18th International Conference on Multiphase Production Technology 2017

Cannes, France
7 – 9 June 2017

ISBN: 978-1-5108-5586-1
## CONTENTS

**FOREWORD**

**DEPOSITS**

- Prediction of asphaltene precipitation risk in oil wells using a coupled hydro-thermodynamic model  
  *E Al-Safran, Kuwait University, Kuwait*
  
- A study of wax deposition in pipeline using thermal hydraulic model  
  *Y Zhao, D Limb, Petrofac Engineering & Production Service, West, UK; X Zhu, China University of Petroleum, Beijing, China*
  
- Assessing hydrate blockage risk in oil pipelines: deploying a new transient simulation capability  
  *B W E Norris, M L Johns, E F May, Z M Aman, University of Western Australia, Australia*

**EXPERIMENTAL**

- Wall shear stress measurements of horizontal two-phase slug flow for high viscosity liquids using constant temperature anemometry  
  *L Buitrago, T Kim, E Pereyra, C Sarica, The University of Tulsa, USA*
  
- Flow structures in low-inclination stratified oil-water pipe-flows using laser-based diagnostic techniques  
  *R Ibarra, O K Matar, C N Markides, Imperial College London, UK*
  
- An experimental study of two-phase flow in horizontal and inclined annuli  
  *J Nossen, L Liu, O Skjæraasen, M Tutkun, J E Amundsen, H G Sleipnaes, N Popovici, K Hald, M Langsholt, R Ibarra, Institute for Energy Technology (IFE), Norway*
  
- Experimental investigation of vertical high-velocity two-phase flows in large-diameter pipes  
  *M S Capovilla, P J Waltrich, Louisiana State University, USA; P Cavalcanti de Sousa, Texas A&M University, USA*
DOWNHOLE APPLICATIONS

Transient simulations on ESP pump compared to measured data
M A H Changoluisa, Schlumberger UK PLC, UK; Z Xu, SWT, Schlumberger, Norway; M Haavelsrud Selberg, X C Billdal, Schlumberger Information Solutions AS, Norway

Multiphase downhole screw assembly (MDA) – A new chapter in conveying hydrocarbons
J – U Brandt, J Lewerenz, F Böker, D Müller-Link, ITT Bornemann GmbH, Germany

Unstable well behaviour in gas well liquid loading – stability tests
A van Wijhe, S P C Belfroid, TNO, The Netherlands

The use of surfactants for gas well deliquification: a comparison of research projects and developed models
J M C van ’t Westende, TNO, Heat Transfer and Fluid Dynamics, The Netherlands; R A W M Henkes, Delft University of Technology and Shell Projects and Technology, The Netherlands; A Ajani, M Kelkar, The University of Tulsa, USA

MODEL ENHANCEMENTS

Velocity profiles in stratified two-phase flow: Comparison of measurements and model predictions
P Andersson, J Henriksson, Schlumberger, SNTC, Norway

Wall transform mechanism in a viscosity stratified turbulent flow
S Ahmadi, A Roccon, A Soldati, Università di Udine, Italy and Technische Universität Wien, Austria; F Zonta, Technische Universität Wien, Austria

Assessment and sensitivity analysis of multiphase flow pipeline models against experimental and field data
P Dhoorjaty, D Erickson, R Kowta, M Mai, P Parthasarathy, Wood Group, USA

Validation of a multiphase flow simulator using three-phase gas condensate field data
N Jauseau, N Zambare, Kongsberg Digital, USA; E Zakarian, J Morgan, Woodside Energy Ltd, Australia

ÅSGARD

Åsgard Subsea Compression – technology overview and operational experience
P E Hedne, A Aarvik, M Nordsveen, B H Pettersen, L E Hauge, Statoil, Norway
Åsgard subsea compression inlet cooler – development, qualification and operation of world’s first passive multiphase subsea cooler

A Lauvdal, H Alfredsson, Aker Solutions ASA, Norway; A Aarvik, Statoil ASA, Norway

Åsgard subsea compression and predictions of liquid surges

G R Setyadi, K Holmås, G G Lunde, K Vannes, A Sengebusch, TechnipFMC, Norway; M Nordsveen, B H Pettersen, Statoil, Norway

PIPELINES AND RISERS

Advances in modelling hydrodynamic slug flow in production systems

T J Lockett, Y Fan, A Ajani, BP Exploration and Production, UK

CFD for multiphase flow in vertical risers

F Tocci, Politecnico di Milano, Italy; F Bos, Dynaflow Research Group, The Netherlands; R Henkes, Shell Projects & Technology, The Netherlands and Delft University of Technology, The Netherlands

Improvement of LedaFlow for churn flow in vertical pipes

J Kjølaas, A Shmueli, A Morin, SINTEF, Norway; R Belt, Total, France

A model for liquid-assisted gas-lift unloading

R Coutinho, W Williams, P Waltrich, Louisiana State University, USA; P Mehdizadeh, Production Technology Inc., USA; S Scott, Petroleum ETC, USA

EROSION AND CORROSION

Minimum sand transportation conditions in multiphase pipelines: an assessment exercise

Z Zhou, L Lao, Cranfield University, UK

Improving CO₂ corrosion rate predictions through the use of corrosion assessment and flow modelling – A field case study

L Barton, M Forde, A Pinto, I Laing, ROSEN, UK; R Ladwa, ROSEN Group, Switzerland

Prolonged gas-condensate pipeline operation below minimum turndown rate

E Zakarian, J Morgan, Woodside Energy Ltd, Australia

RISK AND UNCERTAINTY

The use of a low-cost gas-liquid flow meter to monitor severe slugging

P Andreussi, University of Pisa, Italy; M Bonizzi, P Ciandri, TEA Sistemi, Italy; S Pedersen, D S Hansen, Aalborg University, Denmark

Decision analysis in multiphase flow: uncertainty, risk and application

B L Keinath, ExxonMobil URC, USA
SPECIAL REGIONAL FOCUS – TANZANIA REVISITED

Tanzania gas development – flow assurance challenges
H Holm, Statoil ASA, Norway

Pressure drop measurements in low liquid loading three-phase flows
J Kjølaas, T E Unander, M Wolden, A Shmueli, SINTEF, Norway; H Holm, Statoil, Norway

Pressure drop in low liquid loading flows – the effect of a thin liquid film on the pipe wall
D Biberg, C Lawrence, G Staff, Schlumberger Norway Technology Center, Norway; H Holm, Statoil ASA, Norway

Uncertainty evaluation applied to a model-based Virtual Flow Metering system
H Ausen, M Stinessen, D Fonnes, TechnipFMC, Norway; H Holm, Statoil, Norway

EMERGING APPLICATIONS

Development of speed controlled pigging for low pressure pipelines
M H W Hendrix, H P IJsseldijk, W-P Breugem, Delft University of Technology, The Netherlands; R A W M Henkes, Delft University of Technology, The Netherlands and Shell Projects & Technology, The Netherlands

Subsea water separation: a state of the art review, future technologies and the development of a compact separator test facility
H S Skjefstad, M Stanko, Norwegian University of Science and Technology, Norway

Unequal split of liquid content in parallel flowlines
R J Belt, F X Clément, M A Paran, D Larrey, TOTAL France; F Papot, TOTAL Angola; G Lacaille, TOTAL USA

FLNG, a simple way to open Pandora’s Box
R Malhotra, Wood Group, Australia; I Kopperman, Assured Flow Solutions, UK

ADDITIONAL PAPER

Use of CFD for development of sand erosion control technology
P Kane, D Pliszka, T Wood, INTECSEA WorleyParsons Group, UK

AUTHOR INDEX
