From research to rulemaking in the Federal Railroad Administration  
J Tunna, US Department of Transportation, USA

Video measurement techniques for understanding wheel-induced lateral forces and track component deflections  
P Waterfall, Imetrum Ltd and University of Bristol; B Temple, C Hardwick, LB Foster Rail Technologies; J Sharam, A Plumb, Imetrum Ltd, UK

A 2D DEM analysis of railway ballast vibration under cyclic loads  
X Zhang, C Zhao, W Zhai, Southwest Jiaotong University, China

Railway bridge maintenance modelling  
B Le, J Andrews, University of Nottingham, UK

Multi-domain simulation of hybrid diesel-driven railway vehicles and comparison of electrical energy storage systems  
S Schmid, Voith Turbo GmbH & Co. KG, Germany; K Ebrahimi, University of Bradford, UK; W Commerell, UAS Ulm, Germany

Prediction of wheel-rail contact forces based on a heavy haul locomotive dynamic inverse modelling  
Y Q Sun, M Spiryagin, C Cole, Central Queensland University, Australia

Plasticity in wheel-rail contact and its implications on vehicle-track interaction  
K Six, A Meierhofer, G Trummer, C Marte, G Müller, B Luber, M Rosenberger, VIRTUAL VEHICLE Research Center; P Dietmaier, Graz University of Technology, Austria

Development of a Tram-Train wheel profile for dual-operation running  
D Crosbee, P D Allen, University of Huddersfield; R Carroll, Sheffield Supertram, UK

An experimental study of dynamic performance of slab track using a full scale test rig  
M Wang, X Yuan, C Cai, S Zhu, Southwest Jiaotong University, P.R. China

</tbody>
</table>
C1408/09  A frequency-domain finite element approach for modelling railway induced vibration in soils
  N Hamdan, O Laghouiche, P K Woodward, D Connolly, Heriot-Watt University, UK

C1408/012  Application of dynamic vibration double-absorbers in low-frequency vibration control of floating slab tracks under train–track interaction
  S Zhu, C Cai, L Zhang, Southwest Jiaotong University; J Yang, H Yan, China Railway Eryuan Engineering Group Co. Ltd, P.R. China

C1408/114  Investigation of ground vibration from circular tunnels using a 2.5D FE/BE model of tunnel and ground
  Q Jin, D J Thompson, University of Southampton, UK

C1408/039  Addressing nodal constraints on railway capacity
  J Armstrong, University of Southampton and Arup; J Preston, C Potts, T Bektas, University of Southampton; D Paraskevopoulos, University of Bath, UK

C1408/014  Investigation into the effect of moisture on rail adhesion
  J Fisk, T Armitage, Arup; R Lewis, D Fletcher, M Evans, A Arnall, The University of Sheffield, UK

C1408/009  Development of a methodology for co-simulation of tilting trains in SIMPACK-SIMULINK
  N Kuka, ALSTOM Transport; C Ariaudo, R Verardi, ALSTOM Ferroviaria S.p.A., Italy

C1408/016  Apparently independently rotating wheelset – a possible solution for all needs?
  A Bracciali, University of Florence and AB Consulting sas, Italy

C1408/037  Hunting stability and improvement measures for high speed vehicles
  J Zeng, L Wei, M Chi, J Wang, Southwest Jiaotong University, China

C1408/071  Failure analysis of railroad concrete crossties in center binding conditions using finite element method
  H Yu, B P Marquis, D Y Jeong, Volpe National Transportation Systems Center, USA

C1408/102  Insulated rail joint enhancement: testing and analysis
  A E Beagles, P Beaty, D I Fletcher, R Lewis, The University of Sheffield; B P Temple, LB Foster Rail Technologies (UK) Ltd, UK
C1408/017 Real-time on-board condition monitoring of train axle bearings
I Corni, University of Southampton and Perpetuum Ltd; N Symonds, R J K Wood, University of Southampton; A Wasenczuk, D Vincent, Perpetuum Ltd, UK

C1408/086 Low-power embedded system approach for axlebox bearing condition monitoring
M Entezami, L Saade, E Stewart, C Roberts, P Weston, The University of Birmingham; R Lewis, TWI Ltd, UK

C1408/113 Modern innovations on the application of the rotating ultrasonic probe to in-service inspection of freight solid axles: experiments and MAPOD approach
M Carboni, Politecnico di Milano; S Cantini, Lucchini RS SpA, Italy

C1408/104 Robust multi-train trajectory optimisation for real world conditions using a ‘noisy’ genetic algorithm
J Goodwin, D I Fletcher, R F Harrison, University of Sheffield, UK

C1408/011 SafeCap: the train advisory system for real-time traffic management
A Iliasov, A Romanovsky, Newcastle University, UK

C1408/101 Evaluation of bogie rotational resistance
T Tanaka, K Iida, M Suzuki, T Iida, N Watanabe, T Miyamoto, Railway Technical Research Institute, Japan

C1408/057 Investigation of the application of adjustable air suspension under traction control for heavy haul locomotives
M Spiryagin, P Wolfs, C Cole, Y Q Sun, Central Queensland University, Australia; V Spiryagin, Rostov Electric Locomotive Repair Plant, Russia; I Persson, AB DESolver, Sweden

C1408/024 Wireless mesh sensors are transforming asset monitoring in rail
S Maddison, B Smith, Senseive Ltd, UK

C1408/105 Deploying a low energy power model within data loggers and sensors for the remote monitoring of assets
R J Preece, Arrowvale Electronics and University of Birmingham; T M Hanif, R J Amos, Arrowvale Electronics; E J C Stewart, University of Birmingham, UK
C1408/047  Application of FRA new vehicle-track system qualification requirements
B P Marquis, Volpe National Transportation Systems Center; A Tajaddini, Federal Railroad Administration, USA; H-P Kotz, Siemens – Infrastructure and Cities, Austria; W Breuer, Siemens – Infrastructure and Cities, Germany; M Trosino, National Railroad Passenger Corporation, USA

C1408/076  The development and application of a lean future state design methodology to the railway possession and isolation authorisation process
S Stiles, University of Nottingham and SHE Solutions Ltd; W Garner, Coventry University, UK

C1408/092  The variability of generalised cost weighting parameters
S Pani, F Schmid, University of Birmingham; N G Harris, Railway Consultancy Ltd, UK

C1408/099  Influence of varying input parameters on model validation results
G Götz, Technische Universität Berlin, Germany; O Polach, Bombardier Transportation (Switzerland) AG, Switzerland

C1408/004  A comparison of full scale and model scale measurements of train aerodynamic characteristics
C Baker, A Quinn, H Hemida, M Sterling, M Gallagher, J Morden, University of Birmingham, UK

C1408/088  Preliminary results of monitoring audio frequency track circuits
L Saade, P Weston, C Roberts, University of Birmingham, UK

C1408/046  A 10 Gbit/s Ethernet infrastructure for future-proofed railway communications
G Koczian, S Walker, University of Essex; G Howell, B Simpkin, LPA Connection Systems, UK

C1408/067  Revising US passenger railcar occupant volume integrity requirements
J Gordon, U.S. Department of Transportation, USA

C1408/045  Evaluating options for a fault tolerant railway system
C Fecarotti, J Andrews, R Remenyte-Prescott, The University of Nottingham, UK

C1408/098  The paper that eliminates paper
M Davies, Interfleet, UK

C1408/025  Theoretical and experimental analyses of the HXN3 locomotive cab vibration isolation system
C-S Li, S-H Luo, W-H Ma, Southwest Jiaotong University; T-W Qu, Dalian Locomotive and Rolling Stock Co., Ltd, P.R. China
C1408/029 Vibration isolation design of under chassis equipments for high-speed EMU trains
D Gong, J Zhou, W Sun, Tongji University, China

C1408/018 Flexible carbody vertical vibration characteristic of high-speed train
H Cao, Southwest Jiaotong University and Southwest University of Science & Technology; W Zhang, B Miao, Southwest Jiaotong University, P.R. China

C1408/068 ICE-S – Vehicle reaction measurement and track geometry measurement on the same measuring train: Results of the comparison of the two different track inspection methods
T Kolbe, R Kratochwille, Deutsche Bahn AG, DB Systemtechnik GmbH, Germany

C1408/087 Detection of vertical track faults using an instrumented in-service vehicle: Considering efficient real-time fault detection
G J Yeo, P F Weston, C Roberts, University of Birmingham, UK

C1408/119 Determination of vertical alignment of track using accelerometer readings
E J O'Brien, University College Dublin; C Bowe, Iarnród Éireann Irish Rail; P Quirke, University College Dublin and Iarnród Éireann Irish Rail, Ireland

C1408/073 Crashworthiness research on diesel multiple unit fuel tanks
K M Jacobsen, M E Carolan, US Department of Transportation, USA

C1408/072 Locomotive crashworthiness research
D C Tyrell, P Llana, U.S. Department of Transportation, USA

C1408/084 Radial expansion of metal tubes: static testing and simulation correlation
C Moreno, R Beaumont, D J Hughes, R Dashwood, University of Warwick; T Williams, OLEO International, UK

C1408/093 Lean principles and sustainable operation of high-speed railways
D Hasegawa, G Nicholson, C Roberts, F Schmid, The University of Birmingham, UK; V Novak, Virginia Polytechnic Institute and State University, USA

C1408/021 Consideration of the trade-offs between operational energy consumption and emissions and embedded energy consumption and emissions in rail infrastructure
J A Pritchard, University of Southampton, UK
CASE STUDIES

C1408/120  How accident investigation can drive research  
W Rasaiah, Rail Accident Investigation Branch, UK  
  837

C1408/121  ON-TIME: Improving customer satisfaction through increased capacity and decreased delays  
M Dasigi, Network Rail, UK  
  841
