TABLE OF CONTENTS

SESSION 2: DIGITALIZATION: A VISION FORWARD

Digitalisation – The Next Frontier for the Offshore Industry ................................................................. 1
Dekker, Martijn; Thakkar, Anosh
Effectively Harnessing Data to Navigate the New Normal: Overcoming the Barriers of Digital Adoption ................................................................. 12
Bailie, Bruce; Chinn, Matthew
Digital Oilfield Implementation Challenges Management in Offshore Environment ........................................ 22
Udoja, Emmanuel; Obong, Benjamin
The Control Room is Anywhere and Everywhere: Putting the Industrial Internet of Things to Work Offshore and Beyond ........................................................................................................... 31
Zornio, Peter
Harnessing Data Effectively to Develop a Low-Manned Platform in a Remote, North Sea Operating Environment ......................................................... 38
Knutsen, Edmund; Iieby, Morten
Increasing Production Efficiency via Compressor Failure Predictive Analytics Using Machine Learning ................................................. 47
Artificial Intelligence: Steps to Transforming Offshore E&P for Vastly Improved Business Outcomes .................. 56
Gruss, Alec

SESSION 3: SUBSEA FIELD DEVELOPMENT AND TIEBACKS

Malikai Tension Leg Platform - Drilling Tender Vessel - Top Tension Riser Operations ......................................................... 63
Aramanadaka, Shankar Bhat; Yong, Lewis; Kota, Ravi; Jamal, Sharizul A; Yeap, Fabian
Integrated Reservoir Study of the Who Dat Field .................................................................................. 82
Gong, Xinglai; Simms, Gerard; Fowler, Richard; Doughtie, John; Cumming, Earl
A Universal Field Development Approach for Advancing Stalled GOM Deepwater Projects .................................................. 122
D’Souza, Richard; Basu, Shiladitya; Khurana, Sandeep
Optimized Field Development through Integrating Field Network with Dynamic Reservoir Model ...................... 139
Harish, Mahanauz; Norvigir, Jens Peter; Berg, Kjartan; Vannes, Knut; Irmans-Jacobsen, Tine Bauck; Cuneta, Alberto Daz
Integrated Subsea Supplier-Led Solution: A Case Study ........................................................................ 149
Ligny, F. Harault De; Roberts, J.; James, D.; Eliseeva, E.
Deepwater Innovations: eXtra Long Oil Tiebacks Technologies ..................................................................... 168
Gassert, Michael; Moll, Gianluca De; Calabrese, Vito; Magi, Stefano; Citi, Gianfederico; Rollo, Fabrizio
Lightweight, Compact, Fast & Flexible Subsea Tie-Ins with HCCS-L ...................................................... 175
Ali, Mohammed Hasan

SESSION 4: ADVANCES IN MOORING TECHNOLOGY

Shu, Hongbo; Yao, Alfeng; Ma, Kai-Tung; Ma, Wei; Miller, Jonathan
Formation and Development of Seabed Trenching from Subsea Inspection Data of Deepwater Gulf of Guinea Moorings ................................................................................................................................. 195
Colliat, Jean-Louis; Safinus, Stefanus; Buylan, Noel; Schroeder, Knut
Mooring Chain Wear Experiments and Findings .................................................................................. 210
Jayasinghe, Kanikha; Potts, Andrew; Kilner, Andrew; Melchers, Rob
Mooring Tensioning Systems for Offshore Platforms: Design, Installation, and Operating Considerations ................................................................. 229
Wei, Yongyan; Wang, Tao; Ma, Kai-Tung; He, Qinpian; Garry, Robert; Shelson, John
Effect of Seabed Trenching on the Holding Capacity of Suction Anchors in Soft Deepwater Gulf of Guinea Clays ................................................................................................................................. 245
Saxi, Khalida; Zehouz, Slamane; Blanc, Matthieu; Thorel, Luc; Cathie, David; Puech, Alain; Colliat-Dangus
Qualify, Verify and Demonstrate Robust Synthetic Mooring Lines to Reduce Costs ...................................... 260
Hansen, A. B.; Ehrem, S.; Calora Mooring Systems As Larsen, K.; Gabrielsen, Ø.
Novel Dynamically Installed Fish Anchor - Diving Upon Loading in Calcareous Silt ........................................ 274
Chang, K.; Hassain, M. S.; Kim, Y. H.; Randolph, M. F.; Wang, D.

SESSION 5: REACTIVE AND DISSOLVABLE MATERIALS FOR DOWNHOLE APPLICATIONS

Degradable Packing Element for Low-Temperature Fracturing Applications .................................................. 289
Duan, Ping; Sudana, Anil; Xu, Youqing; Deng, Guijun; Pratt, Barbara
Recommended Design and Field Practices to Maximize the Value of Degradable Completion Systems ................ 297
Aviles, I.; Dardis, M.
Mechanical Behavior of Degradable Thermoplastic Composites ........................................................................ 303
Celestine, A.; Zhu, S.
SESSION 6: RISK MANAGEMENT VS. RISK AVOIDANCE

Managing Marine Risks to Offshore Oil Structures: How Close is Too Close? ................................................................. 362
Tieman, Jason

Risk Based, Statistical Approach to Assessment of Corrosion Anomalies in Pipelines ......................................................... 368
Scales, Derek; Hubbard, Rex; Merrick, Chris

Risk Based Internal Corrosion Assessment of Pipe in Pipe Flowline ................................................................................ 384
Hogelin, P. T.; Webh, J. T.; Ruocco, V.; Vadel, D.; Hill, R.

A Comprehensive Innovation Method to Assess Uncertainties and Increase Performance of Infill Project in Mature Oilfields .................................................................................................................. 399
Shi, Hongfu; Ma, Kingian; He, Yifan; Han, Xiaodong; Ren, Bo

Managing Risks in Relief Well Operations: From Planning to Execution .................................................................................. 406
Poefdonjo, B.; Macreusy, L.; Sikal, A.

Autonomy Applied to Seep Hunting for De-Risking Exploration ....................................................................................... 423
Lindsa, Steffan

Reducing Hydrogen Embrittlement Risk of Steel Bolting in Seawater Environment with Nickel-Cobalt Electroplating .................................................. 435
Rosan, Omar; Burk, James D.; Garcia, Oscar; Hernandez, Jose; Giraul, Carlos

SESSION 7: TOPSIDE INNOVATIVE PROCESSING AND DESIGN

Efficient Condensate Mercury Removal Offshore .................................................................................................................. 449
Manuelis, Tom; Aguadach, Imane

Elimination of Fresh Water Use for Chemical Cleaning in Sulfate Removal Units SRU .............................................................. 459
Moreira, Alexandre M. B.; Lage, Gustavo Garion; Tendillo, Manuel G. S.; Zhang, Xingpeng; Rodrigues, Danielle; Pessoa, Fabio

Novel Adsorption-Based Gas Treating Technology Platform for Upstream Gas Separations ........................................................................... 476
Barnes, William; Chen, Chien-Chiang; Fowiler, Tracy; McMahon, Patrick; Nagavarapu, Ananda Krishna; Shatto, Donald

The Benefit of Replacing Rising Stem Ball Valves with Triple Offset Valves in Natural Gas Molecular Sieve Applications .................................................................................................................. 487
Ferrara, Marco; Casaroli, Sergio

AOGV: New Method for Process Isolation .......................................................................................................................... 492
Rossen, Kenneth O.; Aamot, Kjetil; Mikkelsen, Kurt

Design Considerations to Minimize Hydrocarbon Entrainment in the Aqueous Phase ........................................................... 497
Latta, T. M.; Acosta, E. J.; Teeffelen, N.; Van, Sveen, J. K.; Tienhaara, M. K. S.

SESSION 9: SUBSEA INNOVATIVE PROCESSING AND HARDWARE DESIGN

Long Gas Tiebacks – Pseudo Dry Gas Systems ...................................................................................................................... 583
Thomas, Lee; Ishihara, Laura; Wood, Terry; Stokes, Stephen; Leff, Richard

Emergency Chemical Scavenging of Hydrogen Sulfide During Gulf of Mexico Well Flowback ......................................................... 604
Budd, N.; Joshi, N. B.; Pailie, A.; Li, Q.; Miller, T.; Kapadia, K.

The Underwater Intervention Drone, A New Method for Delivering IRM Services in the Subsea Environment .................. 609
Jamiesson, Jim; Wilson, Lee; Sherry, Wayne; Main, William; Solheimmes, Pål Ate

Local Heating of Subsea Flowlines, A Way to Increase Step Out Distance with Conventional Thermal Insulation ............. 621

Umbilical Cost Reduction and System Availability Improvement with Use of Chemical Injection Valves .................................. 633
McWilliams, R. S.; Phipps, P. J.; Myres, D. J.; Erickson, M. R.; Morrison, D. S.

Compact Modular Manifold Design for Reduced Cost and Added Value Subsea Production Systems ........................................... 644
Campman, Murilo; Silva, Simao; Smith, Matthew

Modular Integration Platform – Submerged Production Unit for Large Subsea Plants ........................................................ 657
Daasvatn, Sigbjorn; Juhlkin, Rasmus; Seterdal, Morten

SESSION 10: FLNG AND GAS MONETIZATION INNOVATIVE PROCESSING AND DESIGN

FLNG - Pushing the Boundary of Existing Practices .............................................................................................................. 674
Abe, Shigeru; Ishizaki, Hiroyuki; Uchida, Hirokatsu; Nitta, Kotaro
Natural Gas Hydrates to Enable the Safe, Sustainable, and Economical Production of Offshore Petroleum Reserves ......................................................................................................................... 680

Combining Floating and Grounded LNG Plant, LNG Storage and Power Units Offshore for Gas Field Developments ............................................................................................................. 690

Takata, N.; Knox, J.; Sharma, P.; Winkler, D.

Optimized Mixed Refrigerant System Using Advanced Vessel Economizer ................................................................................................................................. 705

Kim, Taeysun; Park, Hyunki; Kim, Chilwoo; Oh, Youngsook; Lee, Donghan; Kim, Seunghyuk; Min, Jooho

Flexible Hose Technology Benefits for Ship-to-Shell High Pressure Natural Gas Transfer .............................................................................................................. 735

Szekely, Gergely; Peterson, Eduardo

Re-Shaping LNG Transfer .......................................................................................................................... 743

Lagarriague, Vincent; Hermay, James

Advanced Dual Refrigerant Expansion Cycle for Liquefaction .................................................................... 755

Kim, Hyoubin; Kim, Munghu; Kim, Youngguk; Kim, Minsok; Lee, Kihwan; Kim, Minki; Min, Jooho; Lee, Donghan; Jang, Jungmoon; Kim, Junghoon

VOLUME 2

SESSION 11: DIGITAL REVOLUTION AND DATA TECHNOLOGY RESHAPING OFFSHORE

A Novel Approach to Generating a Hurricane Database for the Gulf of Mexico Based on Numerical Weather Prediction Models .......................................................................................................................................... 769

Liria, Juan; Coelho, Henrique; Sproston, Dave; Martinho, Paulo; Webb, Cody; Oropeza, Fernando; Bradon, Jill; Smith, Rosemary; Peng, Zhong

A Novel Survey of Bulk Gel Treatment Designs in Injection Wells-Part I: Gel Strength ......................................................................................................................... 794

Alidhaheri, Munafith; Wei, Mingchen; Zhang, Na; Bai, Baojun

Improved Operation of Subsea Boosting Systems through Advanced Condition Monitoring and Data Analytics .............................................................................................. 827

Johnstad, Per Christian; Tommerberg, Kyrre; Hauserstad, Marius

Cyber Security - Understanding Your Threat Landscape .................................................................................. 837

Jorgensen, John M.; McSweeney, Kevin P.

Building Cloud Services for Monitoring Offshore Equipment and Operators ......................................................... 852

Tang, S.; Wang, R.; Zhao, X.; Nie, X.

A Roadmap for Adopting a Digital Lifecycle Approach to Offshore Oil and Gas Production .................................. 865

Grange, Elgonda La

Leveraging Field Intelligence Through Operational Certainty: How Automated Operating Practices Deliver Industry Leading Results .............................................................................................. 880

Jimenez, Jose A.; Zornio, Peter

SESSION 12: FIELD DEVELOPMENT STRATEGIES TO FACE THE CURRENT MARKET SITUATION

The Giant Lula Field: World’s Largest Oil Production in Ultra-Deep Water Under a Fast-Track Development ................................................................................................. 885

Rosa, Marcelo Becker; Cavalcante, Jose Sergio De Araujo; Miyakawa, Tetsuo Mineiro; Freitas, Luiz Carlos Soares De

Optimizing Existing Subsea Assets for Respudding of Wells: Step-Over Juniper ................................................................................................................................. 898

Mench, T.; Williams, J.; Roberts, J.; Robichaux, S.; Flakes, K.

Re-Floatable Towed Production Systems for Small Pool Development .............................................................................. 904

Gosslad, M.; Hopkins, D.; Hendawy, M.

Concepts and Strategies for Developing Bankable Floating Production Solutions for Gulf of Mexico ................................. 921

Adil, Adam

Redefining Capital Investment: A Steady Hand in an Unsteady Time .................................................................................. 929

Abghazaleh, Waled

Wet Gas Production from a Semi-Submersible with On-Board Condensate Storage ......................................................... 938

Rijken, Ortil

SESSION 13: MATERIAL ADVANCEMENT

Application of Wear-Resistant Elastomer to Significantly Improve Service Life of Telescopic Joint Packers ......................................................................................................................... 945

Denison, C. R.; Fiore, C. J.; Krakowski, F. J.

Development of New CRA Grade for High Pressure High Temperature Application ......................................................... 958

Song, S.; Richoux, V.; Gomes, C.; Decouloux, F.; Néel, G.

Alcohol Ethoxylate Nano Surfactant: Surface Tension and Compatibility with Acidizing Additives ................................. 969

Omar, Abdullahman Bin Alawani, Nader; Al Moajil, Abdullah; AlDarweesh, Saajad

Temporary Coating for Dissolving Frac-Balls Used in Multi-Stage Fracturing Systems ................................................. 979

Kumar, Deepak; Hernandez, Erwin D.; Sanchez, James S.; Xu, Zhiyu

Reduction of Surfactant Adsorption in Porous Media Using Silica Nanoparticles ................................................................. 984

Suresh, Radhika; Kaznetsov, Oleksandr; Agrawal, Devesh; Darugkar, Quasi; Khabashesku, Valery

DeepStar Technology Advancement Related to Floating Systems and Operations Impact ................................................. 993

Gomes, Joseph; Shamshy, Shaker
Shearography Inspection to Assess the Structural Integrity of Composite Repairs in Metallic Piping ................................................................. 998
Sousa, Sergio Dumascone; Pampa, Ana Lucia; Albertazzi, Armando; Fanfani, Analucia V.; Willemann, Daniel P.; Benedet, Mauro
E.; Silva, Fabio A.

SESSION 14: CONTINUOUS IMPROVEMENT: MORE FOR LESS

SEAR JIP: The Value of Sharing of Lessons Learned on Subsea Integrity and Reliability ................................................................. 1010
Botto, Adriana; Smith, Harvey; Tomar, Manish; Marstrand, Jesper; Ferrier, Stuart; Merrick, Christopher; Forsyth, Helena

The Planning and Execution of the Tortue High Rate Gas Well DST in Offshore Deep Water Mauritania ........................................... 1017
Hiep, S. Vu; Mike, D. Guerra; Paul, A. Berry

Industry Limits Pushed on Cabiruas Gas Export Pipeline Project ............................................................................................................. 1031
D'Huert, Pierre-Emmanuel

How the Perdido Team Safely and Efficiently Increases Production Volumes ......................................................................................... 1038
Leyva, V.; Rolfvondenbaumen, T.; Barber, R.; Kalina, K.; Hartmann, B.

Baldrate Integrity Management Plan: A Continued Service Case Study .................................................................................................. 1048
Kitson, M.; Ramsay, D.; Kemp, D.; Moslehy, Y.; Sheward, R.

Data Driven Virtual Sensors for Riser Prognostic Integrity Management .................................................................................................. 1067
Sandhararaman, S.; Thethi, R.; Hill, M.

Effective Asset Integrity in a $50 a Barrel World ........................................................................................................................................... 1087
Wilson, Mark; McCready, Dallas

SESSION 16: HPHT TECHNOLOGY VERIFICATION, VALIDATION, AND REGULATORY REQUIREMENTS: PART ONE

HPHT Technology Development & Approval: Verification and Validation in the Context of the BSEE Regulatory Process ........................................................................................................................................................................... 1094
Kasinski, Greg J.; Vaclavik, Matt; Hansen, Paul; Fury, Sandi

HPHT Hands Free Drilling Riser System with Superior Fatigue Performance ......................................................................................... 1101
Sandman, Colton; Plichta, Drew; Mills, Darren; Kaculi, Jim

Case Study: Deepwater Design Verification and Validation Testing for Subsurface Safety Valves for HPHT Environments ................................................................................................................................................................................................. 1116
Phillips, Ryan; Tooley, Keegan; Bingham, Fred; Rodriguez, F. Justin

Development of an API 17TR8 Compliant 18-3/4 Subsea Wellhead System Rated to 20,000 psi and 350°F ........................................................................................................................................................................................................................................... 1124
Istre, T.; Hajianmaleki, M.; Christien, T.; Kaminski, D.; Maguire, P.

Case Study: Deepwater Design, Verification, and Validation Testing for Production Packers in HPHT Environments .................................................................................................................................................................................. 1138

Overview of DeepStar Project to Demonstrate the Use of API 17 TR8 - Verification and Validation .......................................................................................................................... 1146

SS: HPHT Technology Verification, Validation, and Regulatory Requirements: HPHT Riser Technology Challenges ........................................................................................................................................................................... 1158
Dincal, Selcuk; Reagen, Daniel; Saglar, Nuri

SESSION 17: WELL CONTROL INTELLIGENCE FOR THE NEXT 50 YEARS

Modeling of Subsea BOP Shear and Sealing Ability Under Flowing Conditions ..................................................................................... 1176
McCleny, Amy B.; Green, Steven T.; Mueschke, Nicholas J.

Condition and Performance Analysis of a Subsea BOP Control System Pressure Regulator ........................................................................... 1193
Muthu, Metic; Wassar, Taoufik; Franchek, Matthew A.; Gutierrez, Jose A.

Digital Transformation and IIoT for Oil and Gas Production .......................................................................................................................... 1204
Berge, Jonas

Leakage Monitoring of Subsea Blowout Preventer Control System .......................................................................................................... 1214
Wassar, Taoufik; Muthu, Metic; Franchek, Matthew A.; Gutierrez, Jose

System Model Integration in Subsea Design ................................................................................................................................................. 1221
Hudson, Abe; Kratzke, Ron; Baker, Jason

All-Electric Subsea Systems - Intelligence on Demand .................................................................................................................................. 1233
Elgsaa, Kristin Moe; Jhovriksen, Terje; Hua; Wei; Tryti, Svein; Glomsaker, Terje

2 Million Pounds Force Electrical Ram BOP ............................................................................................................................................. 1244
Kuilenburg, Robert Van; Li, Jie

SESSION 18: CAMPOS BASIN: FROM SHALLOW WATER TO THE ULTRADEEPWATER AND COMPLEX RESERVOIRS: 40 YEARS PUSHING THE TECHNOLOGY BOUNDARIES

The Big Journey of a Giant: The Campos Basin’s History ............................................................................................................................ 1258
Batalha, M.; Cunha, V.

Campos Basin Technologies Yard: 40 Years of Lessons Learned ........................................................................................................... 1269
Roberto, M.; Coutinho, A. B.; Santos, A. R. Dos
SESSION 19: THE MALIKAI PROJECT

Overview of the Malikai Project ................................................................. 1363
Adrian, E.; Wong, S. H.
Malikai TLP Project: Health Safety and Environment Measures Implemented for GOAL ZERO ................................................................. 1371
Gupta, J. K.; Bhat, S.; Yang, T. K.
Design and Operation of Coupled Mooring System for Tender-Assisted Drilling at Malikai TLP ................................................................. 1379
Kota, Ravikiran; Amrul, Sharizal; Tan-Sabah, Hugo
Malikai TLP Transport and Installation ..................................................... 1396
Huffelen, Rolf Van; Bruin, Ruben De; Wassenaar, Walter
Numerical Study of Vortex Induced Motion and Vibrations on Risers and Tension Leg Platform for Malikai ......................................................... 1401
Gupta, J. K.; Bhat, S.; Yang, T. K.
Malikai TLP: Collaboration in Design and Delivery of the Malikai SCCTTR ................................................................................................. 1416
Aramanandha, Shankar Bhat; Hafizullah, Steven; Power, Thomas; Tay, Kay Yang
Malikai TLP - Superlift and Integration of Topside with Hull ....................... 1433
Sinha, S. K.; Zin, Chaah Siak; Lim, John; Walters, Paul

SESSION 20: CASE STUDIES AND ADVANCES IN RESERVOIR CHARACTERIZATION AND MONITORING

4D-Close-the-Loop Workflow to Calibrate the Geomechanical Simulation Model and Identify Drilling Loads ........................................................................ 1452
Nasser, Yesser Hay
Derivation of Continuous Irreducible Water Saturation and Pore Throat Aperture Distribution from Well Logs in an Offshore Brownfield .................................................................. 1466
Boe, S.; Alzahabi, A.; Balasubramaniam, S.; Chen, P.; Thakur, G. C.
A Multi-Disciplinary Approach to Select the Optimum Infill-Well Location for Efficient Reservoir Management of a Mature Field ................................................................. 1476
Cui, Yunjiang; Shi, Xinlei; Li, Ting; Wang, Ruibong; Lu, Yulong; Meng, Li
How is Multiple-Point Geostatistics of Lithofacies Modeling Assisting for Fast History Matching? A Case Study from a Sand-Rich Fluvial Depositional Environment of Zubair Formation in South Rumaila Oil Field ......................................................................................... 1485
Al-Mudhar, Waheq I.
Accurate Permeability Estimation in a Heterogeneous Middle East Carbonate Field through Facies Classification and Core-Log Integration ....................................................................... 1513
Hybrid Grouping of Wells Combining Geological Compartmentalization and Surface Facilities ............................................................................... 1539
Bose, Sushanta; Balasubramanian, Srinivas; Alzahabi, Ahmed; Chen, Pella; Thakur, Ganesh C.

SESSION 21: RECENT ADVANCES IN GEOTECHNICS

Recent Advances in Well Modeling: Axial Interaction Between Structural Casings and Soil Under Cyclic Thermal Loads ......................................................................................... 1545
Zhou, Hongjie; Amadio, Alessandro; Rodriguez, Antonio Borges; Baylan, Noel; Deeks, Andrew
Experience with Interface Shear Box Testing for Axial Pipe-Soil Interaction Assessment on Soft Clay ......................................................................................... 1565
Westgate, J. J.; White, D. J.; Savazzi, M.
The Design of Subsea Foundations Subject to General Cyclic Loading Using a Massively Scalable Web Based Application ......................................................................................... 1589
Doherty, James; Krstladi, Henry; O’Neill, Michael; Erbrich, Carl; Bransby, Fraser; White, David; Randolph, Mark
Prediction of Seabed Trench Formation Induced by Anchor Chain Motions ................................................................................................. 1603
O’Neill, Michael; Erbrich, Carl; McNamara, Anthony
On-Bottom Stability Design of Pipelines and Umbilicals on Seabed Susceptible to Scour: A Multi-Faceted Approach .......................................................................................................................... 1622

Hybrid Subsea Foundation for Deepwater FLET: A Case History ................................................................. 1639

Normalized Modulus Reduction and Damping Ratio Curves for Bay of Campeche Carbonate Sand ................................................................. 1651

SESSION 23: HPHT TECHNOLOGY VERIFICATION, VALIDATION, AND REGULATORY REQUIREMENTS: PART 2

Verification and Validation of Computational Modeling in Energy Systems .......................................................... 1671

Aspects of Design Verification Analysis for HP/HT Applications ................................................................. 1680

Evaluation Testing of Completion Tubular Connections for an HPHT Environment in the Gulf of Mexico ......................................................... 1695

Gomes, Joseph; Shamsy, Shakir

High Strength Steel for HP/HT Riser Applications and Cost Benefits......................................................................................... 1710

Karanakuran, Daniel; Jones, Richard; Thurel, Eline; Lious, Cedric

Design and Qualification of a 20,000 psi Rated Annulus Seal Assembly ................................................................. 1734

Tooley, Keegan; Phillips, Ryan; Bingham, Fred; Garrett, Timothy; Rodriguez, F. Justin

Rapid Design and Construction of a 30K CRA Pressure Vessel Proof Tested to 50,000 psi ................................................................. 1746

Podues, E.; Scranton, J.; Dzielenkosi, M.

SESSION 24: RESERVOIR ENGINEERING AS THE CORE OF THE OFFSHORE OIL AND GAS ACTIVITIES

A New Practical Water Injection System in Offshore Fields ......................................................................................... 1761

Maximize EOR Potential by Optimizing Miscible CO2 Injection Parameters in Carbonate Reservoirs ................................................................. 1770

Effective Use of Laboratory Measurements on Eor Planning ......................................................................................... 1784

Recent Advances in Enhanced Oil Recovery Technologies for Unconventional Oil Reservoirs ................................................................. 1799

Rethinking Appraisal: Identification of Pre- and Post-Sanction Uncertainty Drivers in Deep and Ultra Deep Gulf of Mexico Fields Using Data Mining and Data Analytics ......................................................................................... 1806

How to Effectively Develop a Marginal Offshore Heavy Oil Field with Strong Aquifer Under Low Oil Price Condition ......................................................................................................................................................... 1824

Autonomous Inflow Control for Reduced Water Cut and/or Gas Oil Ratio ................................................................. 1831

SESSION 25: THE DIGITAL OPTIMIZATION OF OFFSHORE EXPLORATION AND PRODUCTION: THE NEXT 50 YEARS

Integrated Approach in Optimizing Well Placement within Complex Turbidite Channels-Levee Systems in the Niger Delta Basin .......................................................................................................................... 1846

The Process to Provide Effective Decision-Support and Realise Value – Implementing a Global Well Integrity Management Software System .......................................................................................................................... 1857

Data Management and Digitalisation: Connecting Subsea Assets in the Digital Space ................................................................................................................................. 1872

Virtualization: An Innovative Way to Reducing CAPEX and OPEX for Control Systems ................................................................. 1883

Integrated Design Computational Model Applied to O&G Offshore Field Development ................................................................. 1890

Converting Power to Performance: Gulf of Mexico Examples of an Optimization Workflow for Bit Selection, Drilling System Design and Operation .......................................................................................................................... 1906

Automated Model Building: The Next AI Frontier in Predictive Maintenance ................................................................................................................................. 1935
SESSION 26: THE HEBRON PROJECT

Geoscience Overview of the Hebron Field .................................................................................................................. 1940
Cornelius, Vincent; McNeill, Andrew

Hebron Offshore Development Project Overview .................................................................................................. 1953
Wolfe, K. J.; Parker, G. J.; Sellers, S. L.

Hebron Platform: Innovative Design and Efficient Execution .................................................................................. 1965
Widianto; Chichester, Justin; Younan, Adel; Khalifa, Jameel; Komperla, Krishna; Bidne, Knut

Integration of Multi-Site Engineering, Procurement, Fabrication and Commissioning ............................................. 1986

Hebron’s Labor Empowerment Strategy – A Legacy of Success ............................................................................. 2001
Haddock, J.

Successful Management of Major Marine Operations for the Hebron Project .......................................................... 2013
Perry, R.; Overstake, M.; Hagen, O.; McCarthy, R.

Application of Digital Technologies to Improve Collaboration and Support of Remote Offshore Operations ............. 2026
Ryan, M. F.; Kourvelas, C. P.; Tuttle, D. C.; Nicholls, S. G.

SESSION 27: GEOHAZARD AND GEOTECHNICAL CHALLENGES: ENGINEERING SOLUTIONS FOR TODAY AND TOMORROW

Geohazard Monitoring – Mind Mapping the Complexity ......................................................................................... 2034
Streut, James M.; Yanneste, M.; Forsberg, Carl Fredrik; Caugil, Eric; Unterneh, Stephan; Byrd, Daniel

BOEM’s 3DX-Based Regional Bathymetric Data Set, Deepwater Gulf of Mexico: Automated Seafloor Characterization, Geohazards Assessment, and Engineering Planning ......................................................... 2044
John, Morgan D.; Campbells, Kerry J.; Devine, Christine A.

Understanding Slope Instability on the East Nile Delta – A Case Study .................................................................. 2055
Harrison, D. P.; Smith, C. A.; Brown, J.; Thomas, S.

Repeat AUV MBES Surveys for Deepwater Seafloor Change Detection ................................................................. 2078
Haneberg, William C.

Seismic Inversion for Site Characterization: When, Where and Why Should We Use It? ........................................... 2089
Yardy, M. E.; Clare, M. A.; Yanneste, M.; Forsberg, C. F.; Dix, J. K.

Offshore Geological, Geotechnical and Geohazard Modelling and Design for Abu Dhabi ........................................ 2098
Matthew, Free; Esad, Porovic; Jason, Manning; Yannis, Fourniadis; Richard, Lagasse; Charlene, Ting; Grace, Campbell; Areti, Kuskoidi; Andrew, Farrand; Ricky, Terrington; Gareth, Carter; Tarek, Omar

An Example in the Use of Performance-Based Engineering for Offshore Shallow Foundations Overlying Liquefiable Sand ........................................................................................................................................... 2109
Saniclo, Rodolfo B.

SESSION 28: RISERS AND PIPELINES

Offshore Export Gas Pipeline in Pre Salt Santos Basin - Historic, Optimizations and Lessons Learned ..................... 2117
De Acvedo, Fabio Braga; Havrebroth, Guilherme Eller; De Castro Genuito, Monica

Damping Identification from Measurement of Axial Riser Response Data ............................................................... 2126
McNeill, Scot; Stahli, Matt; Bhalla, Kenneth

Reducing Cost While Maintaining Level of Safety by Applying Reliability Based Design for Trawl Interference with Pipelines ............................................................................................................................................. 2142
McNeill, Scot; Stahl, Matt; Bhalla, Kenneth

Vortex-Induced Vibration Effects of Production Risers in Proximity with Drilling Risers or Tendons ......................... 2154
Allen, Don W.; Liu, Nicole

Quick Estimating Pipeline Walking Anchor Force - It is Much Less Than the Full-Length Mobilization ....................... 2170
Carneiro, Daniel

Steel Lazy Wave Risers SLWRs Towing: A Cost Effective Alternative for Deepwater Gas Developments .................. 2186
Ryan, John; Eyssautier, Stéphan; Brouard, Yann; Romans, Kemal Erwin; Doksendal, Oystein

Solutions to Some Mysterious SCR Hydrodynamic Behaviors and their Applications for Improved SCR Design ........ 2198
Yue, B.

SESSION 86: POSTER LOUNGE I

Mapping Benthic Habitat Conditions and Seafloor Deposits Using Sediment Profile Imaging and a Semiautomated Image Processing System .............................................................................................................. 2213
Revelas, Eugene; Sackmann, Brandon; Thurlow, Aimee; Jones, Craig

Integrating Core Porosity and Well Logging Interpretations for Multivariate Permeability Modeling through Ordinary Kriging and Co-Kriging Algorithms ..................................................................................... 2228
Al-Mudahhar, Waleed J.

How to Improve Sweep Efficiency of Horizontal Wells for Offshore Fluvial Oil Reservoir by ICD Inflow Control Device ........................................................................................................................................ 2245
He, Yifan; Shi, Hongfu; Luo, Xiaobo
Looking Deep Beyond the Wellbore: Mid-Field Hydraulic Fracture Diagnostic ............................................................ 2251
Stolyarov, Sergey; Cazzeneuve, Eduardo; Sahab, Karim; Kotou, Sergey

Acoustically Responsive Cement for Enhanced Well Integrity ......................................................................................... 2260
Pollock, Jacob; Veedu, Vinod; Elshahawi, Hani

Incorporating Magneto-Rheological Damper into Riser Tensioner System to Restrict Riser Stroke in Moderate-Size Semisubmersibles .................................................. 2273
Zainudin, Zaid; Kim, Moo-Hyun; Kang, Heon-Yong; Bhat, Shankar

An Integrated Workflow of IOR/EOR Assessment in Oil Reservoirs .................................................................................. 2285
Chen, Peida; Balasubramanian, Sivaram; Bose, Sushanta; Alzahabi, Ahmed; Thakar, Ganesh

Innovative Subsea Repair of a Leaking Flexible Joint Using Hybrid Gasket and Composite Material ............................. 2300
Assier, Ludovic; Byrd, Daniel; Furmanowski, Yves; Golecha, Kartik; Beaumont, Baptiste; Martin, Olivier

VOLUME 4

Adding Value to New HPHT Well Barrier Equipment Rapid Deployment including Regulatory Approvals .......................... 2321
Cain, David; Hoefler, John; Goggans, Tim; Kaucul, Jim T.; Grohmann, Andrew J.; Cain, Jeremy

I3P HPHT Checklist for Design Minimum Acceptance Criteria ........................................................................................... 2338
Andamour, Jay; Hoefler, John

Renewable Generated Energy for Subsea Power Infrastructure ......................................................................................... 2350
Knor, Richard; Buck, Elaine

In-Field Applicable Coatings for Corrosion and Biofouling Control in Marine Environments ........................................ 2354
Nakatuka, Matthew; Thapa, Samid; Brown, Erika; Veedu, Vinod; Santalucia, Andy

Experimental and Computational Study of Thermodynamic Hydrate Inhibitor Mixing and Displacement in Subsea Jumpers ................................................................................................................................. 2361
Lu, Haidan; Tracy, Noah; Johnson, Sc; Volk, Micheal; Delle-Case, Emmanuel; Ozhayougla, Evren M.

CFD Analysis of Entrapped Water Response of FPSO/FLNG Turret .................................................................................. 2389
Yu, Kai; Hsieh, Yronne; Ge, Zhonglie; Yu, Qing

SESSION 30: MEETING NEW CHALLENGES WITH FLEXIBLE AND SPOOLABLE PIPE

Upgrade of Unbonded Flexible Pipe Design Capabilities in Pressure and Temperature ................................................. 2405
Bernard, Gary; Rouche, Pierre-Yves; Caicedo, Juan; Chirat, Mathieu; Deheeger, Antoine

Qualification of a Thermoplastic Composite Pipe for Subsea Pumping Well Intervention Systems - A Practical Implementation of DNVGL-RP-F119 ............................................................................................................ 2419
Charlesworth, David; Mullan, Mick; Scott, Anna; Priddy, James; Richardson, Joshua

Mitigating Flexible Riser Risk by Focused Monitoring and Digital Analytics ................................................................. 2436
Green, L. M.; Nordve, N. T.; Gjendal, A; Lillevold, P; Muren, J; Hanssen, E. B.

Flexible Riser Remnant Life Assessment Using Artificial Neural Networks and Advanced Inspection Methods .................. 2447
Francis, Kirk; Chavez, Victor

Thermoplastic Composite Riser Development for Ultradeep Water ............................................................................. 2460
Smits, Alexander; Neto, Teofilo Barbosa; Boer, Henk De

Large Umbilical Multibore Installation ............................................................................................................................. 2473
Noone, Richard

Flow Induced Pulsations FLIP in Rough Bore Gas Flexible Pipes Test in Partnership with TOTAL E&P - IRPHIE/CNRS - TechnipFMC ............................................................................................................. 2486
Décuupère, Matthieu; Charlote, David; Roques, Jean-Philippe; Karmkian, Alexandre; Galeron, Guélin; Mattei, Pierre-Olivier; Amielh, Muriel

SESSION 31: DRILLING AUTOMATION AND MACHINE LEARNING

Machine Learning for Improved Directional Drilling .................................................................................................. 2496
Pollock, Jacob; Stoecker-Sylvia, Zachary; Veedu, Vinod; Panchal, Neil; Elshahawi, Hani

Application of Real-time Video Streaming and Analytics to Breakdown Rig Connection Process ................................. 2505
Hegde, Chiranth; Avan, Omar; Wiemers, Tim

Well Performance in New Frontiers: Reducing Risk and Uncertainty through Large Scale Data Analytics .................. 2519
Amiratifi, A.; Block, G.; Abou-Sayed, O.; Abou-Sayed, A. S.; Zalane, A.

Development of Next Level Drilling Simulator Using Multiple User Interaction Concepts ........................................ 2537
Srivistava, Saket; Ichim, Adonis; Teodortiu, Catalin

Digital Well Planning - New Cost Saving Well Construction and Life Cycle Well Integrity Model ................................. 2548
Brechan, B.; Dale, S. I.; Sangesland, S.

Well Construction Process Modeling and Simulation ....................................................................................................... 2571
Baker, Jason; Ferraioli, Patrick

Automated Remote Monitoring of Offshore Assets Using Satellite Imagery and Machine Learning .............................. 2582
Arango, Maria S.; Davila, Daniel S.; Blaisdell, Samantha G.; Van Horn, Adam
SESSION 32: FROM HIGH-COST OFFSHORE TO LOW-COST UNCONVENTIONALS: THE CHANGING MARKET FOR LWD TECHNOLOGY

A New Logging-While-Drilling Azimuthal Density Sensor for Large Borehole Applications—Gulf of Mexico Case Studies ................................................................. 2661
Michel, Franck; Parker, Tim; Bennie, Allan; Laroussi, Nasreddine; Elhivario, Michael

New LWD Technology Provides High-Resolution Images in Oil- and Water-Based Muds for Improved Decision Making in Real Time .............................................. 2617
Gillen, M. E.; Moody, B.; Dymmock, S.

Horizontal Well Placement in a Thin Heterogeneous Carbonate Reservoir, Utilizing Azimuthal Sonic and Resistivity Measurements, a Case Study from Offshore Abu Dhabi ........................................ 2627
Serry, Amr M.; Al-Hassani, Sultan; Al-Tamimi, Ibrahim; Khan, Owais A.; Naseem, Shafig; Mostafa, Hassan; El Kholy, Mohamed; Bassiony, Aly

Integration of Lwd and Geochemistry from Cuttings Measurements for Well Placement Based on Real Time Diagenesis Characterization ............................................................. 2641
Camilo, Mejia; Giorgio, Nardi; Lain, Drew

Quantitative Analysis of Drilling Progress with Real Time Modelling ................................................................................................................................. 2653
Austin, Simon; Nieuwoudt, Hermann; Tiley-Baker, Richard; Jonsbrønen, Fredrik

High Speed Telemetry on Wired Drill Pipe, History, and Impact on Drilling Process ............................................................. 2665
Foster, Robert; Macmillan, Robin

SESSION 33: ENHANCED FLOW ASSURANCE STRATEGIES: GUARANTEE THE FLOW, REDUCE THE EXPENDITURE

Enhance Flow Assurance in Large Diameter Gas Flexible Pipes ................................................................. 2669
Lefer, Bruno; Phelut, Renaud; Decuypere, Matthieu; Legeay, Sébastien

OPEX Savings in Pipeline Blockage Remediation - Lessons Learnt from West Africa Experience ................................................................................................. 2678
Bukaraju, Sampath K.; Osorio, Nelson F.; Monge, Juan I.; Estevez, Gabriel J.

Deposition and Shear Stress Initial Investigations for Hydrate Blockage ......................................................................................... 2695
Aman, Zachary M.; Qin, Hao; Pickarts, Marshall; Lorenzo, Mauricio Di; Moy, Eric F.; Koh, Carolyn A.; Zerpa, Luis E.

A Simplified Model for Steady-State Pseudo-Slug Flow ......................................................................................... 2709
Soedarno, Azun; Pereyra, Eduardo; Sarica, Cem

A New Correlation for Predicting Solid Particle Erosion Caused by Gas-Sand Flow in Elbows ................................................................. 2725
Parsi, Mazdak; Arabnejad, Hadi; Al-Sarkhi, Abdelsalam; Zahedi, Peyman; Vieira, Ronald E.; Sharma, Partha; McLaury, Brenton S.

Utilizing the High-Pressure Rheometer for Comparison of LDHI Effectiveness ......................................................................................... 2743
Spratt, Tony; Conrad, Pete; Asheim, Colton; McCarthy, Ryan; Golczynski, Tommy

SESSION 34: MARINE MINING

How AI and Robotics can Support Marine Mining ......................................................................................... 2756
Kampmann, Peter; Christiansen, Leif; Fritsche, Martin; Gaudig, Christopher; Hanfl, Hendrik; Hildebrandt, Marc; Kirchner, Frank

Search for MH370: New Geologic Insights Revealed through the Integration of Multiple Geophysical Datasets ......................................................................................... 2769
McBee, J.; Ingle, S.; Ghrib, J.; McConnell, D.

Shouwei, Zhou; Qiongqing, Li; Wei, Chen; Jianliang, Zhou; Weixun, Pang; Yafa, He; Xin, Li; Liangxin, Yu; Qiang, Fu; Jiang, Lin

Thermogenic Gas Hydrates Formation in Offshore Environments - Results from Numerical Simulations ......................................................................................... 2795
Dhakal, S.; Gupta, I.

A New Method Based on Simulation Experiment to Evaluate Subsea Wellhead Stability of Drilling from Gas Hydrate Sediments in Deep Water ......................................................................................... 2809
Li, Lilin; Yang, Jin; Zhou, Guodong; Yan, Li; Yin, Qixu; Zhou, Bo; Wang, Lei; Ke, Ke

Combining DWS Depressurization Method and Heat Injection to Improve the Hydrate Recovery ......................................................................................... 2817
Sun, Yang; Chen, Yuan; Zhao, Yang

SESSION 35: APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS IN OFFSHORE ENGINEERING

CFD Benchmark Study from the Wind Load Joint Industry Project ......................................................................................... 2827
De Wilde, J. J.; Schrijvers, P.; Witz, J.

Numerical Modeling of High Length-to-Diameter Ratio Riser Subjected to VIV ......................................................................................... 2837
Kara, M. C.; Jaiwals, V.; Sharma, P. P.; Tulimilli, B.; Cosgrove, S.

An Evaluation of an Air Gap Assessment Using a Focus Wave Technique ......................................................................................... 2847
Kim, Youngkook; Zhang, Yali; Pang, Andrew; Chua, Kie Huan; Xu, Hai Hue; Liu, Jing; Ma, Pei Feng; Choudhary, Ankit; Hussain, Anis; Merchant, Aziz Amiri

Estimation of Wind and Current Load on Offshore Structures Using Wind Tunnels and CFD ......................................................................................... 2857

Validation of Multiphase Modeling of a Horizontal Liquid-Liquid Separator in Fluent and STAR-CCM+ ......................................................................................... 2872
McCleneay, A. B.; Green, S. T.; Ovosten, R. A.
SESSION 37: LEVERAGING BIG DATA IN SYSTEM DESIGN

Big Data in the Digital Oilfield Requires Data Transfer Standards to Perform ................................................................. 2911
Neri, Philip

Platform Modular Drilling Rig – An Improved Design to Help Achieve Better Returns in Low Oil Price Environment ......................................................... 2917
Tang, S.; Zhu, X.

RB-FEA Based Digital Twin for Structural Integrity Assessment of Offshore Structures ............................................. 2942
Sharma, Prabha; Katerwas, David; Hayat, Phuong; Malinowski, Grzegorz

Model-Centric Digital Subsea Pipeline Design Process and Framework ................................................................. 2948
Laye, A.; Victoire, K.; Caoctui-Duvenger, V.

Functional Design Specification FDS for MPD Equipment Installation on Deepwater Drillships .................................... 2958
Patil, Harshad; Deshpande, Kedar; Dietrich, Earl; Armone, Maurizio

The Impact of Digitalization on Offshore Operations ......................................................................................... 2976

Integrating Big Data: Simulation, Predictive Analytics, Real Time Monitoring, and Data Warehousing in a Single Cloud Application ............................................... 2991
Mourtiz, N.; Guo, Y.; Panchal, Y.; Mohamed, I. M.; Abou-Sayed, A.; Abou-Sayed, O.

SESSION 38: SUBSEA PROCESSING

BC10 Mudline Pump - A Cost Saving Solution for Brownfields .................................................................................. 3005
Liney, D. J.; Bekker, M. A.; Broderick, R. J.; Cardoso, E. W.; Fletcher, N.; Bourne, M.

Qualification of the HighBoost Multiphase Pump for Heavy Oil Applications ......................................................... 3021
Knuusden, Halldun Rognes; Bibet, Pierre-Jean; Ekeberg, Ina; Martinussen, Svein Arne; Kjellnes, Hans Fredrik; Torberguen, Erik

Subsea Seawater Treatment and Injection - Performance Tests of Filtration Membrane Modules at Simulated Subsea Conditions ......................................................... 3034
Phasencia, Jose; Andreotti, Marcelo; Wang, Hua; Alam, Zamir

Gullfaks Subsea Compression: Early Operational Experience from the World's First Subsea Wet Gas

Compression System ........................................................................................................................................ 3045

Modular Compact Pump: A Game Changer in Subsea Multi-Phase Boosting ........................................................... 3062
Melba, Aslaug; Glomaker, Terje; Sund, Hans Kristian

Qualification of New Technologies in Subsea Processing ......................................................................................... 3068
John, Smarty Mathew; Liu, Meng-Lung; Wang, Zhenghua; Lin, Jessie

42" Subsea Connector & Open-PLET Technology .................................................................................................. 3080
Ali, Mohammed Hasan

SESSION 39: OFFSHORE PIPELINES

New Method for Improved Cathodic Protection Monitoring on a Rock Damped Offshore Pipeline Corridor - A Case History ........................................................................................................ 3093

Evaluation of Rock Mass Stability and Rock Fall Hazard for Pipelines in Submarine Environments ......................... 3102
Britton, J. N.; Vinsonuto, J.; Salentie, I.

Evaluation of Debris Flow Impact on Submarine Pipelines: A Methodology ............................................................. 3117
Malgesini, Giuseppe; Terrile, Emanuele; Zuccarino, Lorenzo; Parker, Eric; Friedmann, Yves

Reliability Analysis of Buried Offshore Pipelines in Sand Subject to Upheaval Buckling ........................................... 3132
Ismaiel, S.; Najjar, S. S.; Sadok, S.

The Impact of Slugs on Pipe Response - Physical Testing and Numerical Correlation ................................................ 3145
Connaire, Adrian; Payne, Jason; Green, Steve; Supak, Kevin

Developing Weld Defect Acceptance Criteria for a Swaged Pipe-in-Pipe System ....................................................... 3157
Zhou, D.; Sriskandarajah, T.; Baname, M.; Teso, P.; Dugat, S.

Assessment of Pipelines for Manmade Hazards ..................................................................................................... 3172
Akinci, N. O.; Kumar, A.; Simpson, N.; Dai, A.; Guinard, M.
SESSION 40: ADVANCES IN OFFSHORE WIND ENERGY

Structural Health Monitoring for Offshore Wind Turbine Towers and Foundations .............................................................. 3181
Mandarini, Alberto; Kwan, Chi-Tai Thomas; Shelton, John; Yao, Asfong

Construction Challenges in Future Offshore Wind Developments ........................................................................................................ 3199
Macleay, A.; Den Hollander, R.

Offshore Wind Sediment Stability Evaluation Framework .................................................. 3209
Jones, Craig; McWilliams, Sam; Engelmann, Georg; Thurlow, Aimee; Roberts, Jesse

Assessment of Wind Energy in the United States Gulf of Mexico Area as Power Supply for Offshore Oil Platforms ............ 3221
Hacis-Fernandez, Francisco; Li, Hua; Ramirez, David

Sustainable Offshore Wind Energy: Faster and Larger at Lower Cost and Less Environmental Impact ........................................ 3246
Dirks, W. G.; Kappen, J. M. J.; Scheltema, R. D.; Winken, J.; Wechner, M. S.

Comparing Levelized Cost of Energy for a 200 MW Floating Wind Farm using Vertical and Horizontal Axis Turbines in the Northeast U.S.A. .............................................................................. 3266
Shelley, Steffen, A.; Boo, S. Y.; Kim, D.; Luahties, William H.

SESSION 42: METOCEAN ADVANCES

On Extreme Surface and Sub-Surface Currents Driven by North Brazil Current Rings Offshore Suriname ........................................ 3279
Schiller, Rafael V.; Smith, Rosemary B.

Downscaling Global Wave Ensemble Forecasts With Machine Learning Techniques in Application to Billia Croo Test Site ........................................................................................................ 3290
Darbyman, David; Wang, Michael; Buck, Elise

A Multi-Resolution Probabilistic Ocean Current Forecasting System for Offshore Energy Operations ........................................... 3300
Srinivasan, Ashwath; Sharma, Neha; Gustafson, Drew

Using Weather Pattern Typology to Identify Calm Weather Windows for Local Marine Operations .................................................. 3319
Steere, Edward; Neal, Robert; Dunkers, Buger; Fournier, Nicolas; Myln, Kenneth; Nwosu, Paul; Saule, Andrew; Shea, Ahsadair; Upton, Jon

API RP-2MET Metocean 2nd Edition; Updates to the Gulf of Mexico Regional Annex ................................................................. 3327

2014-2017 Anomalous Loop Current Activity ......................................................................................................................... 3339
Sharma, Neha; Storie, Jill; Ivanov, Leonid; Magnell, Bruce; Lehre, Michael; Gustafson, Drew; Zimmerle, Heather

Technology Qualification of Deepwater Transport Shuttle Adjustable Buoyancy System ................................................................. 3358
Gaskill, Collin G.; Carlisle, Kipp B.; Schroeder, Art J.; Chitwood, James E.; Gay, Tom A.; Zhao, Wenhua

SESSION 54: SUBSEA ROBOTICS: THE AUTONOMY ERA

Opportunities and Challenges of Remote Operating a ROV Embarked on a USV ........................................................................... 3375
Lachaud, Emilie; Monbeig, Yodrick; Nollet, Pierre; Hardy, Antoine; Thompson, Matthew; Lardeux, Mathieu

SESSION 92: POSTER LOUNGE II

Mooring Design and Operation Practice for Floating Units Subject to Ice Loading .................................................................................. 3385
Moe, A. M.; Erb, P.; Singhal, G.

An Innovative Design and Construction Method of New-Build Hull-Platform for Floating, Production, Storage and Offloading ........................................................................................................ 3434

HPT Materials - Push the Limit with Standardization and Innovation .......................................................................................... 3447
Tang, Fei; Viteri, Martha; Thoddla, Ramgopal

First Set of Bulk Standard Specifications Set to Reduce Cost and Delays in Offshore Oil & Gas Projects ........................................... 3453

Comparison of ASME and BS-EN Codes on Design by Analysis for Subsea Pipeline Components .............................................. 3465
Farahani, Kasra; Vorooghi, Navid

Preventing Unexpected Walking Induced by Interaction Between Acceptable Uncontrolled Buckles And Spans .................................. 3477
Verdel, Julien; Mourad, Romain

Lateral Response of Trenched Pipelines to Large Deformations in Clay .......................................................................................... 3487
Kianian, M.; Esmaeilzadeh, M.; Shiri, H.

Marinization of Mass Transfer Columns for FLNG Applications ........................................................................................................ 3505
Schultes, M.; Brauer, J.; Chen, P.; Doong, S.
SESSION 43: ONE GULF REACHING 50 BILLION BOE AND GROWING

One Gulf Reaching 50 Billion Boe and Growing ........................................................................................3584
Duncan, Tim; Braathen, Bjorn Inge; McCormack, Niall; Stauble, Martin; Campbell, Lorna; Cizek, Mark; Rasmussen, Stein; Khurana, Sandeep; Wilson, Julie

SESSION 45: FLOW ASSURANCE IN A COST ENVIRONMENT: ENGINEERING AND PROJECT LEARNING

Flow Assurance Engineering in Deepwater Offshore - Past, Present, and Future ................................................3608
Bomba, John; Chin, Doreen; Kad, Ashutosh; Meng, Weihong

A Novel Coating to Reduce Solids Deposition in Production Systems ................................................................3635
Bethke, Gregory K.; Snoek, Braden; Herrera, Gilbert; Kelly, Amy E.; Joshi, Sanjeev; Jain, Shekhar; Choudhary, Suresh; Hammami, Ahmed; Evans, Lee

Cold Finger Benchmarking Study for Paraffin Inhibitor Selection .........................................................................3644
Peng, Yun; Golchha, Abhishek; Bronze, George

ETH-HCRA A Cost Effective Flexible Pipe for Active Heating ..................................................................................3658
Lefer, Bruno; Dessaint, Renaud; Marchand, Didier

The End of Cool Down Testing ................................................................................................................................3671

Remediation of Subsea Flowline Restriction Using Seawater and Additives .................................................................3690
Garan, Ron; Esley, John; Arciero, Bryan; Muzzo, Claudia; Alapati, Rama; Yousef, Ali

An Integrated Online Transient Simulation Solution for Subsea Pipeline Operations ..................................................3705
Schoene, Clare Butler

SESSION 46: IMPLEMENTING NEW INTEGRATED TECHNOLOGY FOR SAFER FUTURE IN OFFSHORE OPERATIONS

Expand the Use of Open Wireless Gas Detection Systems for Life Safety and Asset Integrity ..................................................3712
Yeo, Jisuan; Chin, Will

Enhancing Situation Awareness and Process Safety in Offshore Drilling Operations: Applications of Eye-Tracking System ........................................................................................................................................3719
Salehi, Saeed; Raj, Raj; Jieon, Jiwon; Kang, Zhoa; Teodorus, Catalin; Cokely, Edward

Unmanned Aerial Vehicles for Survey of Marine and Offshore Structures: A Classification Organization's Viewpoint and Experience ...........................................................................................................3737
Wen, Feng; Wolling, James; McSweeney, Kevin; Gu, Hai

Integrated Emergency Management Platform Using IoT to Improve MEM ........................................3746

Integration of Wearable Technology for Inspection Tasks ..........................................................................................3754
Pray, J.; McSweeney, K. P.

Taylor, Starr Latusha; Bharadwaj, Bommireddipalli Shashank; Ram, Devaraj Pramesh

Modeling Subsea Gas Release to Atmospheric Gas Dispersion Cloud ..........................................................3774
White, Charles; Pétrid, François; Rouxse, Benjamin

SESSION 47: WELL COMPLETION TECHNOLOGY

Intelligent Completions: Design and Reliability of Interval Control Valves in the Past, Present, and Future .....................3792
Joubert, Jonathon

Field Operational Results of Precision Slot Cutting Using Novel Electromechanical Slot-Cutting Technology ..................3821
Fanini, Otto N.; Garcia, Alejandro; Ransone, Gerald

Expediting Deepwater Subsea Development with a Batch Drilling and Completion Strategy: Lessons Learned Offshore Angola ................3836
Piemontese, M.; Tassone, G.; Sita, F. J.; Bertoldi, L.; Talebballah, E. Y.; Zhao, G.; Crawford, N.
# VOLUME 6

## SESSION 48: INTERVENTION, ABANDONMENT AND DECOMMISSIONING

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>An Integrated Scientific Workflow Enables Successful Perforating Operations in Offshore Southeast Asia</td>
<td>3858</td>
</tr>
<tr>
<td>Single Trip, Multistage System Delivers Fast, Efficient Solutions in Deepwater</td>
<td>3874</td>
</tr>
<tr>
<td>20ksi 350F High Pressure High Temperature Enhanced Vertical Deepwater Tree Development: Simplify, Eliminate, Integrate</td>
<td>3885</td>
</tr>
<tr>
<td>Correlation of Numerical Simulation and DIC Strain Measurements for a Multilateral Junction while Subjected to High Internal Pressure</td>
<td>3896</td>
</tr>
</tbody>
</table>

## SESSION 49: FLOATING SYSTEM AND INTEGRITY MANAGEMENT STANDARDS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advancements in Guidance for the Specification and Assessment of Mooring Steel Wire Rope</td>
<td>4005</td>
</tr>
<tr>
<td>ISO Standards to Enable Reliable, Safe and Cost-Effective Technology Development, Project Execution and Operational Excellence</td>
<td>4021</td>
</tr>
<tr>
<td>CVA for the Continued Service Process - A Proposal</td>
<td>4044</td>
</tr>
<tr>
<td>Development of Approval Procedures for the Land Transport of Equipment on Public Roadways</td>
<td>4054</td>
</tr>
<tr>
<td>New Standard for Standards</td>
<td>4060</td>
</tr>
<tr>
<td>Insight into Pipeline On-bottom Stability, DNV RP F109 and DNVGL RP 114</td>
<td>4079</td>
</tr>
<tr>
<td>Synergy in the Standards and Regulations of Offshore Renewable Energy and Offshore Oil &amp; Gas</td>
<td>4095</td>
</tr>
</tbody>
</table>

## SESSION 51: FIT FOR FIFTY: REDUCING TIME, COST, AND UNCERTAINTY BY STREAMLINING OFFSHORE PROJECTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lean Semi - A Competitive Floating Solution</td>
<td>4111</td>
</tr>
<tr>
<td>Dynamic Uncertainties Appraisal throughout a Development Project, Applying PRMS Indicators of Resource and Reserves Categorization</td>
<td>4131</td>
</tr>
<tr>
<td>Integrating Completions for a True Spud to First Oil Deepwater Well Manufacturing Machine</td>
<td>4161</td>
</tr>
<tr>
<td>A Cost Reduction Methodology for Offshore Projects</td>
<td>4173</td>
</tr>
<tr>
<td>Application of Data Science and Machine Learning for Well Completion Optimization</td>
<td>4186</td>
</tr>
<tr>
<td>Exploring New Concepts in Subsea Field Architecture</td>
<td>4202</td>
</tr>
</tbody>
</table>
SESSION 52: COST EFFECTIVE CHEMICAL SOLUTIONS FOR SUSTAINABLE PRODUCTION

Advances in LDHs and Applications ................................................................. 4226
Chin, Y. D.; Srivistava, A.

Enabling Longer and Cheaper Subsea Tie-Backs Utilizing Local Subsea Chemical Storage and Injection .................................................. 4245
Schröeder, Art J.; Chipwood, James E.; Gay, Tom A.; Bahr, Jeffrey; Brennan, Kevin; York, Matt

Asphaltene Inhibitor Testing: Comparison Between a High Pressure Live-Fluid Deposition and Ambient Pressure ................................. 4254
Jennings, David F.; Chao, Kang-Po; Kim, Jihye

Early Project LDHI Dosage Assumptions Versus an Extensive Laboratory Study ................................................................. 4278
Conrad, P.; McCarthy, R.; Golczynski, T.; Spratt, P.

Modeling Hydrate Formation Management with Anti-Agglomerant Injection in a Subsea Tieback ........................................................ 4297
Wang, Yan; Koh, Carolyn A.; Zerpa, Luis E.

Bridging the Gap between Benchtop Testing and Field Conditions in Flow Assurance Studies ...................................................... 4311

Completion Fluids-Induced Formation Damage in High Temperature Gas Wells: Causes and Mitigation .................................................. 4321
Hamzaoui, Bilal; Moagil, Abdullah M. Al; Yami, Ibrahim; Hazzaz, Hassam

SESSION 53: STRIVING TOWARD SAFETY EXCELLENCE IN OFFSHORE AND SUBSEA ENVIRONMENTS

BOP Testing and It's Availability on Demand-A Case Study ........................................ 4329
Zulqarnain, Muhammad

Filling Gaps in SIS Standards for Reliable, Cost Effective Safety Solutions .... 4344
Startham, Shawn

Pressure Relief Valves Fugitive Emissions Testing .............................................. 4346
Tetto, D. Emile; Gado, Amr; Deng, Calvin

Application of System-Theoretic Process Analysis to the Isolation of Subsea Wells: Opportunities and Challenges of Applying STPA to Subsea Operations .................................................. 4351
Kim, H.; Landreign, M. A.; Hayter, A.; Pedersen, F. B.; Shofield, G.

Operational and Safety Improvements of Applying Real-Time Analytics in an Drilling Contractor RTOC .................................................... 4362

Tactical Airborne Oil Soill Remote Sensing: Poseidon, A New Operational Approach ................................................................. 4376
Vagata, Alessandro; Pinho, Guilherme

A Practical Approach to Evaluate Acoustic and Flow Induced Fatigue of Piping Systems ................................................................. 4388
Chen, Quan; Vinayan, Vinay; Vrijland, Ronald

SESSION 54: SUBSEA ROBOTICS: THE AUTONOMY ERA

FlatFish Resident AUV: Leading the Autonomy Era for Subsea Oil and Gas Operations ................................................................. 4400

Technical Building Blocks for a Resident Subsea Vehicle ................................ 4409
Newell, Todd

Cost Reduction in E&P, IMR, and Survey Operations Using Unmanned Surface Vehicles ......................................................... 4417
Anderson, Brian S.

An Underwater Robotics Platform for Hybrid AUV/ROV Systems ................ 4427
Siegio, Jian

Underwater Free-Space Optical Power Transfer: An Enabling Technology for Remote Underwater Intervention ..................................... 4435

SESSION 55: WELL INTERVENTION

Use of Magnetorheological Fluids for Pressure Drop Generation ................. 4444
Extrada, John; Akbari, Bahak; Nielsen, Garrett

Successful Operation of Fluid-Loss Isolation Barrier Valves in Debris ........... 4457
Craig, Steven J.; Jannise, Ricki; Barrios, Oscar; Tocchetto, Andre; Soares, Robson

Generalized Framework to Simulate Gravel Packing in Wellbore Completions ................................................................. 4467
Mimouna, A.; Verma, A.; Gaudat, M. N.

Electromechanical Remotely Operated Barrier Valve Used in Multiple Operations Globally: A Decade in Review ................................. 4485
Thomson, Barry; Smith, Gary; Brown, Irvine

E-Line Intervention Enables Operator to Design, Manufacture A New Customized Bit to Mill Out Isolation Valve in Record Time and Enable Early Production from Well ........................................ 4499
Tyagi, Chirag; Singh, Virendra; Nayak, Ajit Prakash

Safety Distances of Packers for Deep-Water Tubing-Conveyed Perforating .............. 4509
Deng, Qiao; Zhang, Hai; Li, Jun; Dong, Jian; Wang, Hao; Hou, Xuejun
SESSION 56: NANOTECHNOLOGY INNOVATIONS FOR OFFSHORE DRILLING AND MATERIAL SELECTION

Effects of Nanoclay on the Rheological Properties and Resistivity of Synthetic Based Drilling Fluids under High Temperature
Pan, Dongmei; Vipulanandan, C.; Amani, Niousha; Reddy, Sai Anudeep; Chockalingam, Chella Ganapathy

New Generation Nano Technology Drilling Fluids Application Associated to Geomechanic Best Practices: Field Trial Record in Bahia - Brazil
Barroso, A. L.; Marcelino, C. P.; Leal, A. B.; Odum, D. M.; Lucena, C.; Masculo, M.; Castro, F.

Fluid Loss Control in Smart Bentonite Drilling Mud Modified with Nanoclay and Quantified with Vipulanandan Fluid Loss Model
Vipulanandan, C.; Mohammed, A.; Samuel, R. G.

Novel Surface Modified Nanoparticles for Long-Lasting Mitigation of Water and Condensate Blockage in Gas Reservoirs
Sayed, Mohammed; Liang, Feng; Ow, Hooisweng

Smart Spacer Fluid Modified with Iron Oxide Nanoparticles for In-Situ Property Enhancement was developed for Cleaning Oil Based Drilling Fluids and Characterized Using the Vipulanandan Rheological Model
Vipulanandan, C.; Maddi, A. R.; Ganpatye, A. S.

Experimental Study on the Thermal Insulation and Seawater Corrosion Resistance Effects of Silane-Nanoceramic Coatings in Subsea Riser
Hu, Zhiqiang; Yang, Jin; Kan, Changbin; Xin, Yanyu; Feng, Pengtian; Li, Shuzhan; Wang, Huanhuan; Zhang, Tianwei; Wang, Junxiang

Smart Cement Performance Enhancement with NanoAl2O3 for Real Time Monitoring Applications Using Vipulanandan Models
Vipulanandan, C.; Mohammed, A.; Ganpatye, A. S.

Author Index
