# Table Of Contents

## 2017 25th European Signal Processing Conference (EUSIPCO)

### Acoustic Sensor Array Processing

- **Binaural Beamforming Using Pre-Determined Relative Acoustic Transfer Functions**  
  Andreas Koutrouvelis (Delft University of Technology, The Netherlands), Richard Hendriks (Delft University of Technology, The Netherlands), Richard Heusdens (Delft University of Technology, The Netherlands), Jesper Jensen (Oticon, Denmark), Meng Guo (Oticon A/S, Denmark) ................................................................. 1

- **Retrieval of Individualized Head-Related Transfer Functions for Hearing Aid Applications**  
  Michael Buerger (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Germany), Stefan Meier (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Germany), Christian Hofmann (Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Germany), Walter Kellermann (University Erlangen-Nuremberg, Germany), Eghart Fischer (Sivantos GmbH, Germany), Henning Puder (Sivantos GmbH & Sivantos GmbH, Germany) .................................................. 6

- **Scalable Source Localization with Multichannel Alpha-Stable Distributions**  
  Mathieu Fontaine (INRIA & University of Lorraine, France), Charles Vanwynsberghe (UPMC, France), Antoine Liutkus (INRIA, Nancy Grand-Est, France), Roland Badeau (LTCI, Télécom ParisTech, Université Paris-Saclay, France) ................................................................. 11

- **Angle-of-Arrival-Based Gesture Recognition Using Ultrasonic Multi-Frequency Signals**  
  Hui Chen (King Abdullah University of Science and Technology, Saudi Arabia), Tariq Ballal (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Mohamed Saad (King Abdullah University of Science and Technology, Ireland), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA) ................................................................. 16

- **Study of Widely Linear Multichannel Wiener Filter for Binaural Noise Reduction**  
  Xin Leng (Northwestern Polytechnical University, P.R. China), Jingdong Chen (Northwestern Polytechnical University, USA), Israel Cohen (Technion - Israel Institute of Technology, Israel), Jacob Benesty (INRS-EMT, University of Quebec, Canada) ................................................................. 21

### Biomedical Signal and Image Processing

- **Flexible Fusion of Electroencephalography and Functional Magnetic Resonance Imaging: Revealing Neural-Hemodynamic Coupling Through Structured Matrix-Tensor Factorization**  
  Simon Van Eyndhoven (KU Leuven, Belgium), Borbála Hunyadi (KU Leuven, Belgium), Lieven De Lathauwer (KU Leuven, Belgium), Sabine Van Huffel (Katholieke Universiteit Leuven, Belgium) ................................................................. 26

- **A Robust Algorithm for Gait Cycle Segmentation**  
  Shuo Jiang (University of Bremen, Germany), Xingchen Wang (University of Bremen, Germany), Maria Kyrarini (University of Bremen, Germany), Axel Graeser (University of Bremen, Germany) ................................................................. 31

- **Volumetric Segmentation of Human Eye Blood Vessels Based on OCT Images**  
  Agnieszka Anna Stankiewicz (Poznan University of Technology, Poland), Tomasz Marciniak (PUT, Poland), Adam Miroslaw Dabrowski (Poznan University of Technology, Poland), Marcin Stopa (Poznan University of Medical Sciences, Poland), Eizbieta Marciniak (Heliodor Swieckicki Medical Hospital, Poznan University of Medical Sciences, Poland) ................................................................. 36

- **Automatic Prediction of Spirometry Readings from Cough and Wheeze for Monitoring of Asthma Severity**  
  Achuth Rao MV (Indian Institute of Science, India), Prasanta Kumar Ghosh (Indian Institute of Science, India), Kausthubh K (Indian Institute of Science, India), Shivani Yadv (Electrical Engineering Indian Institute of Science India, India), Dipanjan Gope (Indian Institute of Science, India), Uma Maheswari (M S Ramaiah Medical College, India) ................................................................. 41
Pseudo-CT Generation by Conditional Inference Random Forest for MRI-based Radiotherapy Treatment Planning
Axel Largent (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Jean-Claude Nunes (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Hervé Saint-Jalmes (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Antoine Simon (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Nicolas Perichon (Radiotherapy department, Centre Eugène Marquis, Rennes, France, France), Anaïs Barateau (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Chloé Hervé (Radiotherapy department, Centre Eugène Marquis, Rennes, France, France), Caroline Lafond (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Jason Dowling (CSIRO Australian e-Health Research Centre, Herston, Queensland, Australia, Australia), Renaud De Crevoisier (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France), Oscar Acosta (Laboratory of Signal and Image Processing (LTSI), Rennes, France & INSERM, UMR 1099, Rennes, France, France) .................................................. 46

Learning Feature Extractors for AMD Classification in OCT Using Convolutional Neural Networks
Dafydd Ravenscroft (Swansea University, United Kingdom (Great Britain)), Jingjing Deng (Swansea University, United Kingdom (Great Britain)), Xianghua Xie (Swansea University, United Kingdom (Great Britain)), Louise Terry (Cardiff University, United Kingdom (Great Britain)), Tom Margrain (Cardiff University, United Kingdom (Great Britain)), Rachel North (Cardiff University, United Kingdom (Great Britain)), Ashley Wood (Cardiff University, United Kingdom (Great Britain)) ........................................................................... 51

A New Method for Breast Cancer Identification Using Multi-modal Features in Quaternionic Form
George Apostolopoulos (University of Patras, Greece), Athanasios Koutras (Technical Educational Institute of Western Greece, Greece), Ioanna Christoyianni (University of Patras, Greece), Evagellos Dermatas (University of Patras, Greece) .................................................. 56

Image, Video and Multimedia Processing

Deep Structured Features for Semantic Segmentation
Michael Tschannen (ETH Zurich, Switzerland), Lukas Cavigelli (ETH Zurich, Switzerland), Fabian Mentzer (ETH Zurich, Switzerland), Thomas Wiatowski (ETH Zurich, Switzerland), Luca Benini (Swiss Federal Institute of Technology (ETH), Switzerland) ........................................................................... 61

3D Point Cloud Segmentation Using a Fully Connected Conditional Random Field
Xiao Lin (Technical University of Catalonia (UPC), Spain), Josep R. Casas (UPC Universitat Politècnica de Catalunya, Spain), Montse Pardas (Universitat Politècnica de Catalunya, Spain) ........................................................................... 66

Concept Detection and Face Pose Estimation Using Lightweight Convolutional Neural Networks for Steering Drone Video Shooting
Nikolaos Passalis (Aristotle University of Thessaloniki, Greece), Anastasios Tefas (Aristotle University of Thessaloniki, Greece) ........................................................................... 71

Detecting Conversational Gaze Aversion Using Unsupervised Learning
Matthew Roddy (Trinity College Dublin, Ireland), Naomi Harte (Trinity College Dublin, Ireland) ........................................................................... 76

Registration of Images to Unorganized 3D Point Clouds Using Contour Cues
Alba Pujol-Miró (Universitat Politècnica de Catalunya, Spain), Javier Ruiz-Hidalgo (Universitat Politècnica de Catalunya, Spain), Josep R. Casas (UPC Universitat Politècnica de Catalunya, Spain) ........................................................................... 81

Spoofing Detection, Speaker Diarization and Recognition

Robust Statistical Processing of TDOA Estimates for Distant Speaker Diarization
Pablo Peso Parada (Nuance Communications, United Kingdom (Great Britain)), Dushyant Sharma (Nuance Communications, USA), Toon van Waterschoot (KU Leuven, Belgium), Patrick A Naylor (Imperial College London, United Kingdom (Great Britain)) ........................................................................... 86
Variants of Mel-frequency Cepstral Coefficients for Improved Whispered Speech Speaker Verification in Mismatched Conditions
Milton Sarria-Paja (INRS-EMT, Canada), Tiago Falk (INRS-EMT, Canada) .................................................. 91

Speaker Verification Anti-Spoofing Using Linear Prediction Residual Phase Features
Cemal Hanlici (Bursa Technical University, Turkey) ......................................................................................... 96

Spoofing Detection Employing Infinite Impulse Response - Constant Q Transform-based Feature Representations
Md. Jahangir Alam (Computer Research Institute of Montreal (CRIM) & École de Technologie Supérieure (ETS), Canada), Patrick Kenny (CRIM, Canada) .................................................. 101

Novel Energy Separation Based Instantaneous Frequency Features for Spoof Speech Detection
Madhu Kamble (DA-IICT, Gandhinagar, Gujarat, India), Hemant A. Patil (Dhirubhai Ambani Institute of Information and Communication Technology, India) .................................................. 106

Signal Processing for Communications

Implementation Aspects of Nonlinear Precoding for G.fast - Coding and Legacy Receivers
Rainer Strobel (Intel Corporation, Germany), Andreas Barthelme (Technische Universität München, Germany), Wolfgang Utschick (Technische Universität München, Germany) .......... 111

Collision Resolution and Interference Elimination in Multiaccess Communication Networks
Naeem Akl (UT Austin, USA), Ahmed Tewfik (University of Texas, Austin, USA) .......................................... 116

Performance Analysis of PLNC Using Hierarchical Modulation
Safaa Nash'at Awny (Newcastle University & Newcastle University, United Kingdom (Great Britain)), Charalampos C. Tsimenidis (Newcastle University, United Kingdom (Great Britain)), Jonathon Chambers (Newcastle University, United Kingdom (Great Britain)), Stephane Le Goff (Newcastle University, United Kingdom (Great Britain)) ........................................ 121

Topology-Aware Space-Time Network Coding
Rodolfo Torrea-Duran (KU Leuven, Belgium), Máximo Morales-Céspedes (Université Catholique de Louvain, Spain), Jorge Plata-Chaves (Katholieke Universiteit Leuven (KU Leuven), Belgium), Luc Vandendorpe (Université catholique de Louvain, Belgium), Marc Moonen (KU Leuven, Belgium) ......................................................................................... 126

Path Planning and Localization for Mobile Anchor Based Wireless Sensor Networks
Ecenaz Erdemir (Middle East Technical University, Turkey), T. Engin Tuncer (Middle East Technical University, Turkey) ........................................................................................................ 131

Signal Processing over Graphs and Networks/Optimization Methods

Online Convex Optimization for Dynamic Network Resource Allocation
Tianyi Chen (University of Minnesota, USA), Qing Ling (University of Science and Technology of China, P.R. China), Georgios B. Giannakis (University of Minnesota, USA) .......... 136

Exact Diffusion Strategy for Optimization by Networked Agents
Kun Yuan (University of California, Los Angeles, USA), Bicheng Ying (University of California, Los Angeles, USA), Xiaochuan Zhao (Qualcomm, USA), Ali H. Sayed (University of California, Los Angeles, USA) ......................................................................................... 141

Network Topology Inference via Elastic Net Structural Equation Models
Panagiotis A. Traganitis (University of Minnesota, USA), Yanning Shen (University of Minnesota, USA), Georgios B. Giannakis (University of Minnesota, USA) .................................................. 146

A Connectedness Constraint for Learning Sparse Graphs
Martin Sundin (KTH Royal Institute of Technology & KTH Royal Institute of Technology, Sweden), Arun Venkitaraman (KTH Royal Institute of Technology Stockholm, Sweden), Magnus Jansson (KTH Royal Institute of Technology, Sweden), Saikat Chatterjee (KTH Royal Institute of Technology & Communication Theory Lab, Sweden) ......................................................................................... 151

A Global Optimization Approach for Rational Sparsity Promoting Criteria
Marc Castella (Institut Mines-Télécom, Télécom SudParis & UMR-CNRS 5157 SAMOVAR, France), Jean-Christophe Pesquet (Center for Visual Computing, CentraleSupelec, France) ........................................................................................................ 156
Statistical Signal Processing

Robust Distributed Multi-Speaker Voice Activity Detection Using Stability Selection for Sparse Non-Negative Feature Extraction
Lala Khadija Hamaidi (Darmstadt University of Technology, Germany), Michael Muma (Darmstadt University of Technology, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) ................................................................. 161

Robust Distributed Sequential Hypothesis Testing for Detecting a Random Signal in Non-Gaussian Noise
Mark Ryan Leonard (Technische Universität Darmstadt, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) ................................................................. 166

Recycling Gibbs Sampling
Luca Martino (University of Helsinki, Finland), Víctor Elvira (IMT Lille Douai, France), Gustau Camps-Valls (University of Valencia, Spain) ................................................................. 171

\( H_{\infty} \) Estimator for Gearbox Diagnosis in Variable Speed Conditions
Amadou Assoumane (University of Orleans, France), Philippe Ravier (Université d’Orléans, France), Cécile Capdessus (Université d’Orléans, France), Édgard Sekko (University of Orleans, France) ................................................................. 176

On the Number of Iterations for the Matching Pursuit Algorithm
Fangyao Li (The University of Auckland, New Zealand), Christopher Triggs (The University of Auckland, New Zealand), Bogdan Dumitrescu (University Politehnica of Bucharest, Romania), Ciprian Doru Giurcaneanu (The University of Auckland, New Zealand) ................................................................. 181

Performance Bounds for Cooperative RSS Emitter Tracking Using Diffusion Particle Filters
Stiven S Dias (Instituto Tecnológico de Aeronáutica (ITA) & Embraer S.A., Brazil), Marcelo Bruno (ITA, Brazil) ................................................................. 186

Deconvolution-Segmentation for Textured Images
Jean-François Giovannelli (IMS, UMR CNRS 52 18, Université Bordeaux 1, France), Cornelia Vacar (FEI Visualization Sciences Group, France) ................................................................. 191

Wheels Coating Process Monitoring in the Presence of Nuisance Parameters Using Sequential Change-Point Detection Method
Karim Tout (Troyes University of Technology, France), Florent Retraint (UTT, France), Rémi Cogranne (Troyes University of Technology - ICD - LM2S - UMR STMR CNRS, France) ................................................................. 196

Group Metropolis Sampling
Luca Martino (University of Helsinki, Finland), Víctor Elvira (IMT Lille Douai, France), Gustau Camps-Valls (University of Valencia, Spain) ................................................................. 201

Global Error Control Procedure for Spatially Structured Targets
Raphael Bacher (Univ Grenoble-Alpes, CNRS, INPG, Gipsa-lab, France), Florent Chatelain (Univ Grenoble-Alpes, CNRS, INPG, Gipsa-lab, France), Olivier Michel (Univ Grenoble-Alpes, CNRS, INPG, Gipsa-lab, France) ................................................................. 206

Event-based Particle Filtering with Point and Set-valued Measurements
Somayeh Davar (Concordia University, Canada), Arash Mohammadi (Concordia University, Canada) ................................................................. 211

Auditory Modeling and Hearing Aids

Non-Intrusive Intelligibility Prediction Using a Codebook-Based Approach
Charlotte Sørensen (Aalborg University & GN Hearing A/S, Denmark), Mathew Shaji Kavalekalam (Aalborg University, Denmark), Angeliki Xenaki (GN Hearing A/S & Scripps Institution of Oceanography, University of California San Diego, Denmark), Jesper Bünslund Boldt (GN Hearing A/S, Denmark), Mads Græsbøll Christensen (Aalborg University, Denmark) ................................................................. 216

New Insights into the Role of the Head Radius in Model-Based Binaural Speaker Localization
Mehdi Zohourian (Ruhr-Universität Bochum, Germany), Rainer Martin (Ruhr-University Bochum, Germany), Nilesh Madhu (NXP Software, Germany) ................................................................. 221

Sparsity Promoting LMS for Adaptive Feedback Cancellation
Ching-Hua Lee (University of California, San Diego, USA), Bhaskar Rao (University of California, San Diego, USA), Harinath Garudadri (University of California, San Diego, USA) ................................................................. 226
Combining Null-Steering and Adaptive Filtering for Acoustic Feedback Cancellation in a Multi-Microphone Earpiece
Henning Schepker (University of Oldenburg, Germany), Linh Tran (Curtin University, Australia), Nordholm Sven (Curtin University of Technology, Australia), Simon Doclo (University of Oldenburg, Germany) 231

A Sparsity-Aware Proportionate Normalized Maximum Correntropy Criterion Algorithm for Sparse System Identification in Non-Gaussian Environment
Yanyan Wang (Harbin Engineering University, P.R. China), Yingsong Li (Harbin Engineering University, P.R. China), Rui Yang (Huazhong Agricultural University, P.R. China) 236

Biomedical Signal and Image Processing

An Unsupervised Bayesian Approach for the Joint Reconstruction and Classification of Cutaneous Reflectance Confocal Microscopy Images
Abdelghafour Halimi (University of Toulouse, ENSEEIHT-IRIT, France), Hadj Batatia (University of Toulouse, France), Jimmy Le Digabel (Pierre Fabre Laboratory, France), Gwendal Josse (Pierre Fabre Laboratory, France), Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France) 241

Hyperparameter Estimation in Maximum a Posteriori Regression Using Group Sparsity with an Application to Brain Imaging
Yousra Bekhti (LTGI, Télécom ParisTech, Université Paris-Saclay, France), Roland Badeau (LTGI, Télécom ParisTech, Université Paris-Saclay, France), Alexandre Gramfort (Institut Mines-Télécom, Télécom ParisTech, CNRS-LTCI & Neurospin CEA Saclay, France) 246

Automatic Atlas-Guided Constrained Random Walker Algorithm for 3D Segmentation of Muscles on Water Magnetic Resonance Images
Faezeh Fallah (University of Stuttgart, Germany), Bin Yang (University of Stuttgart, Germany), Fabian Bamberg (University Clinic of Tuebingen, Germany) 251

RSS-based Respiratory Rate Monitoring Using Periodic Gaussian Processes and Kalman Filtering
Roland Hostettler (Aalto University, Finland), Ossi Kaltiokallio (Aalto University, Finland), Huseyin Yigitler (Aalto University, Finland), Simo Särkkä (Aalto University, Finland), Riku Jäntti (Aalto University, Finland) 256

Recovery of Missing Samples in Fetal Heart Rate Recordings with Gaussian Processes
Guanchao Feng (Stony Brook University, USA), Gerald Quirk (Stony Brook University Hospital, USA), Petar M. Djurić (Stony Brook University, USA) 261

Information Forensics and Security

Malicious Users Discrimination in Organized Attacks Using Structured Sparsity
Mehmet Yamac (Bogazici University, EE Department, Turkey), Buğent Sankur (Bogazici University, Turkey), Ali Taylan Cemgil (Bogazici University, Turkey) 266

Log-Likelihood Score Level Fusion for Improved Cross-Sensor Smartphone Periocular Recognition
Fernando Alonso Fernandez (Halmstad University, Sweden), Kiran B. Raja (Norwegian University of Science and Technology (NTNU), Norway), Christoph Busch (NTNU - Gjøvik, Norway), Josef Bigun (Halmstad University, Sweden) 271

Joint Learning of Local Fingerprint and Content Modulation
Dimche Kostadinov (University of Geneva, Switzerland), Svatoslav Voloshynovskiy (University of Geneva, Switzerland), Sohrab Ferdowsi (University of Geneva, Switzerland) 276

Higher-Order, Adversary-Aware, Double JPEG-Detection via Selected Training on Attacked Samples
Mauro Barni (University of Siena, Italy), Ehsan Nowroozi (University of Siena, Italy), Benedetta Tondi (University of Siena, Italy) 281
Machine Learning for Signal Processing

A Two-Stage Subspace Trust Region Approach for Deep Neural Network Training
Viacheslav Dudar (Taras Shevchenko National University of Kyiv, Ukraine), Giovanni Chierchia (Université Paris Est, France), Emilie Chouzenoux (Université Paris-Est Marne-la-Vallée, France), Jean-Christophe Pesquet (Center for Visual Computing, CentraleSupelec, France), Vladimir Semenov (Taras Shevchenko National University of Kyiv, Ukraine) ................................................................. 291

Active Learning with Cross-Dataset Validation in Event-Based Non-Intrusive Load Monitoring
Florian Liebgott (University of Stuttgart, Germany), Bin Yang (University of Stuttgart, Germany) ................................................................. 296

Time-series Classification Using Neural Bag-of-Features
Nikolaos Passalis (Aristotle University of Thessaloniki, Greece), Avraam Tsantekidis (Aristotle University of Thessaloniki, Greece), Anastasios Tefas (Aristotle University of Thessaloniki, Greece), Juho Kanninen (Tampere University of Technology, Finland), Moncef Gabbouj (Tampere University of Technology, Finland), Alexandros Iosifidis (Tampere University of Technology, Finland) .................................................................................................................. 301

Qualitative Assessment of Recurrent Human Motion
André Ebert (Ludwig Maximilian University of Munich, Germany), Michael Beck (Ludwig Maximilian University of Munich, Germany), Andy Mattausch (LMU Munich, Germany), Lenz Belzner (University of Munich, Germany), Claudia Linnhoff-Popien (University of Munich, Germany) .................................................................................................................. 306

Visualization of Feature Evolution During Convolutional Neural Network Training
Arjun Punjabi (Northwestern University, USA), Aggelos K Katsaggelos (Northwestern University, USA) .................................................................................................................. 311

An Elliptical-Shaped Density-Based Classification Algorithm for Detection of Entangled Clusters
Stanley Smith (Conservatoire National des Arts et Métiers, France), Mylene Pischella (CNAM, France), Michel Terré (CNAM, France) .................................................................................................................. 316

A Post-Nonlinear Mixture Model Approach to Binary Matrix Factorization
Mamadou Diop (University of Lorraine, France), Anthony Larue (CEA, France), Sebastian Miron (CRAN, Université de Lorraine, CNRS, France), David Brie (CRAN, Nancy Université, CNRS, France) .................................................................................................................. 321

Classification of One-Dimensional Non-Stationary Signals Using the Wigner-Ville Distribution in Convolutional Neural Networks
Johan Brynolfsson (Lund University, Sweden), Maria Sandsten (Lund University, Sweden) ................................................................. 326

Spectral Detection and Localization of Radio Events with Learned Convolutional Neural Features
Tim O'Shea (Virginia Tech, USA), Tamogna Roy (Virginia Tech, USA), Tugba Erpek (Virginia Tech, USA) .................................................................................................................. 331

Nonlinear Signal Processing/Signal Processing over Graphs and Networks

Low-Rank and Nonlinear Model Approach to Image Inpainting
Ryohei Sasaki (Tokyo University of Science, Japan), Katsumi Konishi (Kogakuin University, Japan), Tomohiro Takahashi (Tokyo University of Science, Japan), Toshihiro Furukawa (Tokyo University of Science, Japan) .................................................................................................................. 336

Autonomous State Space Models for Recursive Signal Estimation Beyond Least Squares
Nour Zalmai (ETH Zurich, Switzerland), Reto Wildhaber (ETH Zurich, Switzerland), Hans-Andrea Loeliger (ETH Zurich, Switzerland) .................................................................................................................. 341

Characterization of Discrete Linear Shift-Invariant Systems
Michael Clausen (University of Bonn, Germany), Frank Kurth (Fraunhofer FKIE, Germany) ................................................................. 346
## Sensor Array and Multichannel Signal Processing

- **Defending Surveillance Sensor Networks Against Data-Injection Attacks via Trusted Nodes**
  Roberto López-Valcarce (Universidad de Vigo, Spain), Daniel Romero (University of Agder, Norway) .......................................................... 380

- **Channel Estimation and Training Design for Hybrid Multi-Carrier mmWave Massive MIMO Systems: The Beamspace ESPRIT Approach**
  Jianshu Zhang (Ilmenau University of Technology, Germany), Martin Haardt (Ilmenau University of Technology, Germany) .......................................................... 385

- **Modal Beamforming for Small Circular Arrays of Particle Velocity Sensors**
  Berke Gur (Bahcesehir University, Turkey) .......................................................... 390

- **Thinned Coprime Arrays for DOA Estimation**
  Ahsan Raza (University of Sheffield, United Kingdom (Great Britain)), Wei Liu (University of Sheffield, United Kingdom (Great Britain)), Qing Shen (Beijing Institute of Technology, P.R. China) .......................................................... 395

- **Joint Frequency and 2-D DOA Recovery with sub-Nyquist Difference Space-Time Array**
  Achanna Anil Kumar (TCS Innovation Labs, India), Girish Chandra (Tata Consultancy Services, India), P. Balamuralidhar (Tata Consultancy Services, India) .......................................................... 400

## Signal Processing for Communications

- **Filtered Multitone Multicarrier Modulation with Partially Overlapping Sub-Channels**
  Kai Shao (Chongqing University of Posts and Telecommunications (CQUPT), P.R. China), Luping Pi (Chongqing University of Posts and Telecommunications, P.R. China), Juha Yli-Kaakinen (Tampere University of Technology, Finland), Markku K. Renfors (Tampere University of Technology, Finland) .......................................................... 405

- **Low Complexity Channel Shortening for Discrete Multitone Modulation Systems**
  Van Minh Nguyen (Huawei Technologies, France), Stefano Tomasin (University of Padova, Italy) .......................................................... 410

- **An Online Algorithm for Joint Long-Term Base Station Activation and Beamforming in Green Downlink MISO Networks**
  Jingran Lin (University of Electronic Science and Technology of China, P.R. China), Qiang Li (University of Electronic Science and Technology of China, P.R. China), Hongwei Deng (University of Electronic Science and Technology of China, P.R. China) .......................................................... 415
Joint Channel Estimation / Data Detection in MIMO-FBMC/OQAM Systems - A Tensor-Based Approach
Eleftherios Kofidis (University of Piraeus & Computer Technology Institute (CTI), Greece), Christos Chatzichristos (Computer Technology Institute (CTI), Greece), André de Almeida (Federal University of Ceará & Wireless Telecom Research Group - GTEL, Brazil) .............................................. 420

Biomedical Signal and Image Processing

Unmixing Dynamic PET Images with a PALM Algorithm
Yanna Cavalcanti (University of Toulouse, France), Thomas Oberlin (University of Toulouse, France), Nicolas Dobigeon (University of Toulouse, France), Clovis Tauber (UMRS INSERM U930 Université François Rabelais, France) ........................................................................................................................................... 425

Effect of a Humorous Audio-visual Stimulus on Autonomic Nervous System and Heart of Females
Karan Pande (National Institute of Technology, Rourkela, India), Deepanjali Gaur (National Institute of Technology, Rourkela, India), Suraj Kumar Nayak (National Institute of Technology, Rourkela, India), Shankar Patel (Jagnyaseni Hospital, Jharsuguda, India), Arfat Anis (King Saud University, Riyadh, India), Biswajit Mohapatra (Vesaj Patel Hospital, India), Srisendu Sekhar Ray (National Institute of Technology, India), Kunal Pal (National Institute of Technology, Rourkela, India) ........................................................................................................ 430

Triaxial Rehabilitative Data Analysis Incorporating Matching Pursuit
Tracey Lee (Singapore Polytechnic & Monash University, Singapore), Saeid Sanei (University of Surrey, United Kingdom (Great Britain)), Kee Hao Leo (Singapore Polytechnic, Singapore), Effie Chew (National University Hospital, Singapore), Ling Zhao (Senior Therapist, Singapore) .......................................................................................................................... 434

Three-dimensional Fluorescence Lifetime Imaging in Confocal Microscopy of Living Cells
Larisa Baiazitova (Brno University of Technology, Czech Republic), Vratislav Čmiel (Brno University of Technology, Czech Republic), Josef Skopalik (Brno University of Technology, Czech Republic), Ondřej Svoboda (Brno University of Technology, Czech Republic), Ivo Provazník (Brno University of Technology, Czech Republic) ........................................................................................................................................ 439

Characterizing Absence Epileptic Seizures from Depth Cortical Measurements
Saeed Akhavan (GIPSA-LAB, University Grenoble-Alpes, Grenoble, France, Iran), Ronald Phlypo (GIPSA-lab, France), Hamid Soltanian-Zadeh (University of Tehran, Iran), Florian Studer (Grenoble Institut des Neurosciences, France), Antoine Depaulis (Université Joseph Fourier, Grenoble, France), Christian Jutten (GIPSA-Lab, France) .................................................................................................................. 444

Direct Nonparametric Estimation of the Period and the Shape of a Periodic Component in Short Duration Signals
Ali Mohammad-Djafari (Centre National de la Recherche Scientifique (CNRS), France) .......................................................... 449

Investigation of Nonlinear Granger Causality in the Context of Epilepsy
Mahjoub Chahira (National Engineering School of Sfax, Tunisia), Jean Bellanger (Université Rennes 1, France), Sahbi Chaibi (LETI Laboratory, Tunisia), Abdennaceur Kachouri (Laboratoire d'Electronique et des Technologies de l'Information, Tunisia), Régine Le Bouquin Jeannès (University of Rennes 1, France) ............................................................................................................... 454

EEG Seizure Detection by Integrating Slantlet Transform with Sparse Coding
Ali Ibrahim (Florida Atlantic University, USA), Hanqi Zhuang (Florida Atlantic University, USA), Nurgun Erdol (Florida Atlantic University, USA), Ali Muhamed Ali (Florida Atlantic University, USA) .......................................................................................................................... 459

Computational Imaging/Spectral Imaging

High-dimensional Optimization of Color Coded Apertures for Compressive Spectral Cameras
Hoover Rueda (University of Delaware, USA), Henry Arguello Fuentes (Universidad Industrial de Santander, Colombia), Gonzalo Arce (University of Delaware, USA) ........................................................................ 463

Multi-Resolution Reconstruction Algorithm for Compressive Single Pixel Spectral Imaging
Hans Garcia (Universidad Industrial de Santander, Colombia), Claudia Correa-Pugliese (University of Delaware, USA), Ofelia P Villarreal (Universidad Industrial de Santander, Colombia), Samuel Pinilla (Universidad Industrial de Santander, Colombia), Henry Arguello Fuentes (Universidad Industrial de Santander, Colombia) ................................................................................................................... 468
Honey Dataset Standard Using Hyperspectral Imaging for Machine Learning Problems
Ary Noviyanto (The University of Auckland, New Zealand), Waileed H. Abdulla (The University of Auckland, New Zealand) 473

Bayesian Method with Sparsity Enforcing Prior of Dual-Tree Complex Wavelet Transform Coefficients for X-ray CT Image Reconstruction
Li Wang (L2S-UPS, France), Ali Mohammad-Djafari (Centre National de la Recherche Scientifique (CNRS), France), Nicolas Gac (Laboratoire des Signaux et Systèmes (L2S), France) 478

A New Multiplicative Nonnegative Matrix Factorization Method for Unmixing Hyperspectral Images Combined with Multispectral Data
Benkounder Yasmine Kheira (Centre des Techniques Spatiales, Algeria), Moussa Sofiane Karoui (Centre des Techniques Spatiales, Algeria), Yannick Deville (University of Toulouse, France), Shahrzad Hosseini (University of Toulouse / CNRS / IRAP, France) 483

Hyperspectral Image Restoration Based on Spatio-Spectral Structure Tensor Regularization
Ryuji Kurihara (The University of Kitakyushu, Japan), Shunsuke Ono (Tokyo Institute of Technology, Japan), Keiichiro Shirai (Shinshu University Japan, Japan), Masahiro Okuda (The University of Kitakyushu, Japan) 488

Signal and Image Processing Applications

A New Approach to Dictionary-Based Nonnegative Matrix Factorization
Jeremy Cohen (FNRS UMONS, Belgium), Nicolas Gillis (Université Catholique de Louvain, Belgium) 493

Denoising Galaxy Spectra with Coupled Dictionary Learning
Konstantina Fotiadou (Institute of Computer Science, Foundation for Research and Technology & University of Crete, Greece), Grigoris Tsakalakos (FORTH, Greece), Bruno Moraes (University College London, Greece), Filipe Abdalla (University College London & Rhodes University, United Kingdom (Great Britain)), Panagiotis Tsakalides (FORTH-ICS and University of Crete, Greece) 498

Restoration from Multispectral Blurred Data with Non-Stationary Instrument Response
Mohamed El Amine Hadj-Youcef (Université Paris-Sud 11, France), Francois Orieux (Universite Paris-Sud 11, France), Aurelia Fraysse (Universite Paris Sud, France), Alain Abergel (Institut d’Astrophysique Spatiale, France) 503

Landmine Detection from GPR Data Using Convolutional Neural Networks
Silvia Lameri (Politecnico di Milano, Italy), Federico Lombardi (University College London, United Kingdom (Great Britain)), Paolo Bestagini (Politecnico di Milano, Italy), Maurizio Lualdi (Politecnico di Milano, Italy), Stefano Tubaro (Politecnico di Milano, Italy) 508

A Statistical Model of Tristimulus Measurements Within and Between OLED Displays
Matti Raitoharju (Tampere University of Technology, Finland), Samu Kallio (Microsoft Mobile, Finland), Matti Pellikka (Microsoft Mobile, Finland) 513

Automatic Crater Detection and Age Estimation for Mare Regions on the Lunar Surface
Atheer L. Salih (Image Analysis Group, TU Dortmund, Dortmund, Germany), Philipp Schulte (TU Dortmund University, Germany), Arne Grumpe (TU Dortmund University, Germany), Christian Wöhler (Dortmund University of Technology, Germany), Harald Hiesinger (Institut für Planetologie, Westfälische Wilhelms-Universität Münster, Germany) 518

Speech Recognition and Other Speech and Language Technology Topics

Voice Activity Detection Using Discriminative Restricted Boltzmann Machines
Rogério Borin (University of São Paulo, Brazil), Magno T. M. Silva (University of São Paulo, Brazil) 523

Class Specific GMM Based Sparse Feature for Speech Units Classification
Pulkit Sharma (IIT Mandi, India), Vinayak Abrol (IIT MANDI, INDIA, India), Dileep Aroor Dinesh (Indian Institute of Technology Mandi (IIT Mandi), India), Anil Kumar Sao (IIT Mandi, India) 528
Comparison of I-vector and GMM-UBM Approaches to Speaker Identification with TIMIT and NIST 2008 Databases in Challenging Environments

Musab T. S. Al-Kaltakchi (Newcastle University, United Kingdom (Great Britain)), Wai Lok Woo (Newcastle University, United Kingdom (Great Britain)), Satnam Dlay (University of Newcastle, United Kingdom (Great Britain)), Jonathon Chambers (Newcastle University, United Kingdom (Great Britain)) 533

Low Resource Point Process Models for Keyword Spotting Using Unsupervised Online Learning

Samik Sadhu (Indian Institute of Science, India), Prasanta Kumar Ghosh (Indian Institute of Science, India) 538

Residual Neural Networks for Speech Recognition

Hari Vydana (IIIT HYDERABAD, India), Anil Kumar Vuppala (International Institute of Information Technology Hyderabad, India) 543

A Curriculum Learning Method for Improved Noise Robustness in Automatic Speech Recognition

Stefan Braun (University of Zurich and ETH Zurich, Switzerland), Daniel Neil (University of Zurich and ETH Zurich, Switzerland), Shih-Chii Liu (University of Zurich and ETH Zurich, Switzerland) 548

A Reassigned Front-End for Speech Recognition

Georgina Tryfou (Fondazione Bruno Kessler & University of Trento, Italy), Maurizio Omologo (Fondazione Bruno Kessler - ist, Italy) 553

On the Improvement of Modulation Features Using Multi-Microphone Energy Tracking for Robust Distant Speech Recognition

Isidoros Rodomagoulakis (National Technical University of Athens, Greece), Petros Maragos (National Technical University of Athens, Greece) 558

VTLN-Warped Gaussian Posteriorgram for QbE-STD

Maulik C. Madhavi (Dhirubhai Ambani Institute of Information and Communication Technology, Gandhinagar, India), Hemant A. Patil (Dhirubhai Ambani Institute of Information and Communication Technology, India) 563

Context Incorporation Using Context - Aware Language Features

Aggeliki Vlachostergiou (National Technical University of Athens, Greece), George Marandianos (National Technical University of Athens, Greece), Stefanos Kollias (University of Lincoln/NTUA, United Kingdom (Great Britain)) 568

Effectiveness of Ideal Ratio Mask for Non-intrusive Quality Assessment of Noise Suppressed Speech

Meet Soni (Dhirubhai Ambani Institute of Information and Communication Technology, India), Hemant A. Patil (Dhirubhai Ambani Institute of Information and Communication Technology, India) 573

Perception and Production of L2 Mandarin Tones by Swedish Learners

Yasuko Nagano-Madsen (University of Gothenburg, Sweden), Xinzheng Wan (Uppsala University, Sweden) 578

Special Session on Acoustical Signal Processing for Hearables

Decorrelation Measures for Stabilizing Adaptive Feedback Cancellation in Hearing Aids

Henning Puder (Sivantos GmbH & Sivantos GmbH, Germany), Falco Strasser (Darmstadt University of Technology, Germany) 583

Real Time Noise Suppression in Social Settings Comprising a Mixture of Non-stationary and Transient Noise

Pei Chee Yong (Curtin University, Australia), Nordholm Sven (Curtin University, Australia) 588

Time-Domain Kalman Filter for Active Noise Cancellation Headphones

Stefan Liebich (RWTH Aachen & Institute for Communication Systems, Germany), Johannes Fabry (RWTH Aachen & Institute for Communication Systems, Germany), Peter Jax (RWTH Aachen University, Germany), Peter Vary (RWTH Aachen, Germany) 593

Binaural Speech Enhancement with Spatial Cue Preservation Utilising Simultaneous Masking

Andreas Koutrouvelis (Delft University of Technology, The Netherlands), Jesper Jensen (Oticon, Denmark), Meng Guo (Oticon A/S, Denmark), Richard Hendriks (Delft University of Technology, The Netherlands), Richard Heusdens (Delft University of Technology, The Netherlands) 598
Sensitivity Analysis of the Multi-Frame MVDR Filter for Single-Microphone Speech Enhancement
Dörte Fischer (University of Oldenburg, Germany), Simon Doclo (University of Oldenburg, Germany) ................................................................. 603

Real-Time Adaptive Equalization for Headphone Listening
Juho Liski (Aalto University School of Electrical Engineering, Finland), Vesa Valimaki (Aalto University, Finland), Sampo Vesa (Nokia, Finland), Riitta Väänänen (Nokia, Finland) ................. 608

Special Session on Signal Processing Challenges in 5G Mobile Communications

Throughput-Based Performance Evaluation of 5G-Candidate Waveforms in High Speed Scenarios
Tomás Domínguez-Bolaño (University of A Coruña, Spain), José Rodríguez-Piñeiro (University of A Coruña, Spain), José A. García-Naya (University of A Coruña, Spain), Luis Castedo (University of A Coruña, Spain) .................................................... 613

Analysis of the Performance of a Non-Coherent Large Scale SIMO System Based on M-DPSK Under Rician Fading
Victor Monzon (Universidad Carlos III de Madrid, Spain), Ana García Armada (Universidad Carlos III de Madrid, Spain) ................................................................. 618

A Mutual Coupling Model for Massive MIMO Applied to the 3GPP 3D Channel Model
Stefan Pratschner (TU Wien, Austria), Sebastian Caban (Vienna University of Technology, Austria), Stefan Schwarz (TU Wien, Austria), Markus Rupp (TU Wien, Austria) ................................................................. 623

Covariance Estimation with Projected Data: Applications to CSI Covariance Acquisition and Tracking
Alexis Decurninge (Huawei Technologies, France), Maxime Guillaud (Huawei Technologies, Mathematical and Algorithmic Sciences Lab, France) ................................................................. 628

Sensor-based Predictive Communication for Highly Dynamic Multi-Hop Vehicular Networks
Roman Alieiev (Volkswagen AG, Germany), Jiri Blumenstein (Brno University of Technology, Czech Republic), Roman Marsalek (Brno University of Technology, Czech Republic), Thorsten Hehn (Volkswagen, Germany), Andreas Kwoczek (Volkswagen AG, Germany), Thomas Kürner (Technische Universität Braunschweig, Germany) ................................................................. 633

A Study on the Physical Layer Performance of GFDM for High Throughput Wireless Communication
Ahmad Nimr (Dresden University of Technology, Germany), Dan Zhang (Technische Universität Dresden, Germany), Ana Belen Martinez (Technische Universität Dresden, Germany), Gerhard Fettweis (Technische Universität Dresden, Germany) ................................................................. 638

Special Session on Advanced Tensor Methods for Big Data Processing

ACMTF for Fusion of Multi-Modal Neuroimaging Data and Identification of Biomarkers
Evrim Acar (University of Copenhagen, Denmark), Yuri Levin-Schwartz (University of Maryland, Baltimore County, USA), Vince Calhoun (University of New Mexico, USA), Tulay Adali (University of Maryland, Baltimore County, USA) ................................................................................................................................. 643

Tensor-Based Sparsity Order Estimation for Big Data Applications
Kefei Liu (Indiana University School of Medicine, USA), Florian Roemer (Ilmenau University of Technology, Germany), João Paulo Carvalho Lustosa da Costa (Universidade de Brasilia (UnB), Brazil), Jie Xiong (University of Electronic Science and Technology of China, P.R. China), Yisheng Yan (University of Electronic Science and Technology of China, P.R. China), Wen-Qin Wang (University of Electronic Science and Technology of China, P.R. China), Giovanni Del Galdo (Fraunhofer Institute for Integrated Circuits IIS & Technische Universität Ilmenau, Germany) ................................................................................................................................. 648

A Novel Non-Iterative Algorithm for Low-Multilinear-Rank Tensor Approximation
José Henrique de Morais Goulart (Gipsa-Lab, CNRS, University Grenoble Alpes, France), Pierre Comon (CNRS, University Grenoble Alpes, France) ................................................................................................................................. 653

Large Deviation Analysis of the CPD Detection Problem Based on Random Tensor Theory
Rémy Boyer (Université Paris-Sud (UPS), CNRS, CentraleSupelec, France), Philippe Loubaton (Université de Marne La Vallée, France) ................................................................................................................................. 658
### Modeling, Analysis, and Synthesis of Acoustic Environments

**Synthesis of a Spatially Band-Limited Plane Wave in the Time-Domain Using Wave Field Synthesis**  
Nara Hahn (University of Rostock, Germany), Fiete Winter (University of Rostock, Germany), Sascha Spors (University of Rostock, Germany)  
673

**Sparse Parametric Modeling of the Early Part of Acoustic Impulse Responses**  
Constantinos Papayiannis (Imperial College London, United Kingdom (Great Britain)), Christine Evers (Imperial College London, United Kingdom (Great Britain)), Patrick A Naylor (Imperial College London, United Kingdom (Great Britain))  
678

**An Image-Inspired Audio Sharpness Index**  
Gael Mahé (Université Paris Descartes, France), Lionel Moisan (Université Paris Descartes, France), Mihai Petru Mitrea (Institut Telecom - Telecom SudParis, France)  
683

**Time-Domain Realisation of Model-Based Rendering for 2.5D Local Wave Field Synthesis Using Spatial Bandwidth-Limitation**  
Fiete Winter (University of Rostock, Germany), Nara Hahn (University of Rostock, Germany), Sascha Spors (University of Rostock, Germany)  
688

**Investigation of Electric Network Frequency for Synchronization of Low Cost and Wireless Sound Cards**  
Oleg Golokolenko (Ilmenau University of Technology, Germany), Gerald Schuller (Ilmenau University of Technology & Fraunhofer Institute for Digital Media Technology, Germany)  
693

**Optimizing Acoustic Feature Extractor for Anomalous Sound Detection Based on Neyman-Pearson Lemma**  
Yuma Koizumi (Nippon Telegraph and Telephone Corporation & NTT Media Intelligence Laboratories, Japan), Shoichiro Saito (NTT Media Intelligence Laboratories, Japan), Hisashi Uematsu (Nippon Telegraph and Telephone Corporation, Japan), Noboru Harada (NTT Communication Science Labs., Japan)  
698

### Sparse Representations in Signal/Image Processing and Imaging

**Joint Active Device Identification and Symbol Detection Using Sparse Constraints in Massive MIMO Systems**  
Ganapati Hegde (TU Darmstadt, Germany), Marius Pesavento (Technische Universität Darmstadt & Merckstr. 25, Germany), Marc Pfetsch (Technische Universität Darmstadt, Germany)  
703

**Restoration of Multilayered Single-Photon 3D LiDAR Images**  
Abderrahim Halimi (Heriot-Watt University, United Kingdom (Great Britain)), Rachael Tobin (Heriot-Watt University, United Kingdom (Great Britain)), Aongus McCarthy (Heriot Watt University, United Kingdom (Great Britain)), Steve McLaughlin (Heriot Watt University, United Kingdom (Great Britain)), Gerald Buller (Heriot-Watt University, United Kingdom (Great Britain))  
708

**Sparse Reconstruction Algorithms for Nonlinear Microwave Imaging**  
Hidayet Zaimaga (Laboratoire des Signaux et Systèmes (L2S), CentraleSupélec, France), Aurelia Fraysse (Université Paris Sud, France), Marc Lambert (GeePs- Group of Electrical Engineering, France)  
713

**Complex Domain Nonlocal Block-Matching Denoising Based on High-Order Singular Value Decomposition (HOSVD)**  
Vladimir Katkovnik (Tampere University of Technology, Finland), Mykola Ponomarenko (Tampere University of Technology, Finland), Karen Egiazarian (Tampere University of Technology, Finland)  
718
Learning Fast Sparsifying Overcomplete Dictionaries
Cristian Rusu (University of Edinburgh, United Kingdom (Great Britain)), John Thompson (University of Edinburgh, United Kingdom (Great Britain)) .................................................. 723

Spatio-Spectro-Temporal Coded Aperture Design for Multiresolution Compressive Spectral Video Sensing
Kareth León (Universidad Industrial de Santander, Colombia), Laura Galvis (University of Delaware, USA), Henry Arguello Fuentes (Universidad Industrial de Santander, Colombia) ...... 728

Image, Video and Multimedia Processing

Weighted MSE Based Spatially Adaptive BM3D
Mykola Ponomarenko (Tampere University of Technology, Finland), Marina Pismenskova (Tampere University of Technology, Finland), Karen Egiazarian (Tampere University of Technology, Finland) ................................................................. 733

EMOEEG: a New Multimodal Dataset for Dynamic EEG-based Emotion Recognition with Audiovisual Elicitation
Anne-Claire Conneau (Institut Mines-Telecom/Telecom ParisTech & CNRS-LTCI, France), Ayoub Hajlaoui (Université Pierre et Marie Curie & ISIR, France), Mohamed Chetouani (Institut des Systèmes Intelligents et de Robotique, France), Slim Essid (Telecom ParisTech & CNRS-LTCI, France) ........................................................................................................................................... 738

Human Crowd Detection for Drone Flight Safety Using Convolutional Neural Networks
Maria Tzelepi (Aristotle University of Thessaloniki, Greece), Anastasios Tefas (Aristotle University of Thessaloniki, Greece) ........................................................................................................ 743

Learning Local Feature Aggregation Functions with Backpropagation
Angelos Katharopoulos (Aristotle University of Thessaloniki, Greece), Despoina Paschalidou (Aristotle University of Thessaloniki, Greece), Christos Diou (Aristotle University of Thessaloniki, Greece), Anastasios Delopoulos (Aristotle University of Thessaloniki, Greece) ........................................................................................................................................ 748

User Adaptation of Convolutional Neural Network for Human Activity Recognition
Shinya Matsui (Asahi Kasei Corporation, Japan), Nakamasa Inoue (Tokyo Institute of Technology, Japan), Yuko Akagi (Asahi Kasei Corporation, Japan), Goshu Nagino (Asahi Kasei Corporation, Japan), Koichi Shinoda (Tokyo Institute of Technology, Japan) .................................................. 753

Semi-Unsupervised Bayesian Convex Image Restoration with Location Mixture of Gaussian
François Orieux (Université Paris-Sud 11 & Université Paris-Saclay, France), Raphael Chinchilla (Université Paris-Saclay, France) .................................................................................................................. 758

Graph-Based Interpolation for Zooming in 3D Scenes
Pinar Akyazi (Ecole Polytechnique Fédérale de Lausanne, Switzerland), Pascal Frossard (EPFL, Switzerland) .................................................................................................................. 763

A Multi-Objective Optimization for Video Orchestration
Federico Colangelo (Roma Tre University, Italy), Federica Battisti (Università degli Studi Roma Tre, Italy), Marco Carli (Università degli Studi Roma TRE, Italy), Alessandro Neri (University of ROMA TRE, Italy) ........................................................................................................................................ 768

Person Identity Recognition on Motion Capture Data Using Label Propagation
Nikos Nikolaidis (Aristotle University of Thessaloniki, Greece), Charalambos Symeonidis (Aristotle University of Thessaloniki, Greece) .................................................................................................. 773

Oriented Asymmetric Kernels for Corner Detection
Hasan Abdulrahman (University of Montpellier, France), Baptiste Magnier (Ales School of Mines, France), Philippe Montesinos (Ecole des Mines DAlès, France) ................................................... 778

Expression Recognition for Severely Demented Patients in Music Reminiscence-Therapy
Antitza Dantcheva (INRIA, France), Piotr Bilinski (University of Oxford, United Kingdom (Great Britain)), Hung Thanh Nguyen (INRIA, France), Jean Claude Brouart (Igam Faculty of MEDICINE of NICE, GSF JL Noisiez FONDATION, France), Francois Bremond (INRIA Institute for Research in Computer Science and Automation, France) ................................................................................................................. 783

Local Frame Match Distance: A Novel Approach for Exemplar Gesture Recognition
Radu Tudor Ionescu (University of Bucharest, Romania), Marius Popescu (University of Bucharest, Romania), Christopher Conly (University of Texas at Arlington, USA), Vassilis Athitsos (University of Texas at Arlington, USA) .................................................................................................................... 788
Graph Scaling Cut with L1-Norm for Classification of Hyperspectral Images
Ramanarayan Mohanty (Indian Institute of Technology Kharagpur & IIT Kharagpur, India), S L Happy (Indian Institute of Technology, Kharagpur, India), Aurobinda Routray (Indian Institute of Technology Kharagpur, India) ................................................................. 793

CNN-Based Transform Index Prediction in Multiple Transforms Framework to Assist Entropy Coding
Saurabh Puri (University of Nantes & Technicolor, France), Sebastien Lasserre (Technicolor, France), Patrick Le Callet (Université de Nantes, France) ................................................................. 798

Convolutional Neural Network-Based Infrared Image Super Resolution Under Low Light Environment
Tae Young Han (Inha University, Korea), Yong Jun Kim (Inha University, Korea), Byung Cheol Song (Inha University, Korea) ................................................................. 803

A Novel Global Image Description Approach for Long Term Vehicle Localization
Fabien Bonardi (LITIS LAB, France), Samia Ainouz-Zemmouche (INSA de ROUEN & LITIS Lab, France), Pascal Vasseur (Université de Rouen & LITIS INSA de Rouen, France), Rémi Boutteau (ESIGELEC, France), Xavier Savatier (IRSEEM, France), Yohan Dupuis (CEREMA, France) ........................................................................................................... 808

A Normalized Mirrored Correlation Measure for Data Symmetry Detection
Fabrizio Guerrini (University of Brescia, Italy), Riccardo Leonardi (University of Brescia, Italy), Alessandro Gnutti (University of Brescia, Italy) ........................................................................................................... 813

Machine Learning for Signal Processing

Variational Stabilized Linear Forgetting in State-Space Models
Thijs van de Laar (Eindhoven University of Technology, The Netherlands), Marco Cox (Eindhoven University of Technology, The Netherlands), Anouk van Diepen (Eindhoven University of Technology, The Netherlands), Bert de Vries (Eindhoven University of Technology, The Netherlands) ........................................................................................................... 818

Probabilistic Cross-Validation Estimators for Gaussian Process Regression
Luca Martino (University of Helsinki, Finland), Valero Laparra (Universidad de Valencia, Spain), Gustau Camps-Valls (University of Valencia, Spain) ........................................................................................................... 823

Evaluating the RBM Without Integration Using PDF Projection
Paul M Baggenstoss (Fraunhofer FKIE, Germany) ........................................................................................................... 828

Data Subset Selection for Efficient SVM Training
Sara Mourad (The University of Texas at Austin, USA), Ahmed Tewfik (University of Texas, Austin, USA), Haris Vikalo (The University of Texas at Austin, USA) ........................................................................................................... 833

Unsupervised Feature Extraction, Signal Labeling, and Blind Signal Separation in a State Space World
Nour Zalmai (ETH Zurich, Switzerland), Raphael Keusch (ETH Zurich, Switzerland), Hampus Malmberg (ETH Zurich, Switzerland), Hans-Andrea Loeliger (ETH Zurich, Switzerland) ........................................................................................................... 838

Clustering and Causality Inference Using Algorithmic Complexity
Marion Revolle (GIPSA-Lab, France), Francois Cayre (Gipsa-Lab, INP Grenoble, France), Nicolas Le Bihan (GIPSA-Lab, CNRS, France) ........................................................................................................... 843

Signal Processing for Communications/Challenges in 5G Mobile Communications

Unsupervised Time Domain Nonlinear Post-Equalization for ACO-OFDM Visible Light Communication Systems
Flávio Ávila (UERJ, Brazil), Lisandro Lovisolo (Universidade do Estado do Rio de Janeiro & PROSAICO, Brazil) ........................................................................................................... 848

Optimized Block-Diagonalization Precoding Technique Using Givens Rotations QR Decomposition
Victor Cramariu (NXP Semiconductors & Politehnica University of Bucharest, Romania), Marius Arvinte (NXP Semiconductors, Romania), Andrei Enescu (NXP Semiconductors, Romania), Silviu Ciocchina (University Politehnica of Bucharest, Romania) ........................................................................................................... 853
On Differential Modulation in Downlink Multiuser MIMO Systems
Fahad Alsifiany (Newcastle University, United Kingdom (Great Britain)), Aissa Ikhlef (Durham University, United Kingdom (Great Britain)), Jonathon Chambers (Newcastle University, United Kingdom (Great Britain)) .......................................................... 858

Precoding Under Instantaneous Per-Antenna Peak Power Constraint
Hela Jedda (Technische Universität München, Germany), Amine Mezghani (University of California, Irvine, USA), Lee Swindlehurst (University of California at Irvine, USA), Josef A. Nossek (TU Munich, Germany & Federal University of Ceara, Fortaleza, Brazil) .................. 863

Joint Carrier Frequency Offset and Channel Impulse Response Estimation for Linear Periodic Channels
Roee Shaked (Ben-Gurion University of the Negev, Israel), Nir Shlezinger (Ben Gurion University, Israel), Ron Dabora (Ben-Gurion University, Israel) .......................................................... 868

Low-Complexity Detection Based on Landweber Method in the Uplink of Massive MIMO Systems
Wence Zhang (Jiangsu University, P.R. China), Xu Bao (Jiangsu University, P.R. China), Jisheng Dai (Jiangsu University, P.R. China) .......................................................... 873

Adaptive Zero Padded CB-FMT for LTE Uplink Transmission in the High Mobility Scenario
Mauro Girotto (University of Udine, Italy), Andrea M Tonello (University of Klagenfurt & WiTekee srl, Austria) .......................................................... 878

Low Complexity Hybrid Precoding in Finite Dimensional Channel for Massive MIMO Systems
Yulong Chen (Newcastle University, United Kingdom (Great Britain)), Said Boussakta (Newcastle University, United Kingdom (Great Britain)), Charalampos C. Tsimenidis (Newcastle University, United Kingdom (Great Britain)), Jonathon Chambers (Newcastle University, United Kingdom (Great Britain)), Shi Jin (Southeast University, P.R. China) .... 883

Inter-Carrier Interference of Multiple Access UFMC with Flexible Subcarrier Spacings
Ljiljana Marijanovic (Technische Universität Wien, Austria), Stefan Schwarz (TU Wien, Austria), Markus Rupp (TU Wien, Austria) .......................................................... 888

Highly Efficient Representation of Reconfigurable Code Based on a Radio Virtual Machine: Optimization to Any Target Platform
Vladimir Ivanov (St. Petersburg State University of Aerospace Instrumentation, Russia), Yong Jin (Hanyang University, Korea), SeungWon Choi (Hanyang University, Korea), Giuseppe Destino (University of Oulu, Finland), Markus Dominik Mueck (Intel Deutschland GmbH, Germany), Valerio Frascolla (Intel Deutschland GmbH, Germany) ......................... 893

Reconfiguration of 5G Radio Interface for Positioning and Communication
Jani Saloranta (University of Oulu, Finland), Giuseppe Destino (University of Oulu, Finland) .......................................................... 898

Adaptive Automotive Communications Solutions of 10 Years Lifetime Enabled by ETSI RRS Software Reconfiguration Technology
Yong Jin (Hanyang University, Korea), Heungseop Ahn (Hanyang University, Korea), KyungHo Kim (Hanyang University, Korea), SeungWon Choi (Hanyang University, Korea), Markus Dominik Mueck (Intel Deutschland GmbH, Germany), Valerio Frascolla (Intel Deutschland GmbH, Germany), Thomas Haustein (Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut, Germany) .......................................................... 903

Signal Processing Theory and Methods

The Scaled Reassigned Spectrogram Adapted for Detection and Localisation of Transient Signals
Isabella Reinhold (Lund University, Sweden), Josefin Starkhammar (Lund University, Sweden), Maria Sandsten (Lund University, Sweden) .......................................................... 907

Designing Optimal Sampling Schemes
Johan Svärd (Lund University, Sweden), Filip Elvander (Lund University, Sweden), Andreas Jakobsson (Lund University, Sweden) .......................................................... 912

Sub-band Equalization Filter Design for Improving Dynamic Range Performance of Modulated Wideband Converter
Yasar Kemal Alp (ASELSAN Inc., Turkey), Gokhan Gok (Hacettepe University, Turkey), Ali Bugra Korucu (ASELSAN Inc., Turkey) .......................................................... 917

Non-iterative Filter Bank Phase (Re)Construction
Zdeněk Průša (Austrian Academy of Sciences, Austria), Nicki Holighaus (Austrian Academy of Sciences, Austria) .......................................................... 922
A Closed-Form Transfer Function of 2-D Maximally Flat Half-Band FIR Digital Filters with Arbitrary Filter Orders
Taiki Shinohara (Tokyo University of Science, Japan), Takashi Yoshida (Tokyo University of Science, Japan), Naoyuki Aikawa (Tokyo University of Science, Japan) ........................................... 927

Co-Prime Arrays and Difference Set Analysis
Usham Dias (Indian Institute of Technology Delhi, India), Seshan Srirangarajan (Indian Institute of Technology Delhi, India) ................................................................. 931

Special Session on Biometrics and Privacy Protection

Gait Recognition Using Normalized Shadows
Tanmay Verlekar (Instituto Superior Técnico Instituto de Telecomunicações, Portugal), Paulo Lobato Correia (Instituto Superior Tecnico - Universidade Tecnica Lisboa & Instituto de Telecomunicacoes, Portugal), Luis Ducla Soares (I.S.C.T.E. / I.T. - Lisbon, Portugal) .............. 936

Biometric Symmetry: Implications on Template Protection
Marta Gomez-Barrero (Hochschule Darmstadt, Germany), Christian Rathgeb (Hochschule Darmstadt, Germany), Kiran B. Raja (NTNU, Gjøvik, Norway, Norway), Raghavendra Ramachandra (NTNU, Gjøvik, Norway, Norway), Christoph Busch (Hochschule Darmstadt, Germany) ................................................................. 941

ASePPI, an Adaptive Scrambling Enabling Privacy Protection and Intelligibility in H.264/AVC
Natacha Ruchaud (Eurecom, France), Jean Luc Dugelay (Eurecom, France) .................................................. 946

Visually Evoked Potential for EEG Biometrics Using Convolutional Neural Network
Rig Das (Roma Tre University, Italy), Emanuele Maiorana (Roma Tre University, Italy), Patrizio Campisi (Università degli Studi Roma Tre, Italy) .................................................. 951

Private Authentication Keys Based on Wearable Device EEG Recordings
Hongxu Yang (Eindhoven University of Technology, The Netherlands), Vojkan Mihajlovic (Holst Centre & IMEC, The Netherlands), Tanya Ignatenko (Eindhoven University of Technology, The Netherlands) .................................................................................. 956

Privacy-Safe Linkage Analysis with Homomorphic Encryption
Chibuike Ugwuoke (Delft University of Technology, The Netherlands), Zeki Erkin (Delft University of Technology, The Netherlands), R. (Inald) L. Lagendijk (Delft University of Technology, The Netherlands) .................................................................................. 961

Music Signal Processing

End-to-End Musical Key Estimation Using a Convolutional Neural Network
Filip Korzeniowski (Johannes Kepler University Linz, Austria), Gerhard Widmer (Johannes Kepler University Linz, Austria) .................................................................................. 966

A Model for Music Complexity Applied to Music Preprocessing for Cochlear Implants
Wim Buyens (Cochlear Technology Centre Belgium & Katholieke Universiteit Leuven, Belgium), Marc Moonen (KU Leuven, Belgium), Jan Wouters (Katholieke Universiteit Leuven, Belgium), Bas van Dijk (Cochlear Technology Centre Belgium, Belgium) .................................................................................. 971

Phase Vocoder Done Right
Zdeněk Průša (Austrian Academy of Sciences, Austria), Nicki Holighaus (Austrian Academy of Sciences, Austria) .................................................................................. 976

Stereophonic Music Separation Based on Non-negative Tensor Factorization with Cepstrum Regularization
Shogo Seki (Nagoya University, Japan), Tomoki Toda (Nagoya University, Japan), Kazuya Takeda (Nagoya University, Japan) .................................................................................. 981

Design and implementation of SP Systems/SP for Power Systems

An Optimized Embedded Target Detection System Using Acoustic and Seismic Sensors
Kyunghun Lee (University of Maryland, USA), Benjamin Riggan (US Army Research Laboratory, USA), Shuvra Bhattacharyya (University of Maryland, USA) .................................................................................. 986
A Nonuniform Quantization Scheme for High Speed SAR ADC Architecture
Youngchun Kim (The University of Texas at Austin & Intersil Communications LLC, USA), Wenjuan Guo (Intel, USA), Ahmed Tewfik (University of Texas, Austin, USA) .......................................... 991

Impact of Temporal Subsampling on Accuracy and Performance in Practical Video Classification
Florian Scheidegger (IBM Research Zurich & ETH Zurich, Switzerland), Lukas Cavigelli (ETH Zurich, Switzerland), Michael Schaffner (ETH Zurich, Switzerland), A. Cristiano I. Malossi (IBM Research - Zurich, Switzerland), Costas Bekas (IBM Research Laboratory, Switzerland), Luca Benini (Swiss Federal Institute of Technology (ETH), Switzerland) ................................................................. 996

An Adaptive Clarke Transform Based Estimator for the Frequency of Balanced and Unbalanced Three-Phase Power Systems
Elias Aboutanios (University of New South Wales, Australia) ...................................................................... 1001

Motor Parameters Estimation from Industrial Electrical Measurements
Daniele Angelosante (ABB Corporate Research Center, Switzerland), Lorenzo Mario Fagiano (Politecnico di Milano, Italy), Enrico Ragaini (ABB, Italy), Fabio Grasso (Politecnico di Milano, Italy) ........................................................................ 1006

Image, Video and Multimedia Processing

Improvement of HEVC Inter-coding Mode Using Multiple Transforms
Pierrick Philippe (Orange Labs, France), Thibaud Biatek (TDF, France), Victorien Lorcy (IRT bcom, France) ................................................................. 1011

Trapezoidal Block Split Using Orthogonal C2 Transforms for HEVC Video Coding
Itsik Dvir (Huawei Technologies Co., Ltd., Israel), Amiram Allouche (Huawei Technologies Co., Ltd., Israel), David Drezen (Huawei Technologies Co., Ltd, Israel), Ady Ecker (Huawei Technologies Co., Ltd, Israel), Dror Irony (Huawei Technologies Co., Ltd, Israel), Nathan Peterfreund (Huawei Technologies Co., Ltd, Israel), Haitao Yang (Huawei Technologies Co., Ltd, P.R. China), Jiantong Zhou (Huawei, USA) ................................................................. 1016

Depth Modeling Modes Complexity Control System for the 3D-HEVC Video Encoder
Gustavo Sanchez (PUCRS, Brazil), Mário Saldanha (UFPEL, Brazil), Luciano Agostini (Federal University of Pelotas, Brazil), César Marcon (PUCRS - Pontifícia Universidade Católica do Rio Grande do Sul, Brazil) ................................................................. 1021

Reducing Computational Complexity in HEVC Decoder for Mobile Energy Saving
Naty Sidaty (IETR - INSA Rennes, France), Julien Heulot (IETR, INSA Rennes & CNRS UMR 6164, UEB, France), Wassim Hamidouche (IETR-INSa Rennes, France), Maxime Pelcat (IETR/INSa Rennes - Institut Pascal, France), Daniel Menard (UEB/INSa Rennes/ IETR, France) ........................................................................ 1026

Complexity Reduction of 3D-HEVC Based on Depth Analysis for Background and ROI Classification
Giovanni Avila (Federal University of Pelotas, Brazil), Ruhan Concejão (Federal University of Pelotas, Brazil), Thiago Bubolz (Federal University of Pelotas, Brazil), Bruno Zatt (Federal University of Pelotas, Brazil), Marcelo Porto (Federal University of Pelotas, Brazil), Luciano Agostini (Federal University of Pelotas, Brazil), Guilherme Correa (Federal University of Pelotas, Brazil) ........................................................................ 1031

Machine Learning and Optimization Methods

Airfare Prices Prediction Using Machine Learning Techniques
Konstantinos Tziridis (Eastern Macedonia and Thrace Institute of Technology, Greece), Theoanis Kalampokas (Eastern Macedonia and Thrace Institute of Technology, Greece), George A Papakostas (Eastern Macedonia and Thrace Institute of Technology (EMaTTech), Greece), Konstantinos Diamantaras (TEI of Thessaloniki, Greece) ................................................................. 1036

Hand Gesture Recognition Using Machine Learning and the Myo Armband
Marco E. Benalcázar (Escuela Politécnica Nacional, Ecuador), Andres Gabriel Jaramillo (Escuela Politécnica Nacional, Ecuador), Jonathan Zea (Escuela Politécnica Nacional, Ecuador), Andrés Páez (Escuela Politécnica Nacional, Ecuador), Víctor H. Andaluz (Universidad de las Fuerzas Armadas ESPE, Ecuador) ........................................................................ 1040
Multimodal Detection of Fake Social Media Use Through a Fusion of Classification and Pairwise Ranking Systems
Taruna Agrawal (Signal Analysis and Interpretation Lab, University of Southern California, USA), Rahul Gupta (Amazon.com, USA), Shrikanth Narayanan (University of Southern California, USA) ................................................................. 1045

Boosted Multiple Kernel Learning for First-Person Activity Recognition
Fatih Ozkan (Middle East Technical University, Turkey), Mehmet Arabaci (Middle East Technical University, Turkey), Elif Surer (Middle East Technical University, Turkey), Alptekin Temizel (Middle East Technical University, Turkey & University of Birmingham, United Kingdom (Great Britain)) ................................................................. 1050

Precoder Design in User-Centric Virtual Cell Networks
Jianfeng Shi (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China), Wence Zhang (Jiangsu University, P.R. China), Zhaohui Yang (Southeast University, P.R. China), Hao Xu (Southeast University, P.R. China) ................................................................. 1055

A Sequential Constraint Relaxation Algorithm for Rank-One Constrained Problems
Pan Cao (University of Edinburgh, United Kingdom (Great Britain)), John Thompson (University of Edinburgh, United Kingdom (Great Britain)), H. Vincent Poor (Princeton University, USA) ................................................................. 1060

A Primal-Dual Line Search Method and Applications in Image Processing
Pantelis Sopasakis (KU Leuven, Belgium), Andreas Themelis (KU Leuven, Belgium), Panagiotis Patrinos (KU Leuven, Belgium) ................................................................. 1065

Bayesian Framework for Mobility Pattern Discovery Using Mobile Network Events
Somayeh Danafar (Zurich University of Applied Sciences, Switzerland, Switzerland), Michal Piorkowski (Swisscom SA, Switzerland, Switzerland), Krzysztof Kryszczuk (Zurich University of Applied Sciences, Switzerland, Switzerland) ................................................................. 1070

Signal Processing Theory and Methods

Radar Detection Schemes for Joint Temporal and Spatial Correlated Clutter Using Vector ARMA Models
Wajih Ben Abdallah (CentraleSupéléc, France), Jean Philippe Ovarlez (ONERA & Centrale-Supelec/SONDRA, France), Pascal Bondon (LSS CNRS, France) ................................................................. 1075

Separation of Delayed Parameterized Sources
Hassan Mortada (ICube, University of Strasbourg - CNRS, France), Vincent Mazet (ICube & Université de Strasbourg, CNRS, France), Charles Soussen (CRAN Université de Lorraine, France), Christophe Collet (ICube, University of Strasbourg - CNRS, France) ................................................................. 1080

Jeffrey's Divergence Between Autoregressive Moving-Average Processes
Léo Legrand (University of Bordeaux, France), Eric J. Grivel (Université de Bordeaux, France), Audrey Giremus (Université de Bordeaux, France) ................................................................. 1085

New Model Order Selection in Large Dimension Regime for Complex Elliptically Symmetric Noise
Eugenie Terreaux (L2S/CentraleSupelec, France), Jean Philippe Ovarlez (ONERA & Centrale-Supelec/SONDRA, France), Frederic Pascal (CentraleSupéléc, France) ................................................................. 1090

Sophia Sulis (Observatoire de la Côte d'Azur & Laboratoire Lagrange, France), David Mary (Université de Nice Sophia-Antipolis, France), Lionel Bigot (Observatoire de la Côte d'Azur & Laboratoire Lagrange, France) ................................................................. 1095

A Multimodal Asymmetric Exponential Power Distribution: Application to Risk Measurement for Financial High-Frequency Data
Aymeric Thibault (Université Paris-Sud, France), Pascal Bondon (LSS CNRS, France) ................................................................. 1100

A Fast and Accurate Chirp Rate Estimation Algorithm Based on the Fractional Fourier Transform
Ahmet Serbes (Yildiz Technical University, Turkey), Omair Aldimashki (Yildiz Technical University, Turkey) ................................................................. 1105

Linear Complex Iterative Frequency Estimation of Sparse and Non-Sparse Pulse and Point Processes
Hans-Peter Bernhard (Johannes Kepler University Linz, Austria), Andreas Springer (Johannes Kepler University Linz, Austria) ................................................................. 1110
Special Session on Multivariate Analysis for Audio Signal Source Enhancement

Convergence Acceleration of Alternating Least Squares with a Matrix Polynomial Predictive Model for PARAFAC Decomposition of a Tensor
Ming Shi (Fudan University, P.R. China), JianQiu Zhang (Fudan University, P.R. China), Bo Hu (Fudan University, Shanghai, P.R. China), Bin Wang (Fudan University, P.R. China), Qiyong Lu (Fudan University, P.R. China) .......................................................... 1115

Eric J. Grivel (Université de Bordeaux, France), Mahdi Saleh (Lebanese University, Lebanon), Samir Omar (Lebanese International University, Lebanon) .......................................................... 1120

Canonical Piecewise-Linear Representation of Curves in the Wave Digital Domain
Alberto Bernardini (Politecnico di Milano, Italy), Augusto Sarti (Politecnico di Milano, Italy) .......................................................... 1125

The ASTRES Toolbox for Mode Extraction of Non-Stationary Multicomponent Signals
Dominique Fourer (IRCAM, France), Jinane Harmouche (Laboratoire des Signaux et Systèmes (CNRS - SUPELEC - Université Paris Sud), France), Jérémy Schmitt (Laboratoire de Physique ENS Lyon, France), Thomas Oberlin (University of Toulouse, France), Sylvain Meignen (University of Grenoble, France), Francois Auger (IUT Saint Nazaire, France), Patrick Flandrin (CNRS-ENS de Lyon, France) .......................................................... 1130

Sparse Frequency Extrapolation of Spectrograms
Jabran Akhtar (Norwegian Defence Research Establishment (FFI), Norway), Karl Erik Olsen (Forsvarets forskningsinstitutt, Norway), Karl Erik Olsen (Forsvarets forskningsinstitutt, Norway) .......................................................... 1135

Co-Prime Sampling Jitter Analysis
Usham Dias (Indian Institute of Technology Delhi, India), Seshan Srirangarajan (Indian Institute of Technology Delhi, India) .......................................................... 1140

Full Proportionate Functional Link Adaptive Filters for Nonlinear Acoustic Echo Cancellation
Danilo Cossiniello (Sapienza University of Rome, Italy), Michele Scarpiniti (Sapienza University of Rome, Italy), Luis Aparicio (Universidad Carlos III de Madrid, Spain), Jerónimo Arenas-Garcia (University Carlos III of Madrid, Spain), Aurelio Uncini (University of Rome "La Sapienza", Italy) .......................................................... 1145

Audio/Video Supervised Independent Vector Analysis Through Multimodal Pilot Dependent Components
Francesco Nesta (Conexant Systems, USA), Saeed Mosayyebpour (Synaptics inc., USA), Zbynek Koldovsky (Technical University of Liberec, Czech Republic), Karel Palecek (Technical University of Liberec, Czech Republic) .......................................................... 1150

Orthogonally Constrained Independent Component Extraction: Blind MPDR Beamforming
Zbynek Koldovsky (Technical University of Liberec, Czech Republic), Petr Tichavsky (Academy of Sciences of the Czech Republic, Czech Republic), Václav Kautský (Czech Technical University in Prague, Czech Republic) .......................................................... 1155

EEG-based Attention-Driven Speech Enhancement for Noisy Speech Mixtures Using N-fold Multi-Channel Wiener Filters
Neetha Das (KU Leuven, Belgium), Simon Van Eyndhoven (KU Leuven, Belgium), Tom Francart (Katholieke Universiteit Leuven, Belgium), Alexander Bertrand (KU Leuven, Belgium) .......................................................... 1160

Data-driven and Physical Model-based Designs of Probabilistic Spatial Dictionary for Online Meeting Diarization and Adaptive Beamforming
Nobutaka Ito (NTT, Japan), Shoko Araki (NTT Communication Science Laboratories, Japan), Tomohiro Nakatani (NTT Corporation, Japan) .......................................................... 1165

Experimental Analysis of Optimal Window Length for Independent Low-Rank Matrix Analysis
Daichi Kitamura (The University of Tokyo, Japan), Nobutaka Ono (National Institute of Informatics, Japan), Hiroshi Sato (The University of Tokyo, Japan) .......................................................... 1170
Special Session on Component Analysis for Computer Vision

Initializing Probabilistic Linear Discriminant Analysis
Stylianos Moschoglou (Imperial College London, United Kingdom (Great Britain)), Mihalis Nicolaou (Goldsmiths, University of London, United Kingdom (Great Britain)), Yannis Panagakis (Middlesex University London, United Kingdom (Great Britain)), Stefanos Zafeiriou (Imperial College London, United Kingdom (Great Britain)) ........................................... 1175

Complex Representations for Learning Statistical Shape Priors
Athanasios Papaioannou (Imperial College London, United Kingdom (Great Britain)), Stefanos Zafeiriou (Imperial College London, United Kingdom (Great Britain)), Epameinondas Antonakos (Imperial College London, United Kingdom (Great Britain)) ........... 1180

Robust Low-rank Tensor Modelling Using Tucker and CP Decomposition
Niannan Xue (Imperial College London, United Kingdom (Great Britain)), George Papamakarios (University of Edinburgh, United Kingdom (Great Britain)), Mehdi Bahri (Imperial College London, United Kingdom (Great Britain)), Yannis Panagakis (Middlesex University London, United Kingdom (Great Britain)), Stefanos Zafeiriou (Imperial College London, United Kingdom (Great Britain)) .................................................. 1185

Lightweight Two-Stream Convolutional Face Detection
Danai Triantafyllidou (Aristotle University of Thessaloniki, Greece), Paraskevi Nousi (Aristotle University of Thessaloniki, Greece), Anastasios Tefas (Aristotle University of Thessaloniki, Greece) ................................................................. 1190

A Robust Ellipse Fitting Algorithm Based on Sparsity of Outliers
Elaheh Sobhani (Sharif University of Technology, Tehran, Iran., Iran), Mostafa Sadeghi (Sharif University of Technology, Iran), Massoud Babaie-Zadeh (Sharif University of Technology, Iran), Christian Jutten (GIPSA-Lab, France) ................................................................. 1195

Statistical Signal Processing

Constrained Subspace Estimation via Convex Optimization
Ignacio Santamaria (University of Cantabria, Spain), Javier Via (University of Cantabria, Spain), Michael Kirby (Colorado State University, USA), Timothy Marrinan (Colorado State University, USA), Chris Peterson (Colorado State University, USA), Louis Scharf (Colorado State, USA) ..................................................................................................................... 1200

Analog Transmit Signal Optimization for Undersampled Delay-Doppler Estimation
Andreas Lenz (Technische Universität München, Germany), Manuel S. Stein (Vrije Universiteit Brussel, Belgium), Lee Swindlehurst (University of California at Irvine, USA) ...... 1205

Robust Trajectory-based Density Estimation for Geometric Structure Recovery
Turner Richmond (North Carolina State University, USA), Namita Lokare (North Carolina State University, USA), Edgar Lobaton (North Carolina State University, USA) ..................................................................................................................... 1210

Crowdsourcing-based Signal Strength Field Estimation by Gaussian Processes
Irene Santos Velázquez (University of Seville, Spain), Petar M. Djurić (Stony Brook University, USA) ..................................................................................................................... 1215

A General Non-Smooth Hamiltonian Monte Carlo Scheme Using Bayesian Proximity Operator Calculation
Lotfi Chaari (University of Toulouse, IRIT - INP-ENSEEIHT & MIRACL Laboratory, Sfax, France), Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France), Hadji Batatia (University of Toulouse, France) ..................................................................................................................... 1220

Acoustic Sensor Array Processing/Signal Enhancement and Restoration

3D Exterior Soundfield Capture Using Pressure and Gradient Microphone Array on 2D Plane
Lachlan Birnie (Australian National University, USA), Prasanga Samarasinghe (Australian National University, Australia), Thushara D. Abhayapala (Australian National University, Australia) ..................................................................................................................... 1225

TDOA Estimation Based on Phase-Voting Cross Correlation and Circular Standard Deviation
Masanori Kato (NEC Corporation, Japan), Yuzo Senda (NEC Corporation, Japan), Reishi Kondo (NEC Corporation, Japan) ..................................................................................................................... 1230
Successive Relative Transfer Function Identification Using Single Microphone Speech Enhancement
Dani Cherkassky (Bar-Ilan University, Israel), Shlomo E. Chazan (Bar-Ilan University, Israel), Jacob Goldberger (Bar-Ilan University, Israel), Sharon Gannot (Bar-Ilan University, Israel) .............................................................................................................. 1235

Multiple DOA Estimation Based on Estimation Consistency and Spherical Harmonic Multiple Signal Classification
Sina Hafezi (Imperial College London, United Kingdom (Great Britain)), Alastair H. Moore (Imperial College London, United Kingdom (Great Britain)), Patrick A Naylor (Imperial College London, United Kingdom (Great Britain)) .......................................................... 1240

Design and Analysis of Second-order Steerable Differential Microphone Arrays
Huawei Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Xiaoguang Wu (Nanjing Tech University, P.R. China) ................................................................................................................................. 1245

Zadoff-Chu Coded Ultrasonic Signal for Accurate Range Estimation
Mohammed AlSharif (King Abdullah University of Science and Technology, Saudi Arabia), Mohamed Saadeldin (King Abdullah University of Science and Technology, Saudi Arabia), Mohamed Siala (Sup'Com, Tunisia), Taqrig Ballal (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Hatem Boujemaa (SupCom, Tunisia), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA) ........................................................................................................................................ 1250

Time-difference of Arrival Model for Spherical Microphone Arrays and Application to Direction of Arrival Estimation
Joonas Nikunen (Tampere University of Technology, Finland), Tuomas Virtanen (Tampere University of Technology, Finland) .............................................................................................................................................. 1255

ADMM-Based Audio Reconstruction for Low-Cost-Sound-Monitoring
Sandra Ramaswani (ESME Sudria, France), Yohei Kawaguchi (Research and Development Group, Hitachi, Ltd., Japan), Ryoichi Takashima (Central Research Laboratory, Hitachi, Ltd., Japan), Takashi Endo (Hitachi, Ltd., Japan), Masahito Togami (Hitachi America, Ltd., USA) .............................................................................................................................. 1260

AUDACITY: Audio Denoising by Adaptive Social CosparsITY
Clément Gaultier (INRIA, France), Srđan Kitić (Technicolor, France), Nancy Bertin (IRISA - CNRS UMR6074 & Inria, France), Rémi Gribonval (INRIA, France) ....................................................................................................................... 1265

A Perceptually-Weighted Deep Neural Network for Monaural Speech Enhancement in Various Background Noise Conditions
Qingju Liu (University of Surrey, United Kingdom (Great Britain)), Wenwu Wang (University of Surrey, United Kingdom (Great Britain)), Philip JB Jackson (University of Surrey, United Kingdom (Great Britain)), Yan Tang (University of Salzford, United Kingdom (Great Britain)) .............................................................................................................. 1270

Low-Complexity Non-Uniform Penalized Affine Projection Algorithms for Active Noise Control
Felix Albu (Valahia University of Targoviste, Romania), Yingxiang Li (Harbin Engineering University, P.R. China), Yanyan Wang (Harbin Engineering University, P.R. China) .................................................. 1275

Amplitude and Phase Dereverberation of Monocomponent Signals
Arthur Belhomme (Telecom ParisTech, France), Roland Badeau (LTIC, Télécom ParisTech, Université Paris-Saclay, France), Yves Grenier (LTIC, Institut Mines-Télécom, Télécom ParisTech, France), Eric Humbert (Invoxia, France) .......................................................................................... 1280

Biomedical Signal and Image Processing

Analysis of the Photic Driving Effect via Joint EEG and MEG Data Processing Based on the Coupled CP Decomposition
Kristina Naskovska (TU Ilmenau, Germany), Alexey Korobkov (Kazan National Research Technical University n. a. A. N Tupolev-KAI, Russia), Martin Haardt (Ilmenau University of Technology, Germany), Jens Haueisen (Technical University Ilmenau, Germany) ........................................................................................................ 1285

Beat-to-beat ECG Features for Time Resolution Improvements in Stress Detection
Dustin Axman (Carnegie Mellon University, USA), Joana S. Paiva (INESC TEC - INESC Technology and Science & Sciences Faculty, University of Porto, Portugal), Fernando De la Torre (Carnegie Mellon University, USA), João Paulo S. Cunha (INESC TEC and FEUP, Portugal) ........................................................................................................................................ 1290

A Page-Hinkley Based Method for HFOs Detection in Epileptic Depth-EEG
Nisrine Jrad (Catholic University of Ouest & LARIS, France), Amar Kachenoura (University of Rennes1-LTSI & Inserm - UMR 1099, France), Isabelle Merlet (University of Rennes 1, France), Fabrice Wendling (INSERM, France) ........................................................................................................... 1295
Compressed Sensing

**Cyclostationary Analysis of ECG Signals Acquired Inside an Ultra-High Field MRI Scanner**
Michel Haritopoulos (University of Orleans, France), Johannes W Krug (Otto-von-Guericke University of Magdeburg, Germany), Alfredo Illanes (Otto-von-Guericke University of Magdeburg, Germany), Michael Friebe (Otto-von-Guericke-Universität, Germany), Asoke K Nandi (Brunel University London, United Kingdom (Great Britain)) .......................................................... 1300

**Automatic Characterization of Sleep Need Dissipation Using a Single Hidden Layer Neural Network**
Gary Garcia Molina (Philips Research North America & University of Wisconsin-Madison, USA), Keith Baehr (University of Wisconsin-Madison, USA), Brenda Steele (University of Wisconsin-Madison, USA), Tsvetomira Tsoneva (Philips Research Europe, The Netherlands), Stefan Pfundtner (Philips Research Europe, USA), Brady Riedner (University of Wisconsin-Madison, USA), David White (Philips, USA), Giulio Tononi (University of Wisconsin-Madison, USA) ....................................................................................................................... 1305

**Pathwise Least Angle Regression and A Significance Test for the Elastic Net**
Muhammad N Tabassum (Aalto University, Finland), Esa Ollila (Aalto University, Finland) .......... 1309

**Compressive Sensing and Sparse Antenna Arrays for Indoor 3-D Microwave Imaging**
Simon Scott (University of California Berkeley, USA), John Wawrzynek (University of California, Berkeley, USA) ......................................................................................................................... 1314

**Optimal Number of Measurements for Compressed Sensing with Quadratically Decreasing SNR**
Yang Lu (Imperial College London, United Kingdom (Great Britain)), Wei Dai (Imperial College, United Kingdom (Great Britain)), Yonina C. Eldar (Technion-Israel Institute of Technology, Israel) ......................................................................................................................... 1319

**Distributed Compressive Sensing: Performance Analysis with Diverse Signal Ensembles**
Sung-Hsien Hsieh (Academia Sinica, Taiwan), Wei-Jie Liang (National Cheng Kung University, Taiwan), Chun-Shien Lu (Institute of Information Science, Academia Sinica, Taiwan), Soo-Chang Pei (National Taiwan University, Taiwan) ......................................................................................................................... 1324

**Transform Learning Algorithm Based on the Probability of Representation of Signals**
Gayatri Parthasarathy (National Institute of Technology Calicut, India), Abhilash G (NIT Calicut, India) ........................................................................................................................................ 1329

Design and Implementation of SP Systems/SP for Power Systems and Internet of Things

**Multiplierless Unified Architecture for Mixed Radix-2/3/4 FFTs**
Fahad Qureshi (Tampere University of Technology, Finland), Jarmo Takala (Tampere University of Technology, Finland), Anastasia Volkova (UPMC, France), Thibault Hilairie (UMPC Univ Paris 06, France) ......................................................................................................................... 1334

**Buffer Dimensioning for Throughput Improvement of Dynamic Dataflow Signal Processing Applications on Multi-Core Platforms**
Malgorzata Michalska (EPFL SCI STI MM, Switzerland), Endri Bezati (EPFL SCI STI MM, Switzerland), Simone Casale Brunet (EPFL & SCI STI MM, Switzerland), Marco Mattavelli (EPFL, Switzerland) ......................................................................................................................... 1339

**An Embedded Solution for Multispectral Palmprint Recognition**
Chao Li (State Key Laboratory of Acoustics, Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Yannick Benezeth (Université de Bourgogne, France), Keisuke Nakamura (Honda Research Institute Japan Co., Ltd., Japan), Randy Gomez (Honda Research Institute Japan Co., Ltd., Japan), Fan Yang (LE2I CNRS 6303, France) ......................................................................................................................... 1344

**Parametrisable Digital Design of a Sphere Decoder with High-Level Synthesis**
Benjamin Knoop (University of Bremen, Germany), Liam Schwez (University of Bremen, Germany), Dagmar Peters-Drolshagen (University of Bremen, Germany), Steffen Paul (University Bremen, Germany) ......................................................................................................................... 1349

**An Approximate Hardware Check Node for $\lambda$-min-based LDPC Decoders**
Georgios Perris-Samios (University of Patras, Greece), Vassilis Paliouras (University of Patras, Greece) ........................................................................................................................................ 1354
Sensor Array and Multichannel Signal Processing

A GLRT Approach for Detecting Correlated Signals in White Noise in Two MIMO Channels
Ignacio Santamaria (University of Cantabria, Spain), Javier Vía (University of Cantabria, Spain), Louis Scharf (Colorado State University, USA), Yuan Wang (Washington State University, USA) .................................................................................................................. 1395

Low Cost Subspace Tracking Algorithms for Sparse Systems
Nacerredine Lassami (IMT Atlantique, France), Karim Abed-Meraim (Polytech’Orléans & University of Sharjah, UAE, France), Abdeljalil Aissa-El-Bey (TELECOM Bretagne, France) .................................................................................................................. 1400

Source Enumeration in Large Arrays Using Corrected Rao’s Score Test and Relatively Few Samples
Yanyan Liu (Jilin University, P.R. China), Sun Xiaoying (Jilin University of China, P.R. China), Guohong Liu (Jilin University, P.R. China) .................................................................................................................. 1405

Bayesian Restoration of Reflectivity and Range Profiles from Subsampled Single-Photon Multispectral Lidar Data
Yoann Altmann (Heriot-Watt University, School of Engineering and Physical Sciences, University of Edinburgh, United Kingdom (Great Britain)), Rachel Tobin (Heriot-Watt University, University of Edinburgh, United Kingdom (Great Britain)), Aurora Maccarone (Heriot-Watt University, University of Edinburgh, United Kingdom (Great Britain)), Ximing Ren (Heriot-Watt University, University of Edinburgh, United Kingdom (Great Britain)), Aongus McCarthy (Heriot Watt University, United Kingdom (Great Britain)), Gerald Buller (Heriot-Watt University, United Kingdom (Great Britain)), Steve McLaughlin (Heriot Watt University, United Kingdom (Great Britain)) .................................................................................................................. 1410

On the Use of Tight Frames for Optimal Sensor Placement in Time-Difference of Arrival Localization
Cristian Rusu (University of Edinburgh, United Kingdom (Great Britain)), John Thompson (University of Edinburgh, United Kingdom (Great Britain)) .................................................................................................................. 1415
Solving Large-scale Systems of Random Quadratic Equations via Stochastic Truncated Amplitude Flow
Gang Wang (University of Minnesota, USA), Georgios B. Giannakis (University of Minnesota, USA), Jie Chen (Beijing Institute of Technology, P.R. China) .................................................. 1420

Dictionary Learning from Incomplete Data for Efficient Image Restoration
Valeriya Naumova (Simula Research Laboratory, Norway), Karin Schnass (University of Innsbruck, Austria) ........................................................................................................... 1425

Low-rank and Sparse NMF for Joint Endmembers’ Number Estimation and Blind Unmixing of Hyperspectral Images
Paris Giampouras (National Observatory of Athens, Greece), Athanasios A. Rontogiannis (National Observatory of Athens, Greece), Konstantinos Kourtrombas (National Observatory of Athens, Greece) ........................................................................................................... 1430

Multi-Frequency Image Reconstruction for Radio-Interferometry with Self-Tuned Regularization Parameters
Rita Ammanouil (University of the Cote d’Azur, France), André Ferrari (Université de Nice Sophia-Antipolis, France), Rémi Flamarly (Université de Nice Sophia-Antipolis & Laboratoire Lagrange, UMR CNRS, France), Chiara Ferrari (Observatoire de la Côte d’Azur, France), David Mary (Université de Nice Sophia-Antipolis, France) ........................................................................................................... 1435

A Distributed Learning Architecture for Big Imaging Problems in Astrophysics
Athanasia Panousopoulou (Institute of Computer Science, Foundation for Research and Technology Hellas, Greece), Samuel Farrens (Laboratoire AIM, UMR CEA-CNRS, France), Yannis Mastorakis (FORTH/University of Crete, Greece), Jean-Luck Starck (Laboratoire AIM, UMR CEA-CNRS, France), Panagiotis Tsakalides (FORTH-ICS and University of Crete, Greece) ........................................................................................................... 1440

Statistical Signal Processing

Robust Object Characterization from Lensless Microscopy Videos
Olivier Flasseur (Université de Lyon, France), Loïc Denis (Université de Lyon, France), Corinne Fournier (Laboratoire Hubert Curien, France), Eric Thiébaut (Centre de Recherche Astrophysique de yon, France) ........................................................................................................... 1445

Nonparametric Detection Using Empirical Distributions and Bootstrapping
Martin Götz (Technische Universität Darmstadt, Germany), Visa Koivunen (Aalto University, Finland), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) .... 1450

On the Efficiency of Maximum-Likelihood Estimators of Misspecified Models
Mouhamadou L. Diong (ISAE, France), Eric Chaumette (ISAE, France), François Vincent (ISAE, France) ........................................................................................................... 1455

On Joint Order and Bandwidth Selection for Identification of Nonstationary Autoregressive Processes
Maciej Niedźwiecki (Gdansk University of Technology, Poland), Marcin Ciołek (Gdansk University of Technology, Faculty of Electronics, Telecommunications and Computer Science, Poland) ........................................................................................................... 1460

Image, Video and Multimedia Processing

Efficient Parallel Architecture for a Real-time UHD Scalable HEVC Encoder
Ronan Parois (INSA de Rennes, France), Wassim Hamidouche (IETR-INS A Rennes, France), Jerome Vieron (ATEME, France), Mickaël Raulot (ATEME Rennes, France), Olivier Deforges (IETR / INS A Rennes, France) ........................................................................................................... 1465

Prediction Mode Based Reference Line Synthesis for Intra Prediction of Video Coding
Qiang Yao (KDDI Research, Inc., Japan), Kei Kawamura (KDDI R&D Laboratories, Inc., Japan), Sei Naito (KDDI R&D Laboratories, Japan) ........................................................................................................... 1470

Low Complexity Intra Mode Decision Algorithm for 3D-HEVC
Hamza Hamout (Faculté des Sciences - Agadir BP 8106 - Cité Dakhla Agadir - Tel: 05 28 22 09 57, Morocco), Abderrahmane Elyousfi (National Engineering School of Applied Sciences Ibn-Zohr University Agadir, Morocco) ........................................................................................................... 1475
Visual Color Difference Evaluation of Standard Color Pixel Representations for High Dynamic Range Video Compression
Maryam Azimi (University of British Columbia, Canada), Ronan Boitard (MTT Innovation & Barco, Canada), Mahsa T Pourazad (TELUS Communications Company, Canada), Panos Nasiopoulos (The University of British Columbia, Canada)

A Machine Learning Approach to Reducing Image Coding Artifacts
Ichiro Matsuda (Tokyo University of Science, Japan), Tomokazu Ishikawa (Tokyo University of Science, Japan), Yusuke Kameda (Tokyo University of Science, Japan), Susumu Itoh (Tokyo University of Science, Japan)

Patch-based Image Denoising: Probability Distribution Estimation vs. Sparsity Prior
Dai Viet Tran (Université Paris 13 & 99 Avenue Jean Baptiste Clément, France), Sébastien Li-Thiao-Tê (Université Paris 13, France), Marie Luong (Université Paris 13, Sorbonne Paris Cité, France), Thuong Le-Tien (Hoohinch city University of Technology, Vietnam), François Dibos (LAGA, Universite Paris 13, France)

Parameter Estimation in Spike and Slab Variational Inference for Blind Image Deconvolution
Juan G. Serra (University of Granada, Spain), Javier Mateos (University of Granada, Spain), Rafael Molina (Universidad de Granada, Spain), Angelos K Katsaggelos (Northwestern University, USA)

Billboard Deformation via 3D Voxel by Using Optimization for Free-viewpoint System

A New Adaptive Video SRR Algorithm with Improved Robustness to Innovations
Ricardo Augusto Borsoi (Federal University of Santa Catarina, Brazil), Guilherme H Costa (University of Caxias do Sul, Brazil), Jose Carlos Moreira Bermudez (Federal University of Santa Catarina, Brazil)

Phase Contrast Computed Tomography Using Continuous THz Source
Masayuki Suga (Yamagata University, Japan), Yoshiaki Sasaki (RIKEN, Japan), Takeshi Sasahara (Yamagata University, Japan), Tetsuya Yuasa (Yamagata University, Japan), Chiko Otani (RIKEN, Japan)

Heuristics for Tile Parallelism in HEVC
Maria Koziri (University of Thessaly, Greece), Panos Papadopoulos (University of Thessaly, Greece), Nikos Tziritas (Chinese Academy of Sciences, P.R. China), Nikos Giachoudis (University of Thessaly, Greece), Thanasis Loukopoulos (University of Thessaly, Greece), Samee U. Khan (North Dakota State University, USA), Georgios Stamoulis (University of Thessaly, Greece, Greece)

Performance and Energy Consumption Analysis of the X265 Video Encoder
Dieison Soares Silveira (Federal University of Rio Grande do Sul, Brazil), Marcelo Porto (Federal University of Pelotas, Brazil), Sergio Bampi (Federal University of Rio Grande do Sul & Microelectronics Group at UFRGS, Brazil)

Edge-Aware Depth Motion Estimation - A Complexity Reduction Scheme for 3D-HEVC
Gustavo Sanchez (PUCRS, Brazil), Mário Saldanha (UFPEL, Brazil), Bruno Zatt (Federal University of Pelotas, Brazil), Marcelo Porto (Federal University of Pelotas, Brazil), Luciano Agostini (Federal University of Pelotas, Brazil), César Marcon (PUCRS - Pontificia Universidade Católica do Rio Grande do Sul, Brazil)

Frequency Spectrum Regularization for Pattern Noise Removal Based on Image Decomposition
Keiichiro Shirai (Shinshu University Japan, Japan), Shunsuke Ono (Tokyo Institute of Technology, Japan), Masahiro Okuda (The University of Kitakyushu, Japan)

Adaptive Colour-Space Selection in High Efficiency Video Coding
Tilo Strutz (Leipzig University of Telecommunications (HfTL), Germany), Alexander Leipnitz (Leipzig University of Telecommunications (HfTL), Germany)

HDR Image Compression with Optimized JPEG Coding
Azza Ouled Zaid (University of Tunis El Manar, Tunisia), Amira Houimli (Higher Institute of Computer Science, Tunisia)

The Iterative 2D Windowed Fourier Transform: A SOS Approach to Speckle Noise Reduction in Digital Holography
Silvio Montresor (University of Maine, France), Pascal Picart (University of Maine, France), Mayssa Karray (Unité de l'Etat Solide, Faculté des Sciences de Sfax, France)

MAP Tomographic Reconstruction with a Spatially Adaptive Hierarchical Image Model
Christophoros Nikou (University of Ioannina, Greece)
Topographical Pattern Analysis Using Wavelet Based Coherence Connectivity Estimation in the Distinction of Meditation and Non-meditation EEG

Laxmi Shaw (Indian Institute of Technology Kharagpur, India), Aurobinda Routray (Indian Institute of Technology, Kharagpur, India) .......................................................... 1554

Machine Learning for Signal Processing

Person Re-identification Based on Deep Multi-instance Learning

Domonkos Varga (The Computer and Automation Research Institute, Hungarian Academy of Sciences, Hungary), Tamas Sziranyi (Computer and Automation Research Institute of the Hungarian Academy of Sciences & Budapest University of Technology and Economics, Hungary) .......................................................... 1559

SparkDict: A Fast Dictionary Learning Algorithm

Tobias Schnier (University of Bremen, Germany), Carsten Bockelmann (University of Bremen, Germany), Armin Dekorsy (University of Bremen, Germany) .......................................................... 1564

Penalty Learning for Changepoint Detection

Charles Truong (CMLA, ENS Cachan, CNRS, Université Paris-Saclay & COGNAC G, University Paris Descartes, CNRS, France), Laurent Oudre (Université Paris 13, France), Nicolas Vayatis (CMLA, ENS Cachan, CNRS, Université Paris-Saclay & COGNAC G, University Paris Descartes, CNRS, France) .......................................................... 1569

An Effective Feature Selection Method Based on Pair-Wise Feature Proximity for High Dimensional Low Sample Size Data

S L Happy (Indian Institute of Technology, Kharagpur, India), Ramanarayan Mohanty (Indian Institute of Technology Kharagpur & IIT Kharagpur, India), Aurobinda Routray (Indian Institute of Technology Kharagpur, India) .......................................................... 1574

Dictionary Learning for Spontaneous Neural Activity Modeling

Eirini Troullinou (University of Crete, Greece), Grigorios Tsagkatakis (FORTH, Greece), Ganna Palagina (Harvard Medical School, USA), Maria Papadopouli (University of Crete, Greece), Stelios Manolis Smirnakis (Harvard Medical School, USA), Panagiotis Tsakalides (FORTH-ICS and University of Crete, Greece) .......................................................... 1579

Nonlinear Signal Processing

Distributed Particle Filtering Under Real-Time Constraints

Alper Kamil Bozkurt (Bogazici University, Turkey), Ali Taylan Cemgil (Bogazici University, Turkey) .......................................................... 1584

An Approximate Minimum Variance Filter for Nonlinear Systems with Randomly Delayed Observations

Paresh Date (Brunel University, United Kingdom (Great Britain)), Seham Allahyani (Brunel University, United Kingdom (Great Britain)) .......................................................... 1589

Online Learning in L2 Space with Multiple Gaussian Kernels

Motoya Ohnishi (Keio University, Japan), Masahiro Yukawa (Keio University, Japan) .......................................................... 1594

Maxout Filter Networks Referencing Morphological Filters

Makoto Nakashizuka (Chiba Institute of Technology, Japan), Kei-ichiro Kobayashi (Chiba Institute of Technology, Japan), Toru Ishikawa (Chiba Institute of Technology, Japan), Kiyoaki Itoi (Chiba Institute of Technology, Japan) .......................................................... 1599

Solution of the Inverse Frobenius-Perron Problem for Semi-Markov Chaotic Maps via Recursive Markov State Disaggregation

Andre McDonald (Council for Scientific and Industrial Research & University of the Witwatersrand, South Africa), Michael Van Wyk (University of the Witwatersrand, South Africa) .......................................................... 1604
Speech Analysis and Coding

Flexible and Scalable Transform-Domain Codebook for High Bit Rate CELP Coders
Václav Eksler (University of Sherbrooke & VoiceAge Corporation, Canada), Bruno Bessette (Université de Sherbrooke, Canada), Milan Jelinek (University of Sherbrooke, Canada), Tommy Vaillancourt (University of Sherbrooke, Canada) ................................................................. 1609

Performance Analysis of Several Pitch Detection Algorithms on Simulated and Real Noisy Speech Data
Denis Jouvet (INRIA & LORIA, France), Yves Laprie (Loria, France) ...................................................... 1614

Modeling Formant Dynamics in Speech Spectral Envelopes
Alexandra Craciun (International Audio Laboratories Erlangen, Germany), Jouni Paulus (Fraunhofer IIS, Germany), Gökhan Sevkin (International Audio Laboratories Erlangen, Germany), Tom Bäckström (Aalto University, Finland) ................................................................. 1619

A Novel Filterbank for Epoch Estimation
Pramod Bachhav (EURECOM, France), Hemant A. Patil (Dhirubhai Ambani Institute of Information and Communication Technology, India) ......................................................... 1624

Pitch Prediction from Mel-generalized Cepstrum — a Computationally Efficient Pitch Modeling Approach for Speech Synthesis
Achuth Rao MV (Indian Institute of Science, India), Prasanta Kumar Ghosh (Indian Institute of Science, India) ................................................................. 1629

Multi-Channel Estimation of Power Spectral Density Matrix Using Inter-Frame and Inter-Band Information
Raziyeh Ranjbaryan (Yazd University, Iran), Hamid Reza Abutalebi (Yazd University, Iran) ......................................................... 1634

Signal and System Modeling and Estimation

Optimal High-Dimensional Shrinkage Covariance Estimation for Elliptical Distributions
Esa Ollila (Aalto University, Finland) ................................................................. 1639

Misspecified Cramér-Rao Bounds for Complex Unconstrained and Constrained Parameters
Stefano Fortunati (University of Pisa, Italy) ................................................................. 1644

The Outlier-Corrected-Data-Adaptive Lasso: A New Robust Estimator for the Independent Contamination Model
Jasin Machkour (Technische Universität Darmstadt, Germany), Bastian Alt (Technische Universität Darmstadt, Germany), Michael Muma (Darmstadt University of Technology, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) ................................................................. 1649

On Characterization and Application of Oscillatory Almost-Cyclostationary Processes
Antonio Napolitano (Universita di Napoli Parthenope, Italy) ................................................................. 1654

Jeffrey’s Divergence Between Complex-Valued Sinusoidal Processes
Eric J. Grivel (Université de Bordeaux, France), Mahdi Saleh (Lebanese University, Lebanon), Samir Omar (Lebanese International University, Lebanon) ................................................................. 1659

A Kernel Density-Based Particle Filter for State and Time-Varying Parameter Estimation in Nonlinear State-Space Models
Cheng Cheng (Northwestern Polytechnical University & School of Astronautics, P.R. China), Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France) ................................................................. 1664

Special Session on Graph Signal Processing

Graph Clustering for Localization Within a Sensor Array
Nima Riahi (University of California San Diego, USA), Peter Gerstoft (University of California, San Diego, USA), Christoph F Mecklenbräuker (Vienna University of Technology, Austria) ................................................................. 1669

Graph Sampling with Determinantal Processes
Nicolas Tremblay (CNRS & GIPSA-lab, France), Pierre-Olivier Amblard (Gipsa-lab, CNRS, France), Simon Barthelme (GIPSA-lab/CNRS, France) ................................................................. 1674
Inference of Spatiotemporal Processes over Graphs via Kernel Krigeed Kalman Filtering
Vassilis N. Ioannidis (University of Minnesota, USA), Daniel Romero (University of Agder, Norway), Georgios B. Giannakis (University of Minnesota, USA) ............................... 1679

Optimal Sampling Strategies for Adaptive Learning of Graph Signals
Paolo Di Lorenzo (University of Perugia, Italy), Paolo Banelli (University of Perugia, Italy), Sergio Barbarossa (Sapienza University of Rome, Italy) ................................................................. 1684

Coordinate Descent Accelerations for Signal Recovery on Scale-Free Graphs Based on Total Variation Minimization
Peter Berger (Technical University Vienna, Austria), Gabor Hannak (Vienna University of Technology, Austria), Gerald Matz (Vienna University of Technology, Austria) ................. 1689

Collaborative Filtering via Graph Signal Processing
Weiyu Huang (University of Pennsylvania, USA), Antonio G. Marques (Universidad Rey Juan Carlos, Spain), Alejandro Ribeiro (University of Pennsylvania, USA) ............................ 1694

Special Session on Hybrid Analog/Digital Signal Processing for Hardware-Efficient Large Scale Antenna Arrays

Tunable Load MIMO with Quantized Loads
Ang Li (University College London, United Kingdom (Great Britain)), Christos Masouros (University College London, United Kingdom (Great Britain)), Mathini Sellathurai (Heriot-Watt University, United Kingdom (Great Britain)), Constantinos B. Papadias (Athens Information Technology, Greece) .............................................................. 1699

Multi-Way Massive MIMO with Maximum-Ratio Processing and Imperfect CSI
Chung Ho (Queen's University Belfast, United Kingdom (Great Britain)), Hien Ngo (Queen's University Belfast, United Kingdom (Great Britain)), Michal Matthaiou (Queen's University Belfast, United Kingdom (Great Britain)), Trung Q. Duong (Queen's University Belfast, United Kingdom (Great Britain)) ................................................................. 1704

Scheduling and Precoding in Hybrid Analog-Digital Multi-antenna Spectrum Sharing Systems
Miguel Ángel Vázquez (Centre Tecnològic de les Telecommunicacions de Catalunya (CTTC/ CERCA), Spain), Ana Pérez-Neira (CTTC, Spain), Roberto Corvaja (University of Padova, Italy), Ana García Armada (Universidad Carlos III de Madrid, Spain), Miguel Angel Lagunas (Telecommunications Technological Center of Catalonia, Spain) ........................................... 1709

A Novel Hybrid Analog-Digital Transmitter for Multi-antenna Base Stations
Mohammad Ali Sedaghat (Friedrich Alexander University of Erlangen-Nürnberg, Germany), Bernhard Gäde (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), Ralf R. Müller (Friedrich-Alexander Universität Erlangen-Nürnberg, Germany), Georg Fischer (FAU Erlangen-Nürnberg, Germany) .............................................................. 1714

Multi-Antenna Transmission Using ESPAR with Peak Power Constraints
Lin Zhou (University of Edinburgh, United Kingdom (Great Britain)), Fahd Ahmed Khan (King Abdullah University of Science and Technology, Saudi Arabia), Tharmalingam Ratnarajah (The University of Edinburgh, United Kingdom (Great Britain)), Constantinos B. Papadias (Athens Information Technology, Greece) .............................................................. 1719

Large Load-Controlled Multiple-Active Multiple-Passive Antenna Arrays: Transmit Beamforming and Multi-User Precoding
Konstantinos Ntougias (Athens Information Technology, Greece), Dimitrios Ntaikos (Athens Information Technology, Greece), Bobby Gizaś (Athens Information Technology, Greece), George K. Papageorgiou (Athens Information Technology, Greece), Constantinos B. Papadias (Athens Information Technology, Greece) .............................................................. 1724

Special Session on Bird Audio Signal Processing

Stacked Convolutional and Recurrent Neural Networks for Bird Audio Detection
Sharath Adavanne (Tampere University of Technology, Finland), Konstantinos Drossos (Tampere University of Technology, Finland), Emre Cakir (Tampere University of Technology, Finland), Tuomas Virtanen (Tampere University of Technology, Finland) ............... 1729

Densely Connected CNNs for Bird Audio Detection
Thomas Pellegrini (Université Paul Sabatier & IRIT, France) ...................................................... 1734
Classification of Bird Song Syllables Using Wigner-Ville Ambiguity Function Cross-Terms
Maria Sandsten (Lund University, Sweden), Johan Brynolfsson (Lund University, Sweden) 1739

Convolutional Recurrent Neural Networks for Bird Audio Detection
Emre Cakir (Tampere University of Technology, Finland), Sharath Adavanne (Tampere University of Technology, Finland), Giambattista Parascandolo (Tampere University of Technology, Finland), Konstantinos Drossos (Tampere University of Technology, Finland), Tuomas Virtanen (Tampere University of Technology, Finland) 1744

Joint Detection and Classification Convolutional Neural Network on Weakly Labelled Bird Audio Detection
Quiqiang Kong (University of Surrey, United Kingdom (Great Britain)), Yong Xu (CVSSP, University of Surrey, United Kingdom (Great Britain)), Mark D. Plumbley (University of Surrey, United Kingdom (Great Britain)) 1749

Rapid Bird Activity Detection Using Probabilistic Sequence Kernels
Anshul Thakur (IIT Mandi, Himachal Pradesh, India), R. Jyothi (IIT Delhi, India), Padmanabhan Rajan (IIT Mandi, India), Dileep Aroor Dinesh (Indian Institute of Technology Mandi (IIT Mandi), India) 1754

Automatic Frequency Feature Extraction for Bird Species Delimitation
Colm O'Reilly (Trinity College Dublin, Ireland), Munever Kokuer (University of Birmingham, United Kingdom (Great Britain)), Peter Jancovic (University of Birmingham, United Kingdom (Great Britain)), Regan Drennan (Trinity College Dublin, Ireland), Naomi Harte (Trinity College Dublin, Ireland) 1759

Two Convolutional Neural Networks for Bird Detection in Audio Signals
Thomas Grill (Austrian Research Institute for Artificial Intelligence (OFAI) & University of Music and Performing Arts Vienna, Austria), Jan Schlüter (Austrian Research Institute for Artificial Intelligence (OFAI), Austria) 1764

Masked Non-negative Matrix Factorization for Bird Detection Using Weakly Labeled Data
Iwona Sobieraj (University of Surrey, United Kingdom (Great Britain)), Quiqiang Kong (University of Surrey, United Kingdom (Great Britain)), Mark D. Plumbley (University of Surrey, United Kingdom (Great Britain)) 1769

Archetypal Analysis Based Sparse Convex Sequence Kernel for Bird Activity Detection
Vinayak Abrol (IIT MANDI, INDIA, India), Pulkit Sharma (IIT Mandi, India), Anshul Thakur (IIT Mandi, Himachal Pradesh, India), Padmanabhan Rajan (IIT Mandi, India), Dileep Aroor Dinesh (Indian Institute of Technology Mandi (IIT Mandi), India), Anil Kumar Sao (IIT Mandi, India) 1774

Automatic Detection of Bird Species from Audio Field Recordings Using HMM-based Modelling of Frequency Tracks
Peter Jancovic (University of Birmingham, United Kingdom (Great Britain)), Munever Kokuer (University of Birmingham, United Kingdom (Great Britain)) 1779

Audio and Acoustic Signal Processing Applications

A Variational EM Method for Pole-Zero Modeling of Speech with Mixed Block Sparse and Gaussian Excitation
Liming Shi (Aalborg University, Denmark), Jesper Kjær Nielsen (Aalborg University, Denmark), Jesper Rindom Jensen (Aalborg University, Denmark), Mads Græsbøll Christensen (Aalborg University, Denmark) 1784

Order Adaptive Golomb Rice Coding for High Variability Sources
Adriana Vasilache (Nokia Technologies, Finland) 1789

Time-Scale Wavelet Scattering Using Hyperbolic Tangent Function for Vessel Sound Classification
Gökmen Can (Bilkent University, Turkey), Cem Emre Akbaş (Bilkent University, Turkey), Enis Çetin (Bilkent University, Turkey) 1794

Non-Intrusive Bit-Rate Detection of Coded Speech
Dushyant Sharma (Nuance Communications, USA), Uwe Jost (Nuance Communications Inc, USA), Patrick A Naylor (Imperial College London, United Kingdom (Great Britain)) 1799

Harmonic and Percussive Source Separation Using a Convolutional Auto Encoder
Wootaek Lim (ETRI, Korea), Taejin Lee (ETRI(Electronics and Telecommunications Research Institute), Korea) 1804
Novel TEO-based Gammatone Features for Environmental Sound Classification
Dharmeshkumar Agrawal (Dhirubhai Ambani Institute of Information and Communication Technology, India), Hardik B. Sailor (DA-IICT, Gandhinagar, India), Meet Soni (Dhirubhai Ambani Institute of Information and Communication Technology, India), Hemant A. Patil (Dhirubhai Ambani Institute of Information and Communication Technology, India) 1809

Automatic Organisation and Quality Analysis of User-Generated Content with Audio Fingerprinting
Gonçalo Mordido (Universidade Nova de Lisboa, Portugal), Joao Magalhaes (Universidade Nova Lisboa, Portugal), Sofia Cavaco (Universidade Nova de Lisboa, Portugal) 1814

A Subjective Evaluation on Mixtures of Crowdsourced Audio Recordings
Nikolaos Stefanakis (Foundation of Research and Technology Hellas, Greece), Athanasios Mouchtaris (Foundation for Research and Technology-Hellas, Greece), Menelaos Viskadourois (University of Crete, Greece) 1819

Discriminant Kernel Learning for Acoustic Scene Classification with Multiple Observations
Jiaxing Ye (National Institute of Advanced Industrial Science and Technology (AIST), Japan), Takumi Kobayashi (National Institute of Advanced Industrial Science and Technology, Japan), Hiroshi Tsuda (The National Institute of Advanced Industrial Science and Technology (AIST), Japan), Masahiro Murakawa (National Institute for Advanced Industrial Science and Technology, Japan) 1824

Dual-band PWM Audio Coding for Ultrasound Artefact Reduction
Konstantinos Kaleris (University of Patras, Greece), John Mourjopoulos (University of Patras, Greece) 1829

Feasibility of Vocal Emotion Conversion on Modulation Spectrogram for Simulated Cochlear Implants
Zhi Zhu (Japan Advanced Institute of Science and Technology, Japan), Ryota Miyauchi (Japan Advanced Institute of Science and Technology, Japan), Yukiko Araki (Kanazawa University, Japan), Masashi Unoki (Japan Advanced Institute of Science and Technology, Japan) 1834

Detection of Alarm Sounds in Noisy Environments
Dean Carmel (Technion - Israel Institute of Technology, Israel), Ariel Yeshurun (Technion - Israel Institute of Technology, Israel), Yair Moshe (Technion - Israel Institute of Technology, Israel) 1839

Voice Pathology Distinction Using Autoassociative Neural Networks
Daria Hemmerling (AGH University of Science and Technology, Poland) 1844

Automatic Music Transcription Using Low Rank Non-Negative Matrix Decomposition
Cian O'Brien (University of Surrey, United Kingdom (Great Britain)), Mark D. Plumbley (University of Surrey, United Kingdom (Great Britain)) 1848

Feature-based Characterization of Violin Timbre
Francesco Setragno (Politecnico di Milano, Italy), Massimiliano Zanoni (Politecnico di Milano, Italy), Augusto Sarti (Politecnico di Milano, Italy), Fabio Antonacci (Politecnico di Milano, Italy) 1853

Empirical Study of Drone Sound Detection in Real-Life Environment with Deep Neural Networks
Sungho Jeon (The Affiliated Institute of ETRI, Korea), Jong-Woo Shin (The Affiliated Institute of ETRI, Korea), Young-Jun Lee (The Affiliated Institute of ETRI, Korea), Woong-Hee Kim (The Affiliated Institute of ETRI, Korea), YoungHyoun Kwon (The Affiliated Institute of ETRI, Korea), Hae-Yong Yang (The Affiliated Institute of ETRI, Korea) 1858

An Approach for Self-Training Audio Event Detectors Using Web Data
Benjamin Elizalde (Carnegie Mellon University, USA), Ankit Shah (National Institute of Technology Karnataka Surathkal & Verification Engineer at ARM, India), Siddharth Dalmia (Carnegie Mellon University, USA), Min Hun Lee (Carnegie Mellon University, USA), Rohan Badlani (Birla Institute of Technology and Science, Pilani, Germany), Anurag Kumar (Carnegie Mellon University & School of Computer Science, USA), Bhiksha Raj (Carnegie Mellon University, USA), Ian Lane (Carnegie Mellon University, USA) 1863

Automated Detection of Geometric Defects on Connecting Rod via Acoustic Resonance Testing
Yun Zheng (Fraunhofer IZFP, Germany), Matthias Heinrich (Fraunhofer IZFP, Germany), Ahmad Osman (Fraunhofer IZFP, Germany), Bernd Valeske (Fraunhofer IZFP, Germany) 1868

Frequency Estimation for Monophonical Music by Using a Modified VMD Method
Berrak Ozturk Simsek (Istanbul Kultur University, Turkey), Aydin Akan (Izmir Katip Celebi University, Turkey) 1873
Signal Processing for BioInformatics

Learning Directed-Acyclic-Graphs from Multiple Genomic Data Sources
Fabio Nikolay (Communication Systems Group, Germany), Marius Pesavento (Technische Universität Darmstadt & Merckstr. 25, Germany) .......................................................... 1877

Sparse-Low Rank Matrix Decomposition Framework for Identifying Potential Biomarkers for Inflammatory Bowel Disease
Mustafa Shawaqfeh (Texas A&M University, USA), Ahmad Al Kawam (Texas A&M University, USA), Erchin Serpedin (Texas A&M University, USA) .......................................................... 1882

Reconstructing the Forest of Lineage Trees of Diverse Bacterial Communities Using Bio-inspired Image Analysis
Athanasios D. Balomenos (National and Kapodistrian University of Athens, Greece), Elias S. Manolakos (National and Kapodistrian University of Athens, Greece) .......................................................... 1887

Your Gaze Betrays Your Age
Olivier Le Meur (University of Rennes 1, France), Antoine Coutrot (University College London, United Kingdom (Great Britain)), Zhi Liu (Shanghai University, P.R. China), Adrien Le Roch (IRISA, France), Andrea Hello (University Paris Descartes, France), Pia Rämä (University Paris Descartes, France) .......................................................... 1892

Image, Video and Multimedia Processing

Image Coding Based on Patch-Driven Inpainting
Nuno Couto (Instituto Superior Técnico - Instituto de Telecomunicações & Universidade de Lisboa, Portugal), Matteo Naccari (Instituto de Telecomunicações, Portugal), Fernando Pereira (Instituto Superior Técnico - Instituto de Telecomunicações & Universidade de Lisboa, Portugal) .......................................................... 1902

Microlens Image Sparse Modelling for Lossless Compression of Plenoptic Camera Sensor Images
Ioan Tabus (Tampere University of Technology, Finland), Petri Helin (Tampere University of Technology, Finland) .......................................................... 1907

A Preprocessing Technique for Improving the Compression Performance of JPEG 2000 for Images with Sparse or Locally Sparse Histograms
Souha Jallouli (National Engineering School of Sfax, Tunisia), Sonia Zouari (Sfax Preparatory Engineering Institute, Tunisia), Atef Masmoudi (Sfax Preparatory Engineering Institute, Tunisia), William Puech (LIRMM, France), Nouri Masmoudi (ENIS, University of Sfax, Tunisia) .......................................................... 1912

PharmaPack: Mobile Fine-Grained Recognition of Pharma Packages
Olga Taran (University of Geneva, Switzerland), Shideh Rezaeifar (University of Geneva, Switzerland), Oscar Dabrowski (University of Geneva, Switzerland), Jonathan Schlechten (University of Geneva, Switzerland), Taras Holotyak (University of Geneva, Switzerland), Sviatoslav Voloshynovskiy (University of Geneva, Switzerland) .......................................................... 1917

Two-layer Tracking for Occlusion Handling and Inter-sensor Identification in Multiple Depth Sensors-based Object Detection and Tracking
Houari Sabirin (KDDI Research, Inc., Japan), Sei Naito (KDDI R&D Laboratories, Japan) ....... 1922

Radar Signal Processing

An Approach to Power Allocation in MIMO Radar with Sparse Modeling for Coherence Minimization
Abdollah Ajourloo (Sharif University of Technology, Iran), Arash Amini (Sharif University of Technology, Iran), Mohammad Hassan Bastani (Sharif University of Technology, Iran) ....... 1927

A New Height-Estimation Method Using FMCW Radar Doppler Beam Sharpening
Amir Laribi (Daimler AG, Germany), Markus Hahn (DAIMLER AG, Germany), Juergen Dickmann (Daimler AG, Germany), Christian Waldschmidt (University of Ulm, Germany) ....... 1932
Multi-Doppler Resolution Automotive Radar
Oded Bialer (University of Tel-Aviv, Israel), Sammy Kolpinizki (Tel Aviv University & General Motors ATCI, Israel) ................................................................. 1937

Multivariate Change Detection on High Resolution Monovariate SAR Image Using Linear Time-Frequency Analysis
Ammar Mian (SONDRA, CentraleSupelec & LISTIC, Universite Savoie Mont-Blanc, France), Jean-Philippe Ovarlez (ONERA, France), Guillaume Ginolhac (Universite de Savoie & LISTIC, France), Abdourrahmane M. Atto (LISTIC, Universite Savoie Mont Blanc, France) ...... 1942

Data-Driven Method of Reverse Modelling for Multi-Function Radar
Jian Ou (National University of Defense Technology, P.R. China), Yongguang Chen (Beijing Institute of Tracking & Telecommunications Technology, P.R. China), Zhao Feng (National University of Defense Technology, P.R. China), Xiaofeng Ai (National University of Defense Technology, P.R. China), Jianhua Yang (National University of Defense Technology, P.R. China) ................................................................................................................. 1947

Optimal Design of Sparse MIMO Arrays for Near-Field Ultrawideband Imaging
Mehmet Kocamis (Middle East Technical University, Turkey), Figen S Oktem (Middle East Technical University, Turkey) ......................................................................................................................... 1952

Design of Multi-Carrier MIMO Radar Array for DOA Estimation
Michael Ulrich (University of Stuttgart, Germany), Yinglai Yang (University of Stuttgart, Germany), Bin Yang (University of Stuttgart, Germany) ........................................................................................................... 1957

Spectrum Reconstruction with Nonuniform Fast Fourier Transform for MIMO SAR Azimuth Nonuniform Sampling
Guanhua Zhao (National University of Defense Technology, P.R. China), Fu Yaowen (National University of Defense Technology, P.R. China), Lei Nie (National University of Defense Technology, P.R. China), Wenheng Zhang (National University of Defense Technology, P.R. China), Zhaowen Zhuang (National University of Defense Technology, P.R. China) ............................................................................................................... 1962

Sensor Array and Multichannel Signal Processing

Projector’s Weighting for W-MUSIC: An Alternative to RMT
Anne Ferréol (Thales Communications, France), Pascal Larzabal (ENS-Cachan, PARIS, France) .......................................................................................................................... 1966

Refinement of Time-Difference-Of-Arrival Measurements via Rank Properties in Two-Dimensional Space
Trung-Kien Le (National Institute of Informatics, Japan), Nobutaka Ono (National Institute of Informatics, Japan) ...................................................................................................................... 1971

Sparse Linear Nested Array for Active Sensing
Robin Rajamäki (Aalto University, Finland), Visa Koivunen (Aalto University, Finland) ........... 1976

Near-Optimal Greedy Sensor Selection for MVDR Beamforming with Modular Budget Constraint
Mario Coutino (Delft University of Technology, The Netherlands), Sundeep Prabhakar Chepuri (Delft University of Technology, The Netherlands), Geert Leus (Delft University of Technology, The Netherlands) ......................................................................................... 1981

Gridless Compressed Sensing for Fully Augmentable Arrays
Wassim Suleiman (TU Darmstadt & Institut für Nachrichtentechnik, Germany), Christian Steffens (Technische Universität Darmstadt, Germany), Alexander Sorg (Technische Universität Darmstadt, Germany), Marius Pesavento (Technische Universität Darmstadt & Merckstr. 25, Germany) ........................................................................................................ 1986

Signal Processing for Communications

Frequency Domain Multipath Fading Channel Simulator Integrated with OFDM Transmitter for E-UTRAN Baseband Traffic Generator
Grzegorz Cisek (Nokia & AGH University of Science and Technology, Poland), Tomasz P. Zieliński (AGH University of Science and Technology, Poland) .............................................. 1991
Special Session on Automatic Detection of Defects in Images of Road Pavement Surface

**Optimal Compression of Vibration Data with Lifting Wavelet Transform and Context-based Arithmetic Coding**
Yang Zhang (University of Bristol, United Kingdom (Great Britain)), Paul Hutchinson (Beran Instruments Limited, Hatchmoor Industrial Estate, United Kingdom (Great Britain)), Nick Lieven (University of Bristol, United Kingdom (Great Britain)), Jose Nunez-Yanez (U Bristol, United Kingdom (Great Britain)) ................................................................. 1996

**Hybrid Digital-Analog Joint Source Channel Coding for Broadcast Multiresolution Communications**
Óscar Fresnedo (University of A Coruña, Spain), Pedro Suárez-Casal (University of A Coruña, Spain), Luis Castedo (University of A Coruña, Spain), Javier García-Frias (University of Delaware, USA) ................................................................................. 2001

**Simplified Analysis of HARQ Cooperative Networks Using Finite-State Markov Chains**
Faton Maliqi (L2S-CNRS-CentraleSupelec-University of Paris Sud, France), Francesca Bassi (LSS-CNRS-Supelec, France), Pierre Duhamel (Lss Supelec & CNRS, France), Ilir Limani (University of Pristhina, Faculty of Electrical and Computer Engineering, Kosovo) ................. 2006

**Spatial Peak Power Minimization for Relaxed Phase M-PSK MIMO Directional Modulation Transmitter**
Ashkan Kalantari (University of Luxembourg, The Interdisciplinary Centre for Security, Reliability and Trust (SnT), Luxembourg), Christos G. Tsinos (University of Luxembourg, Luxembourg), Mojtaba Soltanalian (University of Illinois at Chicago, USA), Symeon Chatzinotas (University of Luxembourg, Luxembourg), Wing-Kin Ma (The Chinese University of Hong Kong, Hong Kong), Björn Ottersten (University of Luxembourg, Luxembourg) ..................................................................... 2011

**Special Session on Automatic Detection of Defects in Images of Road Pavement Surface**

**Ongoing Tests and Improvements of the MPS Algorithm for the Automatic Crack Detection Within Grey Level Pavement Images**
Vincent Baltazart (IFSTTAR, France), Philippe Nicolle (IFSTTAR, France), Longchao Yang (Xi’an Jiaotong University, P.R. China) ........................................................................................................... 2016

**Pseudo-Ground Truth Data Collection on Pavement Images**
Vincent Baltazart (IFSTTAR, France), Longchao Yang (Xi’an Jiaotong University, P.R. China), Philippe Nicolle (IFSTTAR, France), Jean-Marc Moliard (IFSTTAR, France) .................................................. 2021

**Road Surface Crack Detection: Improved Segmentation with Pixel-based Refinement**
Henrique Oliveira (Instituto de Telecomunicações & Instituto Politécnico de Beja, Portugal), Paulo Lobato Correia (Instituto Superior Tecnico - Universidade Tecnica Lisboa & Instituto de Telecomunicacoes, Portugal) .................................................................................. 2026

**Challenges and Lessons from the Successful Implementation of Automated Road Condition Surveys on a Large Highway System**
Yichang James Tsai (Georgia Institute of Technology, USA), Anirban Chatterjee (Georgia Tech, USA), Chenglong Jiang (Georgia Institute of Technology, USA) ...................................................... 2031

**3D Laser Imaging and Sparse Points Grouping for Pavement Crack Detection**
Qingquan Li (Shenzhen University, P.R. China), Dejin Zhang (Hubei University of Technology, P.R. China), Qin Zou (Wuhan University, P.R. China), Hong Lin (Zoyon Co. Ltd., P.R. China) .................................................................................. 2036

**Statistical Signal Processing**

**Pairwise Markov Models for Stock Index Forecasting**
Ivan Gorynin (Institut Telecom, Telecom SudParis, France), Emmanuel Monfrini (Institut Telecom, Telecom SudParis, France), Wojciech Pieczynski (Télécom SudParis, France) .............. 2041

**Distributed Object Tracking Based on Information Weighted UAV Selection with Priory Objects**
Venkata Pathuri Bhuvana (University of Klagenfurt, Austria), Andrea M Tonello (University of Klagenfurt & WITIKe srl, Austria) .............................................................. 2046

**Robust Distributed Sequential Detection via Robust Estimation**
Wenbin Hou (Technische Universität Darmstadt, Germany), Mark Ryan Leonard (Technische Universität Darmstadt, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) ................................................................. 2051
Biomedical Signal and Image Processing

**Nonlinear Model Selection for PARMA Processes Using RJMCMC**
Oktay Karakuş (Izmir Institute of Technology, Turkey), Ercan Engin Kuruoglu (CNR, Italy), Mustafa A Altinkaya (Izmir Institute of Technology, Turkey) ............................................................. 2056

**Measure-Transformed Gaussian Quasi Score Test**
Koby Todros (Ben Gurion University of the Negev, Israel) ............................................................. 2061

Applications of Sparse Representations; Sparse/Low-dimensional Parameter Estimation and Signal Recovery

**Blind Parallel Interrogation of Ultrasonic Neural Dust Motes Based on Canonical Polyadic Decomposition: a Simulation Study**
Alexander Bertrand (KU Leuven, Belgium), Dongjin Seo (University of California, Berkeley, USA), Jose Carmina (University of California-Berkeley, USA), Michel M Maharbiz (University of California, Berkeley, USA), Elad Alon (UC Berkeley, USA), Jan Rabaey (UC Berkeley, USA) ................................................................................................. 2066

**Error Correction Output Coding Coupled with the CSP for Motor Imagery BCI**
Soroosh Shahtalebi (Concordia University, Canada), Arash Mohammadi (Concordia University, Canada) ................................................................................................. 2071

**Finger and Forehead PPG Signal Comparison for Respiratory Rate Estimation Based on Pulse Amplitude Variability**
Alberto Hernando (Centro Universitario de la Defensa de Zaragoza, Spain), Maria Dolores Peláez (Centro Universitario de la Defensa de Zaragoza, Spain), Eduardo Gil (Zaragoza University, Spain), Jesús Lázaro (KU Leuven, Belgium), Maria Teresa Lozano Albalate (Centro Universitario de la Defensa de Zaragoza, Spain), Montserrat Alger (Centro Universitario de la Defensa, Zaragoza, Spain) ................................................................................................. 2076

**PARAFAC2 and Its Block Term Decomposition Analog for Blind fMRI Source Unmixing**
Christos Chatzichristos (Computer Technology Institute (CTI), Greece), Eleftherios Kofidis (University of Piraeus & Computer Technology Institute (CTI), Greece), Sergios Theodoridis (University of Athens, Greece) ................................................................. 2081

**ESTIMATION OF THE BLURRING KERNEL IN EXPERIMENTAL HR-pQCT IMAGES BASED ON MUTUAL INFORMATION**
LI Yufei (CREATIS, France), Bruno Sixou (INSa Lyon, France), Francoise Peyrin (Universite de Lyon INSa Lyon & Inserm U1044 UMR CNRS 5220, France) ................................................................. 2086

**Unveiling Bias Compensation in Turbo-Based Algorithms for (discrete) Compressed Sensing**
Susanne Sparrer (Ulm University, Germany), Robert F.H. Fischer (Ulm University, Germany) ................................................................................................. 2091

**A Gridless Sparse Method for Super-Resolution of Harmonics**
Zai Yang (Nanjing University of Science and Technology, Singapore) ................................................................. 2096

**Online Group-Sparse Estimation Using the Covariance Fitting Criterion**
Ted Kronvall (Lund University, Sweden), Stefan I Adalbjörnsson (Lund University, Sweden), Santhosh Nadig (Lund University, Sweden), Andreas Jakobsson (Lund University, Sweden) ................................................................................................. 2101

**Wideband DoA Estimation Based on Joint Optimisation of Array and Spatial Sparsity**
Mingyang Chen (University of Surrey, United Kingdom (Great Britain)), Wenwu Wang (University of Surrey, United Kingdom (Great Britain)), Mark Barnard (University of Surrey, United Kingdom (Great Britain)), Jonathon Chambers (Newcastle University, United Kingdom (Great Britain)) ................................................................................................. 2106

**Structurally Random Fourier Domain Compressive Sampling and Frequency Domain Beamforming for Ultrasound Imaging**
Foroohar Foroozan (Analog Devices Inc., Canada), Rozhin Yousefi (University of Toronto, Canada), Parastoo sadeghi (The Australian National University, Australia), Kolios Michael (Ryerson University, Canada) ................................................................................................. 2111

**Time-Data Trade-off in the Sparse Fourier Transform**
Abdulmalik Aldharrab (University of Edinburgh, United Kingdom (Great Britain)), Mike E Davies (University of Edinburgh, United Kingdom (Great Britain)) ................................................................................................. 2116
Biometrics and Security-related Applications

Frequency Diverse Array Beamforming for Physical-Layer Security with Directionally-Aligned Legitimate User and Eavesdropper
Jingran Lin (University of Electronic Science and Technology of China, P.R. China), Qiang Li (University of Electronic Science and Technology of China, P.R. China), Jintai Yang (University of Electronic Science and Technology of China, P.R. China) .......................................................... 2166

Botnet Identification in Multi-Clustered DDoS Attacks
Vincenzo Matta (University of Salerno, Italy), Mario Di Mauro (University of Salerno, Italy), Maurizio Longo (University of Salerno, Italy) .......................................................... 2171

Exploring Deep Learning Image Super-Resolution for Iris Recognition
Eduardo Ribeiro (University of Salzburg, Austria), Andreas Ulh (University of Salzburg, Austria), Fernando Alonso Fernandez (Halmstad University, Sweden), Reuben Farrugia (University of Malta, Malta) .......................................................... 2176

Video Phylogeny Tree Reconstruction Using Aging Measures
Simone Milani (University of Padova, Italy), Paolo Bestagini (Politecnico di Milano, Italy), Stefano Tubaro (Politecnico di Milano, Italy) .......................................................... 2181

Improved Reversible Data Hiding in Encrypted Images Based on Reserving Room After Encryption and Pixel Prediction
Catalin Dragoi (Valahia University of Targoviste, Romania), Henri George Coanda (Valahia University of Targoviste, Romania), Dinu Coltuc ("Valahia" University of Targoviste, Romania) .......................................................... 2186
Trust the Biometric Mainstream: Multi-biometric Fusion and Score Coherence
Naser Damer (Fraunhofer Institute for Computer Graphics Research (IGD), Germany), Chadi Izzou Rhaibani (Fraunhofer Institute for Computer Graphics Research IGD, Germany), Andreas Braun (Fraunhofer Institute for Computer Graphics Research, Germany), Arjan Kuijper (Fraunhofer IGD & TU Darmstadt, Germany) ........................................ 2191

Multi-Way Regression for Age Prediction Exploiting Speech and Face Image Information
Evangelia Pantraki (Aristotle University of Thessaloniki, Greece), Constantine Kotropoulos (Aristotle University of Thessaloniki, Greece) ........................................................................................................ 2196

Age Group Detection Using Smartphone Motion Sensors
Erhan Davarci (Bogazici University, Turkey), Betul Soysal (Bogazici University, Turkey), Imran Erguler (Bogazici University, Turkey), Sabri Orhun Aydin (Turcell Telecommunication Services & Bogazici University, Turkey), Onur Dincer (Georgia Institute of Technology, USA), Emin Anarim (Bogazici University, Turkey) ........................................ 2201

Secure Communication Protocol for a Low-Bandwidth Audio Channel
Waldemar Berchtold (Fraunhofer SIT, Germany), Patrick Lieb (Fraunhofer Institute SIT, Germany), Martin Steinebach (Fraunhofer SIT, Germany) ................................................................. 2206

Radar and Sonar Signal Processing

Design of Binary Sequences with Low PSL/ISL
Mohammad Alaee (Isfahan University of Technology, Iran), Augusto Aubry (Universita degli studi di Napoli, Italy), Antonio De Maio (University of Naples "Federico II", Italy), Mohammad Mahdi Naghsh (Isfahan University of Technology & Uppsala University, Sweden), Mahmood Modarres-Hashemi (Isfahan University of Technology, Iran) ........................................ 2211

Range Migrating Target Detection in Correlated Compound-Gaussian Clutter
Nikita Petrov (Delft University of Technology, The Netherlands), François Le Chevalier (TU Delft, The Netherlands), Nikola Bogdanović (Delft University of Technology, The Netherlands), Alexander Yarovoy (TU Delft, The Netherlands) ........................................ 2216

Random Phase Center Motion Technique for Enhanced Angle-Doppler Discrimination Using MIMO Radars
Christian Hammes (University of Luxembourg, Luxembourg), Bhavani Shankar Mysore R (Interdisciplinary Centre for Security, Reliability and Trust & University of Luxembourg, Luxembourg), Yogesh Nijasure (University of Luxembourg, Luxembourg), Thimeo Spielmann (IEE, Luxembourg), Björn Ottersten (University of Luxembourg, Luxembourg) .... 2221

Hybrid Optimization Method for Cognitive and MIMO Radar Code Design
Tuomas Aittomäki (Aalto University, Finland), Visa Koivunen (Aalto University, Finland) ........ 2226

Array Spatial Thinning for Interference Mitigation by Semidefinite Programming
Hamed Nosrati (University of New South Wales & Data61, CSIRO, Australia), Elias Aboutanios (University of New South Wales, Australia), David B Smith (Data61 CSIRO & Australian National University, Australia) ...................................................................................... 2230

Signal Processing for Communications

Boosting LINC Systems Combiners Efficiency Through Ring-type Magnitude Modulation
Mário Castanheira (Instituto de Telecomunicações & University of Coimbra, Portugal), António Simões (Instituto de Telecomunicações & University of Coimbra, Portugal), Marco A. C. Gomes (University of Coimbra, Portugal), Rui Dinis (Faculdade de Ciências e Tecnologia, University Nova de Lisboa & FCT-UNL, Portugal), Vitor Silva (Institute of Telecommunications, Portugal) .......................................................................................................................... 2235

A Novel Channel Estimation Scheme for Multicarrier Communications with the Type-I Even Discrete Cosine Transform
Elena Domínguez-Jiménez (Universidad Politecnica de Madrid, Spain), David Luengo (Universidad Politecnica de Madrid (UPM), Spain), Gabriela Sansigre (Politechnical University of Madrid, Spain), Fernando Cruz-Roldán (Universidad Alcalá, Spain) .......................................................... 2239

Prequalification of VDSL2 Customers for G.fast Services
Driton Statovci (TU Wien, Austria), Martin Wolkerstorfer (TU Wien, Austria), Sandra Drakulić (Technische Universität Wien (TU Wien), Austria) ........................................................................ 2244
Special Session on Cooperative and Distributed Algorithms for Signal Processing and Self-Organization over Wireless Ad-Hoc/Sensor Networks

Coordinate-Descent Adaptation over Networks
Chengcheng Wang (Nanyang Technological University & Harbin Engineering University, Singapore), Yonggang Zhang (Harbin Engineering University, P.R. China), Bicheng Ying (University of California, Los Angeles, USA), Ali H. Sayed (University of California, Los Angeles, USA) .......................................................................................................................... 2284

Distributed Recursive Least Squares Strategies for Adaptive Reconstruction of Graph Signals
Paolo Di Lorenzo (University of Perugia, Italy), Elvin Isufi (Delft University of Technology, The Netherlands), Paolo Banelli (University of Perugia, Italy), Sergio Barbarossa (Sapienza University of Rome, Italy), Geert Leus (Delft University of Technology, The Netherlands) .......................................................................................................................... 2289

Distributed Dictionary Learning via Projections onto Convex Sets
Dimitris Ampliotti (University of Patras & Research Academic Computer Technology Institute, Greece), Christos Mavrokefalidis (University of Patras, Greece), Kostas Berberidis (University of Patras, Greece) .......................................................................................................................... 2294

Adaptive Diffusion-Based Track Assisted Multi-Object Labeling in Distributed Camera Networks
Freweyni K Teklehaymanot (Darmstadt University of Technology, Germany), Michael Muma (Darmstadt University of Technology, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) .......................................................................................................................... 2299
Distributed Efficient Multimodal Data Clustering
Jia Chen (University of Minnesota, USA), Ioannis Schizas (University of Texas at Arlington, USA) .......................................................... 2304

Audio and Speech Source Separation/Signal Enhancement and Restoration

Speech Enhancement Using Modulation-Domain Kalman Filtering with Active Speech Level Normalized Log-Spectrum Global Priors
Nikolaos Dionelis (Imperial College London, United Kingdom (Great Britain)), Mike Brookes (Imperial College London, United Kingdom (Great Britain)) .......................................................... 2309

Multiple Far Noise Suppression in a Real Environment Using Transfer-Function-Gain NMF
Yutaro Matsui (University of Tsukuba, Japan), Shoji Makino (University of Tsukuba, Japan), Nobutaka Ono (National Institute of Informatics, Japan), Takeshi Yamada (University of Tsukuba, Japan) .......................................................... 2314

Antarctic Blue Whale Calls Detection Based on an Improved Version of the Stochastic Matched Filter
Léa Bouffaut (Naval Academy Research Institute, France), Richard Dréo (Naval Academy Research Institute, France), Valérie Labat (Naval Academy Research Institute, France), Abdel-Ouahab Boudraa (Ecole Navale, France), Guilhem Barrou (Lab. de GéoSciences de la Réunion - Institut de Physique du Globe de Paris, France) .......................................................... 2319

Performance Evaluation of Nonlinear Speech Enhancement Based on Virtual Increase of Channels in Reverberant Environments
Kouei Yamaoka (University of Tsukuba, Japan), Shoji Makino (University of Tsukuba, Japan), Nobutaka Ono (National Institute of Informatics, Japan), Takeshi Yamada (University of Tsukuba, Japan) .......................................................... 2324

Independent Vector Analysis with Frequency Range Division and Prior Switching
Rintaro Ikeshita (Hitachi, Ltd., Japan), Yohsei Kawaguchi (Hitachi, Ltd., Japan), Masahto Togami (Hitachi America, Ltd., USA), Yusuke Fujita (Hitachi, Ltd., Japan), Kenji Nagamatsu (Hitachi, Ltd., Japan) .......................................................... 2329

Biomedical Signal and Image Processing

Surgical Tool Tracking by On-line Selection of Structural Correlation Filters
Daniel Wesierski (Gdansk University of Technology, Poland), Anna Jezierska (Systems Research Institute, Polish Academy of Science, Poland) .......................................................... 2334

MoveHN-A Database to Support the Development of Motion Based Biosignal Processing Systems
Andreas Kitzig (Niederrhein University of Applied Sciences, Germany), Stefan Schröter (Niederrhein University of Applied Sciences, Germany), Edwin Naroska (University of Applied Sciences Niederrhein, Germany), Gudrun Stockmanns (Niederrhein University of Applied Sciences, Germany), Reinhard Viga (University of Duisburg-Essen, Germany), Anton Grabmaier (University of Duisburg-Essen, Germany) .......................................................... 2339

Nonconvulsive Epileptic Seizures Detection Using Multiway Data Analysis
Yissel Rodríguez Aldana (Universidad de Oriente & KU Leuven, Cuba), Borbála Hunyadi (KU Leuven, Belgium), Enrique Marañón Reyes (Universidad de Oriente, Cuba), Valia Rodriguez Rodríguez (Cuban Neuroscience Center, Cuba), Sabine Van Huffel (Katholieke Universiteit Leuven, Belgium) .......................................................... 2344

Prognostic Prediction of Histopathological Images by Local Binary Patterns and RUSBoost
Jarle Urdal (University of Stavanger, Norway), Kjersti Engan (University of Stavanger, Norway), Veibjørn Kvistad (Stavanger University Hospital, Norway), Emilius A.M. Janssen (Stavanger University Hospital, Norway) .......................................................... 2349

Differential SART for sub-Nyquist Tomographic Reconstruction in Presence of Misalignments
Florian Roemer (Ilmenau University of Technology, Germany), Marcus Grossmann (Fraunhofer Institute for Integrated Circuits IIS, Germany), Tobias Schön (Fraunhofer Institute for Integrated Circuits IIS, Germany), Roland Gruber (Fraunhofer Institute for Integrated Circuits IIS, Germany), Alexander Jung (Fraunhofer Institute for Integrated Circuits IIS, Germany), Steven Oechl (Fraunhofer Institute for Integrated Circuits IIS, Germany), Giovanni Del Galdo (Fraunhofer Institute for Integrated Circuits IIS & Technische Universität Ilmenau, Germany) .......................................................... 2354
Signal Processing for Education

Teaching Multi-Core DSP Implementation on EVM C6678 Board
Aleksei Kharin (Ryazan State Radio Engineering University, Russia), Sergey Vityazev (Ryazan State Radio Engineering University, Russia), Vladimir Vityazev (Ryazan State Radio Engineering University, Russia) ......................................................... 2359

Raspberry Pi for Image Processing Education
Julien Marot (Institut Fresnel, France), Salah Bourennane (Ecole Centrale Marseille & Fresnel Institute, France) ........................................................................................................ 2364

Real Life Radio-Location Examples for Enhanced Signal Processing Teaching
François Vincent (ISAE, France), Eric Chaumette (ISAE, France), Olivier Besson (ISAE, France) ........................................................................................................ 2369

Telecom Showcase: An Exhibition of Old Technology Useful for Students and Teachers
Eric J. Grivel (Université de Bordeaux, France), Susan Medina (Bordeaux INP, France), Francine Krief (University of Bordeaux, France), Jean-Rémy Fallier (Bordeaux INP, France), Guillaume Ferré (University of Bordeaux, France), Laurent Réveillé (LaBRI/INRIA, France), Daniel Négru (University of Bordeaux, France) ................................................. 2373

Image, Video and Multimedia Processing

Unmixing Multitemporal Hyperspectral Images Accounting for Smooth and Abrupt Variations
Pierre-Antoine Thouvenin (University of Toulouse & INP/ENSEEIHT, France), Nicolas Dobigeon (University of Toulouse, France), Jean-Yves Tournier (University of Toulouse & ENSEEIHT, France) ........................................................................................................ 2378

Image Deblurring Using a Perturbation-Based Regularization Approach
Abdulrahman Alanazi (King Abdullah University of Science and Technology, Saudi Arabia), Tariq Ballal (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Mudassir Masood (King Fahd University of Petroleum and Minerals (KFUPM), Saudi Arabia), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA) ...... 2383

Design of Orthonormal Haar-like Features for Fast Pattern Matching
Izumi Ito (Tokyo Institute of Technology, Japan), Karen Egiazarian (Tampere University of Technology, Finland) ........................................................................................................ 2388

Machine Learning for Automatic Classification of Volcano-Seismic Signatures
Marielle Malfante (Univ Grenoble Alpes, CNRS, GIPSA-Lab, France), Mauro Dalla Mura (Grenoble Institute of Technology, France), Jerome I. Mars (Univ Grenoble Alpes, GIPSA-Lab & Univ Grenoble Alpes, CNRS, GIPSA-Lab, France), Jean-Philippe Métaxian (ISTerre, IRD, France) ........................................................................................................ 2393

Skill Robot Library: Intelligent Path Planning Framework for Object Manipulation
Maria Kyararini (University of Bremen, Germany), Sameer Naem (University of Bremen, Germany), Xingchen Wang (University of Bremen, Germany), Axel Graeser (University of Bremen, Germany) ........................................................................................................ 2398

Sensor Array and Multichannel Signal Processing

Near Field Targets Localization Using Bistatic MIMO System with Symmetric Arrays
Parth Raj Singh (University of Nantes, France), Yide Wang (IREENA, Polytech’Nantes, university of Nantes, France), Pascal Chargé (Université de Nantes, France) ......................................................... 2403

Near Field Targets Localization Using Bistatic MIMO System with Spherical Wavefront Based Model
Parth Raj Singh (University of Nantes, France), Yide Wang (IREENA, Polytech’Nantes, university of Nantes, France), Pascal Chargé (Université de Nantes, France) ......................................................... 2408

Sub-Antenna Sparse Processing for Coherence Loss in Underwater Source Localization
Riwal Lefort (Ensta Bretagne, France), Angélique Drémeau (ENSTA Bretagne, France) ........ 2413

Precision Analysis of the Imaging Pipeline in the Square Kilometre Array
Anthony Griffin (AUT, New Zealand), Nicolas Pradel (AUT, New Zealand), Brody Radford (AUT, New Zealand), David I Wilson (Auckland University of Technology, New Zealand), Andrew Ensor (AUT, New Zealand) ........................................................................................................ 2418
Osama Bushnaq (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Sundeep Prabhakar Chepuri (Delft University of Technology, The Netherlands), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA), Geert Leus (Delft University of Technology, The Netherlands) ........................................................................................................ 2423

Separation of Vibration-Derived Sound Signals Based on Fusion Processing of Vibration Sensors and Microphones
Ryoichi Takashima (Central Research Laboratory, Hitachi, Ltd., Japan), Yohei Kawaguchi (Research and Development Group, Hitachi, Ltd., Japan), Masahito Togami (Central Research Laboratory, Hitachi, Ltd., Japan) ........................................................................................................ 2428

Performance Improvement for Wideband Beamforming with White Noise Reduction Based on Sparse Arrays
Mohammad Reza Anbiyaei (University of Sheffield, United Kingdom (Great Britain)), Wei Liu (University of Sheffield, United Kingdom (Great Britain)), Desmond McLernon (The University of Leeds, United Kingdom (Great Britain)) ....................................................................................................... 2433

Blind Spatial Sound Source Clustering and Activity Detection Using Uncalibrated Microphone Array
Keisuke Nakamura (Honda Research Institute Japan Co., Ltd., Japan), Takeshi Mizuno (HRI-JP, Japan) ........................................................................................................ 2438

Space-Time CUSUM for Distributed Quickest Detection Using Randomly Spaced Sensors Along a Path
Daniel Egea-Roca (Universitat Autònoma de Barcelona, Spain), Gonzalo Seco-Granados (Universitat Autonoma de Barcelona, Spain), José A. López-Salcedo (Universitat Autònoma de Barcelona, Spain), Sunwoo Kim (Hanyang University, Korea) ........................................................................................................ 2443

Enhancing Polynomial MUSIC Algorithm for Coherent Broadband Sources Through Spatial Smoothing
William Coventry (University of Strathclyde, United Kingdom (Great Britain)), Carmine Clemente (University of Strathclyde, United Kingdom (Great Britain)), John J Soraghan (University of Strathclyde, United Kingdom (Great Britain)) ........................................................................................................ 2448

A Low-Complexity Equalizer for Massive MIMO Systems Based on Array Separability
Lucas N Ribeiro (Federal University of Ceará, Brazil), Stefan Schwarz (TU Wien, Austria), Markus Rupp (TU Wien, Austria), André de Almeida (Federal University of Ceará & Wireless Telecom Research Group - GTEL, Brazil), Joao Cesar Moura Mota (UFC, Brazil) ............................................................................. 2453

Design of Pre-coding and Combining in Hybrid Analog-Digital Massive MIMO with Phase Noise
Roberto Corvaja (University of Padova, Italy), Ana Garcia Armada (Universidad Carlos III de Madrid, Spain), Miguel Angel Vázquez (Centre Tecnològic de les Telecomunicacions de Catalunya (CTTC/CERCA), Spain), Ana Pérez-Neira (CTTC, Spain) ........................................................................................................ 2458

Signal and Image Processing Applications

Distributed Approach for Deblurring Large Images with Shift-Variant Blur
Rahul Mourya (Télécom ParisTech, Université Paris-Saclay & LTCI, France), André Ferrari (Université de Nice Sophia-Antipolis, France), Rémi Flamary (Université de Nice Sophia-Antipolis & Laboratoire Lagrange, UMR CNRS, France), Pascal Bianchi (Telecom Paris Tech - LTCI, France), Cédric Richard (Université de Nice Sophia-Antipolis, France) ........................................................................................................ 2463

Astronomical Image Reconstruction with Convolutional Neural Networks
Rémi Flamary (Université de Nice Sophia-Antipolis & Laboratoire Lagrange, UMR CNRS, France) ........................................................................................................ 2468

A Smartphone-based Indoor Localisation System Using FM and Wi-Fi Signals
Anirban Mukhopadhyay (Indian Institute of Technology Delhi, India), Praveen Rajput (Indian Institute of Technology Delhi, India), Seshan Srirangarajan (Indian Institute of Technology Delhi, India) ........................................................................................................ 2473

Computationally Efficient Heart Rate Estimation During Physical Exercise Using Photoplethysmographic Signals
Tim Schäck (Technische Universität Darmstadt, Germany), Michael Muma (Darmstadt University of Technology, Germany), Abdelhak M Zoubir (Darmstadt University of Technology, Germany) ........................................................................................................ 2478
Adaptive Time Corrected Gain for Ultrasound Through Time-Varying Wiener Deconvolution
Daniel Rodrigues Pipa (Universidade Tecnológica Federal do Paraná, Brazil), Giovanni Alfredo Guarneri (Universidade Tecnológica Federal do Paraná, Brazil), Hector Lise de Moura (Federal University of Technology - PR, Brazil) ........................................................................ 2482

Joint Subsample Time Delay and Echo Template Estimations for Ultrasound Signals
Ernesto Williams Antelo, Jr (Universidade Tecnológica Federal do Paraná, Brazil), Daniel Rodrigues Pipa (Universidade Tecnológica Federal do Paraná, Brazil) ........................................................................ 2486

SAR Deception Jamming Target Recognition Based on the Shadow Feature
Xinxin Tang (University of Electronic Science and Technology of China, P.R. China), Xiaoling Zhang (University of Electronic Science and Technology of China, P.R. China), Jun Shi (University of Electronic Science and Technology of China, P.R. China), Shunjun Wei (University of Electronic Science and Technology of China, P.R. China), Lei Yu (University of Electronic Science and Technology of China, P.R. China) ........................................................................ 2491

A Blind Deconvolution Approach to Discontinuity Location and Characterization in Ultrasonic Nondestructive Testing
Giovanni Alfredo Guarneri (Universidade Tecnológica Federal do Paraná, Brazil), Daniel Rodrigues Pipa (Universidade Tecnológica Federal do Paraná, Brazil), Flávio Neves Jr. (Universidade Tecnológica Federal do Paraná, Brazil), Lúcia Valeria Ramos de Arruda (Universidade Tecnológica Federal do Paraná, Brazil) ........................................................................ 2496

Conjugate-Prior-Regularized Multinomial pLSA for Collaborative Filtering
Marcus Klassen (Lund University, Sweden), Stefan I Adalbjörnsson (Lund University, Sweden), Johan Svärd (Lund University, Sweden), Seren Vang Andersen (Lund University, Sweden) ........................................................................ 2501

Pyramid Encoding for Fast Additive Quantization
Anton Muraviev (Tampere University of Technology, Finland), Ezgi Can Ozan (Tampere University of Technology, Finland), Alexandros Iosifidis (Tampere University of Technology, Finland), Moncef Gabbouj (Tampere University of Technology, Finland) ........................................................................ 2506

Using Deep Learning to Detect Price Change Indications in Financial Markets
Avraam Tsantekidis (Aristotle University of Thessaloniki, Greece), Nikolaos Passalis (Aristotle University of Thessaloniki, Greece), Anastasios Tefas (Aristotle University of Thessaloniki, Greece), Juho Kannainen (Tampere University of Technology, Finland), Moncef Gabbouj (Tampere University of Technology, Finland), Alexandros Iosifidis (Tampere University of Technology, Finland) ........................................................................ 2511

Sound-Environment Monitoring Technique Based on Computational Auditory Scene Analysis
Mitsuru Kawamoto (AIST, Japan) ........................................................................ 2516

Signal Processing for Communications/Internet of Things

CFO and Channel Estimation for MISO-OFDM Systems
Abdelhamid Ladacina (University Paris 13 Sorbonne & L2TI Laboratory, Institut Galilée, France), Karim Abed-Meraim (Polytech'Orléans & University of Sharjah, UAE, France), Ahmed Bader (King Abdullah University of Science & Technology (KAUST), Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ........................................................................ 2521

Rapid Prototyping and FPGA-in-the-Loop Verification of a DFrFT-based OFDM System
Atul Kumar (Politecnico di Milano, Italy), Maurizio Magarini (Politecnico di Milano, Italy), Stefano Olivieri (MathWorks, Italy) ........................................................................ 2526

Optimal Decentralized Coded Caching for Heterogeneous Files
Han Cheng (Shanghai Jiao Tong University, P.R. China), Chenglin Li (EPFL, Switzerland), Hongkai Xiong (Shanghai Jiao Tong University, P.R. China), Pascal Frossard (EPFL, Switzerland) ........................................................................ 2531

Interference MAC: Impact of Improper Gaussian Signaling on the Rate Region Pareto Boundary
Ali Kariminezhad (RUB, Germany), Anas Chaaban (King Abdullah University of Science and Technology, Saudi Arabia), Aydin Sezgin (RUB, Germany) ........................................................................ 2536

Constant Modulus Beamforming for Large-Scale MISOME Wiretap Channel
Qiang Li (University of Electronic Science and Technology of China, P.R. China), Chao Li (University of Electronic Science and Technology of China, P.R. China), Jingran Lin (University of Electronic Science and Technology of China, P.R. China) ........................................................................ 2541

Robust Precoding Scheme for Multi-user MIMO Visible Light Communication System
Zhirong Zeng (Jinan University, P.R. China), Huiqin Du (Jinan University, P.R. China) ........................................................................ 2546
A Continuous Cost Function for the Reconstruction of Wired Networks from Reflection Measurements
Simon Blum (University of Stuttgart, Germany), Michael Ulrich (University of Stuttgart, Germany), Bin Yang (University of Stuttgart, Germany) ................................................................. 2551

A New SA-PNC Scheme for Uplink HetNets
Syed Saqlain Ali (University of Aveiro & Instituto de Telecomunicaçoes, Portugal), Daniel Castanheira (Instituto de Telecomunicaçoes (IT)/University of Aveiro, Portugal), Adão Silva (Instituto de Telecomunicaçoes (IT)/University of Aveiro, Portugal), Attilio Gameiro (Telecommunications Institute/Aveiro University, Portugal) ................................................................. 2556

A Robust Signal Quantization System Based on Error Correcting Codes
El jili Fatimetou (University of Reims Champagne Ardenne, France), Gael Mahé (Université Paris Descartes, France), Mamadou Mboup (University Rene Descartes - Paris V, France) ...... 2561

Multi-TOA Based Position Estimation for IR-UWB
Genís Floriach (Universitat Politècnica de Catalunya, Spain), Montse Nájar (Universitat Politècnica de Catalunya, Spain), Monica Navarro (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain) ............................................................................. 2566

Compressive Multispectral Model for Spectrum Sensing in Cognitive Radio Networks
Jeison Marín (Universidad Pontificia Bolivariana, Colombia), Henry Arguello Fuentes (Universidad Industrial de Santander, Colombia), Leonardo Betancur (Universidad Pontificia Bolivariana, Colombia), José ignacio Martinez (Universidad Rey Juan Carlos, Spain) ..................................................................................................................... 2571

Non-Binary Turbo-Coded OFDM-PLC System in the Presence of Impulsive Noise
Wael Abd Alaziz (Newcastle University, United Kingdom (Great Britain)), Zhen Mei (Singapore University of Technology & Design, Singapore), Martin Johnston (Newcastle University, United Kingdom (Great Britain)), Stephane Le Goff (Newcastle University, United Kingdom (Great Britain)) ..................................................................................................................... 2576

RAKE: a Simple and Efficient Lossless Compression Algorithm for the Internet of Things
Giuseppe Campobello (University of Messina, Italy), Antonino Segreto (University of Messina, Italy), Sarah Zanafi (Faculty of Science Tetouan, University Abdelmalek Essaadi, Morocco), Salvatore Serrano (University of Messina, Italy) ..................................................................................................................... 2581

Collision and Packet Loss Analysis in a LoRaWAN Network
Guillaume Ferré (University of Bordeaux, France) ..................................................................................................................... 2586

Trust-based Strategies for Wireless Networks Under Partial Monitoring
Konstantinos Ntemos (University of Athens, Greece), Nicholas Kalouptsidis (National and Kapodistrian University of Athens, Greece), Nicholas Kolokotronis (University of Peloponnese, Greece) ..................................................................................................................... 2591

--- Special Session on Sparsity and Low Rank Minimization Based Techniques for Wireless Communications ---

Modeling and Estimation of Massive MIMO Channel Non-Reciprocity: Sparsity-aided Approach
Orod Raeesi (Tampere University of Technology, Finland), Ahmet Gokceoglu (Tampere University of Technology, Finland), Paschalis C. Sofotasios (Khalifa University & Tampere University of Technology, Finland), Markku K. Renfors (Tampere University of Technology, Finland), Mikko Valkama (Tampere University of Technology, Finland) ..................................................................................................................... 2596

Performance Evaluation of Adaptive Filters for Sparse Wireless Channel Estimation
Markus V. S. Lima (Universidade Federal do Rio de Janeiro, Brazil), Tadeu Ferreira (Fluminense Federal University, Brazil), Wallace A. Martins (Federal University of Rio de Janeiro, Brazil), Marcele O K Mendonça (UFRJ, Brazil), Paulo Diniz (Universidade Federal do Rio de Janeiro, Brazil) ..................................................................................................................... 2601

A Fast Matrix Completion Method for Index Coding
Ehsan Asadi Kangarshahi (Sharif University of Technology, Iran), Shayan Aziznejad (Sharif University of Technology, Iran), Mohammad Amerimehr (Iran Telecommunication Research Center, Iran), Arash Amini (Sharif University of Technology, Iran) ..................................................................................................................... 2606

Compressed Sensing Technique for Synchronization and Channel Estimation in OFDMA Uplink Transmissions
Rifat Volkan Senyuva (Netas Telecommunications Inc., Turkey), Gunes Karabulut Kurt (Istanbul Technical University, Turkey), Emin Anarim (Bogazici University, Turkey) ..................................................................................................................... 2611
Adaptive Signal Processing Algorithms

An NLMS Algorithm for the Identification of Bilinear Forms
Constantin Paleologu (University Politehnica of Bucharest, Romania), Jacob Benesty (INRS-EMT, University of Quebec, Canada), Silviu Ciochina (University Politehnica of Bucharest, Romania) .......................................................... 2620

Quaternion Adaptive Line Enhancer
Saeid Sanei (University of Surrey, United Kingdom (Great Britain)), Clive Cheong Took (University of Surrey, United Kingdom (Great Britain)), Shirin Enshaeifar (University of Surrey, United Kingdom (Great Britain)), Tracey Lee (Singapore Polytechnic & Monash University, Singapore) .................................................................. 2625

Low-complexity Approximation to the Kalman Filter Using Convex Combinations of Adaptive Filters from Different Families
Raffaello Claser (University of São Paulo, Brazil), Vitor H Nascimento (USP, Brazil) .............. 2630

A Design Methodology for the Gaussian KLMS Algorithm
Pedro Pedrosa (Instituto de Telecomunicações - Lisboa, Portugal & Universidade Federal de Santa Catarina, Brazil), Jose Carlos Moreira Bermudez (Federal University of Santa Catarina, Brazil), Cédric Richard (Université de Nice Sophia-Antipolis, France) ........................................ 2634

Quasi-Newton Least-Mean Fourth Adaptive Algorithm
Umair bin Mansoor (KFUPM, Saudi Arabia), Qadri Mayyala (King Fahd University of Petroleum and Minerals, Saudi Arabia), Muhammad Moinuddin (King Abdul Aziz University, Saudi Arabia), Azzedine Zerguine (KFUPM, Saudi Arabia) .................................................................. 2639

Special Session on Networks in Bio-imaging

The Impact of Diverse Preprocessing Pipelines on Brain Functional Connectivity
Eva Výtvarová (Masaryk University, Czech Republic), Jan Fousek (Masaryk University & Faculty of Informatics, Czech Republic), Marek Bartoň (CEITEC, Masaryk University, Czech Republic), Radek Mareček (CEITEC, Masaryk University, Brno, Czech Republic), Martin Gajdoš (CEITEC, Masaryk University, Czech Republic), Martin Lamoš (Brno University of Technology, Czech Republic), Marie Nováková (CEITEC, Masaryk University, Czech Republic), Tomáš Slaviček (CEITEC, Masaryk University, Czech Republic), Igor Peterlik (Masaryk University, Czech Republic), Michal Mikl (CEITEC MU, Masaryk University, Czech Republic) .................................................................. 2644

Fine-scale Patterns Driving Dynamic Functional Connectivity Provide Meaningful Brain Parcellations
Maria Giulia Preti (Ecole Polytechnique Fédérale de Lausanne (EPFL) / Université de Genève, Switzerland), Dimitri Van De Ville (Ecole Polytechnique Fédérale de Lausanne, Switzerland) ........................................................................ 2649

Lattice Boltzmann Method for Modelling of Biological Phenomena
Romain Noel (EMSE, France), Fei Ge (INS A Lyon, France), Yue Zhang (Veterans Affairs Medical Center, France), Laurent Navarro (EMSE, France), Guy Courbebaisse (Institut National des Sciences Appliquées de Lyon, France) .................................................. 2654

Automated Analysis of Collagen Networks via Microscopy
Alejandro Suñe-Auñon (Universidad Carlos III de Madrid & Instituto de Investigación Sanitaria Gregorio Marañon, Spain), Mario Gonzalez-Arjona (Universidad Carlos III de Madrid & Instituto de Investigación Sanitaria Gregorio Marañon, Spain), Alejandro Vidal (Universidad Carlos III de Madrid, Spain), Javier Lanillos (Universidad Carlos III de Madrid, Spain), Arrate Muñoz-Barrutia (Universidad Carlos III de Madrid & Instituto de Investigación Sanitaria Gregorio Marañon, Spain) .................................................................. 2659

On the Value of Graph-based Segmentation for the Analysis of Structural Networks in Life Sciences
Denis Bujoreanu (CREATIS, France), Pejman Rasti (INRA, IRHS, University of Angers, France), David Rousseau (Université Lyon 1, France) .............................................................................. 2664
Special Session on Novel Advances on Linear-in-the-Parameters Nonlinear Filters and Their Applications

*Generalized CMAC Adaptive Ensembles for Concept-Drifting Data Streams*
Francisco Javier Gonzalez Serrano (Universidad Carlos III de Madrid, Spain), Anibal R Figueiras-Vidal (Universidad Carlos III de Madrid, Spain) .......................................................... 2669

*Recursive Multikernel Filters Exploiting Nonlinear Temporal Structure*
Steven Van Vaerenbergh (University of Cantabria, Spain), Simone Scardapane (Sapienza University of Rome, Italy), Ignacio Santamaria (University of Cantabria, Spain) ........................................ 2674

*Multivariance Nonlinear System Identification Using Wiener Basis Functions and Perfect Sequences*
Simone Orcioni (Università Politecnica delle Marche, Italy), Stefania Cecchi (Università Politecnica delle Marche, Italy), Alberto Carini (University of Urbino, Italy) ........................................ 2679

*Modification of Second-Order Nonlinear IIR Filter for Compensating Linear and Nonlinear Distortions of Electrodynamic Loudspeaker*
Kenta Iwai (Kansai University, Japan), Yoshinobu Kajikawa (Kansai University, Japan) .............. 2684

*Steady-State Analysis of the Maximum Correntropy Volterra Filter with Application to Nonlinear Channel Equalization*
Lu Lu (Southwest Jiaotong University, P.R. China), Haiquan Zhao (Southwest Jiaotong University, P.R. China), Benoit Champagne (McGill University, Canada) ......................................................... 2689

*Collaborative Adaptive Exponential Linear-in-the-parameters Nonlinear Filters*
Vinal Patel (Indian Institute of Technology Gandhinagar, India), Somanath Pradhan (Indian Institute of Technology Gandhinagar, India), Nithin V George (IIT Gandhinagar, India) .......................................................... 2694

Special Session on Positioning in Challenging Environments

*Performance Analysis of Multi-frequency GNSS Carrier Tracking for Strong Ionospheric Scintillation Mitigation*
Jordi Vilà-Valls (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC/CERCA), Spain), Pau Closas (Northeastern University, USA), James T Curran (University College Cork, Italy) ...................................................................................................................... 2699

*NLOS Identification and Compensation for UWB Ranging Based on Obstruction Classification*
Kai Wen (Wuhan University, P.R. China), Kegen Yu (Wuhan University, P.R. China), Yingbing Li (Wuhan University, P.R. China) ...................................................................................................................... 2704

*An Empirical Study on Gamma Shadow Fading Based Localization*
Salih Büyükçorak (Istanbul Technical University, Turkey), Gunes Karabulut Kurt (Istanbul Technical University, Turkey), Abbas Yongacoglu (University of Ottawa, Canada) ...................................................................................................................... 2709

*A Collaborative Method for Positioning Based on GNSS Inter Agent Range Estimation*
Alex Minetto (Politecnico di Torino, Italy), Calogero Cristodaro (Politecnico di Torino, Italy), Fabio Dovis (Politecnico di Torino, Italy) ...................................................................................................................... 2714

*Ranging Precision Analysis of LTE Signals*
Kimia Shamaei (University of California, Riverside, USA), Joe Khalife (University of California, Riverside, USA), Zaher Kassas (University of California, Riverside, USA) ............... 2719

*Robust Time-Of-Arrival Estimation in Multipath Channels with OFDM Signals*
Oded Bialer (University of Tel-Aviv, Israel), Dan Raphaeli (Tel Aviv University, Israel), Anthony J. Weiss (Tel Aviv University, Israel) ...................................................................................................................... 2724

Special Session on Computational Methods for Audio Analysis

*On the Feasibility of Personal Audio Systems over a Network of Distributed Loudspeakers*
Gema Piñero (Universitat Politècnica de València, Spain), Carmen Botella (University of Valencia, Spain), María de Diego (Universitat Politècnica De València, Spain), Miguel Ferrer (Universidad Politècnica de Valencia, Spain), Alberto Gonzalez (Universidad Politècnica de Valencia, Spain) ...................................................................................................................... 2729
Glottal Mixture Model (GLOMM) for Speaker Identification on Telephone Channels
Paul M Baggenstoss (Fraunhofer FKIE, Germany), Kevin Wilkinghoff (Fraunhofer FKIE, Germany), Frank Kurth (Fraunhofer FKIE, Germany) ................................................................. 2734

What Makes Audio Event Detection Harder than Classification?
Huy Phan (University of Lübeck, Germany), Philipp Koch (University of Lübeck, Germany), Fabrice Katzberg (University of Lübeck, Germany), Marco Maass (University of Lübeck, Germany), Radoslaw Mazur (University of Luebeck, Germany), Ian McLoughlin (University of Kent, United Kingdom (Great Britain)), Alfred Mertins (Institute for Signal and Image Processing, University of Luebeck, Germany) ................................................................. 2739

Timbre Analysis of Music Audio Signals with Convolutional Neural Networks
Jordi Pons (Universitat Pompeu Fabra, Spain), Olga Slizovskaia (Universitat Pompeu Fabra, Spain), Rong Gong (Universitat Pompeu Fabra, Spain), Emilia Gomez (Universitat Pompeu Fabra, Spain), Xavier Serra (University Pompeu Fabra, Spain) ................................................................. 2744

A Hybrid Approach with Multi-channel I-Vectors and Convolutional Neural Networks for Acoustic Scene Classification
Hamid Eghbal-zadeh (Johannes Kepler University, Austria), Bernhard Lehner (Johannes Kepler University, Austria), Matthias Dorfer (Johannes Kepler University, Austria), Gerhard Widmer (Johannes Kepler University Linz, Austria) ................................................................. 2749

A Neural Network Approach for Sound Event Detection in Real Life Audio
Michele Valenti (Marche Polytechnic University, Italy), Dario Tonelli (Universitá Politecnica delle Marche, Italy), Fabio Vesperini (Marche Polytechnic University, Italy), Emanuele Principi (Universitá Politecnica delle Marche & A3Lab, Italy), Stefano Squartini (Universitá Politecnica delle Marche, Italy) ................................................................. 2754
