2017 13th European Dependable Computing Conference
EDCC 2017

Table of Contents

Message from General Chair .....................................................................................................................ix
Message from Program Chair ..................................................................................................................x
Conference Organization ...........................................................................................................................xi
Program Committee ...................................................................................................................................xii
Steering Committee ...................................................................................................................................xiii
Reviewers ...................................................................................................................................................xiv

Keynotes

Blockchains and Consensus Protocols: Snake Oil Warning ................................................................. 1
    Christian Cachin

It is a Disruptive World with Exponential Development: Expected Trends in Embedded Systems, with a Special Focus on the Automotive Industry and Its Likely Effects on Industry and Society ................................................................. 3
    Andreas Eckel

Industrial Track

Advancing Fault Injection and Dependability Evaluation in the Software-Driven Telecom Industry ................................................................. 5
    Roberto Natella

Data Management and Privacy in a World of Data Wealth ..................................................................... 6
    Francisco Maia

ICT and Data-Management for Dependability of Electricity Distribution Grids:
    Opportunities and Barriers .................................................................................................................... 8
    Hans-Peter Schwefel, Walter Schaffer, and Robert Damboeck
**Distinguish Papers**

Accurately Simulating the Effects of Faults in VHDL Models Described at the Implementation-Level  
*Ilya Tuzov, Juan-Carlos Ruiz, and David de Andrés*

Cluster-Based Vulnerability Assessment Applied to Operating Systems  
*Yazdan Movahedi, Michel Cukier, Ambrose Andongabo, and Ilir Gashi*

Preserving Stabilization While Practically Bounding State Space  
*Vidhya Tekken Valapil and Sandeep S. Kulkarni*

**Fault-Tolerance**

Scalable Byzantine Fault Tolerance on Heterogeneous Servers  
*Michael Eischer and Tobias Distler*

Resilience Analysis of Top K Selection Algorithms  
*Ryan Slechta, Laura Monroe, Nathan DeBardeleben, Qiang Guan, Joanne Wendelberger, and Sarah Michalak*

Analysis of Adaptive Fault Tolerance for Resilient Computing  
*William Excoffon, Jean-Charles Fabre, and Michaël Lauer*

**Hardware Architecture**

Computing the Probability for Data Loss in Two-Dimensional Parity RAIDs  
*Lars Nagel and Tim Suess*

Embedded Multi-core System for Design of Next Generation Powertrain Control Units  
*Georg Macher, Markus Bachinger, and Michael Stolz*

**Testing and Validation Methods**

On the Emulation of Vulnerabilities through Software Fault Injection  
*Frederico Cerveira, Raul Barbosa, Marta Mercier, and Henrique Madeira*

Test Program Generator for AUTOSAR OS  
*Kazuto Shigihara, Shinya Honda, and Hiroaki Takada*

Impact of a Fault Management Architecture on the Performance of a Component-Based System  
*Ghazal Zamani and Olivia Das*
Safety-Critical Systems
Using Safety Contracts to Guide the Maintenance of Systems and Safety Cases
Omar Tawfieeq Saleem Jaradat and Iain Bate

Challenges of Safety Assurance for Industry 4.0
Omar Jaradat, Irfan Sljivo, Ibrahim Habli, and Richard Hawkins

An Approach for Designing Knowledge-Based Systems for High-Integrity Applications
Luke Martin and Alexander Romanovsky

Security and Privacy
Privacy and Data Mining: Evaluating the Impact of Data Anonymization on Classification Algorithms
Hebert de Oliveira Silva, Tania Basso, and Regina Lúcia de Oliveira Moraes

SAFETHINGS: Data Security by Design in the IoT
Manuel Barbosa, Sonia Ben Mokhtar, Pascal Felber, Francisco Maia, Miguel Matos, Rui Oliveira, Etienne Riviere, Valerio Schiavoni, and Spyros Voulgaris

On Combining Diverse Static Analysis Tools for Web Security: An Empirical Study
Paulo Nunes, Ibéria Medeiros, José Fonseca, Nuno Neves, Miguel Correia, and Marco Vieira

An Analysis of OpenStack Vulnerabilities
Ivano Alessandro Elia, Nuno Antunes, Nuno Laranjeiro, and Marco Vieira

vepRisk - A Web Based Analysis Tool for Public Security Data
Ambrose Andongabo and Ilir Gashi

Intrusion and Evaluation
Application of Routine Activity Theory to Cyber Intrusion Location and Time
Kevin Bock, Sydnee Shannon, Yazdan Movahedi, and Michel Cukier

Toward an Intrusion Detection Approach for IoT Based on Radio Communications Profiling
Jonathan Roux, Éric Alata, Guillaume Auriol, Vincent Nicomette, and Mohamed Kâaniche

A Prototype Evaluation of a Tamper-Resistant High Performance Blockchain-Based Transaction Log for a Distributed Database
Leonardo Aniello, Roberto Baldoni, Edoardo Gaetani, Federico Lombardi, Andrea Margheri, and Vladimiro Sassone
