2017 IEEE 25th International Requirements Engineering Conference Workshops (REW 2017)

Lisbon, Portugal
4 – 8 September 2017
# Table of Contents

Welcome Message from the Chairs ........................................................................................................... xiii
Preface to MoDRE 2017 .............................................................................................................................. xvi
MoDRE 2017 Committees .......................................................................................................................... xvii
Preface to ESPRE 2017 ............................................................................................................................... xix
ESPRE 2017 Committees .......................................................................................................................... xx
Preface to UsARE 2017 ............................................................................................................................. xxi
UsARE 2017 Committees ........................................................................................................................... xxii
Preface to CrowdRE 2017 ........................................................................................................................... xxiii
CrowdRE 2017 Committees ....................................................................................................................... xxiv
Preface to RELAW 2017 ........................................................................................................................... xxv
RELAW 2017 Committees ......................................................................................................................... xxvi
Preface to RePa 2017 ................................................................................................................................. xxvii
RePa 2017 Committees ............................................................................................................................. xxviii
Preface to EmpiRE 2017 ........................................................................................................................... xxx
EmpiRE 2017 Committees ........................................................................................................................ xxiii
Preface to RET 2017 ................................................................................................................................. xxxiii
RET 2017 Committees .............................................................................................................................. xxxiv
Preface to AIRE 2017 ............................................................................................................................... xxxvi
AIRE 2017 Committees ............................................................................................................................ xxxvii
Preface to JIT RE 2017 ............................................................................................................................ xxxviii
JIT RE 2017 Committees ........................................................................................................................ xxxix
Donors and Sponsors ................................................................................................................................. xli
MoDRE — 7th International Model-Driven Requirements Engineering Workshop

Goal-Oriented Requirements Engineering
Towards Using Ontologies for Domain Modeling within the SysML/KAOS Approach ......................................................................................................................................................1
Steve Tueno, Régine Laleau, Amel Mammar, and Marc Frappier
Evaluation of Goal Models in Reuse Hierarchies with Delayed Decisions ...................................................6
Mustafa Berk Duran and Gunter Mussbacher
A Distance-Based GRL Approach to Goal Model Refinement and Alternative Selection ..............................................................16
Malak Baslyman and Daniel Amyot

Traceability and Requirements to Architecture Refinement
Seamless Integration of Multirequirements in Complex Systems .............................................................21
Florian Galinier, Jean-Michel Bruel, Sophie Ebersold, and Bertrand Meyer
REQDL: A Requirements Description Language to Support Requirements Traces Generation .............................................................26
Saida Haidrar, Hatime Bencharqui, Adil Anwar, Jean-Michel Bruel, and Ounsa Roudies
A Semi-Automated Approach for the Co-Refinement of Requirements and Architecture Models ..................................................................36
Dominique Blouin, Matthias Barkowski, Melanie Schneider, Holger Giese, Johannes Dyck, Etienne Borde, Dalila Tamzalit, and Joost Noppen
Towards Aligning Multi-concern Models via NLP .......................................................................................46
Fatma Başak Aydemir and Fabiano Dalpiaz
Traceability for Automated Production Systems: A Position Paper ............................................................51
Mounifah Alenazi, Nan Niu, Wentao Wang, and Arushi Gupta

Miscellaneous
What is a Good Textual Representation of Activity Diagrams in Requirements Documents? ..........................................................56
Martin Beckmann and Andreas Vogelsang
DASH: A New Language for Declarative Behavioural Requirements with Control State Hierarchy ..................................................................64
Jose Serna, Nancy A. Day, and Sabria Farheen
ESPRE — 4th Workshop on Evolving Security and Privacy Requirements Engineering

Human Centered Design and Engineering
An Ontological Approach to Predict Trade-Offs between Security and Usability for Mobile Application Requirements Engineering .................................................................69
  Woori Roh and Seok-Won Lee

Design as Code: Facilitating Collaboration Between Usability and Security Engineers Using CAIRIS ...........................................................................................................76
  Shamal Faily and Claudia Iacob

From Requirements to Operation: Components for Risk Assessment in a Pervasive System of Systems ........................................................................................................83
  Duncan Ki-Aries, Huesyin Dogan, Shamal Faily, Paul Whittington, and Christopher Williams

Privacy
Exploratory Study of the Privacy Extension for System Theoretic Process Analysis (STPA-Priv) to Elicit Privacy Risks in eHealth ........................................................................90
  Kai Mindermann, Frederik Riedel, Asim Abdulkhaleq, Christoph Stach, and Stefan Wagner

Challenges of Privacy Requirements Modelling in V2X Applications: A Telematic Insurance Case Study ..........................................................................................97
  Sarah Schulz Mukisa and Awais Rashid

Toward an Approach to Privacy Notices in IoT ................................................................................................................104
  Parvaneh Shayeagh and Sepideh Ghanavati

Awareness
An Effective Immersive Cyber Security Awareness Learning Platform for Businesses in the Hospitality Sector ........................................................................................................111
  Jack Holdsworth and Edward Apeh

UsARE — 3rd International Workshop on Usability and Accessibility focused Requirements Engineering
Video as a By-Product of Digital Prototyping: Capturing the Dynamic Aspect of Interaction ..................................................................................................................118
  Oliver Karras, Carolin Unger-Windeler, Lennart Glauer, and Kurt Schneider

Evaluation of User-Subjective Web Interface Similarity with Kansei Engineering-Based ANN ......................................................................................................................125
  Maxim Bakaev, Vladimir Khvorostov, Sebastian Hell, and Martin Gaedke
RELAW — 10th International Workshop on Requirements Engineering and Law

From RELAW Research to Practice: Reflections on an Ongoing Technology
Transfer Project ........................................................................................................................................204
Nicolas Sannier, Mehrdad Sabetzadeh, and Lionel C. Briand

An Algebraic Approach for Analyzing of Legal Requirements ..................................................209
Alexander Letichevsky, Oleksandr Letychevskyi, Vladimir Peschanenko, and Maxim Poltorakij

FOL-Based Approach for Improving Legal-GRL Modeling Framework: A Case
for Requirements Engineering of Legal Regulations of Social Media ...........................................213
Amin Rabinia and Sepideh Ghanavati

RePa — 7th International Workshop on Requirements Patterns

Towards Requirement Patterns for Smart Physical Work Assistants ...........................................219
Robin Knote, Matthias Söllner, and Jan Marco Leimeister

Use Case Elicitation with FrameNet Frames ..............................................................................224
Mahwish Kundi and Ruzanna Chitchyan

Towards a Tool to Help Exploring Existing Non-functional Requirements
Solution Patterns ........................................................................................................................232
Rodrigo Veleda and Luiz Marcio Cysneiros

Variability Aspects at a Textual Requirements Specification Level ............................................240
Alberto Rodrigues da Silva, João Fernandes, and Sofia Azevedo

Requirements Authorship: A Family Process Pattern ..............................................................248
Graciela Dora Susana Hadad, Jorge Horacio Doorn, and Julio Cesar Sampaio do Prado Leite

Requirement Patterns for Organizational Modeling ....................................................................252
Henrique Prado de Sá Sousa and Julio Cesar Sampaio do Prado Leite

EmpiRE — 6th Workshop on Empirical Requirements Engineering

A Contemporary View on Software Quality Requirements in Agile
and Software Architecture Practices ........................................................................................260
Mohamad Kassab

Enhancing Requirements Engineering in Agile Methodologies
by Agent-Oriented Goal Models: Two Empirical Case Studies ...................................................268
Tanel Tenso, Alexander Horst Norta, Hannes Rootsi, Kuldar Taveter, and Irina Vorontsova

Improving Goal Communication with Information Flow Maps and Distances ..........................276
Mattias Mellhorn and Elizabeth Bjarnason
Evaluation of Tools for Hairy Requirements and Software Engineering Tasks ........................................284
Daniel M. Berry

A Reference Method for User Story Requirements in Agile Systems
Development .............................................................................................................................................292
Niels Bik, Garm Lucassen, and Sjaak Brinkkemper

Gabriel Oliveira and Sabrina Marczak

Towards Studying the Communication Patterns of Kanban Teams: A Research Design ..................................................303
Saad Shafiq and Irum Inayat

How Common are Controlled Experiments with Student Participants in Requirements Engineering?: A Systematic Mapping Study on the Use and Reporting of Graduate and Undergraduate Students in Requirements Engineering Experiments ..........................................................................................307
Marian Daun, Jennifer Brings, and Carolin Hübscher

RET — 4th International Workshop on Requirements Engineering and Testing

Challenges of Aligning Requirements Engineering and System Testing in Large-Scale Agile: A Multiple Case Study ............................................................315
Francisco Gomes de Oliveira Neto, Jennifer Horkoff, Eric Knauss, Rashidah Kasauli, and Grischa Liebel

Initial Investigations on the Influence of Requirement Smells on Test-Case Design ........................................................................................................323
Armin Beer, Maximilian Junker, Henning Femmer, and Michael Felderer

How to Make Use of Empirical Knowledge About Testers’ Information Needs ........................................327
Anne Hess, Joerg Doerr, and Norbert Seyff

Integrating Graphical and Natural Language Specifications to Support Analysis and Testing ................................................................................................331
Christopher L. Robinson-Mallett and Robert M. Hierons

Aligning Requirements and Acceptance Tests via Automatically Generated Guidance .................................................................339
Sofija Hotomski, Eya Ben Charrada, and Martin Glinz

Towards the Generation of End-to-End Web Test Scripts from Requirements Specifications ..............................................................343
Diego Clerissi, Maurizio Leotta, Gianna Reggio, and Filippo Ricca

ReqCap: Hierarchical Requirements Modeling and Test Generation for Industrial Control Systems ..................................................351
Ali Almohammad, João F. Ferreira, Alexandra Mendes, and Phil White
Exploring Traceability Links via Issues for Detailed Requirements Coverage
Reports .....................................................................................................................................................359
Richard Mordinyi and Stefan Biffl

AIRE — 4th International Workshop on Artificial Intelligence for Requirements

Automated Requirements Classification
Automatically Classifying Requirements from App Stores: A Preliminary Study ..................367
Roger Deocadez, Rachel Harrison, and Daniel Rodriguez

AI-Supported Requirements Formalization
Toward Learning Realizable Scenario-Based, Formal Requirements Specifications ..................................................372
David Schmelter, Joel Greenyer, and Jörg Holtmann

From User Demand to Software Service: Using Machine Learning to Automate the Requirements Specification Process ..................................................................................379
Lorijn van Rooijen, Frederik Simon Bäumer, Marie Christin Platenius,
Michaela Geierhos, Heiko Hamann, and Gregor Engels

Automated Identification of Component State Transition Model Elements from Requirements ..................................................................................386
Kaushik Madala, Danielle Gaither, Rodney Nielsen, and Hyunsook Do

AI-Supported Quality Assurance of Requirements
Detecting Domain-Specific Ambiguities: An NLP Approach Based on Wikipedia Crawling and Word Embeddings .................................................................393
Alessio Ferrari, Beatrice Donati, and Stefania Gnesi

Which Requirements Artifact Quality Defects are Automatically Detectable? A Case Study ...............................................................................................................................................400
Henning Femmer, Michael Unterkalmsteiner, and Tony Gorschek
JIT RE — 2nd International Workshop on Just-In-Time Requirements Engineering: Dealing with Non-Functional Requirements in Agile Software Development

Refinement and Resolution of Just-in-Time Requirements in Open Source Software: A Case Study .................................................................407

Anh Quoc Do and Tanmay Bhowmik

Data-Driven Requirements Engineering in Agile Projects: The Q-Rapids Approach .................................................................411

Xavier Franch, Claudia Ayala, Lidia López, Silverio Martínez-Fernández,
Pilar Rodriguez, Cristina Gómez, Andreas Jelitschka, Markku Oivo,
Jari Partanen, Timo Rätty, and Veikko Rytivaara

Towards Requirements Communication and Documentation Guidelines for Agile Teams .................................................................415

Anne Hess, Philipp Diebold, and Norbert Seyff

Automated Support to Capture Verbal Just-in-Time Requirements in Agile Development: A Practitioner View ........................................419

Corey Hollis and Tanmay Bhowmik

Agile with Animals: Towards a Development Method .................................................................423

Dirk van der Linden and Anna Zamansky

Quality Requirements in Agile as a Knowledge Management Problem: More than Just-in-Time .................................................................427

Eric Knauss, Grischa Liebel, Kurt Schneider, Jennifer Horkoff,
and Rashidah Kasauli

Behavior-Driven Requirements Traceability via Automated Acceptance Tests .................................................................431

Garm Lucassen, Fabiano Dalpiaz, Jan Martijn E.M. van der Werf,
Sjaak Brinkkemper, and Didar Zowghi

An Agile Approach for Managing Requirements to Improve Learning and Adaptability .................................................................435

Woogon Shim and Seok-Won Lee

Agile Practitioners’ Understanding of Security Requirements: Insights from a Grounded Theory Analysis .................................................................439

Evenynke Terpstra, Maya Daneva, and Chong Wang

A Regression Model Based Approach for Identifying Security Requirements in Open Source Software Development .................................................................443

Wentao Wang, Nesrin Hussein, Arushi Gupta, and Yinglin Wang

Author Index ...........................................................................................................................................447
