# TABLE OF CONTENTS

## VOLUME 1

### SESSION 1A: CONFERENCE THEME

**Reservoir Sedimentation and Sustainability**  
Timothy Randle, Sean Kimbrel, Kent L. Collins  
1

**Dam Safety and Resilient Water Management: A Case for Dynamic Reservoir Operations**  
Michael McMahon  
9

**The Nebraska Department of Natural Resources Coordinated Efforts in Flood Flows**  
Kristen Obermueller, Bob Beduhn, John Engel  
10

### SESSION 2A: ENVIRONMENT

**Environmental Considerations in Dam Decommissioning**  
11

**Hydraulic Dredging of the Strontia Springs Reservoir — Lessons Learned**  
Douglas Raitt, Brett Cochran  
12

**Dam Decommissioning — Unique Approach by Conversion to a Levee**  
Zachary Whitten  
45

**The Prospects for Climate Scenarios in Hydropower Operations**  
Yulia Zakrevskaya, David Huard  
56

### SESSION 1B: PHYSICAL MODELING

**Linear Weir Size Scale Effects: A Look at Flat Top Weirs**  
Blake Tolles, Kedric Curtis  
72

**Physical Model of Spillway and Reservoir Debris Interaction**  
Kent Walker, Jaron Hasenbalg, Kelly Brom  
73

**Boundary Dam Spillway No. 1 TDG Modifications**  
John Werner, James Rutherford, Andrew Bearlin, Peter Friz, Jeff Johnson, Daniel Kirschbaum, Joe Groeneveld, Justin Arnold  
74

### SESSION 2B: HYDROLOGIC MODELING

**A Comprehensive Approach to Probabilistic Hydrologic Hazard Assessment and its Use to Support Risk-Informed Decisions**  
Shaun Carney, Keil Neff, Mel Schaefer, Bruce Baker  
90

**Meteorological Data Visualization and Analysis Using HEC-MetVue**  
Fauwaz Hanbali  
91

**Big Dam in a Small World: Reassessment of the Spillway Design Flood of Lake Sakakewa**  
Joshua Melliger  
92

**Application of Regional Hydrologic Criteria in the Rocky Mountains to Estimation of the PMF in Alberta**  
John Menninger, Seifu Guangul, Dan Hoffman, George Sabol, Syed Abbas  
93

### SESSION 1C: RISK

**Approaches to Estimating Individual Risk for Dam Safety Tolerable Risk Evaluation**  
104

**Minimizing Bias in Geologic and Geotechnical Aspects of Risk Evaluation for Dams and Levees**  
Kerry D. Cato, Derek S. Morley  
139

**The Common Cause Adjustment in Dam Safety Risk Analysis: Scope, Purpose, and Applicability**  
Dom Galic  
158

### SESSION 2C: RISK

**Potential Failure Mode Analysis – Insights and Lessons Learned for the Foundation of a Successful Dam Safety Management Program**  
Frank L. Blackett, Douglas D. Boyer  
174

**Epistemic vs Natural Uncertainty in Dam Safety Decision Making: Is it Fair Play?**  
Ignacio Escuder-Bueno, Adrian Morales-Torres, Jessica Castillo-Rodriguez  
194

**Consequence Estimation for a Large System of Dams: Our Experiences from TVA Projects**  
Michael M. Crouch, Anurag Srivastava, Morgan D. Ruark  
208
POSTER SESSION

CONCRETE

Freezing and Thawing Durability of Laboratory and In-Situ Roller-Compacted Concrete Test Specimens ................................................................. 469
Timothy Delen, Veronica Madera

Parametric Layout of Double-Curvature Arch Dams Using DIANA Finite Element Software ............................................................. 470
E. Goulas, G. Schreppers, M. Partovi, R.M. Gunn

Study of Uplift Pressure Effect in Roller Compacted Concrete Gravity Dam .......................................................................................... 487
Hichem Mazighi, Mostapha Kamel Mihoubi, Khaled Ghasedi, Zainah Ibrahim

Soil-Structure Interaction Dynamic Analysis for an Existing Old Earth-Rock Fill Dam with Concrete Core .................................................. 505
Mahmoud Seid-Karbasi, Upul Atukorala, Herb Hanson, Bruce Downing

RCC Post Construction Core Testing and Data Analysis For San Vicente Dam Raise Project ................................................................. 522
James Stiady, Andrew Oleksyn, Michael Rogers, Glenn Tarbox, Thomas Reynolds, Gerard E. Reed III, Wade Griffis, Jim Zhou

CONSTRUCTION

Reconstruction of the Matala Spillway: Hydrotechnical and Safety Aspects .................................................................................. 539
Ahmed Bouayad

Decommissioning Outdated Fish Bypass Systems and Preparation for Concrete Retrofit on Lower Granite Lock & Dam ......................................................... 550
Dirk deGroot

Sand Secant Pile Chimney Filter Installation at Pine Creek Dam .................................................................................. 551
Bob Faulhaber, Michael Arnold

Execution of a Cut-Off Wall at the Dead Sea – Unique Conditions Require Unique Solution ......................................................... 562
Franz-Werner Gerressen, Gai Lehrer, Israel Christian Scholz

Catawba Dam: The Long Road and Construction Update ........................................................................ 577
Dennis Hogan

Water-Filled Bladders, an Innovative Bearing Interface for Arch Dam Bracing ........................................................................ 578
Alexandre Louchu

Eductors — The Essential Alternative in Complex Dewatering Applications ........................................................................... 586
Adam Richards, Harry Bagherzadeh

Application of Intelligent Compaction to Embankment Dam Construction .......................................................................... 587
Robert V. Rinehart

Update No. 3 of the Calaveras Dam Replacement Project ........................................................................ 602
John Roadifer, Michael Forrest, Erik Newman, Daniel Wade, Susan Hou, Tedman Lee, Carman Ng

VALIDED INTTEGRATED COMPACTON MONITORING AT TVA’S KIF COAL COMBUSTION PRODUCT STACKING FACILITY ......................................................... 613
Validated Integrated Compaction Monitoring at TVA’s KIF Coal Combustion Product Stacking Facility ......................................................... 613
Jeremy Young, Eric Musselman

EMBANKMENT DAMS

Stability Analysis of a Concrete-Faced Rockfill Dam Using Parametric Evaluations ................................................................. 628
Christopher Conkle

Estimating the Peak Friction Angle of Sandy Soils In Situ with State-Based Overburden Normalized SPT Blow Counts ......................................................... 629
Robert A. Jaeger, Ian P. Maki

Comparison Analysis of the Behavior of Rock-Fill Dams with Clay Core at the Variation of Water Level in the Reservoir ......................................................... 645
Ljupcho Petkovski, Stevcho Mitovski

Using Non-Intrusive Geophysical Techniques in Embankment Dam and Levee Risk Assessment ......................................................... 658
Justin Rittgers, Cassandra Wagner, Bryan K. Simpson

Impact of Glacial Till Deposits — Structural Analysis of Green Mountain Dam ........................................................................ 659
Hillery Venturini

HYDROLOGY AND HYDRAULICS

Using HEC-RAS 2 Dimensional Capability for Simplified Rapid Dam Break Analysis ................................................................. 660
Wesley Crosby

Hydraulic Modeling of a Complex Dam and Reservoir Project: A Case Study of Two Rivers Dam ......................................................... 661
Stephanie Doyal

Rainfall-Runoff Modeling for the Garrison Dam Drainage with HEC-HMS .................................................................................. N/A
Jeff Harris, Kevin Denn, Melissa Larsen
An Innovative Temporary Bulkhead for the Ruskin Dam and Powerhouse Upgrade Project ............................................................. 662
Jorge Marín, Suman Vazinkhoo, Rafael Ibáñez-de-Aldecoa, Mark Mallet

Risk and Uncertainty Features in HEC-ResSim ......................................................................................................................................... 674
George Modini, Fauwaz Hanbali

Methodology Applied for Mapping Flooded Areas of the Lajeado HPP ................................................................................................. 675
Pedro Pupim, Mauricio Santini, Milton Dall’Aglio

Leveraging Multi-Sensor Hydrologic Data for Model Validation ........................................................................................................... 676
Kevin J. Ruswick, Gregory J. Daviero, Jonathon Ruff

LEVEES

Design of Levee Modifications to Accommodate Long-Term River Scour .............................................................................................. 696
Justin Dominguez, James Nickerson

Detection of Levee Voids at Aqueduct Crossings Using Geophysical Imaging Techniques .................................................................. 697
Zhihua Li, Atta Yiadom

Risk Analysis in a Levee Safety Context: The Upper Wood River Levee Case History ........................................................................... 709
Chris J. Redell, Jose R. Lopez

Effects of Compaction on Erodibility Characteristics of Levees Due to Overtopping ........................................................................ 720
Ali Asghari Tabrizi, M. Hanafi Chaudhary, Jasin Imran

MONITORING

Preventing Catastrophic Failure of Underwater Infrastructure: Condition Assessments by ROV ............................................................. 734
Bill Sherwood, Bob Clarke

Automated Data Acquisition System Basics for Dam Safety Instrumentation Monitoring ........................................................................ 735
Peter Zimmerman, Paul Booth, Greg Dutson

RISK

Failure of the Acude da Nacao Earth Dam: A Probabilistic Perspective ........................................................................................................ 749
Danielli de Melo Moura, Rodrigo Borela, Gabriela Alvarado, Wilson Espinosa, Philippe L. Bourdeau

SESSION 3A: MONITORING

Operation and Maintenance of an Instrumentation Program .................................................................................................................. 764
Amanda Sutter

FERC Best Practices for Dam Safety Performance Monitoring ........................................................................................................... 765
Will Brown, Eric Kennedy, Justin Nestle, Emeranwa Anyamw, Eric Grass, Jim McHenry, David Olson

Calculation of Threshold Limits for Dam Safety Instrumentation ........................................................................................................ 778
Jack Husted, Travis Wylde, Sterling Klippel

Somerset Dam – Innovative Remote Monitoring for Time-Sensitive Breach Detection ........................................................................ 800
Jerry Cross, Yogi Sookhu, Jud Donaghy

SESSION 4A: MONITORING

Geospatial Tools for Routine Dam Safety Monitoring and Response Applications During Emergencies ................................................ 808
Yogesh Prashar, Atta B. Yiadom, Elizabeth Bialek, Rachel Wang

Special Considerations When Installing Automated Instrumentation at a Site with Access Limitations ................................................... 809
William Walker

Instrumentation and Information Management at Boone Dam ............................................................................................................... 810
Rozh Ameen, Raphael Siebenmann, Jamey Rosen

SESSION 3B: HYDRAULIC MODELING

Modeling Dam Breaches and Flood Inundation Using HEC-RAS 5.0’s New 2D Capabilities ..................................................................... 825
D.L. Silvertooth, M. Meshkat

Estimating the Probable Maximum Flood for Whittier Narrows Dam Using a 2D Hydrodynamic Modeling Approach ........................................ 839
Brian M. Hall, Haden Smith, Reuben Sasaki

When an Adjacent Watershed Inundates Your Offline Reservoir: Ukumehame Reservoir Dam Removal Challenges and Design ................................................................................................................................. 855
Andrew J. Lynch, Stewart S. Vaughan, Dean B. Durkee

Atoka Dam and Spillway Modifications .................................................................................................................................................. 867
Patrick Miles, Brad Kirksey, John Rutledge, Sam Samandi, John L. Hare, Andrew Mishler
**SESSION 4B: SITE SPECIFIC PMP**

Recent Extreme Storms and Their Relation to PMP .................................................................886
Bill Kappel, Doug Holtrstrand, Geoff Muhlestein

Needs to Update Probable Maximum Precipitation for Determining Hydrologic Loading on Dams .................................................................906
Chandra Pathak

Site Specific Probable Maximum Precipitation Development .................................................................907
Jeff Harris, Ben Rohrbach

Advances in Watershed Modeling Inputs and Methods for Dam Safety Risk Analyses .................................................................924
Jason Caldwell, Nicole Novembre, Katie Laro, Tye Parzych, Bruce Barker, Mel Schaefer, George Taylor, Wayne Gibson

**SESSION 3C: EARTHQUAKES I**

Use of the Conditional Mean for Improved Prediction of Ground Motion Intensity Measures for Embankment Dams .................................................................939

Seismic Deformation Analysis of Blue Ridge Dam ........................................................................954
Glenn J. Rix, Lucas de Melo, Christopher L. Saucier, Michael A. Morrison

A Case History Evaluation of State of Practice for Seismic Deformation Modeling of Earthen Dams .................................................................969
Khaled Chowdhury, Vlad Perlea, Raymond B. Seed, Michael Beatty, Ethan Dawson, George Hu

Comparison of Two Constitutive Models for Simulating the Effects of Liquefaction on Embankment Dams .................................................................1014
Jack Montgomery, Sam Abbassad

**SESSION 4C: EARTHQUAKES I**

Seismic Evaluation of Lookout Point Embankment Dam in Oregon – Cascadia Subduction Zone Implications .................................................................1028
Andrew D. Kost, Kenji Yamazaki, David H. Scofield

Performance of Fena Dam During the 1993 Guam Earthquake .................................................................1043
Lelio H. Mejia

Seismic Evaluation of the Remediated Isabella Auxiliary Dam .................................................................1058
George Hu, David C. Serafini, Henri V. Mulder, Vlad Perlea

**SESSION 3D: CONSTRUCTION II**

Seismic Remediation of Perris Dam Using CDSM .................................................................1071
Wen Yan Chen, Michael Driller, Steven Friesen

Controlled Blasting for the Red Rock Hydroelectric Project .................................................................1090
Rachael V. Bisnett, James Valentyn, Nicholas Johnson

Upriver Dam Spillway Rehabilitation ........................................................................1102
Ray Trudgeon, James H. Rutherford, Steve Burns, Val Kovalishyn, Ccee Chan, Nikou Jalayeri

Lakeside Ranch Stormwater Treatment Area – Lessons Learned During Design and Construction .................................................................1119
Danielle Neamtu, Stephen Whiteside, Stephen Blair

**SESSION 4D: CONSTRUCTION II**

Design and Repair of a Power Intake Gate Sealing Surface Under Challenging Constraints .................................................................N/A
Mike Carney, Don Thompson, Roland Lwiindi, Eli Lundberg, Joshua Phillips

Post-Tensioning in an Underwater Environment: Wanapum Dam + Monolith 4 Spillway Repair .................................................................1135
Paul Krumm

Balancing Water Resources and Power Generation for the Metlakatla Indian Community .................................................................1143
Jesse Hutton

**SESSION 3E: CONCRETE I**

Investigating the Structural Safety of Cracked Concrete Dams .................................................................1153
Glenn S. Tarbox, Robin Charlwood, Chris Hayes

A New Approach for the Design of the Körögul RCC Arch/Gravity Dam .................................................................1167
Quentin Shaw

Upgrade and Spillway Modifications at Santa Anita Dam .................................................................1178
Sterling E. Klippel, Vik Iso-Ahola, Glenn S.Tarbox, Martina Gelo, George Manole

Understanding the Performance of Aging Infrastructure: A 99-Year-Old Multiple Arch Dam .................................................................1189
Vik Iso-Ahola, Glenn S.Tarbox, Mohammadreza Mostafa, Sean Ellenson, Munit Bector, Ali Rasekh
SESSION 4E: CONCRETE I

A Performance-Based Evaluation of Post-Tensioned Anchors Embedded Within a Concrete Gravity Dam

Tae Ha Park, Samantha Hoang, Jonathan Lum, Ziyad Duron

On the Use of Discrete Lumped Element Modeling for Insight into Concrete Dam Behavior

Jonathan Lum, Samantha Hoang, Tae Ha Park, Ziyad Duron, Guy Lund

SESSION 3F: EMBANKMENT DAMS II

Seepage Distress and Canal Repairs on the California Aqueduct

Leslie F. Harder, Jeanne Kuttel, Joseph Royer, Timothy Wehling, Joseph Burke, Robert Black, Michael Driller, Christina Kashinada, Rob Barry, Raphael A. Torres

Geotechnical Investigation of South Carolina Flood-Damaged Dams after the 2015 October Rainfall Event

Inthuorn Sasanakul, Sarah L. Gassman, Charles E. Pierce, William Ovalle, Ryan Starcher, Emaad Gheibi, Mostaqur Rahman

Rough River Dam: Phase 1B Exploratory Drilling and Grouting Program

Conrad Ginther, Dmitri Ivanov, Doug Horvath, Rolando Bemitez

SESSION 4F: EMBANKMENT DAMS II

Integrating a Multidisciplinary Field Investigation to Improve Assessment of Internal Erosion

Cassandra M. Wagner, Justin B. Rittgers, Bryan K. Simpson

Laboratory Investigation of Backward Erosion Piping into Constricted Seepage Exits

John Rice, Ibrahim A. Ibrahim

Evaluation of Internal Erosion Scenarios in an Embankment Dam

R.J. Fannin, M. Li, C. Anderlini

SESSION 5A: MONITORING

Monitoring San Vicente Dam Raise During Initial Fill

Andrew Oleksyn, Nathan Grima, Anna Kolakowski, Larry Rodrigues, Jim Zhou

First Filling Instrumentation Monitoring of the Folsom Dam Auxiliary Spillway Control Structure

Kenneth R. Pattermann, George Hu

Effect of Antecedent Groundwater Level on Piezometric Response During Flood Events

Chun-Yi Kuo, Richard B. Hockett, Troy S. O’Neal

SESSION 5B: RESERVOIR SEDIMENTATION

Numerical Sediment Transport Modeling of Operations at Paonia Reservoir, Colorado

Sean Kimbrel

Impact of Climate Change on Sediment Accumulation in the Reservoirs of Embankment Dams: Case Study, Baldhill Dam, North Dakota

Bahareh Shoghli, Ye Owen Lim

Sediment Transport Through Lake Clarke and Lake Aldred

Jonathan M. G. Viducich, Martin J. Teal
SESSION 6B: RESERVOIR OPERATIONS

To Release or Not to Release? Dam Operation Modeling Using Gridded Short-Term Forecast Rainfall
Maged Aboelata ................................................................. 1460
USACE CWMS: Case Studies of Water Management Decision Support Tools
Ben Zoeller, Nathan Lefkovitz ............................................... 1461
Systems-Based Risk Analysis of Lake Mendocino Forecast-Informed Reservoir Operations with HEC-WAT
Matthew McPherson, Leila Ostadrahimi .................................... 1462
HEC-ResSim 3.3 — New Features to Support Complex Studies
Joan Klipsch ........................................................................ 1463

SESSION 5C: EARTHQUAKES II

A Direct Finite Element Method for Nonlinear Analysis of Semi-Unbounded Dam-Water-Foundation Rock Systems
Anil K. Chopra, Arnhjell Lokke .................................................. 1464
Numerical Assessment of Hydrodynamic Loads Induced During Seismic Interaction Between Reservoir and Concrete Dam
Jerzy Salamon, Jonna Manie .................................................... 1465
Seismic Back Analysis of Monticello Arch Dam – Blind Prediction Workshop and Additional Analyses
Emmanuel Robbe ................................................................... 1480

SESSION 6C: EARTHQUAKES II

Non-Linear Time Domain Analysis of Ruskin Dam in LS-DYNA Including Reservoir-Foundation-Structure Interaction
O. Penner, B. Bergman, S. Razavi-Darbar, D. Queen, P. Léger, Martin Leclerc, Yannick Botvin ........................................ 1498
Boca Dam Spillway Nonlinear Analysis and Validation Study
Jennifer E. Huggins, Roman Koltanuk, Miguel Rocha .................. 1513
Nonlinear Seismic Evaluation of Perris Dam Outlet Tower
Yusof Ghanaat, Zachary Harper ............................................... 1528
Nonlinear Seismic Analysis of an Arch Dam Subjected to Very Intensive Earthquake Loading
Guinderbir S. Sooch, Dan D. Curtis ........................................ 1546

SESSION 5D: LEVEES

U.S. Levee Safety Coalition and International Community of Practice, Recent Activities and Updates
Elena Sossenkina, Michael Sharp, Noah Vroman .......................... 1564
USACE Levee Portfolio Report
Noah Vroman ........................................................................ 1565
Levee Safety Guidance Comprehensive Document Review
Michael Sharp ....................................................................... 1566
Inventory and Review of the Nation’s Levees
Jamie McVicker, Cathi Sanders ............................................... 1567
Levee Safety Practices in the Keystone State
Andrew J. Orlovsky ................................................................ 1568

SESSION 6D: LEVEES

Seismic Vulnerability Analysis of Slag Cement-Cement-Bentonite Seepage Cutoff Walls for Levees
Vlad Perlea, Khaled Chowdhury, Mary Perlea, Michael Kynett .......... 1578
Advances in Design Procedures for Relief Well Lines in Variable Urban Settings
Evaluation and Design of Irregularly-Positioned Relief Wells
Joseph Weber, Mark Stanley, Robert Jaeger, Graham Bradner .......... 1624
Explaining Pore Pressure Changes Due to Piping Through Changes in Hydraulic Conductivity
Carolyne Bocovich, Willem Kanning, Minal Parekh, Michael Mooney ................................. 1643
Design and Construction of Feather River West Levee Improvements
Christopher Kriwanec, Les Harder, Michael Bessette .................... 1657

SESSION 5E: CONCRETE II

Simplified Nonlinear Seismic Analyses of Gravity Dams
Etisa Mezio, Wenbo Duan, Najib Bouaanani, Benjamin Miqael ........... 1658
Strontia Springs Dam: Methods to Better Understand Seismic Behavior
Aimee L. Corn, Guy S. Lund, Darren J. Brinker, Erin Gleason ............. 1673
Cracking in Thin Arch Concrete Dam – Nonlinear Dynamic Structural Analysis ................................................................. 1685

Sherry Hamedian, Roman Koltuniak

SESSION 6E: CONCRETE II

Comparison of Nonlinear Finite Element Analysis Methods Used to Simulate Post-Tensioned Anchorage in Concrete ........................................................................................................................................ 1709
Vojislav Cvijanovic, Mark Schultz, Blake Dolve

Structural Inflection Points, and How They Enhance the Understanding of Structural Safety ........................................... 1724
Guy S. Lund, Kevin Marshall, Todd Barber

Pseudo-Nonlinear Finite Element Analysis of Concrete Gravity Dams .................................................................................. 1735
J. Taylor Perkins, Huacen A. Hasan, Daniel A. Gilbert

Importance of RCC Mixture Lab Studies for the Design of Large Dams ........................................................................... 1747
A. Garduno, M. Montero, F. Ballhausen

SESSION 5F: SAFETY & SECURITY

Managing Threats Through Effective Security Programs ........................................................................................................ 1762
J. A. Gloschat, A. C. Baehr

Unmanned Aerial Vehicles – A Public Agency Approach to Deployment and Protection ..................................................... 1775
Katharine Killeen, John Rizzardo

The Economics of Dam Security Post 9/11 and the Threat to Consumer Confidence ............................................................. 1776
Alexander B. Shannon

SESSION 6F: SAFETY & SECURITY

Flood Risks from Spillways: Modeling and Communicating Non-Dam-Failure Impacts to Native American Tribes .............. 1796
Rinda Tisdale, Matthew Young, Chris Clopper

City of Dubuque, Iowa: Defining Emergency Actions with a Levee Breach Evaluation ......................................................... 1803
Andrew McCoy, Deron Muehring, Rusty Jones

Public Safety and Unauthorized Extreme Activities at Dams .................................................................................................. 1827
Steven Barfuss, Brian M. Crookston, Kade Beck, Ryan Weller

Public Safety and Social Media .................................................................................................................................................. 1828
Sharon Nicole Roach

Author Index
