## TABLE OF CONTENTS

### TECHNICAL SESSION 1: SUBSEA (PLATFORMS)

- MARV NUWC’s Mid-sized Autonomous Reconfigurable Vehicle (MARV): Sub Surface Ship Launch & Recovery of a UUV Efforts ................................................................. 1  
  - R. Bashour, M. Ansay, D. French
- UAV Integration Aboard U.S. Navy Ships ........................................................................... 6  
  - M. Goodman, R. Mortimer
- Dynamic Lift Assisted Short TakeOff and Landing Technology (DynASTOL)® ................. 15  
  - J. Lang
- Stabilized UAV Recovery System ..................................................................................... 30  
  - G. Lovell

### TECHNICAL SESSION 1: SURFACE (PERFORMANCE ANALYSIS)

- Environment & Platform Motion Forecasting for Vehicle Launch and Recovery .................. 38  
  - W.-M. Lin, K. Weems, P. Jones, N. Sidki

### TECHNICAL SESSION 2: AIR (SYSTEMS)

- Ship-based UAV Recovery System (SURS) ........................................................................ 52  
  - J. Goldie, W. Hafer, N. Vitale, J. Belcher, R. Mulligan
- Small Unmanned Aircraft System Sea-Based Launch and Recovery (L/R) ......................... 62  
  - S. Miller

### TECHNICAL SESSION 1: SURFACE (TESTING AND TRIALS)

- State of the Art Model Test Procedures for Launch and Recovery ........................................ 69  
  - N. Carette, C. Schmittner
- A Proposed Approach to Launch and Recovery Experimental Data Acquisition and Analysis ................................................................................................................. 80  
  - S. Minnich, R. Bachman
- Simulation and Analysis for Launch and Recovery (SIMILAR) ........................................... 90  
  - F. DeBord
- Stern Launch and Recovery Evaluation for Large Coast Guard Vessels .............................. 97  
  - R. Sheinberg, C. Cleary, F. DeBord

### TECHNICAL SESSION 2: AIR (PLATFORMS)

- USNA Ship Air Wake Project: Comparison of Experimental and Computational Ship Air Wakes for YP Class Patrol Craft ............................................................... 105  
  - M. Snyder
- Further Validation of Simulated Dynamic Interface Testing Techniques as a Tool in the Forecasting of Air Vehicle Deck Limits ......................................................... 115  
  - B. Ferrier, J. Duncan, J. Nelson, D. Carico, D. Ludwig

### LAUNCH & RECOVERY PROGRAMS PANEL

- Food for Thought – UUV Perspective ................................................................................ 133  
  - D. French
TECHNICAL SESSION 1: SUBSEA (SYSTEMS)

An Unmanned Underwater Vehicle Launch, Recovery, and Onboard Handling and Servicing System (LROHSS) for Use with Unmanned Surface Vehicles

M. Selzler

TECHNICAL SESSION 2: SURFACE (SYSTEMS)

Experimental Tracking Control of an Autonomous Surface Vessel

L. McNinch, H. Ashrafias, K. Muske
