Table of Contents

Preface iii

Chapter 1

Ferrous Alloys

(Invited) Localized Dissolution Kinetics From Fast In Situ Radiography of Propagating Pits in Stainless Steel and Implications for Modeling Pitting Corrosion over Long Time-Scales

Factors Controlling the Location of Crevice Attack in Austenitic Stainless Steels

J. S. Lee and R. G. Kelly 17

The Modeling and Measurement of Boundary Conditions for Pit Size on Stainless Steels under Atmospheric Exposure Conditions

M. E. Shedd and R. G. Kelly 31

Computer Simulation of Crevice Corrosion of Stainless Steels: Influence of Alloying Elements and Film Depassivation

B. Malki, T. Souier, L. Peguet, and B. Baroux 39

The Effect of Chloride on Passive Oxide Film Breakdown on Stainless Steels and Aluminum

P. M. Natishan, W. E. O'Grady, F. J. Martin, R. J. Rayne, H. Kahn, and A. H. Heuer 49

Passive Film Observations on Interstitially Hardened 316L Stainless Steel with Nitrogen for Improved Corrosion Resistance

N. R. Tailleart, F. J. Martin, R. J. Rayne, H. Kahn, A. H. Heuer, and P. M. Natishan 59

Characterization of Passive Films Formed on Manganese Nickel-Free Stainless Steel Exposed to Simulated Concrete Pore Environment

L. P. Veleva and B. Tsaneva 67

Key Parameters to Determine Wall Thinning Due to Flow Accelerated Corrosion

S. Uchida, M. Naitoh, H. Okada, H. Suzuki, S. Koikari, S. Koshizuka, and D. Lister 77
Chapter 2
Light Metals

Effect of the Thermomechanical History on the Corrosion Behavior of 6101 Aluminum-Magnesium-Silicon-Iron Alloy in NaCl Solutions
A. Laurino, E. Andrieu, J. Harouard, G. Odemer, and C. Blanc

Use of Scanning Kelvin Probe Force Microscopy to Investigate the Effects of Surface Preparation on Intermetallic Particles in AA7xxx Aluminum Alloys
W. Zhang, X. Yu, M. Kryzman, T. J. Garosshen, M. Piech, M. R. Jaworowski, and G. S. Zafiris

Pit Propagation in Pure Aluminum Investigated via the 1D Artificial Pit Technique: Growth Regimes, Surface Morphology and Implications for Stability Criteria

Correlating Pit Initiation in Aluminum with Passive Oxide Defect Structure
K. R. Zavadil

Activation Energy for the Corrosion of Aluminum Powders in Water
J. Skrovan

Experimental Evaluation and Modeling of Galvanic Interactions between Aluminum Alloy 7075-T6 and Noble Materials
Y. Shi and R. G. Kelly

On the Self-Passivation Tendency of Mg-Al-Zn (AZ) Alloys in Aqueous Solutions
R. Phillips and J. R. Kish

Intergranular Corrosion Penetration in AA5083 (UNS # A95083) as a Function of Electrochemical and Metallurgical Conditions
M. Lim, S. Jain, R. G. Kelly, and J. Scully

Localized Corrosion of Friction Stir Spot Welds in Magnesium AZ31 Alloy
A. James, T. H. North, and S. J. Thorpe

Chapter 3
Passivity

Visualization of Solution Chemistry inside Crevice by pH and pCl Sensing Plates
T. Kaji, T. Sekiai, I. Muto, Y. Sugawara, and N. Hara
In Situ Observation for the Reaction of Hydrogen Peroxide in High Temperature Water Utilizing Electrochemical Impedance Spectroscopy

Local Electrochemical Impedance Spectroscopy Investigation of Corrosion Inhibitor Films on Copper

Development of a New Microelectrochemical Measurement System for In Situ Optical Microscopic Observation of Pit Initiation Processes
   A. Chiba, I. Muto, Y. Sugawara, and N. Hara
