Highway Capacity and Quality of Service

Transportation Research Record: Journal of the Transportation Research Board Volume 2615 (2017)

## TABLE OF CONTENTS

2. Evaluation and Testing of Driver-Assistive Truck Platooning: Phase 2 Final Results ........................................ 11 Bishop, Richard; Bevly, David; Humphreys, Luke; Boyd, Stephen; Murray, Daniel
3. Influence of Remotely Operated Stop–Slow Controls on Driver Behavior in Work Zones .......................... 19 Debnath, Ashim Kumar; Blackman, Ross; Haworth, Narelle; Adinegoro, Yusuf
4. Estimation of Saturation Headway in Work Zones on Urban Streets .................................................. 26 Hajbabaie, Ali; Kim, SangKey; Schroeder, Bastian J.; Aghdashi, Seyedbehzad; Rouphail, Nagui M.; Tahrizi, Kambiz
5. Naturalistic Study of Truck Following Behavior .................................................................................................. 35 Nodine, Emily; Lam, Andy; Yanagisawa, Mikio; Najm, Wassim
6. Optimizing and Modeling Tollway Operations Using Microsimulation: Case Study Sanand Toll Plaza, Ahmedabad, Gujarat, India .......................................................................................... 43 Bains, Manraj Singh; Arkatkar, Shrinivas S.; Anbumani, K. S.; Subramaniam, Siva
7. Estimating the Effects of Urban Street Incidents on Capacity ........................................................................ 55 Massahi, Aidin; Hadi, Mohammed; Cutillo, Maria Adriana; Xiao, Yan
9. Calibrating Vissim to Analyze Delay at Signalized Intersections .......................................................... 73 Buck, H. Sebastian; Mallig, Nicolai; Vortisch, Peter
10. Novel Area Occupancy–Based Method for Passenger Car Unit Estimation on Multilane Urban Roads Under Heterogeneous Traffic Scenario ........................................................................... 82 Mishra, Raunak; Kumar, Pallav; Arkatkar, Shrinivas S.; Sarkar, Ashoke Kumar; Joshi, Gaurang J.
11. Modeling Pedestrian Delays at Signalized Intersections as a Function of Crossing Directions and Moving Paths ........................................................... 95 Zhao, Jing; Liu, Yue
12. Application of High-Resolution Vehicle Data for Free-Flow Speed Estimation ........................................ 105 Rouphail, Nagui M.; Kim, SangKey; Aghdashi, Seyedbehzad
13. How Weather Events Affect Freeway Demand Patterns ........................................................................... 113 Dehman, Amjad; Drakopoulos, Alexander
14. Operational Analysis of a Single-Lane Roundabout with a Mix of Driverless Vehicles .................................. 123 Shi, Liang; Prevedouros, Panos D.
15. Car Drivers’ Experienced Level of Service on Freeways ........................................................................ 132 Jensen, Søren Underlien
16. Relationship Between Cycle Overflow Probability and Capacity at Signalized Intersections: Application for Delay Estimation .......................................................... 140 Wu, Ning; Giuliani, Stefan; Geistefeldt, Justin
17. Proposed Framework for Evaluating Spillback in the Highway Capacity Manual ....................................... 148 Zheng, Yinan; Armstrong, Michael; de Andrade, Gustavo; Elefteriadou, Lily
18. Queue Length at Signalized Intersections from Red-Time Formula and the Highway Capacity Manual Compared with Field Data .................................................. 159 Liu, Xueying; Benekehal, Rahim F.; Shaik, Mohammed Abdul Rawoof
