2017 IEEE Conference on Communications and Network Security (CNS 2017)

Las Vegas, Nevada, USA
9-11 October 2017
Program

2017 IEEE Conference on Communications and Network Security (CNS)

Session 1A: Privacy

Privacy-Preserving Inference in Crowdsourcing Systems
Liyao Xiang (University of Toronto, Canada), Baochun Li (University of Toronto, Canada), Bo Li (Hong Kong University of Science and Technology, Hong Kong) ........................................ 1

SPRIDE: Scalable and Private Continual Geo-Distance Evaluation for Precision Agriculture
Qiben Yan (University of Nebraska-Lincoln, USA), Hao Yang (University of Nebraska Lincoln, USA), Mehmet Can Vuran (University of Nebraska-Lincoln, USA), Suat Irmak (University of Nebraska-Lincoln, USA) ........................................................................... 10

Deanonymizing Mobility Traces With Co-Location Information
Youssef Khazbak (The Pennsylvania State University, USA), Guohong Cao (The Pennsylvania State University, USA) ........................................................................................................ 19

PrivacyManager: An Access Control Framework for Mobile Augmented Reality Applications
Sarah Lehman (Temple University, USA), Chiu C. Tan (Temple University, USA) ........................................... 28

Session 1B: Cyber Deception

CyberMoat: Camouflaging Critical Server Infrastructures with Large Scale Decoy Farms
Jianhua Sun (College of William and Mary, USA), Kun Sun (George Mason University, USA), Qi Li (Tsinghua University, P.R. China) ........................................................................................................ 37

HoneyProxy: Design and Implementation of Next-Generation Honeynet via SDN
Sukwha Kyung (Arizona State University, USA), Wonkyu Han (Arizona State University, USA), Naveen Tiwari (Arizona State University, USA), Vaibhav Hemant Dixit (Arizona State University, USA), Lakshmi Srinivas (Arizona State University, USA), Ziming Zhao (Arizona State University, USA), Adam Doupe (Arizona State University, USA), Gail-Joon Ahn (Arizona State University, USA) ........................................................................................................ 46

WebTrap: A Dynamic Defense Scheme Against Economic Denial of Sustainability Attacks
Huangxin Wang (George Mason University, USA), Zhonghua Xi (George Mason University, USA), Fei Li (George Mason University, USA), Songqing Chen (George Mason University, USA) ........................................................................... 55

Session 2A: Wireless MIMO Security

Fundamental Limits of Covert Communication over MIMO AWGN Channel
Amr Abdelaziz (The Ohio State University & Military Technical College, USA), Can Emre Koksal (The Ohio State University, USA) ........................................................................................................ 64

Massive MIMO Pilot Distortion Attack and Zero-Startup-Cost Detection: Analysis and Experiments
Xu Zhang (Rice University, USA), Edward W. Knightly (Rice University, USA) ........................................... 73

Pilot Contamination Attacks in Massive MIMO Systems
Berk Akgun (University of Arizona, USA), Marwan Krunz (University of Arizona, USA), O. Ozan Koyluoglu (University of California, Berkeley, USA) ........................................................................................................ 82

Enabling Jamming-Resistant Communications in Wireless MIMO Networks
Huacheng Zeng (University of Louisville, USA), Chen Cao (University of Lousiville, USA), Hongxiang Li (University of Louisville, USA), Qiben Yan (University of Nebraska-Lincoln, USA) ........................................... 91
Session 2B: Malicious/Benign Inference

D-miner: A framework for Mining, Searching, Visualizing, and Alerting on Darknet Events
Heather Lawrence (University of Central Florida, USA), Andrew Hughes (University of Central Florida, USA), Robert Tonic (University of Central Florida, USA), Cliff Zou (University of Central Florida, USA) ................................................................. 100

OS Fingerprinting: New Techniques and a Study of Information Gain and Obfuscation
Blake Anderson (Cisco Systems, Inc., USA), David McGrew (Cisco, USA) ................................................. 109

A Graph-Theoretic Approach to Virtual Access Point Correlation
John Roth (Naval Postgraduate School, USA), Jeremy Martin (United States Naval Academy, USA), Travis Mayberry (United States Naval Academy, USA) .................................................................................. 118

Session 3A: System Security

Secure Logging with Crash Tolerance
Erik-Oliver Blass (Airbus Group Innovations, Germany), Guevara Noubir (Northeastern University, USA) ................................................................................................................................. 127

Organizational Practices in Cryptographic Development and Testing
Julie Haney (National Institute of Standards and Technology and Department of Defense, USA), Simson L. Garfinkel (National Institute of Standards and Technology, USA), Mary Theofanos (National Institute of Standards and Technology, USA) .................................................................................. 137

Data Verification in Information-Centric Networking with Efficient Revocable Certificateless Signature
Qingji Zheng (Huawei Research Center, USA), Qi Li (Tsinghua University, P.R. China), Aytac Azgin (Huawei Research, USA), Jian Weng (Jinan University, P.R. China) .................................................................................. 146

Securing Cyber-Physical Systems with Adaptive Commensurate Response
Zhiyuan Zheng (Texas A&M University, USA), Shan Jin (Texas A&M University, College Station, USA), Riccardo Bettati (Texas A&M University, USA), Narasimha Reddy (Texas A & M University, USA) .................................................................................. 155

Session 3B: Attacks

Cyber Attacks on Remote Relays in Smart Grid
Jiapeng Zhang (University of Hawaii, USA), Yingfei Dong (University of Hawaii, USA) .................. 164

Ghost Telephonist Impersonates You: Vulnerability in 4G LTE CS Fallback
Yuwei Zheng (360 Technology, P.R. China), Lin Huang (360 Technology, P.R. China), Haoqi Shan (360 Technology, P.R. China), Jun Li (360 Technology, P.R. China), Qing Yang (360 Technology, P.R. China), Wenyuan Xu (Zhejiang University, P.R. China) ................................................. 173

Evaluating Private Modes in Desktop and Mobile Browsers and Their Resistance to Fingerprinting
Yuanyi Wu (Shanghai Tech University, P.R. China), Hao Chen (UC Davis, USA), Dongyu Meng (Shanghai Tech University, P.R. China) .................................................................................. 182

Backdoor Attacks against Learning Systems
Yujie Ji (Lehigh University, USA), Xinyang Zhang (Lehigh University, USA), Ting Wang (Lehigh University, USA) .................................................................................. 191
Session 4A: VANET Security

QnQ: A Reputation Model to Secure Mobile Crowdsourcing Applications from Incentive Losses
Shameek Bhattacharjee (Missouri University of Science and Technology, USA), Nirmay Ghosh (Missouri University of Science and Technology, USA), Vijay K. Shah (Missouri University of Science and Technology, USA), Sajal K. Das (Missouri University of Science and Technology, USA) ................................................................. 200

A Data Trust Framework for VANETs Enabling False Data Detection and Secure Vehicle Tracking
Mingshun Sun (University of Arizona, USA), Ming Li (University of Arizona, USA), Ryan Gerdes (Virginia Tech, USA) .................................................................................................................. 209

Protecting Vehicular Networks Privacy in the Presence of a Single Adversarial Authority
Chang-Wu Chen (Ethereum Asia Pacific, Singapore, Taiwan), Sang-Yoon Chang (University of Colorado Colorado Springs, USA), Yih-Chun Hu (University of Illinois at Urbana-Champaign, USA), Yen-Wen Chen (National Central University, Taiwan) ........................................................................................................ 218

Session 4B: Cloud Security

CAPIA: Cloud Assisted Privacy-preserving Image Annotation
Yifan Tian (Embry-Riddle Aeronautical University, USA), Yantian Hou (Boise State University, USA), Jiawei Yuan (Embry-Riddle Aeronautical University, USA) ................................................................. 227

Secure and Efficient Outsourcing of Large-Scale Nonlinear Programming
Wei Du (University Of Arkansas, USA), Qinghua Li (University of Arkansas, USA) ............................................. 236

Secure Multi-Client Data Access with Boolean Queries in Distributed Key-Value Stores
Xu Yuan (University of Louisiana at Lafayette, USA), Xingliang Yuan (Monash University, Australia), Baochun Li (University of Toronto, Canada), Cong Wang (City University of Hong Kong, Hong Kong) ........................................................................................................ 245

Session 5A: DSA Security

Secure and Optimized Unauthorized Secondary User Detection in Dynamic Spectrum Access
Xiaonan Zhang (Binghamton University, USA), Qi Jia (Binghamton University, USA), Linke Guo (Binghamton University, USA) ................................................................. 254

When the Hammer Meets the Nail: Multi-Server PIR for Database-Driven CRN with Location Privacy Assurance
Mohamed Grissa (Oregon State University, USA), Attila Altay Yavuz (Oregon State University, USA), Bechir Hamdaoui (Oregon State University, USA) ................................................................. 263

Differential Location Privacy for Crowdsourced Spectrum Sensing
Zonghao Huang (Oklahoma State University, USA), Yanmin Gong (Oklahoma State University, USA) ................................................................. 272

Practical Privacy-Preserving Spectrum Query Schemes for Database-Driven CRNs with Multiple Service Providers
Jiajun Xin (University of Nevada, Reno, USA), Ming Li (University of Nevada, Reno, USA), Linke Guo (Binghamton University, USA), Pan Li (Case Western Reserve University, USA) ................................................................. 281

Session 5B: Wireless Security

An OFDM-based Dual Radar/Communication System Facing Uncertain Jamming Power
Andrey Garnaev (WINLAB, Rutgers University, USA), Wade Trappe (WINLAB, Rutgers University, USA) ................................................................. 290
Session 6: Mobile and IoT Security

Learning to Detect and Mitigate Cross-layer Attacks in Wireless Networks: Framework and Applications
Liyang Zhang (Northeastern University, USA), Francesco Restuccia (Northeastern University, USA), Tommaso Melodia (Northeastern University, USA), Scott M Pudlewski (Air Force Research Laboratory, USA) .................................................. 299

Manipulatable Wireless Key Establishment
Song Fang (University of South Florida, USA), Ian Markwood (University of South Florida, USA), Yao Liu (University of South Florida, USA) .................................................. 308

Secret Key Distribution Leveraging Color Shift Over Visible Light Channel
Hongbo Liu (Indiana University-Purdue University Indianapolis, USA), Bo Liu (Stevens Institute of Technology, USA), Cong Shi (Stevens Institute of Technology, USA), Yingying Chen (Rutgers University, USA) .................................................. 317

ViViSnoop: Someone is Snooping Your Typing Without Seeing It!
Kun Jin (The Ohio State University, USA), Si Fang (The Ohio State University, USA), Chunyi Peng (Purdue University, USA), Zhiyang Teng (Singapore University of Technology and Design, Singapore), Xuefei Hao (Tsinghua University, P.R. China), Lan Zhang (University of Science and Technology of China, P.R. China), Xiang-Yang Li (University of Science and Technology of China, P.R. China) .................................................. 326

MTRA: Multiple-Tier Remote Attestation in IoT Networks
Hailun Tan (UNSW, Australia), Sanjay Jha (University of New South Wales (UNSW), Australia), Gene Tsudik (University of CA, Irvine, USA) .................................................. 335

Composition Policies for Gesture Passwords: User Choice, Security, Usability and Memorability
Gradeigh Clark (Rutgers University, USA), Janne Lindqvist (Rutgers University, USA), Antti Oulasvirta (Aalto University, Finland) .................................................. 344

Towards Physical Layer Identification of Cognitive Radio Devices
Seth Andrews (Virginia Tech, USA), Ryan Gerdes (Virginia Tech, USA), Ming Li (University of Arizona, USA) .................................................. 353

Poster Session

VulMap: Global Information Security Vulnerabilities
Dennis Kergl (Universität der Bundeswehr München, Germany), Robert Roedler (Universität der Bundeswehr München, Germany), Gabi Dreo Rodosek (Universität der Bundeswehr München, Germany) .................................................. 362

Physical Layer Authentication Based on Channel Information and Machine Learning
Fei Pan (University of Electronic Science and Technology of China, P.R. China), Hong Wen (UESTC, P.R. China), Run-Fa Liao (UESTC, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China), Aidong Xu (Electric Power Research Institute China Southern Power Grid, P.R. China), Kai Ouyang (UESTC, P.R. China), Xiping Zhu (University of Electronic Science and Technology of China, P.R. China) .................................................. 364

A Physical Layer Secure Transmission Method based on Channel Prediction and QoS
Run-Fa Liao (UESTC, P.R. China), Hong Wen (UESTC, P.R. China), Fei Pan (University of Electronic Science and Technology of China, P.R. China), Huanhuan Song (University of Electronic Science and Technology of China, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China), Feiyi Xie (University of Electronic Science and Technology of China, P.R. China), Aidong Xu (Electric Power Research Institute China Southern Power Grid, P.R. China) .................................................. 366
Performance Analysis of Cooperative Secure Transmission System
Huanhuan Song (University of Electronic Science and Technology of China, P.R. China), Luping Zhang (University of Electronic Science and Technology of China, P.R. China), Hong Wen (UESTC, P.R. China), Run-Fa Liao (UESTC, P.R. China), Songlin Chen (UESTC, P.R. China), Yi Chen (UESTC, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China) ........................................................................................................................................ 368

A Model Divides the Mobile Security Level Based on SVM
Qing Yang (UESTC, P.R. China), Hong Wen (UESTC, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China), Aidong Xu (Electric Power Research Institute China Southern Power Grid, P.R. China) ........................................................................................................................................ 370

A method of reconciling the key discrepancy by exploiting Unconditional Secure Transmission
Wei Cheng (University Of Electronic Science And Technology Of China, P.R. China), Hong Wen (UESTC, P.R. China), Huanhuan Song (University of Electronic Science and Technology of China, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China), Aidong Xu (Electric Power Research Institute China Southern Power Grid, P.R. China), Kai Ouyang (UESTC, P.R. China), Xiping Zhu (University of Electronic Science and Technology of China, P.R. China) ........................................................................................................................................ 372

The Realization of Key Extraction based on USRP and OFDM Channel Response
Wei Cheng (University Of Electronic Science And Technology Of China, P.R. China), Hong Wen (UESTC, P.R. China), Huanhuan Song (University of Electronic Science and Technology of China, P.R. China), Yixin Jiang (Southern Electric Power Research Institute, P.R. China), Aidong Xu (Electric Power Research Institute China Southern Power Grid, P.R. China), Kai Ouyang (UESTC, P.R. China), Xiping Zhu (University of Electronic Science and Technology of China, P.R. China) ........................................................................................................................................ 374

Leveraging Inter-Controller Communication to Mitigate DDoS Attacks in SDN Networks
Jean Paul Houle (Carleton University, Canada), Saeed Ahmadi (Carleton University, Canada), Brent Robart (University of Ottawa, Canada), Ashraf Matrawy (Carleton University, Canada) ........................................ 376

Naggen: a Network Attack Graph GENeration Tool
Martin Barrère (Imperial College London, United Kingdom (Great Britain)), Emil Lupu (Imperial College, United Kingdom (Great Britain)) ........................................................................................................................................ 378

Time-Varying Keys for Encryption in WSN
Elena Uchiteleva (The University of Western Ontario, Canada), Abdallah Shami (University of Western Ontario, Canada), Ahmed Refaey (Manhattan College, USA & Western University, Canada) ........................................................................................................................................ 380

Cryptanalysis of Stream Cipher Using Density Evolution
Ahmed Refaey (Manhattan College, USA & Western University, Canada), Khaled Loukaoukha (Laval University, Canada), Adel Omar Dahmane (Universite du Quebec a Trois-Rivieres, Canada) ........................................................................................................................................ 382

Security and Trust for Surveillance Cameras
Konstantin Boyarinov (BCIT, Canada), Aaron Hunter (BCIT, Canada) ........................................................................................................................................ 384

Bluetooth for Decoy Systems: A Practical Study
Ken Wong (BCIT, Canada), Aaron Hunter (BCIT, Canada) ........................................................................................................................................ 386

Combining FPGAs and processors for high-throughput forensics
Franck Cornevaux-Juignet (IMT Atlantique, France), Matthieu Arzel (IMT Atlantique, France), Pierre-Henri Horrein (IMT Atlantique, France), Tristan Groléat (OVH, France), Christian Person (IMT Atlantique, France) ........................................................................................................................................ 388

Current State of Client-side Extensions Aimed at Protecting Against CSRF-like Attacks
Natalija Vlajic (York University, Canada) ........................................................................................................................................ 390

Public Key Exchange scheme that is Addressable (PKA)
Bilal Habib (Northern Arizona University, USA), Bertrand Cambou (Northern Arizona University & Northern Arizona University, USA), Duane Booher (Northern Arizona University, USA), Christopher Filipa (Northern Arizona University, USA) ........................................................................................................................................ 392

Quantitative Models of Imperfect Deception in Network Security using Signaling Games with Evidence
Jeffrey Pawlick (New York University, USA), Quanyan Zhu (New York University, USA) ........................................................................................................................................ 394
Distributed Shuffle Index: Analysis and Implementation in an Industrial Testbed
Enrico Bacis (University of Bergamo, Italy), Alan Barnett (Dell EMC, Ireland), Andrew Byrne (DELL, Ireland), Sabrina De Capitani di Vimercati (Università degli Studi di Milano, Italy), Sara Foresti (Università degli Studi di Milano, Italy), Stefano Paraboschi (University of Bergamo, Italy), Marco Rosa (University of Bergamo, Italy), Pierangela Samarati (Università degli Studi di Milano, Italy) ................................................................. 396

Toward the SIEM Architecture for Cloud-based Security Services
Jong-Hoon Lee (ETRI, Korea), Youngsoo Kim (ETRI, Korea), Jonghyun Kim (ETRI, Korea) .......... 398

Session 1

Deep Learning-Based Data Forgery Detection in Automatic Generation Control
Fengli Zhang (University of Arkansas, Fayetteville, USA), Qinghua Li (University of Arkansas, USA) ................................................................. 400

Securing Balise-based Train Control Systems Using Cryptographic Random Fountains
J Harshan (Indian Institute of Technology Delhi, India), Sang-Yoon Chang (University of Colorado Colorado Springs, USA), Seungmin Kang (Advanced Digital Sciences Center, Singapore), Yih-Chun Hu (University of Illinois at Urbana-Champaign, USA) ........................................... 405

Efficient Detection of False Data Injection Attacks on AC State Estimation in Smart Grids
James Ranjith Kumar (National University of Singapore, Singapore), Biplab Sikdar (National University of Singapore, Singapore) ......................................................... 411

Secure and Practical Output Feedback Control for Cloud-Enabled Cyber-Physical Systems
Zhiheng Xu (New York University, USA), Quanyan Zhu (New York University, USA) .................. 416

Session 2

An Efficient MQTT Framework for Control and Protection of Networked Cyber-Physical Systems
Utku Ozgur (Florida International University, USA), Harikrishnan Nair (Florida International University, USA), Aditya Sundararajan (Florida International University, USA), Kemal Akkaya (Florida International University, USA), Arif Sarwat (Florida International University, USA) .......... 421

A Game Theoretic Approach to Analyze False Data Injection and Detection in LQG System
Ruochi Zhang (Lehigh University, USA), Parvathinathan Venkitasubramaniam (Lehigh University, USA) ................................................................................. 427

Managing Cybersecurity Break-ins Using Bluetooth Low Energy Devices to Verify Attackers: A Practical Study
Ken Wong (BCIT, Canada), Aaron Hunter (BCIT, Canada) ......................................................... 432

Technical Session

Privacy for Targeted Advertising
Avradip Mandal (Fujitsu Laboratories of America, USA), John Mitchell (Stanford University, USA), Hart Montgomery (Fujitsu Laboratories of America, USA), Arnab Roy (Fujitsu Laboratories of America, USA) ................................................................. 438

Privacy-Preserving Audience Measurement in Practice -- Opportunities and Challenges
Steffen Passmann (INFOnline GmbH, Germany), Anne Lauber-Roensberg (TU Dresden, Germany), Thorsten Strufe (TU Dresden, Germany) ................................................................. 444

Dynamic ad-insertion and content orchestration workflows through manifest manipulation in HLS and MPEG-DASH
Robert Seeliger (Fraunhofer Institute FOKUS, Germany), Daniel Silhavy (Fraunhofer Institute FOKUS, Germany), Stefan Arbanowski (Fraunhofer Institut FOKUS, Germany) ................................................................. 450

Towards A New Privacy-Preserving Social Media Advertising Architecture (Invited Position Paper)
Daniela Becker (Robert Bosch LLC, USA), Jorge Guajardo (Robert Bosch LLC, USA), Karl-Heinz Zimmermann (Hamburg University of Technology, Germany) ................................................................. 456

Session 1: Access control, privacy policies, and security assurance

Privacy Aware Web Services in the Cloud
Farshad Rahimi Asl (McMaster University, Canada), Fei Chiang (McMaster University, Canada), Wenbo He (McMaster University, Canada), Reza Samavi (McMaster University, Canada) ................................................................. 458

Dynamic Security Assurance in Multi-Cloud DevOps
Erkuden Rios (Tecnalia, Spain), Eider Iturbe (Tecnalia, Spain), Wissam Mallouli (Montimage, France), Massimiliano Rak (University of Campania Studies Luigi Vanvitelli, Spain) ................................................................. 467

Selective Access for Supply Chain Management in the Cloud
Anselme Kemgne Tueno (SAP Research, Germany), Florian Kerschbaum (University of Waterloo, Canada), Daniel Bernau (SAP Research, Germany), Sara Foresti (Università degli Studi di Milano, Italy) ................................................................. 476

EncSwift and Key Management: An Integrated Approach in an Industrial Setting
Enrico Bacis (University of Bergamo, Italy), Marco Rosa (University of Bergamo, Italy), Ali Sajjad (British Telecom, United Kingdom (Great Britain)) ................................................................. 483

Session 2: Intrusion detection and privacy

Epidemic-Resistant Configurations for Intrusion Detection Systems
Robert Mitchell (Sandia National Laboratories, USA) ................................................................. 487

GeoSecure: Towards Secure Outsourcing of GPS Data over Cloud
Vikram Patil (State University of New York, Albany, USA), Shivam Parikh (State University of New York, Albany, USA), Priyanka Singh (State University of New York, Albany, USA), Pradeep K Atrey (State University of New York, Albany, USA) ................................................................. 495
Privacy-Preserving Fog Computing Paradigm
Nabil Abubaker (Bilkent University, Turkey), Leonard Dervishi (Bilkent University, Turkey), Erman Ayday (Bilkent University, Turkey) .......................................................... 502

Could Network View Inconsistency Affect Virtualized Network Security Functions?
Mohamed Aslan (Carleton University, Canada), Ashraf Matrawy (Carleton University, Canada) .......................................................... 510

Session 3: Security requirements and controls, secure computation

Determining security requirements for cloud-supported routing of physical goods
Sandra Domenquie Ringmann (HTWG Konstanz University of Applied Sciences & Siemens Postal, Parcel & Airport Logistics GmbH, Germany), Hanno Langweg (HTWG Konstanz University of Applied Sciences, Germany) .......................................................... 514

Structuring the Scope: Enabling Adaptive and Multilateral Authorization Management
Bojan Suzic (Graz University of Technology, Austria), Andreas Reiter (Graz University of Technology, Austria), Alexander Marsalek (Graz University of Technology, Austria) .......................................................... 522

Computing Multiple Exponentiations in Discrete Log and RSA Groups: From Batch Verification to Batch Delegation
Giovanni Di Crescenzo (Vencore Labs, USA), Matluba Khodjaeva (CUNY Graduate Center, USA), Delaram Khoobraei (CUNY Graduate Center, USA), Vladimir Shpilrain (CUNY Graduate Center, USA) .......................................................... 531

Technical Session I

Covert Secret Key Generation
Mehrdad Tahmasbi (Georgia Institute of Technology, USA), Matthieu Bloch (Georgia Institute of Technology, USA) .......................................................... 540

Technical Session II

Gaussian Fading Channel with Secrecy Outside a Bounded Range
Shaofeng Zou (University of Illinois at Urbana-Champaign & Coordinated Science Lab, USA), Yingbin Liang (Syracuse University, USA), Shlomo (Shitz) Shamai (The Technion, Israel) ............... 545

On Full-Duplex Secure Key Generation with Deterministic Models
Rick Fritschek (Technische Universität Berlin, Germany), Gerhard Wunder (FU Berlin, Heisenberg Communications and Information Theory Group, Germany) .......................................................... 550

Storage of General Data Sources on a Public Database with Security and Privacy Constraints
Sebastian Baur (Technische Universität München, Germany), Holger Boche (Technical University Munich, Germany) .......................................................... 555
Technical Session III

MAC Resolvability: First And Second Order Results
Matthias Frey (Technische Universität Berlin, Germany), Igor Bjelakovic (Technische Universität Berlin, Germany), Slawomir Stanczak (Fraunhofer Heinrich Hertz Institute & Technische Universität Berlin, Germany) ......................................................... 560

Technical Session IV

Physical Layer Security using BCH and LDPC Codes with Adaptive Granular HARQ
Mohamed Haj Taieb (Laval University, Canada), Jean-Yves Chouinard (Laval University, Canada) ......................................................... 565

Binary Primes Sequence for Cryptography and Secure Communication
Prashanth BusiReddyGari (Oklahoma State University, USA), Subhash Kak (Oklahoma State University, USA) ......................................................... 570

Optimal capacity region for PUF-based authentication with a constraint on the number of challenge-response pairs
Mani Khavari (Technical University of Munich, Germany), Holger Boche (Technical University Munich, Germany), Sebastian Baur (Technische Universität München, Germany) ......................................................... 575

Technical Session 1

Detecting Anomalous Behavior of PLC using Semi-supervised Machine Learning
Ken Yau (The University of Hong Kong, Hong Kong), K. p. Chow (The University of Hong Kong, Hong Kong), Siu Ming Yiu (The University of Hong Kong, Hong Kong), CF Chan (University of Hong Kong, Hong Kong) ......................................................... 580

Black Penguin: On the Feasibility of Detecting Intrusion with Homogeneous Memory
Ning Zhang (Virginia Tech & Raytheon Company, USA), Ruide Zhang (Virginia Tech, USA), Qiben Yan (University of Nebraska-Lincoln, USA), Wenjing Lou (Virginia Tech & National Science Foundation, USA), Thomas Hou (Virginia Tech, USA), Danfeng Yao (Virginia Tech, USA) ......................................................... 586

Linkography Abstraction Refinement and Cyber Security
Robert Mitchell (Sandia National Laboratories, USA), Marci McBride (Sandia National Laboratories, USA), John C Jarocki (Sandia National Laboratories, USA) ......................................................... 595

Technical Session 2

A Layered Graphical Model for Mission Attack Impact Analysis
Changwei Liu (George Mason University, USA), Anoop Singhal (NIST, USA), Duminda Wijesekera (George Mason University, USA) ......................................................... 602

Open-source flexible packet parser for high data rate agile network probe
Franck Cornveaux-Juignet (IMT Atlantique, France), Matthieu Arzel (IMT Atlantique, France), Pierre-Henri Horrein (IMT Atlantique, France), Tristan Groléat (OVH, France), Christian Person (IMT Atlantique, France) ......................................................... 610
Email Spoofing Detection Using Volatile Memory Forensics

Padmavathi Iyer (State University of New York, Albany, USA), Pradeep K Atrey (State University of New York, Albany, USA), Gaurav Varshney (Indian Institute of Technology, Roorkee, India), Manoj Mishra (IIT Roorkee, India)
