ADAPTIVE 2018
The Tenth International Conference on Adaptive and Self-Adaptive Systems and Applications

February 18 - 22, 2018
Barcelona, Spain

ADAPTIVE 2018 Editors
Andreas Rausch, TU Clausthal, Clausthal-Zellerfeld, Germany
Christoph Knieke, TU Clausthal, Clausthal-Zellerfeld, Germany
Melanie Schranz, EU-H2020 CPSwarm, Lakeside Labs GmbH, Austria
Table of Contents

Self-Reconfigurable Manufacturing System For Personalized Mass Customisation
*Rotimi Ogunsakin, Cesar Marin, and Nikolay Mehandjiev*

Low Power Tristate Buffer for Mobile Applications
*Karol Niewiadomski and Dietmar Tutsch*

Adaptive Petri Nets – A Petri Net Extension for Reconfigurable Structures
*Carl Mai, Rene Schone, Johannes Mey, Thomas Kuhn, and Uwe Assmann*

Managing Communication Paradigms with a Dynamic Adaptive Middleware
*Tim Warnecke, Karina Rehfeldt, and Andreas Rausch*

Towards A Cubesat Autonomicity Capability Model
*Clement Gama, Roy Sterritt, George Wilkie, and Glenn Hawe*

Improvement of Self-optimizing in Selection and Composition of Services Using Reinforcement Learning Algorithm Based on Convex Hull
*Hadis Khorasaninasab Abbasi and Eslam Nazemi*

Conception of a Type-based Pub/Sub Mechanism with Hierarchical Channels for a Dynamic Adaptive Component Model
*Mohamad Ibrahim, Karina Rehfeldt, and Andreas Rausch*

Distributed Simulation for Evolutionary Design of Swarms of Cyber-Physical Systems
*Micha Rappaport, Davide Conzon, Midhat Jdeed, Melanie Schranz, Enrico Ferrera, and Wilfried Elmenreich*

Automated and Connected Driving in Urban Scenarios
*Maximilian Flormann, Adrian Sonka, and Roman Henze*

Highly Accurate Map-based Path and Behavior Planning for Automated Urban Driving
*Bjorn Reuber, Holger Znamiec, Roman Henze, and Ferit Kucukay*

Vehicle Antenna-Footprint Optimization for Efficient MIMO V2X Communications
*Andreas Pfadler, Christian Ballesteros, Jordi Romeu, and Lluis Jofre*

Improving Thermal Management of Electric Vehicles by Prediction of Thermal Disturbance Variables
*Peter Engel, Sebastian Meise, Andreas Rausch, and Wilhelm Tegethoff Tegethoff*

Long-Term Environment Prediction for Model Predictive Control in Vehicles: Pattern Recognition upon Primitive Driving Behavior and Driver Condition
*Karl-Falco Storm, Daniel Eckardt, Meng Zhang, Jorg Grieser, Michael Prilla, and Rausch Andreas*
