devices  
  *M. Rahbar, S. Seyfollahi, A. Khosla, B. L. Gray, and L. Shannon*  
  7

- Micromachined Nickel Floating Element Shear Stress Sensor Array  
  *Z. Zhao, J. Gallman, and R. White*  
  19

### Chapter 2  
**Gas and Liquid Phase Sensors**

- Ultra Violet Irradiation of Metal Oxide Semiconductor Gas Sensors  
  *R. Smith, L. M. Cavanagh, and R. Binions*  
  29

### Chapter 3  
**Biosensors and Biomedical Applications**

- Oxygen Detection Using Different Types of Membranes Deposited on Needle Based Platforms  
  *S. Anastasova, A. Spehar-Delèze, and P. Vadgama*  
  43

- Single-Step Bacterial Detection by Simultaneous Synthesis and Integration of Gold Nanoparticles and Its Application in Intracellular Delivery  
  *V. D. Badwaik and R. Dakshinamurthy*  
  49
Chapter 4
Poster Session

Improvement of Conductivity by Incorporation of Boron Atoms in Hydrogenated Amorphous Carbon Films Fabricated by Plasma CVD Methods and its Electrochemical Properties
   H. Naragino, K. Yoshinaga, S. Tatsuta, and K. Honda

Effects of SAW Propagation with Electrochemical Deposition of Ge Film on LiNbO₃ Substrate
   C. Kaneshiro and R. Gushiken

   F. Juang, Y. Fang, and J. Ke
