2017 8th IEEE International Conference on Cognitive Infocommunications (CogInfoCom 2017)

Debrecen, Hungary
11-14 September 2017
Performance Evaluation of Finite-Source Cognitive Radio Networks with Collision Using Simulation
Hamza Nemouchi and Sztrik Janos

SuSy: Surveillance System for Hospitals
Dominika Palivcova, Miroslav Macik and Zdenek Mikovec

Sprego Virtual Collaboration Space
Gábor Csapó

Sprego Virtual Collaboration Space: Improvement Guidelines for the MaxWhere Seminar System
Gábor Csapó

Improving Reverse Geocoding: Localization of Blind Pedestrians Using Conversational UI
Vojtech Gintner, Jan Balata, Jakub Boksansky and Zdenek Mikovec

Gender differences in the language of the Map Task dialogues
Carl Vogel, Milena Ribeiro Lopes and Anna Esposito

How can ICT help the visually impaired older adults in residential care institutions:
The everyday needs survey
Miroslav Macik, Ivo Maly, Jan Balata and Zdenek Mikovec

Denormalized Quantum Density Operators for Encoding Semantic Uncertainty in Cognitive Agents
Ingo Schmitt, Ronald Römer, Günther Wirsching and Matthias Wolff

Numerical analysis of a network evolution model
Attila Perecsényi, István Fazekas and Bettina Porvázsnyik

Differences between hearing and deaf subjects in assessing foreign emotional faces
Anna Esposito, Antonietta Maria Esposito, Mauro Maldonato and Carl Vogel

Implementation of a Geographic Information System with Big Data Environment on Common Data Model
David Sik, Kristof Csorba and Peter Ekler

Introduction of a Multi-leveled E-learning Environment with Community Contribution
David Sik

János Arany’s Meeting with Harry Potter
Gabriella Kiss, Veronika Takács and Viktor László Takács

Perception of Delay Tolerant Network Behavior with Cognitive Sonification Controller
Mohamed Amine Korteby and Zoltan Gal

Data-structure validator; An application of the HY-DE model
Maria Csernoch and Erzsébet Dani

Task-based Evaluation for Improving Natural Language Understanding in Human-Robot Rescue Teams
Fereshta Yazdani, Matthias Scheutz and Michael Beetz

Hungarian web archiving pilot project in the National Széchényi Library
Marton Nemeth and László Drótos

Comparison of read and spontaneous speech in case of Automatic Detection of Depression
Gábor Kiss and Klara Vicsi

A prosody inspired RNN approach for punctuation of machine produced speech transcripts
to improve human readability
Anna Moró and György Szaszák

First year students’ attitude to computer problem solving
Maria Csernoch and Pirosha Biró

Explorations into ICT Usage and Behavior in Travel Related Activities of Wheelchair Users
Anna Kutiková, Jan Balata and Zdenek Mikovec

Values Derived from Virtual Reality Shopping Experience among Generation Z
Kapusy Katalin and Lógó Emma

Research questions on integrating user experience approaches into software development processes
Balint Szabo and Karoly Hercegfi
Improving SSVEP-BCI Performance Using Pre-Trial Normalization Methods ................................................................. 247
James Henshaw, Wei Liu and Daniela Romano

Pilot Corpus of Child-Robot Interaction in Therapeutic Settings ............................................................................. 253
Milan Gnjatović, Jovica Tasevski, Dragaša Mišković, Srđan Savić, Branislav Borovac,
Aleksandra Mikov and Rastislava Krasnik

Bringing Cognitive Infocommunications to small language communities .............................................................. 259
Graham Wilcock and Kristiina Jokinen

Are You Stressed? Detecting High Stress from User Diaries .................................................................................. 265
Arindam Ghosh, Evgeny Stepanov, Morena Danieli and Giuseppe Riccardi

Smart Campus Service Link: Adaptation and Interaction Planes for Campus and University Environments .......... 271
Attila Adamkö

Ethical Responsibilities of Researchers and Participants in the Development of Multimodal Interaction Corpora .......................................................................................................................... 277
Maria Koutsombogera and Carl Vogel

Virtual Reconstruction of a Medieval Church ......................................................................................................... 283
AttilaGilányi, Györgyi Bujdosó and Marianna Bálint

Three-dimensional connection visualization based on tabular data ...................................................................... 289
György Papp, Ilkö Papp and Roland Kunkli

Measurement of team mental model as a part of a new team usability testing method: A proposed research agenda .................................................................................................................................. 291
Dalma Geszten, Balázs Péter Hámornik and Károly Hercegfi

On Architecture and Performance of LIRKIS CAVE System ............................................................................. 295
Marián Hudák, Štefan Korečko and Branislav Sobota

Learning Socio-Cultural Behavioral Norms in Uncertain and Changing Contexts ................................................. 301
Vasant Sarathy, Matthias Scheutz and Bertram Malle

The use of mythological content in virtual learning environment .......................................................................... 307
István Károly Boda, Erzsébet Tóth, István Csont and László T. Nagy

Cognitively-Inspired Symbolic Framework for Knowledge Representation ........................................................... 315
Srđan Savić, Milan Gnjatovic, Dragiša Mišković, Jovica Tasevski and Nemanja Maček

How to develop serious games for Cognitive Competence of Children with Learning Difficulties ........................ 321
Cecília Sik-Lanyi, Veronika Szucs, Tibor Gusvivencz, Shervin Shirzohomhmad, Boris Abersek, Karel Van Isacker,
Karel Van Isacker and Andrejan Lazarov

(Predictation of Audience Response from Spoken Sequences, Speech Pauses and Co-speech Gestures in Humorous Discourse by Barack Obama ................................................................. 327
Costanza Navarretta

Economical Aspects of 3D Virtual Collaboration ................................................................................................. 333
Ferenc Erdős and Kallos Gabor

Interaction-dependent e-Health hub-software adaptation to cloud-based electronic health records .................. 339
Abel Garai, Istvan Pentek and Attila Adamko

Classification of Cognitive Load Using Voice Features: A Preliminary Investigation ............................................ 345
Igor Mijić, Marko Sršija and Davor Petrinović

Cognitive workload classification using cardiovascular measures and dynamic features ....................................... 351
Eydis Huld Magnúsdóttir, Kamilla R. Johannsdóttir, Christian Bean, Brynjar Olafsson and Jon Gudnason

Joint Acquisition of Word Order and Word Referent in a Memory-Limited and Incremental Learner .................. 357
Sepideh Sadeghi and Matthias Scheutz

Possibility analysis of danger factors visualization in the construction environment based on Virtual Reality Model .......................................................................................................................... 363
Radoslaw Idzikowski, Konrad Kluwak, Tomasz Nowobilski, Tomasz Zamojski and Ryszard Klempous

An MPEG-4 based talking head for real-time voice chatting on Android platform .................................................. 369
Jonathán Oszváth, Bence Erős, Ákos Tóth and Roland Kunkli
The impact of virtual and augmented learning environments on the teaching and learning process in secondary and higher education .......................................................... 371
György Molnár Dr., Kinga Biró, Dalma Pap and Zoltán Szüts Dr.

Presentation of a Medieval Church in MaxWhere ........................................................................................................................ 377
Attila Gilányi, Gyöngyi Bujdosó and Marianna Bálint

The IT device demand of edu-coaching in the higher education of engineering ................................................... 379
Ildiko Horvath

Teaching electrical machines in a 3D virtual space ............................................................................................... 385
Zoltán Kvaszniczka

The application opportunities of green roof, as an interactive educational space ................................................. 389
Anita Dolgosne Kovacs

Linguistic Repetitions, Task-based Experience and A Proxy Measure of Mutual Understanding ............................... 395
Justine Reverdy and Carl Vogel

Perception Changes With and Without a Video Channel: A Study from a Speech-to-Speech, Machine Translation Mediated Map Task ............................................................................................................. 401
Akira Hayakawa, Carl Vogel, Nick Campbell and Saturnino Luz

Examine the Effect of Different Web-based Media on Human BrainWaves ......................................................... 407
Jozsef Katona, Tibor Ujbányi, Gergely Sziládi and Attila Kovari

The analysis of hand gesture based cursor position control during solve an IT related task ..................................... 413
Gergely Sziládi, Tibor Ujbányi, Jozsef Katona and Attila Kovari

Application of E-diary to analyze the effectiveness of learning ............................................................................. 419
Eldo Gogh, Attila Kovacs and Gergely Sziládi

Assessment of wetlands by the methods of waterchemistry and bioindication .................................................... 425
Pécz Tibor

Mathability and Coaching ....................................................................................................................................... 427
Katarzyna Chmielewska and Damian Matuszak

Cluttered centres: interaction between eccentricity and clutter in attracting visual attention of readers of a 16th century map .................................................................................................................................................. 433
Ágoston Török, Zsolt Győző Török and Borbála Tölgyesi

Multimodal Dialogue System with NAO and VoiceXML Dialogue Manager ............................................................ 439
Stanislav Ondas, Jozef Juhar, Matus Pleva, Peter Fercak and Rastislav Husovsky

Multi TP model transformation for Functions with Different Numbers of Variables ............................................... 445
Péter Baranyi

Cognitive and Spiritual Revolution of the Tenth Century – Constantine Porphyrogenitus and his Hidden World Part I....................................................... 451
Péter Várlaki, Péter Baranyi

Cognitive and Spiritual Revolution of the Tenth Century – Constantine Porphyrogenitus and his Hidden World Part II....................................................................................................................... 473
Péter Várlaki, Péter Baranyi

Imaginative and Interpretative ‘Cognitive Revolution’ of W. Pauli Collaborating with C. G. Jung and Constantine Porphyrogenitus’ Hidden World ......................................................................................... 497
Péter Várlaki, Péter Baranyi

‘Hermeneutical and Cognitive Experiments’ of the “Explicit Name of God’s Crown of Number-Archetype 137 in the Book Bahir Compared with the “Fine Structure” of the Related Medieval Artistic Works .......................... 511
Péter Várlaki, Péter Baranyi

Virtual proximity in distance education – The usage of a three-dimensional software ............................................. 529
Júlia Szőke, Petra Kecskés

Teaching Coaching Using 3D/VR Technology in the Light of Intercultural Knowledge ........................................... 530
Attila Pongrácz, Judit Sipos

Additional Paper:  
Teaching Popular culture 3D/VR Technology ........................................................................................................... 531
Adel Vehre
