# TABLE OF CONTENTS

## VOLUME 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>3-D Geological Interpretation Examples in Unconventional Shale Reservoirs</td>
<td>1</td>
</tr>
<tr>
<td>A 3-D Outcrop Perspective of an Unconventional Carbonate Mudstone Reservoir</td>
<td>7</td>
</tr>
<tr>
<td>Advanced Imaging and Inversion for Oil Production Estimates in Unconventional Resource Plays</td>
<td>22</td>
</tr>
<tr>
<td>Ambient Fracture Imaging: A New Passive Seismic Method</td>
<td>30</td>
</tr>
<tr>
<td>An Analytic Approach to Geologic Interpretation and Petrophysical Modeling of the Bakken/Three Forks Plays</td>
<td>40</td>
</tr>
<tr>
<td>An Analytic Approach to Optimizing Well Space and Completions in the Bakken/Three Forks Plays</td>
<td>47</td>
</tr>
<tr>
<td>Application of Innovative Reaming and Completion Technology in Williston Basin Wells</td>
<td>54</td>
</tr>
<tr>
<td>Application of Real-Time Well-Site Tools for Enhanced Geosteering, Reservoir and Completions Characterization</td>
<td>63</td>
</tr>
<tr>
<td>Applying 3D Seismic Technology to Better Understand the Mechanical Variability of the Lower Barnett Shale in Southern Montague and Northern Wise Counties, Fort Worth Basin</td>
<td>81</td>
</tr>
<tr>
<td>Assessing and Advancing a CBM Resource Play Towards Commerciality - A Case Study from the UK</td>
<td>90</td>
</tr>
<tr>
<td>Azimuthal AVO Gradient Anisotropic Analysis on Prediction of Fractures on Barnett Shale</td>
<td>99</td>
</tr>
<tr>
<td>The Bakken at Parshall Field: Inferences from New Data Regarding Hydrocarbon Generation and Migration</td>
<td>109</td>
</tr>
<tr>
<td>Barnett Gas Geochemistry and Thermal Maturity, Fort Worth Basin</td>
<td>119</td>
</tr>
<tr>
<td>Baseline/Calibration Method for Reservoir Pressure Determination</td>
<td>128</td>
</tr>
<tr>
<td>Basic Characteristics and Exploration Prospect of the Upper Triassic Xujiahe Formation Continental Shale Gas in Sichuan Basin of China</td>
<td>138</td>
</tr>
<tr>
<td>Borehole Microseismic, Completion and Production Data Analysis to Determine Future Wellbore Placement, Spacing and Vertical Connectivity, Eagle Ford Shale, South Texas</td>
<td>146</td>
</tr>
<tr>
<td>A Case Study: New Low Damage Frac Fluid Provides Immediate Production Results in Eagle Ford Shale</td>
<td>158</td>
</tr>
<tr>
<td>Case Study of 3D Seismic Inversion and Rock Property Attribute Evaluation of the Haynesville Shale</td>
<td>168</td>
</tr>
<tr>
<td>A Case Study to Evaluate Shale Oil Production Performance Models with Actual Well Production Data</td>
<td>175</td>
</tr>
<tr>
<td>Changes in Porosity and Organic Matter Phase Distribution Monitored by NMR Relaxometry Following Hydrous Pyrolysis</td>
<td>185</td>
</tr>
<tr>
<td>Characteristics of the Gidgealpa Group Composite Resource Play in the Cooper Basin, South Australia</td>
<td>192</td>
</tr>
<tr>
<td>Characterization of Stress-field Variation on Subsurface Faults in Surrounding Areas of Hydraulic Fracturing</td>
<td>213</td>
</tr>
<tr>
<td>Characterization of Thickness Anomalies in the Bakken and Three Forks Formations, North Central North Dakota, USA</td>
<td>232</td>
</tr>
<tr>
<td>Characterization of Unconventional Reservoir Core at Multiple Scales</td>
<td>242</td>
</tr>
<tr>
<td>Characterizing Tight-gas Systems with Production Data - Wyoming, Utah, and Colorado</td>
<td>252</td>
</tr>
<tr>
<td>Title</td>
<td>Page</td>
</tr>
<tr>
<td>---------------------------------------------------------------------</td>
<td>------</td>
</tr>
<tr>
<td>Clay Mineralogy of Shale Gas Reservoirs through Integrating Infrared Spectroscopy and X-Ray Diffraction</td>
<td>270</td>
</tr>
<tr>
<td>Coal Seam/Bed Methane in Northern Louisiana: Investigations at the University of Louisiana at Lafayette</td>
<td>280</td>
</tr>
<tr>
<td>Complementary Role of Multi-Component and Conventional 3D Seismic for Risk Reduction in Unconventional Resource Plays - A Marcellus Shale Example</td>
<td>289</td>
</tr>
<tr>
<td>Compositional Simulation of Condensate Banking Coupled with Reservoir Geomechanics</td>
<td>309</td>
</tr>
<tr>
<td>A Comprehensive Well Look-Back; Analyzing Three Years' Worth of Drilling, Completing and Producing Eagle Ford Wells in Order to Understand Trend-Wide Performance Drivers and Variability</td>
<td>319</td>
</tr>
<tr>
<td>Concepts and Methods for the Recognition of Cyclicity in the Marcellus Shale of the Appalachian Basin, NE USA</td>
<td>326</td>
</tr>
<tr>
<td>Constructing Meaningful Geologic Models of Shale Gas Systems: An Example from the Horn River Basin, Canada</td>
<td>336</td>
</tr>
<tr>
<td>Controlling Effects of Overall Basin Uplift on Tight Sand Gas Reservoirs - Case Study of Xujiahe Formation in the Sichuan Basin and Upper Paleozoic in the Ordos Basin</td>
<td>342</td>
</tr>
<tr>
<td>Critical Role of Rock and Fluid - Impact on Reservoir Performance on Unconventional Shale Reservoirs</td>
<td>377</td>
</tr>
<tr>
<td>Current Workflows for Shale Gas Reservoir Characterization</td>
<td>397</td>
</tr>
<tr>
<td>Cutting Generation Study Based On Cutter and Design Testing For Improved Drilling Performance</td>
<td>403</td>
</tr>
<tr>
<td>Decision Support Tool (DST) for Characterization, Treatment, and Beneficial Use of Unconventional Gas Frac Flowback and Produced Water</td>
<td>412</td>
</tr>
<tr>
<td>Declining Frac Effectiveness - Evidence that Propped Fractures Lose Conductivity, Surface Area, and Hydraulic Continuity</td>
<td>416</td>
</tr>
<tr>
<td>Determination of In-Situ Hydrocarbon Volumes in Liquid Rich Shale Plays</td>
<td>431</td>
</tr>
<tr>
<td>Determination of Thermal Maturity and the Extent of Oil Cracking in Tight Shales Using Extract Biomarker and Diamondoid Concentrations and Distributions</td>
<td>438</td>
</tr>
<tr>
<td>Determining the Contributing Reservoir Volume from Hydraulically Fractured Horizontal Wells in the Wolfcamp Formation in the Midland Basin</td>
<td>443</td>
</tr>
<tr>
<td>Developing Diagnostic Tools for Hydraulic Fracture Geometry Analysis</td>
<td>451</td>
</tr>
<tr>
<td>Diagnosing Pressure-Dependent-Permeability in Long-Term Shale Gas Pressure and Production Transient Analysis</td>
<td>458</td>
</tr>
<tr>
<td>Direct Pore-Scale Modeling of Flow and Transport in Tight Formations</td>
<td>468</td>
</tr>
<tr>
<td>The Discovery of the Marcellus Shale Play, An Operator's Experience</td>
<td>476</td>
</tr>
<tr>
<td>Distinctive Based Multi-Attribute Seismic Facies Classification to Identify Sweet Spots within the Barnett Shale: A Case Study from the Fort Worth Basin, TX</td>
<td>491</td>
</tr>
<tr>
<td>Do Gas Hydrates Occur in Alaminos Canyon, Gulf of Mexico?</td>
<td>501</td>
</tr>
<tr>
<td>Drilling Optimization Methodology Connects 28+ Technical Disciplines</td>
<td>520</td>
</tr>
<tr>
<td>Dynamic Imaging of Fluid Mobility in Low-Permeability Matrices Using Positron Emission Tomography</td>
<td>530</td>
</tr>
<tr>
<td>Title</td>

</tbody>
</table>
Hydrocarbon Maturity and Migration Analysis Using Production Gas Stable Isotopic Signatures in the Wattenberg Field, Denver Basin, Colorado, USA .................................................. 1044

Scherwood, Owen A.; Travers, Patrick D.; Dolan, Michael P.
The Identification and Commercialization of Subnormally Pressured Unconventional, Gas-Bearing Sandstones ............................................................ 1051

Law, Ben

Identification of Shale Sweet Spots Using Key Property Estimates from Log Analysis and Geostatistics .......................................................... 1062

Chorn, Larry; Yarus, Jeffrey; del Rosario-Davis, Suzanne; Picher, Jason

Identification of Three Williston Basin Oil Fields Derived from Mississippian Carbonate Source Rocks .......................................................... 1075

Zomer, John E.; Curtis, John B.; Rocher, Don

Image-Based Modeling of Flow in Natural Partially Cemented Fractures .................................................................................. 1082

Tokan-Lavall, Ademile; Prodanovic, Maša; Eichhubl, Peter

Impact of Completion Design on Unconventional Horizontal Well Performance .................................................................................. 1092

Yalavarthi, R.; Jayakumar, R.; Nyaaba, C.; Rai, R.

Impact of Operator's Best Practices, Completion Design and Well Density on Projected Ultimate Recoveries of Horizontal Bakken Wells in Williams County, North Dakota .......................................................... 1104

Møller, Brudney; Hower, Timothy

Impact of Spatial Distribution of Kerogen Network on Electrical Resistivity of Organic-Rich Source Rocks .......................................................... 1113

Chen, Huangye; Chi, Lu; Kethireddy, Nikhil; Heidari, Zoya

Impacts of Stress, Natural and Induced Fractures on Mechanical Properties of Organic-Rich Shales .......................................................... 1123

Mokhchiri, Mehdi; Alqahtani, Adel A.; Tutuncu, Azra N.

Importance of U.S. Oil Shale .............................................................................................................................................................................................. 1139

Vetter, Glenn

Improved Data Analysis and Interpretation Method for Laboratory Determination of Crushed-Sample Shale Gas Permeability .......................................................................................................................................................... 1143

Civan, F.; Devon, D.; Sigal, R.

An Improved Method to Obtain Reliable Production and EUR Prediction for Wells with Short Production History in Tight/Shale Reservoirs ................................................................................................................................ 1154

Yu, Shaofeng; Miocic, Dominic J.

Improving Cement Placement in Horizontal Wells of Unconventional Reservoirs Using Magneto-Rheological Fluids .......................................................... 1165

Mokhchiri, Mehdi; Alqahtani, Adel A.; Tutuncu, Azra N.

Improving Our Understanding of Porosity in Source Rock Reservoirs through Advanced Imaging Techniques .......................................................... 1177

Alcantar-Lopez, Leo; Chipera, Steve J.

Incorporating Effect of Maturity and Organic Richness in Petrophysical Analysis of Shales .......................................................................................... 1187

Zargari, Saeed; Prasad, Manika

Incorporating Geological Characterization into Unconventional Geomodels for Accurate Reservoir Characterization ........................................................................................................................................................................ 1197

Melson, Braden D.

Incorporation of Unconventional Investment Opportunities Using a Risked Phased Program Assessment Method To Enable Consistent Portfolio Decision Making .......................................................... 1204

Edwards, Brett; Rodriguez, Karyna; Rasey, Stephen

Increasing Drilling Performance in ERD Wells with New Generation Drill Pipe .......................................................................................... 1209

Van Paynbroeck, Luc; Williams, Henry

In-Depth Experimental Investigation of Shale Physical and Transport Properties .................................................................................. 1220

Alqasmani, K.; Alnoami, K.; Kosicek, A. R.

Insights into the Maturation Process from Physical and Chemical Analysis of Partially Pyrolyzed Green River Oil Shale ........................................................................................................................................................................ 1230

Pomerantz, Andrew; Kleinberg, Robert; Le-Doan, Tuong-Van; Erdman, Natasha; Burnham, Alan; Allix, Pierre Al-Duhamlan, Mohammed A.; Sonnenberg, Stephen A.; Meckel, Lawrence D.

Insights on Hydrocarbon-Generation Microfracturing in Organic-Rich Shales .......................................................................................... 1237

Al-Duhamlan, Mohammed A.; Sonnenberg, Stephen A.; Meckel, Lawrence D.

An Integrated Approach for Optimizing Vertical Wolfbone Wells in the Delaware Basin .................................................................................. 1249

Yan, Malcolm E.; Sharma, Anoop; Etherhart, Tark; Smith, Lance; Fisher, Kelvin; Brown, Randy; Honeymon, Lex; Bates, Bradley

Integrated Geological Reservoir Characterization of the Cardium Light Tight Oil Play, Pembina Field in Alberta .................................................................................. 1256

Pedersen, Per Kent; Fic, Julianne D.; Fraser, Adam

An Integrated Geomechanical and Microseismic Study of Multi-Well Hydraulic Fracture Stimulation in the Bakken Formation ........................................................................................................................................................................ 1263

Yang, Yi; Zoback, Mark; Simon, Michele; Dohmen, Ted

Integrating Geology and Engineering: Implications for Production in the Bakken Play, Williston Basin .................................................................................. 1273

Theley, Costina; Sonnenberg, Stephen A.

Integration of Active and Passive Surface Seismic for Understanding the Variations Observed During a Stimulation Campaign ........................................................................................................................................................................ 1285

Primiero, Paolo; Leiceaga, Gorka Garcia; Le Calvez, Joël

Integration of Different Imaging Methodologies To Study Shale Sample Heterogeneity .................................................................................. 1297

Chen, J.; Wei, D.; Yang, W.

Integration of Natural and Hydraulic Fracture Network Modeling with Reservoir Simulation for an Eagle Ford Well ........................................................................................................................................................................ 1302

Offenburger, Randy; Bull, Nathaniel; Kamaganti, Konic; Oussoltsev, Dmitry
Integration of Structure and Stratigraphy in Bone Spring Tight Oil Sandstones using 3D Seismic in the Delaware Basin, TX ................................................................. 1312

Allen, Jessica; Schwartz, Ken; DeSantis, John; Koglin, Don; Chen, Fajiu

VOLUME 3

Interfacial Tension and Mineral Adhesion Properties of Cyclopentane Hydrate ...................................................... 1319

Aman, Zachary M.; Zerpa, Luis E.; Grassia, Giovanni; Leith, William E.; Sloan, E. Dendy; Sam, Amadeo K.; Koh, Carolyn A.

Interfacing the Critical Geological and Completion Parameters That Impact Production Performance ........................................ 1323

Ejofodomi, E.A.; Cavazzoni, G.; Estrada, J.D.; Peano, J.

Investigation of Created Fracture Geometry through Hydraulic Fracture Treatment Analysis ........................................ 1334

Ahmed, Braheem A.; Eldig-Economides, Christine

Investigation of Flow and Imbibition Processes in Spraberry Fracture Systems Using a Hyper-Threaded Reservoir Simulator .................................................. 1344

Scott, Kyle D.; Quinn, Michael A.; Monson, Gene D.; Leonard, Paul A.

Investigation of the Microstructure of Shales in the Oil Window .................................................................................. 1353

Curtis, Mark E.; Sondergeld, Carl H.; Rai, Chandra S.

Joint VTI and Mud Slowness Inversion Using Multiple Modes and Adaptive Weighting ...................................................... 1359

Collins, Mark

Laboratory Determination of the Continuous Stress-Dependent Permeability of Unconventional Oil Reservoir Rocks ........................................................................ 1367

Katsuki, Daiisuke; Gutierrez, Marte; Tutuncu, Azra N.

Laboratory Measurements of Matrix Permeability and Slippage Enhanced Permeability in Gas Shales .................................................. 1377

Heller, Rob; Zoback, Mark

Leveraging Seismic Attributes to Understand the 'Frac-Able' Limits and Reservoir Performance in the Eagle Ford Shale, South Texas, USA ........................................................................ 1387

Collins, Kim; Bodizak, Robert; Stephens, Andy; Meek, Robert

Leveraging the Option Value of Unconventional Resource Projects .................................................................................. 1395

Allan, Paul D.

Liquid Loading Within Hydraulic Fractures And Its Impact on Unconventional Reservoir Productivity .......................... 1405

Agrawal, Samarth, Sharma, Mukul M.

Fosburgh, E.T.; Djordjevic, O.A.; Rashing, J.A.

Lowering Drilling Cost, Improving Operational Safety, and Reducing Environmental Impact through Zonal Isolation Improvements for Horizontal Wells Drilled in the Marcellus Shale ........................................................................ 1420

Bassett, Jessica; Watters, Jeff; Conner, N.Kyle; Nakano, Michael

Making Fossil Energy More Sustainable - Technology Pathways and Conflict Reduction ........................................... 1429

Namnedal, Dag; McCray, John

Manage the Pressure - Drive the Results .................................................................................................................. 1436

Bernard, Christopher James; Lovorn, Randy; Lewis, Derrick; Baker, Ed; Saded, Saad

Marcellus Well Spacing Optimization - Pilot Data Integration and Dynamic Modeling Study ........................................ 1449

Cakici, Deniz; Dick, Chris; Mookerjee, Abhijit; Stephenson, Ben

Measurement of Relative Permeability of Coal to Gas and Water .................................................................................. 1459

Ham, Y.; Kantzas, A.

Message in a Bottle .................................................................................................................................. 1478

Bearinger, Doug

Methods for Seismic Sweet Spot Identification, Characterization and Prediction in Shale Plays ........................................ 1484

Xia, Xiaoming; Martin, Kevin; Luo; Collins, Paul

Micro-scale Characterization of the Eagle Ford Formation Using SEM Methods and Digital Rock Modeling .......................... 1489

Driskill, Brian; Walle, Joel; Sinclair, Steven W.; DeVito, Juliana

Minimum Miscibility Pressure in Conventional and Unconventional Reservoirs .................................................. 1496

Teklu, Tadesse; Weldie, Alharthy, Najeeb; Kazemi, Hossein; Yin, Xiaolong; Graves, Ramona M.; Al-Sumaiti, Ali M.

Mississippian Lime Play: Variations in Reservoir Geology East of the Nemaha Ridge .................................................. 1507

Wilson, Edith Newton; Matson, Shane; Wickstrom, Charles

Mobile Clarification for Re-Use of Unconventional Oil and Gas Produced Water to Reduce Costs and Minimize Environmental Footprint .................................................. 1511

Horner, Patrick; Anderson, Jeffrey A.; Thompson, Mark

Modeling and Simulation of Production from Commingled Shale Gas Reservoirs .................................................. 1521

Milad, Benmadi; Civian, Faruk; Devegowda, Deepak; Sigal, Richard F.

Modeling Gas Injection into Shale Oil Reservoirs in the Sanish Field, North Dakota ........................................ 1530

Dong, Cuiyu; Hoffman, B. Todd

Modeling Abnormal Fluid Pressure in Unconventional Plays Due to Uplift ........................................................................ 1540

Boerner, Sean; Singh, Rohit; Peebles, Ross; Garvin, Jessica; Holt, William J.E.

Modeling Production Performance of an Anomally High Pressure Unconventional Shale Reservoir .................................. 1560

Kurtoglu, Basak; Ramirez, Benjamin; Kazemi, Hossein
Modeling the Injection of Carbon Dioxide and Nitrogen into a Methane Hydrate Reservoir and the Subsequent Production of Methane Gas on the North Slope of Alaska .......................................................... 1570

Keith, Stan; Swan, Monte; Horne, John

Modeling the Significance of Mechanical Interfaces to Fracture Propagation and Morphology - Geomechanical Models Derived from Outcrop Analysis .......................................................... 1580

Garapati, Nagaseve; McGuire, Patrick; Anderson, Brian J.

Multi-Detector, Pulsed Neutron-Based Synthetic Openhole Logs- An Unconventional Gas Reservoir Case Study .......................................................... 1590

Km, Tonghwee; Chace, David

A Multi-Domain Approach to Completion and Stimulation Design in the Marcellus Shale ........................................................................................................ 1604

MacDonald, Courteney; Brewer, James; Cakici, Mahmut D.; Rampton, David; Dick, Karen; Moskiter, Geh; Clark, Brian D.; Ganguly, Utapal

Multi-Fracture Stimulation Techniques Make Better Wells in Ultra-Low Permeability Oil Reservoirs .................................................................................... 1614

Chang, Yuanrong; Lu, Hongjun; Chen, Baoshan; Ji, Zhen-niing; Wang, Chengwang; Qie, Yin; Li, Jiashan; Du, Xiaofei; Yin, Guiqin

A Multi-Measurement Core-Log Integration for Advanced Formation Evaluation of Source Rock Formations: A Green River Case Study ........................................................................... 1624

Reeder, Stacy L.; Kleinberg, Robert L.; Herron, Michael; Burnham, Alan; Allis, Pierre

Multiple Interpretations of Unconventional Well Performance Using Analytical Solutions: A Marcellus Case Study .......................................................... 1634

Lalorhooh, F.; Jayakumar, R.; Yalavarthi, R.

Multiuse of Seismic and Attribute Mapping for Field Appraisal and Development in the Eagle Ford Shale: Mapping TOC, Porosity and Seal Integrity ........................................................................ 1646

Bello, Hector D.; Barzola, Gervasio; Portis, Doug; Yannin, Beul; Handke, Michael; Clemons, Kit

Nanoscale Visualization of Gas Shale Pore and Textural Features ................................................................................................................................. 1655

Singh, Kalyan; Andrews, Jay C.; Li, Yijian; Gelb, Jeff; Kovscek, Anthony

Natural and Hydraulic Fracture Interaction Study Based on Semi-Circular Bending Experiments ..................................................................................... 1666

Wang, Weirui; Olson, Jon E.; Prodanovic, Maja

A Nearly Complete Characterization of Permeability to Hydrocarbon Gas and Liquid for Unconventional Reservoirs: A Challenge to Conventional Thinking ........................................................................ 1674

Cai, Albert; Wust, Raphael; Nassichuk, Brent; Glover, Ken; Brezovski, Ron; Twemlow, Cory

New Approach to Geomechanics Solves Serious Horizontal Drilling Problems in Challenging Unconventional Plays ........................................................................................................... 1691

Higgins-Borchardt, Shannon; Kepp, Tony; Friedman, Marcelo; Stichler, Jason

A New Geochemical Tool for the Assessment of Organic-Rich Shales ................................................................................................................................. 1701

Elias, Ronen; Duclerc, Dominique; Le-Yen-Loi, Robert; Gelin, Francois; Dessort, Daniel

A New Laboratory Approach to Shale Analysis Using NMR Relaxometry ................................................................................................................................. 1706

Washburn, Kathryn E.; Birdwell, Justin E.

New Reserves in an Old Field, the Niobrara Resource Play in the Wattenberg Field, Denver Basin, Colorado ..................................................................................... 1714

Sonnenberg, Stephen A.

New Technologies and Integration for Optimizing Well Placement and Production ................................................................................................................ 1727

de Ribe, Bruno

Niobrara Horizontal Well Planning and Execution: The Other Half of the Equation .................................................................................................................. 1733

Wiener, Jack; Elfedawy, Mohamed

Niobrara Sweet Spots, Basement Geology, and Sea Floor Geochemistry ................................................................................................................................. 1740

Swan, Monte; Keith, Stan

Nonempirical Apparent Permeability of Shale ................................................................................................................................. 1749

Haghepour, Javaadpour, Faramarz

Non-Linearity in Decline Behavior of Unconventional Wells ................................................................................................................................. 1765

Gilman, James R.; Fad居, Sepehr

Not All Source Rocks Are Source Rock Plays: Screening Quality From Quantity .................................................................................................................. 1776

Evenick, Jonathan C.

Novel Approach to Determining Unconsolidated Reservoir Properties: Fabric and Flow in Oil Sands ..................................................................................... 1783

Bell, Julie Dee; Kalkarni, Kamal; Maraj, Marsha P.

Novel Approaches for the Simulation of Unconventional Reservoirs ................................................................................................................................. 1791

Yan, Bicheng; Killoough, John E.; Wang, Yuhe; Cao, Yang

Numerical Upscaling of Coupled Flow and Geomechanics in Highly Heterogeneous Porous Media ................................................................................. 1801

Yang, Daegil; Moridis, George J.; Blasingame, Thomas A.

Optical Kerogen Analysis - A New Workflow in Unconventional Shale Play Analysis ........................................................................................................... 1827

Jaeger, Hartmut

Optimization of Placement of Hydraulic Fracture Stages in Horizontal Wells Drilled in Shale Gas Reservoirs ........................................................................ 1836

Ma, Xiaodian; Plaksina, Tatjana; Gildin, Eduard

Pattern Recognition in a Digital Age: A Gameboard Approach to Determining Petrophysical Parameters ........................................................................ 1847

Krygowski, Daniel A.; Cluff, Robert M.

Permeability Estimation from Fracture Calibration Test Analysis in Shale and Tight Gas ................................................................................................. 1856

Xue, Han; Ethig-Economides, Christine

Petrophysical Rock Typing in Organic-Rich Source Rocks Using Well Logs ....................................................................................................................... 1866

Arastabar, Aivarou, Sanejof, Behmoush, Heidari, Zaya

Pitfalls of Averaging Fracture Dimensions and Reservoir Permeability for Unconventional Reservoirs ........................................................................ 1875

Jayakumar, R.; Boulos, A.; Martinez, Asra-Araque

Plate Tectonic Contraints for Hydrocarbon Formation in the Niobrara Formation ...................................................................................................... 1888

Keith, Stan; Swan, Monte; Horne, John
VOLUME 4

Production Forecasting for Shale Gas Reservoir Wells using a Simulator that Honors the Microstructure of Shale Gas Reservoirs and the Physics of Fluids in Nano-Porous Media .................................................. 1977
Michel, G.; Civan, F.; Sigal, R.; Devedzovs, D.

A Production Optimization Approach to Completion and Fracture Spacing Optimization for Unconventional Shale Oil Exploration ........................................................................................................ 1987
Jin, C.J.; Sierra, Leopoldo; Mayerhofer, Mike

PSDM for Unconventional Reservoirs? A Niobrara Shale Case Study ........................................................................................................ 1999
Michel, G.; Civan, F.; Sigal, R.; Devedzovs, D.

Pulsed Fracturing in Shale Reservoirs: Geomechanical Aspects, Ductile-Brittle Transition and Field Implications ........................................ 2015
Safavi, M. Reza; Gandikota, Raju; Mulia, Uno; J. Missy; Glanville, Jonathan; Abase, Hazim

Pyrolysis and TOC Identification of Tight Oil Sweet Spots .................................................................................................................. 2029
Pagels, Markus; Willberg, Dean M.; Edelman, Eric; Zagoski, William; Frant, Joe

Real-Time Wireless Seismic Acquisition of Microseismic Events for Monitoring Hydrofracing .............................................................. 2073
Crise, Doug; Kligfield, Roy; Lambert, Mick

Regional Geologic Characterization of the Polish Lower Paleozoic Unconventional Play Using an Integrated Seismic and Well Data Approach ........................................................................................................ 2088
Ramirez-Caro, D.; Totten, M.; Chaudhuri, S.; Chau, N.; Bouin, R.; Meece, J.; Riepl, G.; Semhi, K.

Relative Permeability in a Shale Formation in Colombia Using Digital Rock Physics ............................................................................................. 2093
Cottrell, Mark; Hosseinipour, Hooman; Dershowitz, William

Reservoir Characterization and Evaluation Methods of Tight Lacustrine Carbonates: Example from Shulu Sag in Bohai Bay, China ............................................................... 2105
Zhang, Zaiting; Li, Qiong

Reservoir Characterization of Eagle Ford Shale through Lithofacies Analysis for Identification of Sweet Spot and Best Landing Point ................................................................................................ 2122
Sahoo, Ajit K.; Mukherjee, Diya; Mukherjee, Abhishek; Srivastava, Mukul

Reservoir Geometries and Facies Associations of Fluvial Tight-Gas Sands, Williams Fork Formation, Rifle Gap, Colorado .......................................................................................................................... 2130
McDouell, Bryan; Plink-Bjorklund, Pirex

Reservoir Modeling and Forecasting Shale Multi-Stage Stimulation with Multi-disciplinary Integration ................................................................................................................................. 2138
Malayalam, Shif; Gangopadhyay, Abhijit; Abhouchah, Coudibly; Sebastian, Herb; Woodward, Don

Reservoirs That Are Not in Capillary Pressure Equilibrium ................................................................................................................................. 2148
Hoffman, Monty E.

Resolving Production Trends in Shale Reservoirs - An Eagle Ford Case Study from Localized Reservoir Characterization to Basin Understanding ........................................................................................................... 2158
Moncada, Katharine; Atwood, Keith; Altman, Raphael; Mulpani, Ravi; Indriati, Shirley; Clayton, Richard
