
Savannah, Georgia, USA
7-9 November 2017
The 30th IEEE Conference on Software Engineering Education and Training

CSEET 2017

Table of Contents

Introduction .................................................................................................................................................. x
Welcome Message ..................................................................................................................................... xii
Organizing Committee ............................................................................................................................ xiii
Keynote Speakers ..................................................................................................................................... xiv
Workshop Overviews ................................................................................................................................ xvi

Hall of Fame Presentations
CSEE&T 2017 Hall of Fame Nomination: Studio-Based Master of Software Engineering Program at Carnegie Mellon University ........................................................................................................ 1
Grace A. Lewis
Rochester Institute of Technology Bachelor of Science in Software Engineering CSEE&T Hall of Fame Nomination .......................................................................................................................... 3
James R. Vallino
The University of Ottawa Undergraduate Software Engineering Program: Leading and Innovative .............................................................................................................................................................................. 5
Timothy C. Lethbridge, Liam Peyton, Daniel Amyot, and Stéphane Somé
Hall of Fame Nomination Paper: Distributed Software Development Course ........................................... 7
Igor Čavrak, Ivana Bosnić, Mario Zagar, Federico Ciccozzi, Elisabetta Di Nitto, Raffaela Mirandola, and Ivica Crnković

Paper Session 1: Course Design
Applying a Maturity Model during a Software Engineering Course - Experiences and Recommendations ................................................................................................................................................................................. 9
Andreas Bollin, Elisa Reci, Csaba Szabó, Veronika Szabóová, and Rudolf Siebenhofer
The Evolving Perceptions of Sustainability in CS and SE Education: Findings from a Master's Programme ............................................................19
   Jari Porras, Maria Palacin-Silva, and Birgit Penzenstadler

The Use of Industry Training Strategies in a Software Engineering Course: An Experience Report ...........................................................29
   Carlos Portela, Alexandre Vasconcelos, Sandro Oliveira, and Mauricio Souza

Paper Session 2: DevOps and Mobile
DevOpsEnvy: An Education Support System for DevOps .........................................................37
   Guoping Rong, Shenghui Gu, He Zhang, and Dong Shao

A Pilot Study on Introducing Continuous Integration and Delivery into Undergraduate Software Engineering Courses ................................47
   Brian P. Eddy, Norman Wilde, Nathan A. Cooper, Bhavyansh Mishra, Valeria S. Gamboa, Keenal M. Shah, Adrian M. Deleon, and Nikolai A. Shields

Challenge Based Learning Applied to Mobile Software Development Teaching ................57
   Fabio Vinicius Binder, Mark Nichols, Sheila Reinehr, and Andreia Malucelli

Workshop
Crafting the Future of Software Engineering Education in CC2020: A Workshop ........................................................65
   Richard J. LeBlanc, Nancy R. Mead, and John Impagliazzo

Paper Session 3: Project-Based Learning
An Approach for Project Task Approximation in a Large-Scale Software Project Course ..............................................................67
   Birgit Demuth and Marc Kandler

Evolving a Project-Based Software Engineering Course: A Case Study .................................77
   David Delgado, Alejandro Velasco, Jairo Aponte, and Andrian Marcus

Experimenting with Realism in Software Engineering Team Projects: An Experience Report .............................................................87
   Robbie Simpson and Tim Storer

Paper Session 4: Requirements and Projects
On a Pursuit for Perfecting an Undergraduate Requirements Engineering Course ..........................................................97
   Chandan R. Rupakheti, Mark Hays, Sriram Mohan, Stephen Chenoweth, and Amanda Stouder

Using Extreme Characters to Teach Requirements Engineering .................................................107
   Claudia Iacob and Shamal Faily
Work and Play in Software Engineering Training: Experiences from the Silicon Mountain ............................................................112

  Ngatchu Damen Nyinkeu and Henry Ngatchu

Training Software Engineers Using Open-Source Software: The Professors’ Perspective ..........................................................117

  Gustavo Henrique Lima Pinto, Fernando Figueira Filho, Igor Steinmacher, and Marco Aurelio Gerosa

Panel

CSEE&T 2017 Panel Proposal How to Enhance Diversity in Software Engineering Programs? .............................................................122

  Hossein Saiedian, Grace A. Lewis, and Andrew B. Williams

Paper Session 5: Modeling

Model Driven Software Engineering in Education: A Multi-Case Study on Perception of Tools and UML ........................................124

  Grischa Liebel, Omar Badreddin, and Rogardt Heldal

Teaching Conceptual Modeling in Online Courses: Coping with the Need for Individual Feedback to Modeling Exercises ................134

  Marian Daun, Jennifer Brings, Patricia Aluko Obe, Klaus Pohl, Steffen Moser, Hermann Schumacher, and Marcel Rieß

Improving the Teaching of Software Design with Automated Modelling of Syntactic Dependencies .............................................144

  Kevin Steppe, Sally Chin, and Wong Wai Tuck

Paper Session 6: Online and Programming

Initial Evaluation of JaguarCode: A Web-Based Object-Oriented Programming Environment with Static and Dynamic Visualization ................................152

  Jeong Yang, Youlg Lee, and Kai H. Chang

Improving Computer Science Education through Cloud Computing: An Observational Study .........................................................162

  Jorge Edison Lascano and Stephen Wright Clyde

Towards the Role of Test Design in Programming Assignments .................................................................170

  Lilian Passos Scatalon, Jorge Marques Prates, Draylson Micael de Souza, Ellen Francine Barbosa, and Rogério Eduardo Garcia
Panel
Undergraduate Software Engineering Programs .......................................................... 180
Chris Taylor, Kevin Gary, James Kiper, Carol Wellington, Norha M. Villegas,
and Lily Chang

Paper Session 7: Agile and Processes
Ten Years of the Agile Software Factory for Software Engineering Education
and Training ......................................................................................................................... 182
Robert C. Green II and Joseph T. Chao
Cooperative Thinking, or: Computational Thinking Meets Agile .................................. 187
Marcello Missiroli, Daniel Russo, and Paolo Ciancarini
Software Engineering Education: Converging with the Startup Industry .................. 192
Nitish M. Devadiga
Does Process Assessment Drive Process Learning? The Case of a Bachelor
Capstone Project ................................................................................................................ 197
Vincent Leildé and Vincent Ribaud

Paper Session 8: Learning Strategies
Integrating Components, Contracts, and Reasoning in CS Curricula
with RESOLVE: Experiences at Multiple Institutions .................................................... 202
Wayne Heym, Paolo A.G. Sivilotti, Paolo Bucci, Murali Sitaraman, Kevin Plis,
Joseph E. Hollingsworth, Joan Krone, and Nigamanth Sridhar
Infusing Design Thinking into a Software Engineering Capstone Course .................. 212
Maria Palacin-Silva, Jayden Khakurel, Ari Happonen, Timo Hynninen,
and Jari Porras
Is It Better to Learn from Problems or Erroneous Examples? ..................................... 222
Williamson Alison Freitas Silva, Igor Fabio Steinmacher, and Tayana Uchôa Conte

Workshop
Teaching Agile Project Management by Combining Group Interaction
and Simulation ..................................................................................................................... 232
Eduardo Miranda

Panel
SWEBoK Evolution: A CSEE&T 2017 Panel Session .................................................. 234
Rich Hilliard
Paper Session 9: Online and Novice Education

It’s Not What You Think: Lessons Learned Developing an Online Software Engineering Program .................................................................236

Kevin A. Gary, Sohum Sohoni, and Timothy Lindquist

A Study of Keywords Based on the Word Frequency Effect Theory in Video Lectures of Software Engineering Education for Detecting Mind ..................................................241

Jaechoon Jo and Heuiseok Lim

Novice Programmers and Software Quality: Trends and Implications .................................................................246

Peeratham Techapalokul and Eli Tilevich

Girls Who . . . Do Scratch a First Round with the Essence Kernel .................................................................251

Cassandra Balland, Néné Satorou Cissé, Louise Hergoualch, Gwendoline Kervot, Audrey Lidec, Alix Machard, Lisa Ribaud-Le Cann, Constance Rio, Maelle Sinilo, Valérie Dantec, Catherine Dezan, Cyrielle Feron, Claire François, Chabha Hireche, Arwa Khannoussi, and Vincent Ribaud

Paper Session 10: Human Aspects

Crossing the Borders and the Cultural Gaps for Educating PhDs in Software Engineering .................................................................256

Antti Knutas, Ahmed Seffah, Lene Sorensen, Andrey Sozykin, Fawaz Al-Zaghoul, and Alain Abran

Impact of Pre-University Factors on the Motivation and Performance of Undergraduate Students in Software Engineering .................................................................266

Pablo Schoeffel, Raul Sidnei Wazlawick, and Vinicius Ramos

Gamification in Software Engineering Education: An Empirical Study .................................................................276

Mauricio Ronny de Almeida Souza, Kattiana Fernandes Constantino, Lucas Furtini Veado, and Eduardo Magno Lages Figueiredo

Author Index ............................................................................................................................................285
