**Internet of Things**

*Handover Performance Prioritization for Public Safety and Emergency Networks*
Rahul Paropkari (University of Missouri-Kansas City, USA), Cory Beard (University of Missouri-Kansas City, USA), Appie van de Liefvoort (University of Missouri-Kansas City, USA) .................................................. 1

*Cooperative Trajectory Planning in an Intercommunicating Group of UAVs for Convex Plume Wrapping*
Angelyn Arputha Babu John (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA) .................................................................................................. 7

*ViLDAR: A Novel Speed Estimation System using Visible Light in Vehicles*
Hisham Abuella (Oklahoma State University, USA), Sabit Ekin (Oklahoma State University, USA), Murat Uysal (Ozyegin University, Turkey) ................................................................................. 13

*A Spectrally Efficient Algorithm for Massive MIMO for Mitigating Pilot Contamination*
Seshadri Mohan (University of Arkansas at Little Rock, USA), Aqiel Almamori (University of Arkansas at Little Rock, USA) ........................................................................................................ 19

**Emerging Channels and Networks**

*Evaluation of Ultra-Wideband Radio for Industrial Wireless Control*
Daniel King (University of New Brunswick, Canada), Bradford G. Nickerson (University of New Brunswick, Canada), Wei Song (University of New Brunswick, Canada) ............................................. 24

*Adaptive Power Management in Wireless Powered Communication Networks: A User-Centric Approach*
Panagiotis Vamvakas (National Technical University of Athens, Greece), Eirini Eleni Tsiropoulou (University of New Mexico, USA), Marinos Vomvas (National Technical University of Athens, Greece), Symeon Papavassiliou (National Technical University of Athens, Greece) .......................................................... 30

*Low-Complexity Memory-Assisted Adaptive-Threshold Detection Scheme for On-OFF-Keying Diffusion-Based Molecular Communications*
Ghalib Alshammri (Stevens Institute Of Technology, USA), Mohammed Alzaidi (Stevens Institute of Technology, USA), Walid Ahmed (Broadcom Inc., USA), Victor Lawrence (Stevens Institute of Technology, USA) .................................................................................. 36

*A First Look at Performance of TV Streaming Sticks*
Ayon Chakraborty (Stony Brook University, USA), Arani Bhattacharya (Stony Brook University, USA), Santosh Ghosh (Stony Brook University, USA), Samir Das (Stony Brook University, USA) ..................................................................................................... 42

**Communications Channels**

*On Channel Rate Discovery for Discrete Memoryless Binary Output Channels*
Michael Tope (Laboratory for Telecommunication Sciences, USA), Joel M. Morris (University of Maryland, Baltimore County, USA) ................................................................. 48
Programmable Low-Complexity Linear Frequency Discriminator for Microwave Photonic Links (Invited)
Benjamin Dingel (Nasfine Photonics Incorporated, USA) ................................................................. 54

Improved GFDM Equalization in Severe Frequency Selective Fading
Matt Carrick (Virginia Tech, USA), Jeffrey Reed (Virginia Tech, USA) ........................................ 60

A Novel Closed-form of ASEP and Channel Capacity with MRC over η - μ IG Distribution
Vidhi Rana (G B Pant Engineering College, Pauri, Uttarakhand, India, India), Rohit Joshi (GB Pant Engineering College, Pauri, Uttarakhand, INDIA, India), Sanjay Soni (Indian Institute of Technology, Kharagpur India, India) ................................................................. 66

Network Architecture and Operations

Virtual Machine Migration in heterogeneous Clouds: From OpenStack to VMWare
Dimitrios Kargatzis (Technical University of Crete, Greece), Stelios Sotiriadis (University of Toronto, Canada), Euripides G.M. Petrakis (Technical University of Crete (TUC), Greece) ......................................................... 71

iRP: Intelligent Rendezvous Point for Multicast Control Plane
Ammar Latif (New Jersey Institute of Technology, USA), Pradeep Kathail (Cisco, USA), Sachin Vishwarupe (Cisco Systems, USA), Subha Dhesikan (Cisco Systems, USA), Abdallah A Khreishah (New Jersey Institute of Technology, USA) .................................................................................................................. 77

Minimum Network Migration Cost and Duration
Hamed Pouya (Concordia University, Canada), Brigitte Jaumard (Concordia University, Canada), Catherine Preston-Thomas (CIENA, Canada) .................................................................................................................. 83

Toward Realizing Choice-based Co-Optimizable Networking Paradigm
Robinson Udechukwu (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA), Takaya Miyazawa (National Institute of Information and Communications Technology (NICT), Japan), Hiroaki Harai (National Institute of Information and Communications Technology, Japan) .................................................................................................................. 89

Security

Collaborative Botnet Detection with Partial Communication Graph Information
Harshvardhan P Joshi (North Carolina State University, USA), Matthew Bennison (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA) ............................................. 95

Performance Analysis of a Mobile receiver in a Field of Poisson Interferers
Constantine Mukasa (Florida Atlantic University, USA), Valentine Aalo (Florida Atlantic University, USA), George Efthymoglou (University of Piraeus, Greece) .................................................................................................................. 101

Investigating the Impact of Media Coverage on Data Breach Fatigue
Susanne Wetzel (Stevens Institute of Technology, USA), Guenther Reitberger (Universitaet Passau, Germany) .................................................................................................................. 107
