### Symposia Organizers

### COMPSAC Symposia

#### SETA: Software Engineering Technology & Applications

**Message from SETA 2017 Program Chairs** ................................................................. 1  
*Hridesh Rajan, Alexander Bolotov, and Chang Xu*

**Message from SETA 2017 Symposium Chairs** ......................................................... 2  
*Ricky Chan and Hong Zhu*

#### SETA Session 1

**An Empirical Comparison of Similarity Measures for Abstract Test Case Prioritization** ................................................................. 3  
*Rubing Huang, Yunan Zhou, Weiwen Zong, Dave Towey, and Jinfu Chen*

**Identifying Core Objects for Trace Summarization Using Reference Relations and Access Analysis** ......................................................... 13  
*Kunihiro Noda, Takashi Kobayashi, Tatsuya Toda, and Noritoshi Atsumi*

**LeakDAF: An Automated Tool for Detecting Leaked Activities and Fragments of Android Applications** ......................................................... 23  
*Ma Jun, Liu Sheng, Yue Shengtao, Tao Xianping, and Lu Jian*
SETA Session 2
Measurement of Source Code Readability Using Word Concreteness and Memory
Retention of Variable Names .........................................................................................................................33
    Weifeng Xu, Dianxiang Xu, and Lin Deng
Modeling and Analysis of the Security Protocol in C-DAX Based on Process Algebra ...........................................39
    Ailun Liu, Huibiao Zhu, Yuan Fei, Shuangqing Xiang, Gang Lu, and Wanling Xie
A Proof System for mCWQ .................................................................................................................................45
    Wanling Xie, Xi Wu, Huibiao Zhu, Gang Lu, and Ailun Liu
FeSCH: A Feature Selection Method Using Clusters of Hybrid-Data for Cross-Project Defect Prediction .................................................................51
    Chao Ni, Wangshu Liu, Qing Gu, Xiang Chen, and Daoxu Chen

SETA Session 3
Toward Understanding Information Models of Fault Localization: Elaborate is Not Always Better ………………………………………57
    Yan Lei, Xiaoguang Mao, Min Zhang, Jingan Ren, and Yinhua Jiang
Comprehensive Static Analysis for Configurable Software via Combinatorial Instantiation .......................................................67
    Dong Yan, Linjie Pan, Rongjie Yan, Jun Yan, and Jian Zhang
Who Should be Selected to Perform a Task in Crowdsourced Testing? ………………………………………………………………75
    Qiang Cui, Junjie Wang, Guowei Yang, Miao Xie, Qing Wang, and Mingshu Li

SETA Session 4
A Constraint-Pattern Based Method for Reachability Determination .........................................................................................85
    Yuexing Wang, Zuxing Gu, Xi Cheng, Min Zhou, Xiaoyu Song, Ming Gu, and Jiaguang Sun
Defining and Validating a Client-Based Cohesion Metric for Object-Oriented Classes .................................................................91
    Musaad Alzahrani and Austin Melton
Towards an Agent-Oriented Framework for Multidisciplinary Decision Support and Its Application to Triple Assessment of Breast Cancer ........................................................................97
    Liang Xiao and John Fox
Revisiting the Correlation Between Alerts and Software Defects: A Case Study on MyFaces, Camel, and CXF .......................................................................................103
    Meng Yan, Xiaohong Zhang, Ling Xu, Haibo Hu, Song Sun, and Xin Xia

SETA Session 5
Quality Assessment of Interaction Techniques in Immersive Virtual Environments Using Physiological Measures .........................................................109
    Rafael Rieder, Christian Haag Kristensen, and Márcio Sarroglia Pinho
Interactively Decomposing Composite Changes to Support Code Review and Regression Testing ........................................................................118
    Bo Guo and Myoungkyu Song
Can Developers’ Interaction Data Improve Change Recommendation? ........................................128
   Akihiro Yamamori, Anders Mikael Hagward, and Takashi Kobayashi

SETA Session 6

An Approach to Proving Proof Obligation of Hybrid Event B Based on Differential Invariants .................................................................138
   Jie Liu, Jing Liu, Miaomiao Zhang, Haiying Sun, Xiaohong Chen, Dehui Du,
   and Mingsong Chen

Preserving the Benefits of Open Government Data by Measuring and Improving Their Quality: An Empirical Study ........................................144
   Marco Torchiano, Antonio Vetrò, and Francesca Iuliano

Assertion Recommendation for Formal Program Verification ..........................................................154
   Cong Wang, Fei He, Xiaoyu Song, Yu Jiang, Ming Gu, and Jiaguang Sun

SETA Session 7

A Hierarchical Categorization Approach for Configuration Management Modules .................................160
   Wei Chen, Peixing Xu, Wensheng Dou, Guoquan Wu, Chushu Gao, and Jun Wei

Supporting the Development of Agent-Based Simulations: A DSL for Environment Modeling .................................................................170
   Fernando Santos, Ingrid Nunes, and Ana L. C. Bazzan

Tool-Supported Collaborative Requirements Prioritisation ....................................................................180
   Paolo Busetta, Fitsum Meshesha Kifetew, Denisse Munante, Anna Perini, Alberto Siena,
   and Angelo Susi

SETA Session 8

Finding Extract Method Refactoring Opportunities by Analyzing Development History .........................................190
   Ayaka Imazato, Yoshiki Higo, Keisuke Hotta, and Shinji Kusumoto

Infer Precise Program Invariant Using Abstract Interpretation with Recurrence Solving ........................................196
   Zhenpeng Fang, Xibin Zhao, and Min Zhou

XMLValue: XML Configuration Attribute Value Recommendation .........................................................202
   Yiqi Lu, Jiaqing Liang, Yanghua Xiao, Sheng Huang, Deqing Yang, Wei Wang,
   and Haibo Lin

Tester Experience: Concept, Issues and Definition .............................................................................208
   Oswald Mesumbe Ekwoge, Awdren Fontão, and Anlo C. Dias-Neto

SETA Session 9

Xdroid: Testing Android Apps with Dependency Injection .....................................................................214
   Chun Cao, Chenglin Meng, Hongjun Ge, Ping Yu, and Xiaoxing Ma

Towards Variability Management in Bidirectional Model Transformation ...........................................224
   Xiao He, Zhenjiang Hu, and Yi Liu

Models of Connected Things: On Priced Probabilistic Timed Reo .........................................................234
   Kangli He, Holger Hermanns, and Yixiang Chen
SETA Session 10
An Empirical Analysis on Effective Fault Prediction Model Developed Using Ensemble Methods .......................................................................................................................................................................244
Lov Kumar, Santanu Rath, and Ashish Sureka
Pain Points for Novice Programmers of Ambient Intelligence Systems: An Exploratory Study ...........................................................................................................................................................................250
Fulvio Corno, Luigi De Russis, and Juan Pablo Sáenz
Fault Classification Oriented Spectrum Based Fault Localization ...............................................................................256
Xiujing Liu, Yong Liu, Zheng Li, and Ruilian Zhao
ISO/IEC 25010 Based Evaluation of Free Mobile Personal Health Records for Pregnancy Monitoring ............................................................................................................................................262
Ali Idri, Mariam Bachiri, José Luis Fernández-Aleman, and Ambrosio Toval

SETA Session 11
Using MDA to Automate the Integration of Virtual Platforms for System-Level Simulation ....................................................................................................................................................................268
David Perillo and Marco Di Natale
An ICE Compliant Component Model for Medical Systems Development ...............................................................................................278
Imad Eddine Touahria, Marisol Garcia-Valls, and Abdellah Khababa
Tool Support for Managing Clone Refactorings to Facilitate Code Review in Evolving Software ......................................................................................................................................................................288
Zhiyuan Chen, Maneesh Mohanavilasam, Young-Woo Kwon, and Myoungkyu Song

SETA Session 12
A High-Level DSL for Geospatial Visualizations with Multi-core Parallelism Support .........................................298
Cleverson Ledur, Dalvan Griebler, Isabel Manssour, and Luiz Gustavo Fernandes
The Need for Traceability in Heterogeneous Systems: A Systematic Literature Review ............................................305
Nasser Mustafa and Yvan Labiche
Incremental Annotate-Generalize-Search Framework for Interactive Source Code Comprehension ...........................................................................................................................................................311
Ken Nakayama, Shun’ichi Tano, Tomonori Hashiyama, and Eko Sakai

SETA Session 13
Detecting Java Code Clones with Multi-granularities Based on Bytecode ...............................................................................................317
Dongjin Yu, Jie Wang, Qing Wu, Jiajia Yang, Jiaojiao Wang, Wei Yang, and Wei Yan
Supporting the Specification and Serialization of Planned Architectures in Architecture-Driven Modernization Context ................................................................................................................................................................................327
André de S. Landi, Fernando Chagas, Bruno M. Santos, Renato S. Costa, Rafael Duelli, Ricardo Terra, and Valter V. de Camargo
GenLog: Accurate Log Template Discovery for Stripped X86 Binaries ...............................................................................................337
Maosheng Zhang, Ying Zhao, and Zengmingyu He
SETA Session 14
A Situation-Centric Approach to Identifying New User Intentions Using the MTL Method ..........................................................347
  Jingwei Yang, Carl K. Chang, and Hua Ming
State-Based Tests Suites Automatic Generation Tool (STAGE-1) ........................................................................................................357
  Hoda Khalil and Yvan Labiche
Mediating Turf Battles! Prioritizing Shared Modules in Locating Multiple Features ...............................................................363
  Maaki Nakano, Kunihiro Noda, Shinpei Hayashi, and Takashi Kobayashi
On the Composibility of Design Patterns: Extended Abstract ...........................................................................................................369
  Hong Zhu and Ian Bayley

CELT: Computer Education & Learning Technologies

CELT Session 1
Mining Capstone Project Wikis for Knowledge Discovery ..................................................................................................................371
  Swapna Gottipati, Venky Shankararaman, and Melvrick Goh
Experimental Validation of a Massive Educational Service in a Blended Learning Environment ..............................................................381
  Elena Baralis, Luca Cagliero, Laura Farinetti, Marco Mezzalama, and Enrico Venuto
A Microservice-Based MOOL in Acoustics Addressing the Learning-at-Scale Scenario .........................................................................391
  Antonella Longo and Marco Zappatore

CELT Session 2
Test-Driven Summarization: Combining Formative Assessment with Teaching Document Summarization ..................................................................................................................401
  Luca Cagliero, Laura Farinetti, and Elena Baralis
Self-Paced Approach in Synergistic Model for Supporting and Testing Students ..............................................................................................407
  Alice Barana, Marina Marchisio, Alessandro Bogino, Lorenza Operti, Michele Fioravera,
  Sergio Rabellino, and Francesco Floris

CELT Session 3
Toward Blocks-Text Parity .................................................................................................................................................................413
  Chris Johnson and Adrian Abundez-Arce
Teaching Test-First Programming: Assessment and Solutions ..................................................................................................................420
  Marcello Missiroli, Daniel Russo, and Paolo Ciancarini
SEABED: An Open-Source Software Engineering Case-Based Learning Database ..........................................................................................426
  Veena Saini, Paramvir Singh, and Ashish Sureka
Adaptive Teaching Supported by ICTs to Reduce the School Failure in the Project “Scuola Dei Compiti” ..................................................................................................................432
  Alice Barana, Michele Fioravera, Marina Marchisio, and Sergio Rabellino
CELT Session 4
Cloud Adapted Workflow e-Assessment System: Cloud-AWAS .................................................................438
   Fahima Hajjej, Yousra Bendaly Hlaoui, and Leila Jemni Ben Ayed
Evaluating the Use of Virtual Reality on Professional Robotics Education ..................................................448
   Mauro César Charão dos Santos, Vicenzo Abichequer Sangalli, and Marcio Sarroglia Pinho
Combinations of Personal Characteristic Types and Learning Effectiveness of Teams .....................................456
   Hironori Washizaki, Yusuke Sunaga, Masashi Shuto, Katsuhiko Kakehi,
   Yoshiaki Fukazawa, Shoso Yamato, Masashi Okubo, and Bastian Tenbergen

CAP: Computer Architecture & Platforms
Message from the CAP 2017 Organizing Committee ..................................................................................458
   Cristina Seceleanu, Hironori Kasahara, and Tiberiu Seceleanu

CAP Session 1
An Extensible Pervasive Platform for Large-Scale Anticipatory Mobile Computing ....................................459
   Christian Meurisch, Bennet Jeutter, Wladimir Schmidt, Nickolas Gündling,
   Benedikt Schmidt, Fabian Herrlich, and Max Mühlhäuser
A Novel Integrated Architecture for Ambient Assisted Living Systems .....................................................465
   Ashalatha Kunnappilly, Alexandru Sorici, Imad Alex Awada, Irina Mocanu,
   Cristina Seceleanu, and Adina Madga Florea

CAP Session 2
RefCRE: A Reference Count Based Rewriting Framework for VM Image Restoration ..................................473
   Jiwei Xu, Xiaozhao Xing, Tao Wang, Zhigang Lu, and Wenbo Zhang
xB+-Tree: Access-Pattern-Aware Cache-Line-Based Tree for Non-volatile Main
   Li-Zheng Liang, Ming-Chang Yang, Yuan-Hao Chang, Tseng-Yi Chen, Shuo-Han Chen,
   Hsin-Wen Wei, and Wei-Kuan Shih
Multicore Cache Coherence Control by a Parallelizing Compiler .................................................................492
   Hironori Kasahara, Keiji Kimura, Boma A. Adhi, Yuhei Hosokawa, Yohei Kishimoto,
   and Masayoshi Mase

NCIW: Networks, Communications, Internet, & Web Technologies
Message from the NCIW Program Co-chairs .............................................................................................498
   Tugkan Tuglular and Ying Cai

NCIW Session 1
Formalization and Verification of the PKMv3 Protocol Using CSP ...............................................................499
   Yuanmin Xu, Huibiao Zhu, Xiaoran Zhu, Xi Wu, Jian Guo, and Gang Lu
Cardinality Counting Circuit for Real-Time Abnormal Traffic Detection ..................................................505
   Shuji Sannomiya, Akira Sato, Kenichi Yoshida, and Hiroaki Nishikawa
Cache Effect of Shared DNS Resolver ........................................................................................................................511

Kazunori Fujiwara, Akira Sato, and Kenichi Yoshida

NCIW Session 2
A Framework for User-Friendly Verification-Oriented VNF Modeling ........................................................................................................................517

Guido Marchetto, Riccardo Sisto, Matteo Virgilio, and Jalolliddin Yusupov

Router Position-Based Cooperative Caching for Video-on-Demand in Information-Centric Networking ................................................523

Zhe Zhang, Chung-Hong Lung, Ioannis Lambadaris, Marc St-Hilaire, and Sankarshan Sakkareppattana Nagaraja Rao

NCIW Session 3
Automatic Construction of Name-Bound Virtual Networks for IoT ..........................................................................................529

Kenji Fujikawa, Ved P. Kafle, Pedro Martinez-Julia, Abu Hena Al Muktadir, and Hiroaki Harai

Analysis of Geographic DTN Routing under Random Walk Mobility Model ................................................................538

Daiki Matsui, Ryo Hagihara, Yasuhiro Yamasaki, and Hiroyuki Ohsaki

Bata Krishna Tripathy, Ashray Sudhir, Padmalochan Bera, and Mohammad Ashiqur Rahman

NCIW Session 4
Supporting Interoperability among Web Services Through Efficient Matching ........................................................................557

Xiaocao Hu, Zhiyong Feng, Keman Huang, and Shizhan Chen

Practical Enhancement and Evaluation of a Low-Latency Network Model Using Mobile Edge Computing ........................................567

Krittin Intharawijitr, Katsuyoshi lida, Hiroyuki Koga, and Katsunori Yamaoka

CoAP-CTX: A Context-Aware CoAP Extension for Smart Objects Discovery in Internet of Things ..................................................575

Felipe M. Barreto, Paulo A. de S. Duarte, Marcio E. F. Maia, Rossana M. de C. Andrade, and Windson Viana

SEPT: Security, Privacy, & Trust
Message from SEPT 2017 Organizing Committee ................................................................................................................585

Katsuyoshi lida and Mohammad Zulkernine

SEPT Session 1
Enforcing Generalized Refinement-Based Noninterference for Secure Interface Composition ........................................................................................................586

Cong Sun, Ning Xi, and Jianfeng Ma
Securing Link State Routing for Wireless Networks against Byzantine Attacks: A Monitoring Approach ................................................................. 596
  Babatunde Ojetunde, Naoki Shibata, and Juntao Gao

Authenticating Preference-Oriented Multiple Users Spatial Queries .................................................................................................................. 602
  Xiaoran Duan, Yong Wang, Juguang Chen, and Junhao Zhang

SEPT Session 2
An In-depth Concealed File System with GPS Authentication Adaptable for Multiple Locations ................................................................................................................................. 608
  Yong Jin, Masahiko Tomoishi, and Satoshi Matsuura

Automated Crash Filtering Using Interprocedural Static Analysis for Binary Codes ............................................................................................................. 614
  Hyeon-Gu Jeon, Seong-Kyun Mok, and Eun-Sun Cho

Seer: A Lightweight Online Failure Prediction Approach ................................................................................................................................. 624
  Burcu Ozcelik and Cemal Yilmaz

SEPT Session 3 — Keynote
Physical Attestation in the Smart Grid for Distributed State Verification ........................................................................................................... 626
  Thomas Roth and Bruce M. McMillin

SEPT Session 4
SecretSafe: A Lightweight Approach against Heap Buffer Over-Read Attack ........................................................................................................ 628
  Xiaoguang Wang, Yong Qi, Chi Zhang, Saiyu Qi, and Peijian Wang

Challenge to Impede Deep Learning against CAPTCHA with Ergonomic Design ........................................................................................................... 637
  Tomoka Azakami, Chihiro Shibata, and Ryuya Uda

DomainChroma: Providing Optimal Countermeasures against Malicious Domain Names ............................................................................................... 643
  Daiki Chiba, Mitsuaki Akiyama, Takeshi Yagi, Takeshi Yada, Tatsuya Mori, and Shigeki Goto

Claimsware: A Claims-Based Middleware for Securing IoT Services .................................................................................................................. 649
  Vathalloor Merin George and Qusay H. Mahmoud

SEPT Session 5
Detecting Malicious Websites by Integrating Malicious, Benign, and Compromised Redirection Subgraph Similarities .................................................................................................................. 655
  Toshiki Shibahara, Yuta Takata, Mitsuaki Akiyama, Takeshi Yagi, and Takeshi Yada

TLS Connection Validation by Web Browsers: Why do Web Browsers Still Not Agree? .............................................................................................. 665
  A. S. Wazan, R. Laborde, D. W. Chadwick, F. Barrere, and A. Benzekri

An Inferential Metamorphic Testing Approach to Reduce False Positives in SQLIV Penetration Test .................................................................................................................................................. 675
  Lei Liu, Guoxin Su, Jing Xu, Biao Zhang, Jiehui Kang, Sihan Xu, Peng Li, and Guannan Si
Student Research Symposium
Message from the Student Research Symposium Chairs ................................................................. 681
Claudio Demartini, Kenichi Yoshida, and Luigi De Russis

SRS Session 1
Research on Integrated Authentication Using Passwordless Authentication Method ................................................................. 682
Michitomo Morii, Hiroki Tanioka, Kenji Ohira, Masahiko Sano, Yosuke Seki,
Kenji Matsuura, and Tetsushi Ueta
On the Effect of Scale-Free Structure of Network Topology on Performance
of Content-Centric Networking ........................................................................................................ 686
Ryo Nakamura and Hiroyuki Ohsaki
A Fluid-Based Model of a Transport Protocol in Content-Centric Networking ................................................................. 690
Tsuyoshi Yabuuchi, Ryo Nakamura, and Hiroyuki Ohsaki

SRS Session 2
How GitHub Contributing.md Contributes to Contributors ............................................................................................... 694
Naoki Kobayakawa and Kenichi Yoshida
On the Effectiveness of Link Addition for Improving Robustness of Multiplex Networks
against Layer Node-Based Attack ........................................................................................................ 697
Yui Kazawa and Sho Tsugawa
On Message Delivery Delay of Epidemic DTN Routing with Broadcasting ACKs ....................................................... 701
Natsuko Kawabata, Yasuhiro Yamasaki, and Hiroyuki Ohsaki

Fog Computing and Networking — Business Drivers and Impacts
Fogonomics — The Strategic, Economic, and Financial Aspects of the Cloud ................................................................. 705
Joe Weinman

Fog Computing and Networking — Technology Drivers and Impacts
Application Deployment through the Fog ........................................................................................................ 706
Antonio Brogi
Secure Fog Computing for Smart Living ........................................................................................................ 707
Bruce McMillin
FA2ST: Fog as a Service Technology ........................................................................................................ 708
Yang Yang

ITiP: IT in Practice
ITIP Session 1
The Adoption of Emerging Technology: Technology Before Requirements ...............................................................709
   Stephen J. Andriole

Process Patterns: Reusable Design Artifacts for Business Process Models ..............................................................714
   Muhammad Ashad Kabir, Zhenchang Xing, Prakash Chandrasekaran, and Shang-Wei Lin

Situation-Aware Data-Driven Decision Making in Smart Environments Using the MapReduce ...............................................................722
   Hoda Gholami and Carl K. Chang

ITIP Session 2
Tool Integration in the Aerospace Domain: A Case Study ..........................................................................................731
   Iacopo Vagliano, Davide Ferretto, Eugenio Brusa, Maurizio Morisio, and Laura Valacca

Strategies and Challenges on the Accessibility and Interoperability of e-Government Web Portals: A Case Study on Brazilian Federal Universities ............................................................737
   Alberto Dumont Alves Oliveira and Marcelo Medeiros Eler

Software Industry Practice in Africa: Case Study Sudan ............................................................................................743
   Saleh Alamdy and Rasha Osman

ITIP Session 3
Agent Marketplaces and Deep Learning in Enterprises: The COMPOSITION Project ...............................................749
   Dario Bonino and Paolo Vergori

DIIG: A Distributed Industrial IoT Gateway ..................................................................................................................755
   Masoud Hemmatpour, Mohammad Ghazivakili, Bartolomeo Montrucchio, and Maurizio Rebaudengo

Towards Verifiable Safe and Correct Medical Best Practice Guideline Systems ........................................................760
   Chunhui Guo, Zhicheng Fu, Shangping Ren, Yu Jiang, and Lui Sha

DSAT: Data Sciences, Analytics, & Technologies

DSAT Session 1 — Data Analytics Competition

DSAT Session 2
Inference of Extreme Synchrony with an Entropy Measure on a Bipartite Network ....................................................766
   Aki-Hiro Sato

Predicting Misconfiguration-Induced Unsuccessful Executions of Jobs in Big Data System ...............................................................772
   Tang Hongyan, Li Ying, Wang Long, Gu Jing, and Wu Zhonghai
DSAT Session 3

R-Extractor: A Method for Data Extraction from Template-Based Entity-Pages ..........................................................778
  Edimar Manica, Carina F. Dorneles, and Renata Galante

Container Rebalancing: Towards Proactive Linux Containers Placement Optimization in a Data Center ..........................................................788
  Pongsakorn U-Chupala, Yasuhiro Watashiba, Kohei Ichikawa, Susumu Date, and Hajimu Iida

HybridFS — A High Performance and Balanced File System Framework with Multiple Distributed File Systems ..........................................................796
  Lidong Zhang, Yongwei Wu, Ruini Xue, Tse-Chuan Hsu, Hongji Yang, and Yeh-Ching Chung

DSAT Session 4

A Parallel Self-Organizing Community Detection Algorithm Based on Swarm Intelligence for Large Scale Complex Networks ..........................................................806
  Hanlin Sun, Wei Jie, Christian Sauer, Sugang Ma, Gang Han, Zhongmin Wang, and Kui Xing

KANDOR — Knowledge Analysis of Neighborhood Dynamics and Online Relationships ..........................................................816
  Ricardo Chagas Rapacki, Leandro Krug Wives, and Renata Galante

An Adaptive Diversity-Based Ensemble Method for Binary Classification ..................................................................................................822
  Xing Fan, Chung-Horng Lung, and Samuel A. Ajila

Combining Word and Character N-Grams for Detecting Deceptive Opinions ..................................................................................................828
  Al Hafiz Akbar Maulana Siagian and Masayoshi Aritsugi

HCSC: Human Computing & Social Computing

Message from HCSC Organizing Committee ..................................................................................................834
  Moushumi Sharmin and Jalal Mahmud

HCSC Session 1

Opportunities and Challenges in Designing Participant-Centric Smoking Cessation System ..........................................................835
  Moushumi Sharmin, Theodore Weber, Hillol Sarker, Nazir Saleheen, Santosh Kumar, Shameem Ahmed, and Mustafa Al’ Absi

Simple Group Photo Sharing Using Facesense ..................................................................................................845
  Nova Ahmed, Minhaz Ahmed Syrus, and Arshad Chowdhury

Tactile Interface Design for Helping Mobility of People with Visual Disabilities ..........................................................................................851
  Christian Lykawka, Bruno Konzen Stahl, Marcia de Borba Campos, Jaime Sanchez, and Márcio Sarroglia Pinho
HCSC Session 2
Understanding the Feasibility of a Location-Aware Mobile-Based 911-Like Emergency Service in Bangladesh
Md Monsur Hossain, Moushumi Sharmin, and Shameem Ahmed

Your Mouse Reveals Your Next Activity: Towards Predicting User Intention from Mouse Interaction

HCSC Session 3
Spreadsheet Element Sharing through Synchronization
Massimo Maresca and Pierpaolo Baglietto

Users Interfaces Adaptation for Visually Impaired Users Based on Meta-Model Transformation
Lamia Zouhaier, Yousra Bendaly Hlaoui, and Leila Jemni Ben Ayed

EATA: Emerging Advances in Technology & Applications
Message from the EATA 2017 Co-Chairs
Ali Hurson and Hiroyuki Sato

EATA Session 1
Ontology-Based Social Media Analysis for Urban Planning
Xinxin Gao, Wencheng Yu, Yilong Rong, and Songmao Zhang

Improving Mobility in Smart Cities with Intelligent Tourist Trip Planning
Petar Mrazovic, Josep L. Larriba-Pey, and Mihhail Matskin

EATA Session 2
SNS Agency Robot for Elderly People Using External Cloud-Based Services
Toru Kobayashi, Kazushige Katsuragi, Taishi Miyazaki, and Kenichi Arai

Building Energy Modelling and Monitoring by Integration of IoT Devices and Building Information Models
Lorenzo Bottaccioli, Alessandro Aliberti, Francesca Ugliotti, Edoardo Patti, Anna Osello, Enrico Macii, and Andrea Acquaviva

EATA Session 3
Efficient Worker Selection Through History-Based Learning in Crowdsourcing
Tarek Awwad, Nadia Bennani, Konstantin Ziegler, Veronika Sonigo, Lionel Brunie, and Harald Kosch

Collaborative Computation Offloading in Heterogeneous Asynchronous Cloud Environment
Lei Ma, Bing Yu, Hiroyuki Sato, and Yadong Wang
Dynamic Data Flow Processing in Edge Computing Environments .................................................................935
Yuuichi Teranishi, Takashi Kimata, Hiroaki Yamanaka, Eiji Kawai, and Hiroaki Harai

MOWU: Mobile, Wearable, & Ubiquitous Computing
Message from the MOWU 2017 Organizing Committee .................................................................................945
Vladimir Getov and Hong Va Leong

MOWU Session 1
A Novel Framework to Recognize Complex Human Activity ............................................................................N/A
Md Osman Gani, Amit Kumar Saha, Golam Mushih Tanimul Ahsan,
Sheikh Iqbal Ahamed, and Roger O. Smith
CAOS: A Context Acquisition and Offloading System ......................................................................................N/A
Francisco A. A. Gomes, Paulo A. L. Rego, Lincoln Rocha, José N. de Souza,
and Fernando Trinta
A Novel Real-Time Non-invasive Hemoglobin Level Detection Using Video Images
from Smartphone Camera .................................................................................................................................967
Golam M. T. Ahsan, Md. O. Gani, Md. K. Hasan, Sheikh I. Ahamed, William Chu,
Mohammad Adibuzzaman, and Joshua Field

MOWU Session 2
Polynomial Classification Model for Real-Time Fall Prediction System ..........................................................973
Masoud Hemmatpour, Milad Karimshoushtari, Renato Ferrero, Bartolomeo Montrucchio,
Maurizio Rebaudengo, and Carlo Novara
Enabling Flexible and Efficient Remote Execution in Opportunistic Networks
through Message-Oriented Middleware ...........................................................................................................979
Minh Le, Myoungkyu Song, and Young-Woo Kwon

Author Index - Symposia .....................................................................................................................................985
Message from the Standing Committee Chair - Workshops ........................................................xx
Message from the Steering Committee Chair - Workshops ........................................................xxii
Message from the General Chairs - Workshops ........................................................................xxiii
Message from the Program Chairs - Workshops .......................................................................xxiv
Message from the Workshop Chairs .......................................................................................xxvi
COMPSAC Workshop Organizers ............................................................................................xxvii

COMPSAC 2016 Workshops

ADMNET: The 4th IEEE International COMPSAC Workshop on Architecture, Design, Deployment and Management of Networks and Applications

Session 1: Test, Measurement

DNetSpec: A Distributed Network Testing Toolset for Middleware Developers .................................................................1
  Shintaro Ishihara, Fujita Masahiro, and Toyokazu Akiyama

Improving Packet Capture Trace Import in Trace Compass with a Data Transformation

DSL ..........................................................................................................................................................7
  Ruediger Gad

Interest ACK: A Fast Packet Loss Detection Mechanism for Content-Centric Networking ..................................................13
  Tsuyoshi Yabuuchi, Ryo Nakamura, and Hiroyuki Ohsaki
Session 2: Resource Balancing
A Method of Mobile Core Network Load Reduction Using Autonomous Clustering-Based Two-Layered Structure for Information Dissemination in Wireless Networks .......................................................... Toshikazu Terami, Tomoyuki Ohta, and Yoshiaki Kakuda .......................................................... 19

LXC Container Migration in Cloudlets under Multipath TCP .......................................................... Yuqing Qiu, Chung-Hong Lung, Samuel Ajila, and Pradeep Srivastava .................................................. 31

Session 3: Security and Invited Talk
Cache Function Activation on a Client Based DNSSEC Validation and Alert System by Multithreading .................................................................................. Kunitaka Kakoi, Yong Jin, Nariyoshi Yamai, Naoya Kitagawa, and Masahiko Tomoishi .................................................................................................... 37

A Spoofed E-Mail Countermeasure Method by Scoring the Reliability of DKIM Signature Using Communication Data ........................................... Kanako Konno, Kenya Dan, and Naoya Kitagawa ........................................................................ 43

Deployment of Multilanguage Security Awareness Education Online Course by Federated Moodle in Japan ........................................................................ Hiroshi Ueda and Motonori Nakamura ........................................................................................... 49

STA: The 9th IEEE International COMPSAC Workshop on Software Test Automation
Message from STA 2017 Workshop Co-Chairs .................................................................................. Fevzi Belli and Rajesh Subramanyan .................................................................................................. 53

Session 1: Feature and Interface Based Testing
Applying Feature Selection to Software Defect Prediction Using Multi-objective Optimization ........................................................................................................ Xiang Chen, Yuxiang Shen, Zhanqi Cui, and Xiaolin Ju ................................................................. 54

A Model-Based Framework for Cloud API Testing ........................................................................ Junyi Wang, Xiaoying Bai, Linyi Li, Zhicheng Ji, and Haoran Ma ......................................................... 60

FORMAT: A Tool for Adapting Test Models Based on Feature Models ................................................. Burcu Ergun, Ceren Şahin Gebizli, and Hasan Sözer ......................................................................... 66

OpenFlow Modeling Based on CPN for Evolution Consideration and Executable Test Case Generation .................................................................................. Hongwei Ruan, Lu Wang, Xiao Yang, Lulu Dong, and Hua Li .................................................................. 72
Session 2: Formal Methods
Theoretical, Weak and Strong Accuracy Graphs of Spectrum-Based Fault Localization Formulas ........................................................................................................................................................................78  
  C. M. Tang, W. K. Chan, and Y. T. Yu
A Case Study on Context Maintenance in Dynamic Hybrid Race Detectors ..................................................................................................................84  
  Jialin Yang, Ernest Bota Pobee, and W. K. Chan
How Does GUI Testing Exercise Application Logic Functionality? ...............................................................................................................................90  
  Abdulaziz Alkhalid and Yvan Labiche

ESAS: The 12th IEEE International COMPSAC Workshop on E-Health Systems and Semantic Web

ESAS Session 1
A Deep-Learning-Based Method of Estimating Water Intake .................................................................................................................................96  
  Yutaro Yamada, Takato Saito, Satoshi Kawasaki, Daizo Iketa, Masaji Katagiri, Masafumi Nishimura, and Hiroshi Mineno
Blood.Health.FOAF: Extending FOAF with Blood Ontology .................................................................................................................................102  
  Okan Bursa, Emine Sezer, Ozugü Can, and Murat Osman Unalir
Standardizing the Crowdsourcing of Healthcare Data Using Modular Ontologies ............................................................................................107  
  Hengyi Hu and Larry Kerschberg

ESAS Session 2
Towards Detecting Sex Offenders in Social Networks .................................................................................................................................113  
  Sai K. Vallapu and Thoshitha T. Gamage
A Mathematical Model for a Hybrid System Framework for Privacy Preservation of Patient Health Records .........................................................................................................119  
  Kissi Mireku Kingsford, Fengli Zhang, Mensah Dennis Nii Ayeh, and Armah MaryMargaret

ESAS Session 3
Technological Module for Unsupervised, Personalized Cardiac Rehabilitation Exercising .................................................................................................................................125  
  Anargyros Chatzitofis, Dimitrios Zarpalas, Dimitrios Filos, Andreas Triantafyllidis, Ioanna Chouvarda, Nicos Maglaveras, and Petros Daras
A Semantic Extraction and Sentimental Assessment of Risk Factors (SESARF): An NLP Approach for Precision Medicine: A Medical Decision Support Tool for Early Diagnosis from Clinical Notes .........................................................................................................131  
  Susan Sabra, Khalid Mahmood, and Mazen Aloabaidi
An Intelligent Tracking System: Application to Acute Respiratory Tract Infection (TrackARTI) .........................................................................................................137  
  Duygu Çelik Ertugrul, Atilla Elçi, and Yıltan Bitirim
Session 1: Distributed Services

Trust-Aware and Location-Based Collaborative Filtering for Web Service QoS
Kai Chen, Hongyan Mao, Xiangyu Shi, Yuanmin Xu, and Ailun Liu

PRUCC-RM: Permission-Role-Usage Cardinality Constrained Role Mining
Carlo Blundo, Stelvio Cimato, and Luisa Siniscalchi

Adaptive Cost Efficient Framework for Cloud-Based Machine Learning
Rezvan Pakdel and John Herbert

Session 2: Data Protection

Querying Encrypted OLAP Data
Alfredo Cuzzocrea and Giorgio Mario Grasso

Is Pokémon GO Watching You? A Survey on the Privacy-Awareness of Location-Based Apps’ Users
Chiara Braghin and Marilisa Del Vecchio

Digital Media Tampering Detection Techniques: An Overview
Songpon Teerakanok and Tetsutaro Uehara

MVDA: The 6th IEEE International COMPSAC Workshop on Modeling and Verifying Distributed Applications

MVDA Session 1

A Modeling Approach for Flexible Workflow Applications of Cloud Services
Imen Ben Fraj, Yousra Bendaly Hlaoui, and Leila Jemni Ben Ayed

Towards an ASM Specification for Monitoring and Adaptation Services of Large-Scale Distributed Systems
Andreea Buga and Sorana Tania Nemes

From Sequence Diagrams to Event B: A Specification and Verification Approach of Flexible Workflow Applications of Cloud Services Based on Meta-model Transformation
Yousra Bendaly Hlaoui, Ahlem Ben Younes, Leila Jemni Ben Ayed, and Manel Fathali
MediComp: The 4th IEEE International COMPSAC Workshop on Medical Computing

Session 1: Predictive Data Analysis
Chronic Kidney Disease Prediction on Imbalanced Data by Multilayer Perceptron:
Chronic Kidney Disease Prediction .............................................................................................................................193
Pinar Yildirim
Identify Biological Modules and Hub MiRNAs for Oral Squamous Cell Carcinomas ..................................................199
Doudou Zhou, Jianqiang Li, Ji-Jiang Yang, Qing Wang, Weiliang Qiu, Shi Chen, and Minhua Lu
An Initial Screening Method for Tuberculosis Diseases Using a Multi-objective Gradient
Evolution-Based Support Vector Machine and C5.0 Decision Tree ...........................................................................204
Ferani E. Zulvia, R. J. Kuo, and E. Roflin
SLC25A36 and ZFAND5 Expression Levels Altered by the Interaction of EtOH Dosage
and Exposure Time in Human Dental Pulp Stem Cells ...............................................................................................210
Zhirui Wang, Jianqiang Li, Weiliang Qiu, Ji-Jiang Yang, Rui Mao, and Shi Chen

Session 2: Medical Association Analysis
Alcohol-Induced Differential Variable Genes ...............................................................................................................215
Siyuan Liang, Jianqiang Li, Juan Li, Caiyun Yang, Weiliang Qiu, Ji-Jiang Yang, Zhihua Sun, and Rui Mao
A Novel Technique of Noninvasive Hemoglobin Level Measurement Using HSV Value
of Fingertip Image ........................................................................................................................................................N/A
Re-Structuring and Specific Similarity Computation of Electronic Medical Records ...................................................230
Yunxuan Zhang, Ziping He, Ji-Jiang Yang, Qing Wang, and Jianqiang Li

Session 3: Medical System and Evaluation
A Study of Machine Learning in Healthcare ................................................................................................................236
Rohan Bhardwaj, Ankita R. Nambiar, and Debojyoti Dutta
Breaking Implicit Trust in Point-of-Care Medical Technology: A Cyber-Physical
Attestation Approach ...................................................................................................................................................242
Fredrick Love and Bruce McMillin
Gene Network Modules Associated to DPSCs Differentiation ....................................................................................248
Wenjing Xu, Juan Li, Jianqiang Li, Yue Li, Weiliang Qiu, Ji-Jiang Yang, Chunjie Guo, and Minhua Lu
The Investigation on Effectiveness Evaluation Methods for One Medical Material Used
for Surgery Patients Based on Electronic Medical Records Data ...............................................................................253
Bo Liu, Kelu Yao, Lan Wei, Xiaolu Fei, and WangQing
Fast Abstracts

Message from COMPSAC 2017 Fast Abstract Track Co-Chairs

Dave Towey, Michiharu (Michael) Takemoto, and Hossain Shahriar

Fast Abstracts Session 1

Infusing Topic Modeling into Interactive Program Comprehension: An Empirical Study

Tianxia Wang and Yan Liu

First Meeting Time Formula of Two Random Walkers toward Understanding Epidemic Information Dissemination

Yusuke Sakumoto and Hiroyuki Ohsaki

Toward Design of Garbled Circuits Using Quantum Gates

Maryam Ehsanpour

New Strategies for Selecting Reuse Candidates on Automated Program Repair

Akito Tanikado, Haruki Yokoyama, Masahiro Yamamoto, Soichi Sumi, Yoshiki Higo, and Shinji Kusumoto

Investigation and Detection of Split Commit

Ryo Anima, Yoshiki Higo, and Shinji Kusumoto

Design of a Node Status Visualizing Software Utilizing the AR Technology for Multihop Wireless Networks

Tomoyuki Ohta, Ryota Ito, and Yoshiaki Kakuda

Energy Consumption Measurements in Docker

Senay Semu Tadesse, Francesco Malandrino, and Carla-Fabiana Chiasserini

Fast Abstracts Session 2

What Makes Software Energy-Efficient?: Make it Faster

Hiroyuki Matsuo, Shinsuke Matsumoto, and Shinji Kusumoto

Identifying Fundamental Goals from Objects in a Scenario to Facilitate System Introduction

Yoshhide Chubachi and Haruhiko Kaiya

Computer Literacy Education: Challenges in Multicultural Environments: A View on Japanese University Environment

Simona Vasilache

FATDOG: Hadoop Based Test Data Generation Tool for RESTful Web Service

Jing Liu and Wenjie Chen

A Secure and Lightweight IoT Device Remote Monitoring and Control Mechanism Using DNS

Yong Jin, Masahiko Tomoishi, and Nariyoshi Yamai

Development of the Edge Computing Platform Based on Functional Modulation Architecture

Tohru Kondo, Hidenobu Watanabe, and Toshihiro Ohigashi
Traceability Link Mining — Focusing on Usability ................................................................. 286
Yukiya Yazawa, Shinpei Ogata, Kozo Okano, Haruhiko Kaiya, and Hironori Washizaki

FCN: The 1st IEEE International COMPSAC Workshop on Fog Computing and Networking

FCN Session 1

On the Deployment of Healthcare Applications over Fog Computing Infrastructure .................................................. 288
Orestis Akrivopoulos, Ioannis Chatzigiannakis, Christos Tselios, and Athanasios Antoniou

Towards Container Orchestration in Fog Computing Infrastructures ........................................................................ 294
Saiful Hoque, Mathias Santos de Brito, Alexander Willner, Oliver Keil, and Thomas Magedanz

SIS-SS: The 1st IEEE International COMPSAC Workshop on Smart IoT Sensors and Social Systems for eHealth and Well-being Applications

Session 1: Security, IoT Systems and Devices for eHealth

Performance Assessment of BLE Nano BAN Micro-Infrastructures ........................................................................... 300
Luca Vollero and Marco Sabatini

Cybersecurity of Wearable Devices: An Experimental Analysis and a Vulnerability Assessment Method ................................................................................................................. 304
Matteo Langone, Roberto Setola, and Javier Lopez

LoRaWAN as an e-Health Communication Technology .............................................................................................................. 310
M. Talha Buyukakkaslar, Mehmet Ali Erturk, Muhammed Ali Aydin, and Luca Vollero

Contactless Detection of ECG Signals: Sensor Architecture and Simulation ........................................................................ 314
Marco Santonico, Alessandro Zompanti, Giorgio Pennazza, Giuseppe Ferri, Francesca Romana Parente, and Mario Benassai

Security in Cross - Border Medical Data Interchange: A Technical Analysis and a Discussion of Possible Improvements .......................................................................................... 317
Raffaele Martino, Salvatore D’Antonio, Luigi Coppolino, and Luigi Romano

CDS: The 5th IEEE International COMPSAC Workshop on Consumer Devices and Systems

CDS Session 1

Design of Common Software Architecture as Base for Application Generator and Meta-Generator for Interactive Systems ................................................................................................. 323
Atsushi Esaka, Masami Noro, and Atsushi Sawada

Dynamically Exposing and Controlling Physical Devices by Expanding Web of Things Scheme .......................................................................................................................... 329
Takuya Sakamoto, Hidenobu Ito, and Kazuaki Nimura
Wrist Player: A Smartwatch Gesture Controller for Smart TVs .................................................................336
   Mateus M. Luna, Thyago P. Carvalho, Fabrizzio Alphonsus A. M. N. Soares,
   Hugo A. D. Nascimento, and Ronaldo M. Costa

A Collusion-Resilient Hybrid P2P Framework for Massively Multiplayer Online Games ..............................342
   Kazuma Matsumoto and Yasuo Okabe

CDS Session 2
On-Demand Barrier-Free Street View System Using Sensor Information
from General-Purpose Wheelchair Users ...........................................................................................................348
   Kenichi Arai, Takuya Tateishi, Toru Kobayashi, and Noboru Sonehara

Visualization Method for Bicycle Rider Behavior Analysis Using a Smartphone ...........................................354
   Hajime Kato, Yuto Sakaiyo, and Shigeo Kaneda

Visualization Method Using Probe Bicycle to Analyze Bicycle Rider’s Control Behavior ...............................360
   Ryoichi Takahashi, Kazuki Miki, and Shigeo Kaneda

VID: Virtual Information Desk ..........................................................................................................................366
   Navid Seidi, Farshad Eshghi, and Manoochehr Kelarestaghi

DSCAC: The 1st IEEE International COMPSAC Workshop on Data Science Challenges in Algorithm and Complexity

DSCAC Session 1
Finding All Breadth First Full Spanning Trees in a Directed Graph .................................................................372
   Hoda Khalil and Yvan Labiche

Incremental Learning from Multi-level Monitoring Data and Its Application
to Component Based Software Engineering ......................................................................................................378
   Salman Taherizadeh and Vlado Stankovski

Session 2: Data Science Challenges in Agriculture, Climate, Food
IoT Solutions for Precision Farming and Food Manufacturing: Artificial Intelligence
Applications in Digital Food ..................................................................................................................................384
   Rob Dolci

Session 3: Data Science Challenges in Finance and Economics
Detection of Irregularities and Rips by Finding Critical Points of Morse Theory —
Preliminary Results on Analysis on Sales Data ....................................................................................................386
   Hiroyuki Sato, Yoshihiro Seino, Takanori Ogata, and Tatsuya Shirakawa

Application of Complex Hilbert Principal Component Analysis to Financial Data .........................................391
   Wataru Souma, Hiroshi Iyetomi, and Hiroshi Yoshikawa

Detrending Moving Average Algorithm: Quantifying Heterogeneity in Financial Data ..................................395
   Linda Ponta, Anna Carbone, and Silvano Cincotti
QUORS: The 11th IEEE International COMPSAC Workshop on Quality Oriented Reuse of Software

Session 1: Efficiency and Quality in Clouds
The Impact of Database Layer on Auto-Scaling Decisions in a 3-Tier Web Services
Cloud Resource Provisioning ..................................................................................................................401
Ali Yadavar Nikravesh, Samuel A. Ajila, and Chung-Horng Lung

ESBSC: Energy-Aware Service Brokering Strategy in Clouds .............................................................407
Feng Ma, Xiaodong Liu, Ying Yang, Wei Yao, Jinjin Cai, and Fang Wang

Automated Constraint-Based Multi-tenant SaaS Configuration Support Using XML
Filtering Techniques .................................................................................................................................413
Azadeh Etedali, Chung-Horng Lung, Samuel Ajila, and Igor Veselinovic

Session 2: Emerging Reuse
Developing a Creative Travel Management System Based on Software Reuse and Abstraction Techniques ........................................................................................................................................419
Sicong Ma, Hongji Yang, and Meiyu Shi

A Creative Approach to Reusing Data and Generating Knowledge in Enterprise Systems ........................................................................................................................................................................425
Lin Zou, Qinyun Liu, Hongming Che, Hongji Yang, and Hua Zhou

Towards Requirements Reuse by Implementing Traceability in Agile Development ................................431
Randa Elamin and Rasha Osman

Session 3: Software and System Evolution 1
Improving Workflow Anomaly Detection with a C-Tree ........................................................................437
Feng-Jian Wang, Alex Chang, and Tennyson Lu

An Approach Based on Structural Differences to Expedite Applying OSS Updates to Products .................................................................445
Masahiro Fukuyori, Ryuichi Umekawa, Hiroshi Fujino, Junya Yamaguchi, and Kota Ariyama

Executable Domain-Specific Modelling Based on Domain Spaces ............................................................451
Qing Duan, Junhui Liu, Dongdai Zhou, Feng Yu, and Hongji Yang

Session 4: Softare and System Evolution 2
Combining Neutron and OpenDaylight for Management of Networking ..................................................457
Lu Wang, Hongwei Ruan, Hua Li, and Qi Liu

DeDuCT: A Data Dependence Based Concern Tagger for Modularity Analysis ........................................463
Andrea Fornaia and Emiliano Tramontana

Towards Service-Oriented Design of Hybrid Systems Modeled in Simulink ............................................469
Timm Liebrenz, Paula Herber, Thomas Göthel, and Sabine Glesner
BIOT: The 4th IEEE International COMPSAC Workshop on Big Data Management for the Internet of Things

Session 1: IoT Architecture and Algorithms
An IoT Architecture for Personalized Recommendations over Big Data Oriented Applications

Georgios Palaiokrassas, Ilias Karlis, Antonios Litke, Vassilios Charlaftis, and Theodora Varvarigou

Improving the Prediction Accuracy of Decision Tree Mining with Data Preprocessing

Priyanga Chandrasekar, Kai Qian, Hossain Shahrir, and Prabir Bhattacharya

STPSA: The 12th IEEE International COMPSAC Workshop on Security, Trust and Privacy for Software Applications

STPSA Session 1
Data-Oriented Instrumentation against Information Leakages of Android Applications

Cong Sun, Pengbin Feng, Teng Li, and Jianfeng Ma

A Lightweight Multi-receiver Encryption Scheme with Mutual Authentication

Ei Khaing Win, Tomoki Yoshihisa, Yoshimasa Ishi, Tomoya Kawakami, Yuuichi Teranishi, and Shinji Shimojo

Access Control Model for the Inference Attacks with Access Histories

Kinoshita Hirotsugu and Morizumi Tetsuya

An Iris-Based Authentication Framework to Prevent Presentation Attacks

Hossain Shahrir, Hisham Haddad, and Mahbubul Islam

STPSA Session 2
Addressing Security Issues in the eHealth Domain Relying on SIEM Solutions

Luigi Coppolino, Salvatore D'Antonio, Luigi Romano, Luigi Sgaglione, and MariaCarla Staffa

Blockchain as an Audit-Able Communication Channel

Shigeya Suzuki and Jun Murai

Hyo-Cheol Lee and Seok-Won Lee

UCDAS: The 4th IEEE International COMPSAC Workshop on User Centered Design and Adaptive Systems

UCDAS Session 1
Integrating Goal Models and Problem Frames for Requirements Analysis of Self-Adaptive CPS

Deshuai Han, Jianchun Xing, Qiliang Yang, Juelong Li, Xiaobing Zhang, and Ying Chen
A Similarity-Based Approach to Recognizing Voice-Based Task Goals in Self-Adaptive Systems .........................................................536
   Xiaobing Zhang, Qiliang Yang, Jianchun Xing, Deshuai Han, and Ying Chen

Talis — A Design Study for a Wearable Device to Assist People with Depression .................................................................543
   Dirk Siegmund, Laura Chiesa, Oliver Hörr, Frank Gabler, Andreas Braun, and Arjan Kuijper

UCDAS Session 2

Method for Text Entry in Smartwatches Using Continuous Gesture Recognition ...............................................................549
   Thamer Hobylon Nascimento, Fabrizzio Alphonsus A. M. N. Soares, Pouang Polad Irani,
   Leandro Luiz Galdino de Oliveira, and Anderson da Silva Soares

Tele-operation of Robot Teams: A Comparison of Gamepad-, Mobile Device and Hand Tracking-Based User Interfaces .............555
   Stefano Bonaiuto, Alberto Cannavò, Giovanni Piumatti, Gianluca Paravati,
   and Fabrizio Lamberti

The Problem of Cognitive Load in GUI’s: Towards Establishing the Relationship between Cognitive Load and Our Executive Functions .................................................................561
   Andrés Mejía Figueroa and Reyes Juárez-Ramírez

NETSAP: The 7th IEEE International COMPSAC Workshop on Network Technologies for Security, Administration and Protection

NETSAP Session 1

Making DNS Servers Resistant to Cyber Attacks: An Empirical Study on Formal Methods and Performance ..................................................566
   Barry S. Fagin, Bradley Klanderman, and Martin C. Carlisle

Secure Double-Layered Defense against HTTP-DDoS Attacks ..............................................................................................572
   Mohamad Samir A. Eid and Hitoshi Aida

Application of Hidden Markov Model in SQL Injection Detection ..........................................................................................578
   Peng Li, Lei Liu, Jing Xu, Hongji Yang, Liying Yuan, Chenkai Guo, and Xiujuan Ji

NETSAP Session 2

TRUST-CAP: A Trust Model for Cloud-Based Applications ........................................................................................................584
   Eslam G. Abdallah, Mohammad Zulkernine, Yuan Xiang Gu, and Clifford Liem

Detecting and Classifying Android PUAs by Similarity of DNS queries ..................................................................................590
   Mitsuhiro Hatada and Tatsuya Mori

Message from CORCS-IEESD 2017 Workshop Chairs

Cristina Seceleanu, Detlef Streitferdt, Tiberiu Seceleanu, and Philipp Nenninger

Session 1: Embedded and Distributed Systems Development

System Level Partitioning for Embedded Systems

Adaptive Resource Allocation of Multiple Servers for Service-Based Systems in Cloud Computing

Siqian Gong, Beibei Yin, Wenlong Zhu, and Kai-Yuan Cai

Simulation Driven Development of Distributed Systems — Improving the System Development Process Using the Example of the German Automatic Toll System

Tommy Baumann and Bernd Pfitzinger

SSERV: The 4th IEEE International COMPSAC Workshop on Social Services through Human and Artificial Agent Models

Session 1: Application

Searching Promising Researchers through Network Centrality Measures of Co-author Networks of Technical Papers

Masanori Fujita, Hiroto Inoue, and Takao Terano

Feature Representation Extraction Method of Hotel Reviews Using Co-occurrence Restriction and Dependency Graph

Koji Tanaka, Koichi Tsuji, Takashi Ikoma, Akiyuki Sekiguchi, and Kazuhiko Tsuda

Promoting Environmental Education Using a Multilingual Environment: Manufacturing Soap from Waste Oil

Bo Wang, Hiroshi Suzuki, Yuqi Liao, Yuuya Ieiri, and Reiko Hishiyama

SSERVE Session 2

Corroboration Effect of Current Net Earnings and Management’s Net Earnings Forecasts in Japan’s Corporate Bond Market

Hiroaki Jotaki, Hiroshi Takahashi, Yasuo Yamashita, and Takao Terano

A Walk Rally Application to Motivate Users to Visit Potential Sightseeing Resources

Yuuya Ieiri, Yuu Nakajima, Ryota Ayaki, and Reiko Hishiyama

A Comparative Study Using Discriminant Analysis on a Questionnaire Survey Regarding Project Managers’ Cognition and Team Characteristics

Ayako Masuda, Tohru Matsuodani, and Kazuhiko Tsuda

Online Shopping Frauds Detecting System and Its Evaluation

Kenichi Yoshida, Kazuhiko Tsuda, Setsuya Kurahashi, and Hiroki Azuma
Session 3: Method

Early Signals of Trending Rumor Event in Streaming Social Media .................................................................654
  Shihan Wang, Izabela Moise, Dirk Helbing, and Takao Terano

Agent-Based Urban Dynamics Simulation to Analyze Effects of Street Attractiveness and Tramway for an Urban Sprawl ..........................................................................................................................660
  Hideyuki Nagai and Setsuya Kurahashi

An Analysis of Multi-language Simultaneous Display in the Translation System .........................................................666
  Mizuki Sato and Reiko Hishiyama

eIoT: The 1st IEEE International COMPSAC Workshop on Embedded Internet of Things

Session 1: IoT Application, Architecture and Protocols

SociCoAP: Social Interaction with Supplementary Sensors and Actuators through CoAP in Smartphones .........................................................................................................................................................672
  Cristian Martin, Jaime Chen, Manuel Diaz, Ana Reyina, and Bartolome Rubio

Optimizing RPL Objective Function for Mobile Low-Power Wireless Networks .................................................................678
  Ifeoma Helen Urama, Hossein Fotouhi, and Mohammad Mahmoud Abdellatif

IoT Agent Platform Mechanism with Transparent Cloud Computing Framework for Improving IoT Security .............................................................................................................................................684
  Ikuo Nakagawa and Shinji Shimojo

A Wireless Early Prediction System of Cardiac Arrest through IoT ....................................................................................690
  Yosuf ElSaadany, AKM Jahangir A. Majumder, and Donald R. Ucci

OER: The 2nd IEEE International Workshop on Open Educational Resources for Computer Science & Information Technology

Message from OER 2017 Workshop Organizers ........................................................................................................696
  Henry Chan and Edmundo Tovar

Session 1: Communities Based on OERs

MERLOT — A Reliable Framework for OER .........................................................................................................................697
  Eli Shmueli

Promoting MERLOT Communities Based on OERs in Computer Science and Information Systems .............................700
  Edmundo Tovar, Henry Chan, and Sorel Reisman

Developing an Open Educational Resource: Reflections on a Student-Staff Collaboration ..................................................707
  Dave Towey, David Foster, Filippo Gliardi, Paul Martin, Andrew White, Yiru Jiang, Yichen Pan, and Yu Qu
Session 2: Infrastructure to Adopt OERs
A Knowledge-Driven Web Tutoring System Framework for Adaptive
and Assessment-Driven Open-Source Learning .................................................................712
Maria Sette, Lixin Tao, and Ning Jiang

SIMICE: The 3rd IEEE International COMPSAC Workshop on Secure Identity
Management in the Cloud Environment

SIMICE Session 1
Verifiable Delegated Authorization for User-Centric Architectures and an OAuth2
Implementation .....................................................................................................................718
Luca Ferretti, Mirco Marchetti, and Michele Colajanni
A Novel Binarization Scheme for Real-Valued Biometric Feature ........................................724
Jialiang Peng and Bian Yang
A Threshold-Based Authentication System Which Provides Attributes Using Secret
Sharing ..................................................................................................................................730
Tomohiro Ito, Daisuke Kotani, and Yasuo Okabe

SIMICE Session 2
Flexible Key Revocation and Access Control for a Privacy-Protecting Cloud CBIR
System ....................................................................................................................................738
Hao Liu and Hideaki Goto
Enhancing Breeder Document Long-Term Security Using Blockchain Technology ..................744
Nicolas Buchmann, Christian Rathgeb, Harald Baier, Christoph Busch, and Marian Margraf

SSMSC: The 1st IEEE International COMPSAC Workshop on Smart
and Sustainable Mobility in Smart Cities

Session 1: Optimization in Smart Mobility
Ant Colony Optimisation and Geolocation Technologies for the Transportation
Assignment Problem: Use of ACO and Geolocation Technologies for Performance
Improvement and Test of Local Public Transport ..................................................................749
Fabio Pompei
Modelling Urban Transport Sector: A Methodology Based on OSeMOSYS Model
Generator .............................................................................................................................754
Daniele Grosso, Raffaella Gerboni, and Dario Cotugno
Multi Period Assignment Problem for Social Engagement and Opportunistic IoT ......................760
Edoardo Fadda, Dario Mana, Guido Perboli, and Roberto Tadei
The Impact of Combining Inbound and Outbound Demand in City Logistics Systems ..................766
Pirmin Fontaine, Teodor Gabriel Crainic, Ola Jabali, and Walter Rei
Session 2: Smart Mobility: Business Models and Users Behaviors

Car-Sharing: Current and Potential Members Behavior Analysis after the Introduction of the Service .................................................................771
  Guido Perboli, Brunella Caroleo, and Stefano Musso

One-Way Free Floating Car-Sharing: Applying Vehicle-Generated Data to Assess the Market Demand Potential of Urban Zones ...........................................777
  Y. M. Chianese, A. Avenali, R. Gambuti, and L. Palagi

Business Modeling of a City Logistics ICT Platform ..................................................................................................................783
  Alberto De Marco, Giulio Mangano, Giovanni Zenezini, Anna Corinna Cagliano,
  Guido Perboli, Mariangela Rosano, and Stefano Musso

Assessing the Impacts of Electric Vehicles Uptake: A System Dynamics Approach .................................................................790
  Brunella Caroleo, Elisa Pautasso, Michele Osella, Enrico Palumbo, and Enrico Ferro

Author Index - Workshops ........................................................................................................................................796
