TABLE OF CONTENTS

VOLUME 1

Enabling Interoperability between Healthcare Devices and EHR Systems ................................................................. 1
Swapna Ayyanark ; Paul Schlaifer ; Kathryn Bennett ; Daniel J. Vreeman ; Clement J. McDonald

Applying a Process-based Framework to examine Interunit Patient Transfers ................................................................. 3
Joanna Abraham ; Shirley Burton ; Imade Ihianle

Medical Benefit Drug Claims: Assessing the NDC Documentation Gap ........................................................................ 5
Terrence J. Adam ; Bithia Anderson ; Angelina Carlton ; Mahsa Salavsbili ; Glenn Trygstad ; Stephen Schonfeldmeyer

Advanced Use of EHRs in US Hospitals and the Emergence of a Digital “Use” Divide .................................................. 7
Julia Adler-Milstein ; A.J. Helmgen

Phenotyping Physiologic Measurement of Lung Function in a Large Electronic Health Record Using Automated Tools ............................................................................................................................................. 9
Kathleen M. Akpin ; Keith Sigel ; Kei Cheung ; Farah Kidwai-Khan ; Alex K. Bryant ; Cynthia Brand ; Amy C. Justice ; Kristina Crothers

Why Predicting Postprandial Glucose Using Self-monitoring Data is Difficult................................................................. 11
David Albers ; Matthew Levine ; Andrew Stuart ; Bruce Gluckman ; George Hripcsak ; Lena Momykina

Pain Assessment Automatic Documentation Initiated by Patients and Parents: A Case Study from the University of Minnesota Masonic Children’s Hospital ............................................................................... 13
Ranyah Aldekhyyel ; Michael Pitt ; Yan Wang ; Genevieve B. Melton

Quick Sequential [Sepsis-related] Organ Failure Assessment (qSOFA) and St. John Sepsis Surveillance Agent to Detect Patients At-Risk of Sepsis: An Observational Cohort Study .................................................. 15
Robert C. Amland ; Bharat B. Satalyra

Identifying and Predicting Falls among Elderly Residents of Baltimore City Using Hospital Discharge Summaries and Health Information Exchange Data .................................................................... 17
Laura Anzald ; Elsey Lassner ; Joshua Sharfstein ; Hadi Kharrazzi

Differing Patterns of Satisfaction and Perception Among Clinical and Non-clinical Users Following Replacement of a Legacy EHR System........................................................................................................ 19
Nate C. Apathe ; Joshua R. Yest ; Nir Menachemi ; John W. Puz ; Justin Morea ; Christopher A. Harle

Novel Targeting of Clinical Decision Support: Utilizing Machine Learning To Improve Provider Acceptance – Repeat Imaging as an Example.................................................................................................. 21
Wesin Al Assad ; Ivan Ip ; Li Zhou ; Ramin Khorasani

Clinical Trial Eligibility Criteria Fail to Meet Burden of Generalizability ........................................................................ 23
Amelia J. Avert ; Chunhua Weng ; Adler Perotte

Using Computer Agents to Explain Clinical Test Results ............................................................................................... 25
Renato F. Azevedo ; Kwangsao Gu ; Yang Zhang ; Victor Sadauskas ; Tarek Sakakini ; Daniel Morrow ; Mark Hasegawa-Johnson ; Thomas S. Huang ; Sama Bhat ; Ann Willemsen-Dunlap ; Donald J. Halpin ; James F. Graumlich ; William Schuh

EHR-based Quality Measurement to Reduce Antibiotic Use in Children ........................................................................ 27
L. Charles Bailey ; Hanhinc Bazzagh ; Elizabeth R. Earley ; Jeanninc Moon ; Leon Widjian ; Jessica Hawkins ; Chris Forrest

Usability and Acceptability of a System to Identify Pediatric Patients at Risk of 30-day Hospital Readmission Prior to Discharge .......................................................................................................................... 29
Amie Barda ; Lingyan Shi ; Andrew H. Urbach ; Srinivasan Suresh ; Fuchiang Tsai

Large-Scale Text Mining of Social Determinants from Electronic Health Records: Case Studies of Homelessness and Adverse Childhood Experiences ..................................................................... 31
Cosmin A. Bejan ; John Angiolillo ; Douglas Conway ; Jana Shirey-Bice ; Loren Lipsworth-Elliot ; Robert M. Cronin ; Jill Pulley ; Sunil Kripalani ; Shari Barkin ; Kevin B. Johnson ; Joshua C. Denny

A Digital Health Advisor for High-Need, High-Cost Patients: Exploring Needs, Functions and System Constraints ................................................................................................................................. 33
Onil Bhattacharyya ; Arnav Shah ; Lovisa Gustafsson ; Kathryn Mossman ; Eric Schneider

The OpenNotes Patient and Family Reporting Tool: Engaging Patients and Families as Partners in Safety and Quality ................................................................................................................................................... 35
Fabienne C. Bourgeois ; Madda Gerard ; Alan Fossa ; Linda Larie ; Dianne Arnold ; Monique Mello ; Jenny Sadler ; Patricia A. Folcarelli ; Sigall Bell

Evaluating the Quality of Patient Address Data in an EHR system .................................................................................... 37
Michael N. Cantor

Data-driven Risk Characterization and Prediction of Renal Failure among Diabetic Type 2 Patients using Electronic Medical Records .................................................................................................................. 39
Prithvirsh Chakraborty ; Vichravas Gopalakrishnan ; Sharon Hensley Alford ; Faisal Farooq

Using Electronic Health Records Data for Comparative Effectiveness Research ............................................................. 41
David Cheng ; Ashwin Ananthakrishnan ; Tianxi Cai

Patient and Physician Predictors of Patient Receipt of Empiric Therapies Recommended by a Computerized Decision Support System: A Cohort Study ................................................................. 43
Angela Chow ; David C. Lye ; Omyehachi A. Arach

Opportunities and Challenges for an Interdisciplinary Team to Guide Adoption of Technology to Dissipate Threats to Patient Safety in Real-Time .................................................................................. 45
Anuj K. Dalal ; Theresa E. Fuller ; Pamela M. Neri ; Dominic Breuer ; David Bates ; James Benneyan

Use of Clinical Phenotypes and Non-negative Tensor Factorization for Heart Failure Prediction .................................. 47
Yu Deng ; Al’Onna Furmanuch ; Robert Chen ; Faraz S. Ahmad ; Jimeng Sun ; Abel N. Kho
Consumer Views of Electronic Health and Genetic Data Sharing: Findings of a National Survey ................................................................. 107
Examining the Coverage of Nursing Content in the UMLS-CORE Problem List .................................................................................. 109
Tae Youn Kim; Nicholas Hardiker
Reuse of PCORnet Data to Support the Precision Medicine Initiative: Data Model Harmonization ................................................................. 111
Jeffrey G. Klaun; Matthew A. Josx; Kevin Embree; Shawn N. Murphy
Evaluation of Text Mining Methods to Support Reporting Public Health Notifiable Diseases Using Real-World Clinical Data .............................................................................................................. 113
Matthew Kochman; Joaehn Wang; Brian Dison; Swangana Kasthuriratnh; Shawn Grannis
Cardioprotective Drugs and Incident Dementia in Medicare's Big Data ........................................................................................................ 115
Fabrice S. P. Kary; Seo H. Baik; Clement J. McDonald
Generating a Test of Electronic Health Record Narrative Comprehension with Item Response Theory ......................................................... 117
John P. Lalor; Hao Wu; Li Chen; Kathleen Mazor; Hong Yu
Comorbidity Miner: An Open Source Interactive Tool for Mining Disparate Electronic Health Data Sources ........................................ 119
Ashley S. Lee; Indra N. Sarkar; Genevieve B. Melton; Yuanqing Liu; Vivekanand Sharma; Elisabeth S. Chen
Usability and Feasibility of a Mobile App for Nursing Student Handoff Education .............................................................................. 121
Miyousung Lee; Catherine Bailey; Peggy Mancuso; Patti Hamilton
Clustering Vital Sign Observations Using Unsupervised Random Forest ........................................................................................................ 123
Dae Hyun Lee; Melita Yetisgen
Patient-Reported Outcomes in Clinical Use: Clinician Perspectives ........................................................................................................ 125
Cynthia Lerouge; Andrea L. Hartzler; Liz Kellnog; Mary Beth Hasselquist; Danielle C. Lavallee
When to Re-order Laboratory Tests? Learning Lab Shelf-life.................................................................................................................... 127
Gail L. Ferr; Sharon Lignety-German; Noemie Ethalad
User-Centered Design of a Collaborative Genetic Variant Interpretation Tool ..................................................................................... 129
Wayne H. Liang; Bas De Veer; Diane M. Korgscheid; Annie T. Chen; Gail J. Jarvin; Peter Tarcey-Hornoch; David R. Crosslin
Promoting Adoption and Effective Use of Continuous Patient Monitoring Technology in the Acute Care Setting .................................. 131
Graham Lowenthal; Stuart B. Lingsitz; Catherine S. Yoon; Perry G. An; Suzanne Salvucci; Christine Shaughnessy; Sharon Kepoh; David Bates; Patricia C. Dykes
Recurrent Neural Networks for Classifying Relations in Clinical Notes ...................................................................................................... 133
Yuen Loo Loo
A Pilot Randomized Trial to Train Vulnerable Primary Care Patients to Use an Online Patient Portal Website ........................................ 135
Courtney Lyles; Lina Tiea; Stephen Kiyoi; Shobha Sadashiviah; Mekhala Hoskote; Neda Ratanavongsa; Urmimala Sarkar; Dean Schillinger
Leveraging SNOMED CT Relationships for Mapping Disease Codes with Different Levels of Abstraction Between EHR Systems .............................................................................................................. 137
Jenna Marquard; Barry Saver; Swaminathan Kandassamy; Vanessa Martinez; Jane Simoni; Joanne Stekler; Deepak Ganesan; Sean Noren; James Scanlan
Development of a Wrist-Worn Sensor to Improve Medication Adherence: Designing for Diverse User Behaviors and Technology Preferences .............................................................................................................. 139
Turning Off Medication Alerts to Reduce Clinical Decision Support Overrides ..................................................................................... 141
Alison B. McCoy; Eric J. Thomas; Marie Kressel-Wood; Ryan P. Walsh; Adam Wright; Dean F. Sittig
Beyond ResearchKit: User Engagement with Phendo, a Novel App for Self-tracking and Research ............................................................................................................................ 143
Molise McKillop; Sylvia English; Sharib Khan; Chinan Patel; Noemie Ethalad
Usability Testing to Guide Development of a Clinical Decision Support System for Substance Use Screening and Interventions in Primary Care ............................................................................................................................ 145
Jennifer McNeely; Andre W. Kushniruk; Sarath Furkas; Aida Vega; Eva Waite; Lauren Peccoraro; Melanie Harris; Christine Chollak; Richard N. Rosenthal; John Bartosen; Joseph Kamary
Identification of Clinically Meaningful Clusters of Multi-morbidity in a National Cohort of Adults Using Unsupervised Learning ............................................................................................................................ 147
Che Ngoc; Rosalina G. McCoy; Lixia Yao; Lindsey B. Sangaralingham; Shannon M. Dunlay; Nilay D. Shah
Designing and Evaluating an Automated System for Real-time Medication Administration Error Detection in a Neonatal Intensive Care Unit ............................................................................................................................ 149
Yizhao Ni; Todd Lingren; Eric S. Hall; Matthew Leonard; Kristin Melton; Eric Kirkendall
Reducing Variation in Core Measures Data through Automation .................................................................................................................... 151
Matthew A. Oberhardt; Hagan Salamanian; Dana Goffman; David K. Vawdrey
The Impact of Simulation on Electronic Health Record Use Patterns among Pediatric Residents .................................................................................................................................................. 153
Evon Orenstein; Irit Basnolly; Waczyk Phillips; Mark Mai; Adam Dziorny; Levon Usidjian; Anthony Luberti; Jill Pomer; Rebecca Tenney-Soeiro; Chris Bonafide
Improving Electronic Inpatient Progress Notes Using Voice: Results from the VGEENS Project ........................................................................ 155
Thomas H. Payne; Andrew Markel; William D. Alonso; Ross J. Lordon; Kevin Lybarger; Melita Yetisgen; Jennifer M. Zech; Andrew A. White
Text Mining Radiology Reports for Deep Learning Radiology Images ........................................................................................................ 157
Yijan Peng; Xiaosong Wang; Le Lu; Bugheri Mohammedhadi; Ronald Summers; Zhiyong Lu
Towards a Generalized 6 Month Mortality Risk Model .............................................................................................................................. 159
Andrew Placoa; Shanthan Phakawala; Becky Yamarik; Neal O’Hara
Linking Resident Behavior to Health Conditions in an Eldercare Monitoring System ................................................................................ 161
Mihai Porpesca; Andrew L. Craver; Lorraine Phillips; Richelle J. Koozman; Laurel Despins; Gregory L. Alexander; Marilyn Rants
Identifying Potentially Missing Hierarchical Relations in SNOMED CT based on Lexical Features – Impact of Synonyms and Lexico-syntactic Constraints ................................................................. 163

Selecting and Refining the Characteristics of a Virtual Nurse for a Technology-Assisted Hospital-to-Home Care Transition Intervention in the Veterans Health Administration ......................................................... 165

Lorlile M. Richardson ; Jessica Lipschitz ; Timothy P. Hogan ; Stephanie L. Shimada ; Bridget Smith ; Steven R. Simon ; Amy Rubin ; Bonnie Wakefield ; Peter Kaboli ; Jeydith Gutierrez Perez ; Paul A. Heidenreich ; Shuo Zhou ; Zachary Berwald ; Lin Shi ; Timothy Rickmore ; Thomas K. Houston

Information Retrieval for Biomedical Datasets: The 2016 bioCADDIE Challenge ........................................................................................................... 167

Kirk Roberts ; Anupama E. Gururaj ; Xiaolong Chen ; Saed Pournejati ; Trevor Cohen ; William R. Hersh ; Dina Demner-Fushman ; Lucila Ohno-Machado ; Hua Xu

Association of BMI and Obesity Genetic Risk Score with Surgical Procedures Through a Procedure-wide Association Study ............................................................................................................. 169

Deep Recurrent Neural Networks Identify Transgender Patients ................................................................................................................................. 171

Joseph D. Romano ; Kenrick Cato ; Rami Vanguri ; Nicholas P. Tattonetti

Development and Validation of a Continuously Age-Adjusted Measure of Patient Condition for Hospitalized Children Using the Electronic Medical Record ................................................................................................. 173

Michael J. Rothman ; Joseph J. Tepas ; Andrew J. Nowalk ; Joan M. Rimar ; Albert Marchetti ; Albert Hsiang

Can Emergency Department Provider Notes Help Achieve More Dynamic Clinical Decision Support? ....................................................................................................................... 175

Justin F. Roussin ; Ivan Ip ; Ali S. Raja ; Jeremiah D. Schuur ; Ramin Khorasani

Using mHealth to Monitor Asthma Symptoms Between Visits ................................................................................................................................. 177

Robert S. Rubin ; Christopher H. Fanta ; Zachary Predmore ; Eyal Zimlichman ; Kevin W. Kron ; Marisa Edelen ; David Bates

Rationale and Design for the Duke Connected Care Predictive Modeling Pilot with a Medicare Shared Savings Program Population .............................................................................................................. 178

Shelley A. Rusinecovich ; Ricardo Henaq ; Michael Gao ; Lawrence Carin ; Ursula Rogers ; N. B. Neely ; Mary Schilder ; Daniel Costello ; Eugenie Komivas ; Erich Huang

Dr. Babel Fish: A Machine Translator to Simplify Providers’ Language ................................................................................................................................. 180

Tarek Sakakini ; Renato F. Azvedo ; Victor Sadashivas ; Kuangxiao Gu ; Yang Zhang ; Soma Bhat ; Daniel Morrow ; Mark Hasegawa-Johnson ; Thomas S. Huang ; Ann M. Willemse-Dunlap ; Donald J. Halpin ; James F. Graumlich

DeepPhE - A Natural Language Processing System for Extracting Cancer Phenotypes from Clinical Records ....................................................................................................................... 182

Guergana Savova ; Eugene Tsytlin ; Seun Pitan ; Melissa Castine ; Timothy A. Miller ; Olga Medvedeva ; David Harris ; Harry Hochheiser ; Chen Lin ; Girish Chawan ; Rebecca Jacobson

Novel Approaches to Identifying Rare Diseases Using Electronic Health Record Data, Mabry Syndrome as an Example ................................................................................................................................. 184

Prabha R. Shankar ; Rachel Logan ; Allison Foley ; Hong Li

The Variation in Patient Portal Access for Adolescents in the United States: How Different Medical Centers Manage their Adolescent Access ........................................................................................................... 186

Marianne Sharf ; Lauren Wilcox ; Matthew K. Hong ; Jessica S. Ancker

Assessing Usability of the D2Refine Platform for Harmonization and Standardization of Clinical Study Data ................................................................................................................................. 188

Deepak K. Sharma ; Kevin Peterson ; Guoqian Jiang

Rule-Based Criteria for Recommending Algorithms and Visualization Techniques for Biomedical Data Analysis ................................................................................................................................. 190

Leslie Smi ; Charlotte Cheng ; Ajay Shah ; Sririsatram Achuthan

Personal Health Information Management in the Virtual Home: A New Taxonomy for a New Perspective ................................................................................................................................. 192

Catherine A. Smith ; Taiq He ; Gail R. Casper

Discordances Between Patient-Reported Family History and Family Histories in EHR ................................................................................................................................. 194

Jung Hoon Son ; Chunhua Weng

Implementing NLP-based Point-of-care CDS Drives Adherence to Evidence-based Clinical Pathways ................................................................................................................................. 196

Srinivasan Suresh ; Gabriella Butler ; Andrew Buchert ; Amy Urban ; Curtis Stratman ; Nancy Zimmerman ; James A. Colbert

A Probabilistic Scoring Model to Evaluate Providers Regarding Continuity of Care from a Relational Perspective ................................................................................................................................. 198

Kazim Topuz ; Scott Shepherd ; William D. Paiva ; Dursun Delen ; Kristin Schumacher ; Shreem Raih Sathyanarayanan ; Mehmet B. Yildirim

Retrospective and Prospective Evaluations of the System for Hospital Adaptive Readmission Prediction and Management (SHARP) for All-Cause 30-Day Pediatric Readmission Prediction ................................................................................................................................. 200

Fuchuang Tsai ; Victor M. Ruiz ; Amie J. Barza ; Ye Ye ; Gabriella Butler ; Srinivasan Suresh ; Andrew H. Urbach

Developing Computable Phenotypes of Pediatric Chronic Conditions in PEDSnet ................................................................................................................................. 202

Levon Utidjian ; Ritu Khare ; Hanieh Razaghi ; Amanda Dempsey ; Michelle Denburg ; Chris Forrest ; Charles Bailey

Clinical Workflow Visualization: Representation of Clinician Activity from Location Tracking Data ................................................................................................................................. 204

Akshay Vankapuram ; Stephen Traub ; Vinma L. Patel

Using EHR and HIE Data to Identify Patients’ Need for Services That Address the Social Determinants of Health ................................................................................................................................. 206

Joshua B. Vest ; Shanuan Grannin ; Jennifer L. Williams ; Dawn Haun ; Irir Menachemi

A Conceptual Model of Personal Health Informatics for Chronic Illness ................................................................................................................................. 208

Lisa M. Vizer ; Jordan Eschler ; Bon Mi Koo ; James Ralston ; Wanda Pratt

The LOINC/RSNA Radiology Playbook: A Unified Terminology for Radiology Procedures ................................................................................................................................. 210

Daniel J. Vreeman ; Ken Wang ; Chris Carr ; Beverly Collins ; Swapna Abhyankar ; Jamalyne Deckard ; Clement J. McDonald ; Daniel Rubin ; Curtis Lungolz

Impact of Clinician Experience on Machine Learned Clinical Order Patterns ................................................................................................................................. 212

Jason K. Wang ; Alejandro Schuler ; Nigam Shah ; Jonathan H. Chen

Interactive Medical Word Sense Disambiguation with Instance and Feature Labeling ................................................................................................................................. 214

Yue Wang ; Kai Zheng ; Hua Xu ; Qiaozhu Mei
Building an Informed Consent Tool Starting with the Patient: The Patient-Centered Virtual Multimedia

Interactive Informed Consent (VIC) ............................................................................................................. 374

Fuad Abzugard ; Sandra Afzamo ; Tiffani J. Bright ; Shehu Kannuth ; Nicole Grant ; Matthew Gubale ; Peter Peduzzi ; Geoffrey Chupp

Big Data in Healthcare– The Promises, Challenges and Opportunities from a Research Perspective: a Case Study with a Model Database ................................................................................................... 384

Mohammad Adibuzzaman ; Pochong Delaurentis ; Jennifer Hill ; Brian D. Benneyworth

Applying the Concept of Nutrient-Profiling to Promote Healthy Eating and Raise Individuals’ Awareness of the Nutritional Quality of their Food .................................................................................................................. 393

Maya A. Ajiige ; Samir Chatterjee ; Ernie Medina ; Jeje Noval

Open Globe Injury Patient Identification in Warfare Clinical Notes ................................................................ 403

Emilia Apostolova ; Helen A. White ; Patty Morris ; David Eliason ; Tom Velez

Intelligent Word Embeddings of Free-Text Radiology Reports ........................................................................ 411

Imon Banerjee ; Siriraman Madhavan ; Roger Eric Goldman ; Daniel Rubin

Gap Analysis and Refinement Recommendations of Skin Alteration and Pressure Ulcer Enterprise Reference Models against Nursing Flowsheet Data Elements ........................................................................ 421

Karen M. Bavaro ; Roberto A. Rocha ; Perry L. Mar ; Sarah Collins

Eliciting Values of Patients with Multiple Chronic Conditions: Evaluation of a Patient-centered Framework ................................................................................................................................. 430

Andrew B. Berry ; Catherine Lim ; Andrea L. Hartzler ; Ted Hirsch ; Evette Ludman ; Ed Wagner ; James Balston

Improving the ‘Fitness for Purpose’ of Common Data Models through Realism Based Ontology .......... 440

Jonathan C. Blaukore ; Werner Custerers

A Simulation Study on Handoffs and Cross-coverage: Results of an Error Analysis .................................. 448

Kathryn H. Bowles ; Sarah J. Rankilfe ; Mary D. Naylor ; John H. Holmes ; Susan K. Reim ; Emilia Flores

Creating Clinical Fuzzy Automata with Fuzzy Arden Syntax ...................................................................... 475

Jeroen S. De Bruin ; Heinz Steltzer ; Andrea Rappelsberger ; Klaus-Peter Adlassnig

deidentify ....................................................................................................................................................... 485

Philipp Burckhardt ; Rema Padman

Mobile Apps for Mood Tracking: An Analysis of Features and User Reviews ........................................... 495

Clara Caldeira ; Yu Chen ; Lesley Chan ; Vivian Pham ; Yuman Chen ; Kai Zheng

Combining Rules, Background Knowledge and Change Patterns to Maintain Semantic Annotations ............. 505

Silvio Domingos Cardoso ; Chantal Reynaud-Delairie ; Marcos Da Silveira ; Cedric Pruski

Detecting Evidence of Intra-abdominal Surgical Site Infections from Radiology Reports Using Natural Language Processing ....................................................................................................................... 515

Alec B. Chapman ; Danielle Mowery ; Douglas S. Swords ; Wendy Chapman ; Brian T. Bucher

Deep Learning Solutions for Classifying Patients on Opoid Use ................................................................ 525

Zhengping Che ; Jennifer St. Sauver ; Hongfang Liu ; Yan Liu

Automated Metabolic Phenotyping of Cytochrome Polymorphisms Using PubMed Abstract Mining ........ 535

Joseph Pinkelstein

Large-scale Analysis of Opioid Poisoning Related Hospital Visits in New York State .................................. 545

Xin Chen ; Yu Wang ; Xiaixia Yu ; Elinor Schoenfeld ; Mary Saltz ; Joel Saltz ; Fusheng Wang

Determining Burden of Commuting for Treatment Using Online Mapping Services – A Study of Breast Cancer Patients ........................................................................................................................................... 555

Alex C. Cheng ; Mia A. Levy

Predicting Inpatient Acute Kidney Injury over Different Time Horizons: How Early and Accurate? ........... 565

Peng Cheng ; Leman B. Watan ; Yong Hu ; Mei Liu

Specifications of Clinical Quality Measures and Value Set Vocabularies Shift Over Time: A Study of Change through Implementation Differences ............................................................................... 575

Raja A. Cholan ; Nicole G. Weiskopf ; Dugg Bhoson ; Nicholas Colen ; Rachel L. Ross ; Melanie N. Marzullo ; Bhavaya Sachdeva ; David A. Dorr

Doodle Health: A Crowdsourcing Game for the Co-design and Testing of Pictographs to Reduce Disparities in Healthcare Communication ........................................................................................................ 585

Carrie Christensen ; Douglas F. Redd ; Erica Lake ; Jean Shipman ; Heather Arora ; Roger Altizer ; Bruce E. Bruz ; Qing T. Zeng

Evaluation of a Systematic Methodology to Detect in Near Real-time Performance Changes During Electronic Health Record System Implementations: A Longitudinal Study ........................................................................... 595

Tiago K. Colicchio ; Guilherme Del Fiol ; Gregory J. Stoddard ; Scott P. Narus

Evolution of an Implementation-Ready Interprofessional Pain Assessment Reference Model .................. 605

Sarah A. Collins ; Karen M. Bavaro ; Mary Swenson ; Christine Sucheck ; Perry L. Mar ; Roberto A. Rocha

Towards Analytics of the Patient and Family Perspective: A Case Study and Recommendations for Data Capture of Safety and Quality Concerns ......................................................................................... 615

Brittany Couture ; Maureen B. Fagan ; Esteban Gerhasnik ; Catherine Yoon ; James Bennennay ; David Bates ; Sarah Collins

Calibration Drift Among Regression and Machine Learning Models for Hospital Mortality ................. 625

Sharon E. Davis ; Thomas A. Lasko ; Guanhua Chen ; Michael E. Matheny
Improving Quality of Follow-Up Imaging Recommendations in Radiology .............................................................................................................. 1189
Evidence of Progress in Making Nursing Practice Visible Using Standardized Nursing Data: a Systematic Review .......................................................... 1198
Detection of Adverse Drug Reactions Using Medical Named Entities on Twitter .............................................................................................................. 1208
Usability and Learnability of RxUniverse, an Enterprise-Wide App Prescribing Platform Used in an Academic Tertiary Care Hospital........................................................................................................................................ 1218
Deep Learning Meets Biomedical Ontologies: Knowledge Embeddings for Epilepsy.......................................................... 1226
Extracting Healthcare Quality Information from Unstructured Data ............................................................................................................................. 1236
A Novel Application of Point-of-sales Grocery Transaction Data to Enhance Community Nutrition Monitoring .......................................................... 1246
Point of Care Research: Integrating Patient-generated Data Into Electronic Health Records for Clinical Trials ........................................................................ 1255
Fast and Accurate Metadata Authoring Using Ontology-Based Recommendations .................................................................................................. 1265
Developing a Concussion Assessment Mhealth App for Certified Athletic Trainers. ........................................................................................................ 1275
Does a Community-Engaged Health Informatics Platform Facilitate Resource Connectivity? An Evaluation Framework ...................................................... 1285
Distinction Between Medical and Non-medical Usages of Short Forms in Clinical Narratives ..................................................................................... 1295
Supervised Learning Methods for Predicting Healthcare Costs: Systematic Literature Review and Empirical Evaluation ........................................................................... 1305
The Role of Surface, Semantic and Grammatical Features on Simplification of Spanish Medical Texts: A User Study ................................................................................................. 1315
Identification of Clinically Meaningful Plasma Transfusion Subgroups Using Unsupervised Random Forest Clustering ........................................................................... 1325
Evaluation of Semantic Web Technologies for Storing Computable Definitions of Electronic Health Records ........................................................................... 1345
Tracking Related Discussions on Reddit for Public Health Applications ..................................................................................................................................... 1355
Mining Hierarchies and Similarity Clusters from Value Set Repositories ......................................................................................................................... 1365
A Conceptual Measurement Model for eHealth Readiness: A Team Based Perspective ............................................................................................................. 1375
Challenges with Collecting Smoking Status in Electronic Health Records ....................................................................................................................... 1385
Design and Evaluation of a Web-based Decision Support Tool for District-level Disease Surveillance in a Low-resource Setting....................................................... 1394
Design Stage-Specific Survivability Prediction Models across Different Cancer Types ................................................................................................................ 1404
An Open Source Tool for Game Theoretic Health Data De-Identification ......................................................................................................................... 1413
Leveraging Health Information Exchange to Construct a Registry for Traumatic Brain Injury, Spinal Cord Injury and Stroke in Indiana .......................................................... 1423
Stakeholder Use and Feedback on Vaccination History and Clinical Decision Support for Immunizations Offered by Public Health ................................................................................ 1433
Formative Evaluation of CareNexus: a Tool for the Visualization and Management of Care Teams of Complex Pediatric Patients ........................................................................... 1441
Understanding Patient Questions about their Medical Records in an Online Health Forum: Opportunity for Patient Portal Design
Tara L. Reynolds ; Nida Ali ; Emma McGregor ; Tricia O'Brien ; Christopher Longhurst ; Andrew L. Rosenberg ; Scott Rudkin ; Kai Zheng
A Semantic Parsing Method for Mapping Clinical Questions to Logical Forms
Kirk Roberts ; Braja G. Pratna
Is the Application of SNOMED CT Concept Model Sufficiently Quality Assured?
Jean-Marie Rodrigues ; Stefan Schulte ; Bassim Mizzen ; Alan L. Rector ; Sofiane Serr
Mining the Literature for Genes Associated with Placenta-mediated Maternal Diseases
Lariza M. Rodriguez ; Stephanie M. Morrison ; Kathleen Greenberg ; Dina Demmer-Fushman
Electronic Surveillance For Catheter-Associated Urinary Tract Infection Using Natural Language Processing
Patrick C. Sanger ; Marion Granich ; Robin Olson-Scribner ; Rupali Jain ; William B. Lober ; Ann Stapleton ; Paul Pottinger
The Problems of Realism-Based Ontology Design: a Case Study in Creating Definitions for an Application
James C. Schuler ; Werner Ceusters
Reconciliation of Multiple Guidelines for Decision Support: a Case Study on the Multidisciplinary Management of Breast Cancer Within the DESIREE Project
Brigitte Seroussi ; Gilles Guézennec ; Jean-Baptiste Lamy ; Niaira Muro ; Nekane Larbure ; Booma Devi Sekar ; Coralie Prehet ; Jacques Bouaud
Harnessing Biomedical Natural Language Processing Tools to Identify Medicinal Plant Knowledge from Historical Texts
Vivekanand Sharma ; Wayne Law ; Michael J. Balick ; Indra N. Sarkar
The Effect of Neighborhood Disadvantage on Diabetes Prevalence
Lincoln Sheen ; Greg Perroski ; Julie Jaddoo ; Van Barnett ; Chris Barnett ; Laura E. Henderson Kelley ; Vaishnavi Ramun ; Amy J. Kind ; Jerry C. Parker
Leveraging Collaborative Filtering to Accelerate Rare Disease Diagnosis
Feichen Shen ; Shijia Liu ; Yanyan Wang ; Liwei Wang ; Naveed Afzal ; Hongfang Liu
Utilizing Smartphone-Based Machine Learning in Medical Monitor Data Collection: Seven Segment Digit Recognition
Thomas R. Campion
Leveraging Clinical Time-Series Data for Prediction: A Cautionary Tale
Ed Sherman ; Hitinder Gurm ; Ulysse Balis ; Scott R. Owens ; Jenna Wiens
Secondary Use of Patients' Electronic Records (SUPER): An Approach for Meeting Specific Data Needs of Clinical and Translational Researchers
Evan Sholle ; Joseph Kabariti ; Stephen B. Johnson ; John Leonard ; Jyotsishman Pathak ; Vinay I. Yarugheuse ; Curtis Cole ; Thomas B. Campion
Disease-Specific Integration of Omics Data to Guide Functional Validation of Genetic Associations
Maya Shumayatcher ; Rui Hong ; Jessica Levin ; Blanca E. Himes
Data Visualization of Home Care Admission Nurses' Decision-Making...
Paulina S. Sockolow ; Yushi Tang ; Ellen J. Bass ; Kathryn H. Bowles ; Amnna Holmberg ; Sheryl L. Potashnik
Current State of Electronic Consent Processes in Behavioral Health: Outcomes from an Observational Study
Hiral Soni ; Adela Granado ; Anita C. Mueck ; Mike Bayuk ; Premod Bharadwaj Chandrashekhar ; Madhumita Mukandani ; Meredith Abrams ; Marcela P. Aliste ; Megan Hietsand ; Julia Varkey ; Wentai Zhou ; Caroline Horrow ; Michael Sachs ; Richard Sharp ; Mary Jo Whitfield ; Mark Callesen ; Christina Dye ; Darwin Chern
Modeling Contextual Knowledge for Clinical Decision Support...
Margaretta Sordo ; Priyanshant Tokachchua ; Christopher J. Vitale ; Saverio M. Maviglia ; Roberto A. Rocha
Reducing the Toxicity Risk in Antibiotic Prescriptions by Combining Ontologies with a Multiple Criteria Decision Model

A Data-Driven Method for Generating Robust Symptom Onset Indicators in Disease Registry Data
Zhaonian Sun ; Yang Li ; Soumya Ghosh ; Yu Cheng ; Amrita Mohan ; Cristina Sampaio ; Jianying Hu
Designing Decision-support Technologies for Patient-generated Data in Type 1 Diabetes
Si Sun ; Kaitlin L. Costello
Causal Phenotyping for Susceptibility to Cardiotoxicity from Antineoplastic Breast Cancer Medications
Deya San ; Georgy Simon ; Steven J. Skube ; Anne Blaes ; Genevieve B. Melton ; Rui Zhang
A Multi-task Framework for Monitoring Health Conditions via Attention-based Recurrent Neural Networks
Qiaoling Suo ; Fenglong Ma ; Giovanni Canino ; Jing Gao ; Aidong Zhang ; Pierangelo Veltri ; Agostino Gnasso
Physician Information Needs in Managing Delirium...
Teresa Talia ; Stacey Sager ; Scott D. Nelson ; Charlene Weir
Facilitating Cohort Discovery by Enhancing Ontology Exploration, Query Management and Query Sharing for Large Clinical Data Repositories
Shiqiang Tao ; Li Cong Cui ; Xi Wu ; Guo-Qiang Zhang
A Scalable Privacy-preserving Data Generation Methodology for Exploratory Analysis
Jaideep Vaidya ; Bashi Shafiq ; Muazzam Asani ; Nabil H. Adam ; Xiaqian Jiang ; Lucila Ohno-Machado
ProvCaRe Semantic Provenance Knowledgebase: Evaluating Scientific Reproducibility of Research Studies
Joshua Valdez ; Matthew Kim ; Michael Rueschman ; Vimig Socrates ; Satya S. Sahoo ; Susan Redline
Using a Community-Engaged Health Informatics Approach to Develop a Web Analytics Research Platform for Sharing Data with Community Stakeholders

Drug Repositioning for Prostate Cancer: Using a Data-driven Approach to Gain New Insights

Combining Mechanism-based Prediction with Patient-based Profiling for Psoriasis Metabolomics Biomarker Discovery

SCOTCH: Secure Counting Of encrypted genomiC Data Using a Hybrid Approach

Classifying Clinical Trial Eligibility Criteria to Facilitate Phased Cohort Identification Using Clinical Data Repositories

What Are They Trying to Do?: An Analysis of Action Identities in Using Electronic Documentation in an EHR

Towards Precision Informatics of Pharmacovigilance: OAE-CTCAE Mapping and OAE-based Representation and Analysis of Adverse Events in Patients Treated with Cancer Drugs

Clinical Named Entity Recognition Using Deep Learning Models

Using EHR Audit Trail Logs to Analyze Clinical Workflow: A Case Study from Community-based Ambulatory Clinics

Learning Doctors’ Medicine Prescription Pattern for Chronic Disease Treatment by Mining Electronic Health Records: A Multi-Task Learning Approach

Identifying High Health Care Utilizers Using Post-Regression Residual Analysis of Health Expenditures from a Medicaid Program

Classification of Hepatocellular Carcinoma Stages from Free-text Clinical and Radiology Reports

Talking About My Care: Detecting Mentions of Hormonal Therapy Adherence Behavior in an Online Breast Cancer Community

Can SNOMED CT Changes Be Used as a Surrogate Standard for Evaluating the Performance of Its Auditing Methods?

Barriers, Facilitators, and Solutions to Optimal Patient Portal and Personal Health Record Use: A Systematic Review of the Literature

Identifying Falls Risk Screenings Not Documented with Administrative Codes Using Natural Language Processing

Spark-MCA: Large-scale, Exhaustive Formal Concept Analysis for Evaluating the Semantic Completeness of SNOMED CT

User-Centered Design and Usability Assessment of an EHR Integrated Automated SOFA Calculator App

Characterizing a Learning Curve for Annotating Data for Training and Validation of Natural Language Processing Systems
Katie E. Bickert ; Timothy D. Imler

RxNorm Concept History Service ......................................................................................................................... 1955
Olivier Bodenreider ; Lee Peters

Does Semantic Tag Usage in SNOMED CT Match its Concept Hierarchy? ................................................................. 1956
Jonathan P. Bonu

Electronic Health Records and their Modules: Impacts on Clinical Practice and Patient Care ........................................ 1957
Elizabeth M. Boryck ; Andre W. Kushniruk ; Yalini Sansethrajah

Leveraging Large-Scale Computing for Population Information Integration, Analysis, and Modeling .............................. 1958
Jessica A. Boten ; Donna R. Rivera ; Madhumita Myneni ; Georgia Tousas ; Tannoy Bhattacharyya ; Ana Paula De Oliveira

Sales ; Thomas Britt ; Paul Fearn ; Lynne Penberthy

Detection of Opioid-Dependence: Extracting Opioid Use Patterns from Patient Secure Messages ................................. 1959
Lina Bouayd ; Dezon Finch ; Stephen L. Luther

Toward a Reliable and Interoperable Public Repository for Natural Product Drug Interaction Study Data ...................... 1960
Richard D. Boyce ; Isabelle Raguenneau-Majlessi ; Jingjing Yu ; Jessica Sontheimer ; Chris Kinsella ; Mathias Broichhausen ; John
Judkins ; Bruce Pinkleton ; Rebecca L. Cooney ; Mary Paine ; Jeannine McCune

Leveraging Electronic Medical Record Data for Research with Consistency and Efficiency: A Use Case in an
Ongoing Obstetrics Clinical Study .............................................................................................................................. 1961
Robert L. Bradford ; Karen Dorman ; Anna Maria Siega-Riz ; Alison Suebe ; Wanda Nicholson ; Kiira Lyons

Enabling Collaboration for Building High Quality, Sustainable and Scalable National Health Information Systems
in Resource-limited Settings ........................................................................................................................................... 1962
Pascale Brandt ; Jon Flowers ; William B. Lober

Modular Health Informatics Architecture for a Patient Centered mHealth Diabetes Intervention ...................................... 1963
Ian M. Brooks ; Justin Gatwood ; Bonnie L. Binkley ; Emmanuel Villa ; Jennifer Featherston ; James E. Bailey

TNF-alpha Use as a Risk Factor for Lymphoma in Rheumatoid Arthritis Patients Using the Virtual Research Data
Center ........................................................................................................................................................................... 1964
Gregory T. Brown ; Fabrizio S. Kury ; Clement J. McDonald

Knowledge-Enriched Data: Realizing the Riches of Our Data ........................................................................................ 1965
Matthew Burton ; Amy Knopp ; Davide Sotara ; James Buntrock ; Daryl J. Kor ; Terri Glaze ; Meghan Sandberg ; Scott
Finnegan

Physicians Behavior with a Non – Overriding Alert Prescriptions in a CDS Dosing System Developed in Argentina ........ 1966
Maria S. Hernandez Gaffiot ; Carolina Vogt ; Solana Mulio Fernandez ; Francisco M. Bernabeu ; Bayan V. Khorsandi

Improving EHR Chart Review Efficiency Via Semantic Similarity Assessment ............................................................. 1967
Tianrun Cai ; Andrew Beam ; Stephanie Chan ; Jacqueline Bonerlax ; Tichi Zhang ; David Gagnon ; Kelly Cho ; Michael
Guziano ; Katherine P. Liu ; Tianzi Cai ; Yuk-Lam Ho

Exploring Novel Graphical Representations of Clinical Data in a Learning EMR ........................................................... 1968
Luca Calzoni ; Gilles Clermont ; Gregory F. Cooper ; Shyam Viswanathan ; Harry Hochheiser

A Natural Language Processing System for Biomedical Dataset Retrieval ..................................................................... 1969
Xiaoling Chen ; Jun Xu ; Jingqi Wang ; Anupama E. Gururaj ; Lucila Ohno-Machado ; Hua Xu

The Access of Bone Marrow Transplant Patients to Online Support ............................................................................. 1970
Ming-Yuan Chih ; Jennifer A. Christian ; Kang Namkoong ; Miranda Hatfield ; Meghan Johnson ; Ranie Hannah ; Jamie Studts ;
Robin Vanderpool ; Gerhard C. Hildebrandt

Usability Evaluation of a Prototype mHealth App for Symptom Self-Management in Underserved Persons Living with
HIV ............................................................................................................................................................................... 1971
Hwayoung Cho ; Hestia Rojas ; Casey Fulmer ; Rebecca Schnall

Evaluation of OMOP Vocabulary on Transplant Registry Data ....................................................................................... 1972
Sylvia Cho ; Margarei Sin ; Karthik Natarajan

Use of Storyboarding in the Development of a Pain Management Mobile App: A Case Study ........................................ 1973
Jeeyae Choi

Validating a Single-Item Stress Scale for mHealth Interventions .................................................................................. 1974
Wonchan Choi ; Sherry L. Pagoto ; Edwin D. Boudreau ; Bengisu Tulu

Creating a Framework to Standardize Data Extraction from Electronic Health Record Systems for Researchers
and to Support Distributed Queries ............................................................................................................................ 1975
Mera Choi ; Nageeh Bashyam ; Daniella Meeker ; Eliel Oliveira

OMOP on FHIR as an Enabler for Analytics-As-A-Service .......................................................................................... 1976
Myung Choi ; Richard Sturr ; Jon Duke

Reproducibility in Biomedical Natural Language Processing .......................................................................................... 1977
Kevin B. Cohen ; Aurelie Neveol ; Jingbo Xia ; Negacy Hailu ; Cyril Grouin ; Lawrence E. Hunter ; Pierre Zweigenbaum

The Impact of Health IT Adoption: Are We Measuring the Right Outcomes? ................................................................. 1978
Tsago K. Coliccio ; Guilherme Del Fiol ; Watson A. Bowes ; Julio Facelli ; Debra Scammon ; Scott P. Narus

ProjectFlow: Configurable Clinical Trial Management with Enterprise Data Integration and Point-of-Care Study
Support ............................................................................................................................................................................. 1979
Ryan C. Cornia ; Nilla Majahalme ; Danne C. Elbers ; Svitlana Dipietro ; Brian R. Ivie ; Brad Adams ; Ramana Seregau ;
Valmek Kudesa ; Scott L. Duvall

An International Comparison of High-priority and Low-priority Drug-drug Interactions in Different Electronic
Health Record Systems ................................................................................................................................................. 1980
Pieter Corna ; Shobha Phansalkar ; Diane L. Seger ; Insook Cho ; Sarah K. Pontefract ; Alexandra Robertson ; David Bates ;
Sarah P. Slight

Automated Image Quality Assessment for Fundus Images in Retinopathy of Prematurity ............................................. 1981
Aaron S Coyaer ; Ryan Svam ; Jayashree Kalpathy-Cramer ; Sang Jin Kim ; John P. Campbell ; Karyn Jonas ; Susan Ostmo ; R.
V. P. Chan ; Michael F. Chiang

Factors Affecting the Decision of Heart Failure Patients to Accept Telehealth Services in the Home: An Integrative Review ........................................................................................................................................................................ 2233
Kyungmi Woo; Dawn Dowding

A Phenome-Wide Association Study (PheWAS) of Iron Deficiency in a Large Electronic Health Record Database ........................................................................ 2234
Patrick Wu; Joshua C. Denny; Wei-Qi Wei

Toward Reading Comprehension of Online Health Information: An Initial Annotation ........................................................................................................ 2235
Danny T. Y. Wu; Seung-Hyun B. Ko; Chirs A. Feak

Classification Method of Dental Electronic Health Record Data Potentially Improves Precision Treatment ........................................................................ 2236
Di Wu

Detecting Contradictory and Consistent Citations in Biomedical Literature .................................................................................................................. 2237
Jun Xu; Yonghui Wu; Yaoyun Zhang; Qiang Wei; Hua Xu

Evaluation of Automated Spectrographic Seizure Detection Using Scale Invariant Feature Transform and Support Vector Machines ............................................................................................................................. 2238
Peter Yan; Fei Wang; Ramin Zabih; Zachary M. Grinspan

Preliminary Study of the Portability of an Automated Text Categorization Model to Identify Unsuspected Lung Nodule Findings in Radiology Reports ............................................................................................................................................................. 2239
Jianji Yang; Theodore B. Wright; James Morrison

Visualizing Social Support Mechanisms in English and Spanish Tweets to Meet Self-Management Needs of Family Dementia Caregivers .................................................................................................................................................. 2240
Sunmoo Yoon; Nurka M. Suero-Tejeda; Robert J. Lucero; Suzanne Bakken

Novel Visualization of Clostridium Difficile Infection in Intensive Care Units .................................................................................................................. 2241
Sean C. Yu; Courtney L. Hebert; Albert M. Lai; Justin Smyer; Jennifer Flaherty; Julie Mangino; Susan Moffatt-Bruce

Subtype Discovery for Autism Spectrum Disorder by Comorbidity Analysis .................................................................................................................. 2242
Kun-Hsing Yu; Nathan P. Palmer; Isaiah Rohen
SMART on FHIR Apps from the University of Utah Interoperable Apps and Services (IAPPS) Initiative:
Extending the EHR to Optimize Patient Care ..........................................................2298
Kensaku Kawamoto ; Benjamin S. Brooke ; Guilherme Del Fiol ; Charlene Weir

Web-Service-Enabled Apps for Research: SMART-on-FHIR for OMOP and PCORNet ..........................................................2299
Jeffrey G. Klann ; Katrina Wagholik ; Lori C. Phillips ; Matthew A. Jox ; Shawn N. Murphy

CDS Connect: A New National Repository for Clinical Decision Support Knowledge Artifacts .................................................2300
Edwin Lomotan ; Robert McCready ; Steven Bernstein

Canary: An Information Extraction Platform for Clinical Researchers ..................................................................................2301
Shervin Malmasi ; Nicolae L. Sandor ; Naoshi Hosomura ; Matt Goldberg ; Stephen Skentzos ; Alexander Turchin

Sync for Science (S4S): Helping Patients Share EHR Data with Research .................................................................2302
Joshua C. Mandel ; David A. Kreda

Genome Dashboard: An Interactive Tool for the Exploration of Human Genomic Variants and Phenotypic Associations ..........................................................2303
Katherine Miller ; Rajeswari Swaminathan ; Soheil Moosavinasab ; Robert Strouse ; Matthew Bailey ; Yungui Huang ; Simon Lin

Systems Demonstration: Fall Prevention and Fire Departments ..................................................................................2304
Andrew Math ; Christopher Hollweg ; Pamela Garcia-Filion ; Michael Smith ; Hamed Abbaszadegan

Applications of the Ontology Abstraction Framework ..........................................................................................2305
Christopher Ochs ; James Geller ; Yehoshua Perl

A Scalable Approach to Federating Distributed Data: The Avec® Platform ........................................................................2306
Philip R. O. Payne ; Mark Vance ; Peter J. Embi

The All of Us Research Program Researcher Portal: Innovative Access to Unprecendented Data .........................................2307
Andrea H. Ramirez ; Anthony Philippakis ; Goncalo Abecasis ; Paul Harris ; Joshua C. Denny

DocUBuild: A Collaborative System to Enhance Dissemination and Discovery of Genomic Clinical Content .......................................2308
Luke F. Rasmussen ; Casey L. Overby

Creating a Cluster of Preclinical Lessons Using Pharmacogenomic-Focused Patient Case Presentations ........................................2309
Blaine Takesse ; Maureen Harrington ; Bradley Allen ; Debra Litzelein ; Paul Dexter

CLAMP – A User-Centric Clinical Natural Language Processing Toolkit ..................................................................2310
Hua Xu ; Ergin Soysal ; Jingqi Wang ; Min Jiang ; Yonghui Wu
