Table of contents

**Volume 232**

10th International Conference on Compressors and their Systems
11–13 September 2017, City, University of London, United Kingdom

Accepted papers received: 17 August 2017
Published online: 6 September 2017

**Preface**

011001
OPEN ACCESS
International Conference on Compressors and their Systems

011002
OPEN ACCESS
Sponsors

011003
OPEN ACCESS
Conference Committees

011004
OPEN ACCESS
Scientific Review Committee 2017

011005
OPEN ACCESS
Peer review statement

**Keynote**

012001
OPEN ACCESS
New concept single screw compressors and their manufacture technology

Q Feng, F Liu, L Chang, C Feng, C Peng, J Xie and M van den Broek.....1
Reciprocating Compressors

012002
OPEN ACCESS
Thermal and Fluid Mechanical Investigation of an Internally Cooled Piston Rod
K Klotsche, C Thomas and U Hesse.....10

012003
OPEN ACCESS
Characterization and Performance Testing of Natural Gas Compressors for Residential and Commercial Applications
Xinye Zhang, Eckhard A. Groll and Dylan Bethel.....20

012004
OPEN ACCESS
Novel Long Stroke Reciprocating Compressor for Energy Efficient Jaggery Making
M V Rane and D B Uphade.....30

012005
OPEN ACCESS
Investigation on the variation of pressure in the cylinder of the refrigerator compressor based on FSI model
Zhilong He, Zhifang Jian, Tao Wang, Dantong Li and Xueyuan Peng.....40

012006
OPEN ACCESS
Numerical analysis of gas leakage in the piston-cylinder clearance of reciprocating compressors considering compressibility effects
V M Braga and C J Deschamps.....49

012007
OPEN ACCESS
Comprehensive model of a hermetic reciprocating compressor
B Yang, D Ziviani and E A Groll.....58
Comprehensive 3D-elastohydrodynamic simulation of hermetic compressor crank drive

S Posch, J Hopfgartner, E Berger, B Zuber, R Almbauer and P Schöllauf....68

Determination of the oil distribution in a hermetic compressor using numerical simulation

S Posch, J Hopfgartner, E Berger, B Zuber, R Almbauer and P Schöllauf....77

A conjugate heat transfer analysis of a hermetic reciprocating compressor

M DÎNCER, K SARIOĞLU and H GÜNEŞ.....86

Heat Transfer Simulation for Reciprocating Compressor with Experimental Validation

Ruixin Zhou, Bei Guo, Xiaole Chen, Jinliang Tuo, Rui Wu, Fabian Fagotti, Yali Zhao, Song Yang and Bo Xu.....96

Acoustical contribution calculation and analysis of compressor shell based on acoustic transfer vector method

Xiaol Chen, Bei Guo, Jinliang Tuo, Ruixin Zhou and Yang Lu.....106

Pulsation damping of the reciprocating compressor with Helmholtz resonator

W Wang, Y Zhang, Q Zhou, X Peng, J Feng and X Jia.....116
Research on Noise Reduction of Reed Valves of a Hermetic Refrigerator Compressor
Zhilong He, Qian Chen, Dantong Li, Ju Wang, Pu Xia and Tao Wang.....128

Dynamic analysis of the reciprocating compressor package on the offshore platform
Y Zhao, W Wang, Q Zhou, J Feng, X Jia and X Peng.....138

Vibration analysis in reciprocating compressors
V Kacani.....147

Screw Compressors

Application of numerical grid generation for improved CFD analysis of multiphase screw machines
S Rane and A Kovačević.....157

Energy potential of dual lead rotors for twin screw compressors
Matthias Utri and Andreas Brümmer.....167

Research on the injected effect by the narrow-slit injection orifice in screw compressors
J Xie, J Feng, F Liu, C Peng and Q Feng.....177
CFD simulation of a screw compressor with oil injection
Hui Ding and Yu Jiang.....185

Use of CFD to predict trapped gas excitation as source of vibration and noise in screw compressors
James Willie.....193

Manufacturing method and performance assessment for variable lead vacuum rotors
C. S. Holmes, S Rane and X. Wang.....203

Determining of actual profile clearances and screw compressor rotor positions depending on working conditions
T N Mustafin, R R Yakupov, M S Khamidullin, I G Khisameev, L H Uybeka and O Y Paranina.....211

Statistical Capability Study of a Helical Grinding Machine Producing Screw Rotors
C. S. Holmes, M. Headley and P. W. Hart.....220

Comparative study of bearing loads for different twin screw compressor rotor configurations
D Buckney and C Anderson.....228
Numerical investigation of flow characteristics in twin-screw pump under cavitating conditions

D Yan, A Kovacevic, Q Tang and S Rane.....238

Yang Lu, Yu Fu, Bei Guo, Lijuan Fu, Qingqing Zhang and Xiaole Chen.....249

A CFD study of Screw Compressor Motor Cooling Analysis

S Branch.....259

Optimization analysis of the motor cooling method in semi-closed single screw refrigeration compressor

Z L Wang, Y F Shen, Z B Wang and J Wang.....269

Valves

Fully coupled fluid-structure interaction model of reed valves in a multi-cylinder reciprocating piston compressor

F Xie, J Nieter, A Lifson, R Reba and V Sishtla.....279

Investigations on pneumatically forced-actuated compressor valves

Christian Stöckel, Christiane Thomas, Jörg Nickl and Ullrich Hesse.....289
A fluid-structure interaction solver for the fluid flow through reed type valves
I González, A Naseri, J Rigola, C D Pérez-Segarra and A Oliva.....298

Stainless steel valves with enhanced performance through microstructure optimization
A A Barani, M Boukhattam, M Haggeney and S Güler.....308

Reduction of the suction losses through reed valves in hermetic reciprocating compressors using a magnet coil
J Hopfgartner, S Posch, B Zuber, R Almbauer, K Krischan and S Stangl.....314

Turbocompressors

Determination of Pressure Fluctuations in Rotor Bundle of Centrifugal Compressor at Critical Conditions of Operation
V A Levashov and K Yu Lyubchenko.....324

The numerical study of the rake angle of impeller blade in centrifugal compressor
A Drozdov and Y Galerkin.....334

Optimization of a centrifugal compressor impeller using CFD: the choice of simulation model parameters
V V Neverov, Y V Kozhukhov, A M Yablokov and A A Lebedev.....345
012038
OPEN ACCESS
Numerical analysis of flow in a centrifugal compressor with circumferential grooves: influence of groove location and number on flow instability

X Chen, G Qin, Z Ai and Y Ji.....355

012039
OPEN ACCESS
An alternative method for centrifugal compressor loading factor modelling

Y Galerkin, A Drozdov, A Rekstn and K Soldatova.....365

012040
OPEN ACCESS
2D and 3D impellers of centrifugal compressors – advantages, shortcomings and fields of application

Y Galerkin, A Reksrin and A Drozdov.....376

012041
OPEN ACCESS
Improving of the working process of axial compressors of gas turbine engines by using an optimization method

E Marchukov, I Egorov, G Popov, O Baturin, E Goriachkin, Y Novikova and D Kolmakova.....387

012042
OPEN ACCESS
Development of the virtual experimental bench on the basis of modernized research centrifugal compressor stage test unit with the 3D impeller.

A A Aksenov, A M Danilishin, A M Dubenko and Y V Kozhukov.....397

012043
OPEN ACCESS
Impact of inlet coherent motions on compressor performance

Jacopo Forlese and Giovanni Spoleti.....407
Comparison of CFD-calculations of centrifugal compressor stages by NUMECA Fine Turbo and ANSYS CFX programs

Y B Galerkin, I B Voinov and A A Drozdov.....417

Dynamic Machines

CFD study of leakage flows in shroud cavities of a compressor impeller

K Soldatova.....428

A network application for modeling a centrifugal compressor performance map

A Nikiforov, D Popova and K Soldatova.....438

Analysis of Three-dimension Viscous Flow in the Model Axial Compressor Stage K1002L

K Tribunskaya and Y V Kozhukhov.....449

Analysis of casing treatment's impact on the axial compressor model stage characteristics

K Tribunskaya and Y V Kozhukhov.....459
Scroll Compressors

012049
OPEN ACCESS
Performance Measurements and Mapping of a R-407C Vapor Injection Scroll Compressor

Domenique Lumpkin, Niklas Spielbauer and Eckhard Groll.....466

012050
OPEN ACCESS
Numerical analysis of the transient flow in a scroll refrigeration compressor

Shuahui Sun, Kai Wu, Pengcheng Guo and Xingqi Luo.....476

012051
OPEN ACCESS
Oil flow at the scroll compressor discharge: visualization and CFD simulation

Jiu Xu and Pega Hrnjak.....486

012052
OPEN ACCESS
CFD simulation of a dry scroll vacuum pump with clearances, solid heating and thermal deformation

A Spille-Kohoff, J Hesse, R Andres and F Hetze.....496

Vane Compressors

012053
OPEN ACCESS
Grid generation methodology and CFD simulations in sliding vane compressors and expanders

Giuseppe Bianchi, Sham Rane, Ahmed Kovacevic, Roberto Cipollone, Stefano Murgia and Giulio Contaldi......506
An intracooling system for a novel two-stage sliding-vane air compressor
Stefano Murgia, Gianluca Valenti, Ida Costanzo, Daniele Colletta and Giulio Contaldi.....516

Thermal modelling of a dry revolving vane compressor
K T Ooi and K T Aw.....524

**Novel Compressors**

Improved design method of a rotating spool compressor using a comprehensive model and comparison to experimental results
Craig R Bradshaw, Greg Kemp, Joe Orosz and Eckhard A Groll.....534

Comparison of energy-efficiency and size of portable oil-free screw and scroll compressors
Olly Dmitriev and Prof. Ian MacDonald Arbon.....544

Internally geared screw machines with ported end plates
M G Read, I K Smith and N Stosic.....552

Working principle of new multi-chamber rotary compressor
M Lin, Y D Lim and K T Ooi.....562
Performance evaluation of a novel dual vane rotary compressor
A Shouman, A El Dein Hussin, A Hamed, M Serag El Din, N Mahmoud and A El Baz.....572

Performance improvement of air source heat pump by using gas-injected rotary compressor
B L Wang, X R Liu, Y C Ding and W X Shi.....583

Modeling and analysis of an open-drive Z-compressor
Davide Ziviani and Eckhard A. Groll.....589

Maintenance free gas bearing helium blower for nuclear plant
Dr A Molyneaux, Prof M Harris, Prof S Sharkh, S Hill and T de Graaff.....599

Simulation study of multi-chamber rotary compressor
Y D Lim, M Lin and K T Ooi.....612

A new Wankel-type compressor and vacuum pump
D W Garside.....622
Compressor systems

012066
OPEN ACCESS
Dynamic modelling and PID loop control of an oil-injected screw compressor package
G W Poli, W J Milligan and P McKenna.....631

012067
OPEN ACCESS
System solution to improve energy efficiency of HVAC systems
L Chretien, R Becerra, N P Salts and E A Groll.....641

012068
OPEN ACCESS
The process of gas-dynamic design of pneumatic braking system using the baseline compressor
Y Novikova, G Popov, E Goriachkin, O Baturin and V Zubanov.....650

012069
OPEN ACCESS
The methodology for the existing complex pneumatic systems efficiency increase with the use of mathematical modeling
A.M. Danilishin, S.V. Kartashov, Y.V. Kozhukhov and E.G. Kozin.....660

Optimization

012070
OPEN ACCESS
CFD analysis of linear compressors considering load conditions
Sanghyun Bae and Wonsik Oh.....670

012071
OPEN ACCESS
Characteristics between the meshing pairs with different envelope profile in single screw compressors
R Huang, F Liu, T Li and Q Feng.....676
Investigation on the electromagnetic centring technique in compressor with labyrinth seal structure

W Zhang, C Feng, J Cheng, Q Feng and W Wu.....687

Reduction of gas flow nonuniformity in gas turbine engines by means of gas-dynamic methods

V Matveev, O Baturin, D Kolmakova and G Popov.....696

Numerical Simulation on Flow and Heat Transfer Performance of Air-cooler for a Natural Gas Storage Compressor Unit

Biyuan Liu, Feng Zhang, Zenghui Ma, Zilong Zheng and Jianmei Feng.....707

Effect of end-wall riblets on radial turbine performance

M A Khader and A I Sayma.....717

Non-symmetric approach to single-screw expander and compressor modeling

Davide Ziviani, Eckhard A. Groll, James E. Braun, W. Travis Horton, M. De Paepe and M. van den Broek.....730

Theoretical investigation of flash vaporisation in a screw expander

Hanushan Vasuthevan and Andreas Brümmer.....740
Effects of spontaneous condensation in steam-driven screw expanders
Manuel Grieb and Andreas Brümmer.....750

Three-dimensional numerical simulation and experimental validation of flows in working chambers of roots blowers with backflow design
S K Sun, Q Zhou, J Wen and X Y Peng.....760

Combined Numerical and Analytical Analysis of an Oil-free Twin Screw Compressor
Stuart Kennedy, Maria Wilson and Sham Rane.....770

Numerical investigation of refrigeration machine compressor operation considering single-phase electric motor dynamic characteristics
Y Baidak and V Smyk.....780

Numerical Simulation and Experimental Validation of Failure Caused by Vibration of a Fan
Qiang Zhou, Wu Han, Jianmei Feng, Xiaohan Jia and Xueyuan Peng.....789

Study on the CO\textsubscript{2} electric driven fixed swash plate type compressor for eco-friendly vehicles
Donglim Nam, Kitae Kim, Jehie Lee, Yunki Kwon and Geonho Lee.....798
Energy efficiency

012084
OPEN ACCESS
Technology's present situation and the development prospects of energy efficiency monitoring as well as performance testing & analysis for process flow compressors

L Li, Y Zhao, L Wang, Q Yang, G Liu, B Tang and J Xiao.....808

012085
OPEN ACCESS
Carbon and Energy Saving Financial Opportunities in the Industrial Compressed Air Sector

Diego Vittorini and Roberto Cipollone.....817

012086
OPEN ACCESS
Turbomachinery group for cold energy concept application

S Alavi, A Arpi, M Ascani, G Cerri, L Chennaoui and A Manni.....827

012087
OPEN ACCESS
Climate Adaptivity and Field Test of the Space Heating Used Air-Source Transcritical CO₂ Heat Pump

Yulong Song, Zuliang Ye and Feng Cao.....838

Measurements and Control

012088
OPEN ACCESS
The Integration of an API619 Screw Compressor Package into the Industrial Internet of Things

W J Milligan, G Poli and D K Harrison.....848
Theoretical investigation of vapor mass fraction measurement methods for two-phase injection compression

T W Moesch, D Lumpkin, C Thomas, U Hesse and E Groll.....857

Modification of a compressor performance test bench for liquid slugging observation in refrigeration compressors

Max Ola, Christiane Thomas and Ullrich Hesse.....867

Lubricants

Evaluations of PVE Lubricants for Refrigeration and Air Conditioning system with the Low GWP Refrigerants

Tomoya Matsumoto, Masato Kaneko and Yasuhiro Kawaguchi.....876

Identifying lubricant options for compressor bearing designs

J Karnaz, C Seeton and L Dixon.....883

Refrigeration oils for low GWP refrigerants in various applications

R Saito and S G. Sundaresan.....892
