# TABLE OF CONTENTS

## VOLUME 1

### SESSION 1

**Understanding the Role of Mixing and Viscosity in Rapid Volume Expansion Due to Gas Holdup in Anaerobic Digesters** ................................................................. 1  
Nick Bartek, Matthew J. Higgins, Sudhir N. Murthy, Steven Beightol, Ahmed Al-Omari  

**Quantification of Struvite Content of Biosolids is Necessary to Avoid Bias in the Assessment of Digester and Dewaterability Performance** ................................................................. 12  
Alexandria A. Gagnon, Christopher A. Wilson, Wendell Khunjar, Ron Latimer, Jeff Nicholson, Charles Bott  

**Driving Operational Improvement Through the Use of Dashboards: A Regional Biosolids Pelletizing Facility Perspective** ................................................................. 19  
Amber M. Batson, Raymond H. Schauer, Scott Trainor  

**The Trials and Tribulations of Commissioning a Large Biosolids Facility; An Operational Perspective** ................................................................. 35  
Kenneth Schnaars, Terry Highsmith

### SESSION 2

**Optimising THP - The Intermediate Thermal Hydrolysis Process** ................................................................. 42  
Ester Rus, Aurelien Perrault, Nick Mills, Achame Shana, Paul J. Nilsen, O Molokwu  

**Solubilization of Organics Due to Thermal Hydrolysis Pretreatment Leading to Stable Mesophilic Anaerobic Digestion** ................................................................. 50  
Manisha Berde, Domenec Jolis  

**Does Operation At Increased Ammonia Concentration Impact Hydrolysis Rates?** ................................................................. 60  
Baoqiang Li, Adrian Romero, Elizabeth Manning, Matthew Higgins, Ahmed Al-Omari, Sudhir Murthy, Rumana Riffat, Haydee D. Clippeleir  

**Are Thermal Hydrolysis Digesters Robust Because of Their Unique Microbial Communities?** ................................................................. 64  
Joshua Mah, John Novak, Kaisen Lin  

**Free Nitrous Acid Pretreatment of Thickened Waste Activated Sludge Improves Anaerobic Degradability** ................................................................. 75  
Elsayed Elbeshbishy, Frances Okoye, Dang Ho, Siva Sarathy, Wayne Parker  

**Thermal Hydrolysis Reduces Carbon Footprint of Biosolids Treatment** ................................................................. 85  
William Barber  

**Batch Vs. Continuous Thermal Hydrolysis: Which Is Right For You?** ................................................................. 106  
Chris Thomson, Rich Dimassimo, Robert Clay, Sudhakar Viswanathan, Jongmin Kim, Nicholas Landes

### SESSION 3

**Pilot-scale Evaluation Of Airprex® For Digestate Treatment** ................................................................. 119  
Blair Wisdom, Brad Van Anderson, Isaac Avila, Troy Gottschalk, Kurt Carson, Liam Cavanaugh  

**Enhanced Dewatering with Struvite Recovery: Pilot Testing of AirPrex® Technology at Miami’s South District WWTP** ................................................................. 139  
Brian D. Stitt, Terry Goss, Manual Moncholi, Mohammad Abu-Orf, Brian Ismael Diaz  

**Construction and Startup Lessons of the Rocky Mountain Roadmap for Setting Up an Optimal Treatment Train Configuration for Nutrient Recovery from (Digested) Residuals** ................................................................. 155  
Tom Dingemen, Matt Gough, Sean Cooney, Adam Parmenter  

**Utilization Of Municipal Waste And Biosolids As Sources Of Phosphorus For Land Restoration Projects** ................................................................. 173  
Principal Mdolo, Magnus H. Johannsson

**Extractive Nutrient Recovery is a Viable Nutrient Control Alternative for Water Resource Reclamation Facilities** ................................................................. 185  
Wendell Khunjar, Ronald Latimer, Samuel Jeyanayagam, Chirag Mehta, Damien Batstone
SESSION 4

Selection of a Thermal Hydrolysis Process for The City of Calgary’s Bonnybrook Wastewater Treatment Plant .......................................................... 196
Jennifer Peters, Kari MacDonald, Kim Fries, Ryan Roberts

Reinventing Your Biosolids Management Program and Unlocking Resource Recovery with Thermal Hydrolysis - The City of Raleigh’s Journey .......................................................... 217
C M. Bullard, Amy Hanna, Greg Knight, Kent Lackey, Brenan Buckley, Perry Schaefer, T. J. Lynch, Aaron Browe

A Commitment to Improving the Odors of DC Water Biosolids Leads to Improved Acceptance .......................................................... 234
Bill Brower, Christopher Peot, Al Razik

Developing a Large-scale CAMBI Biosolids Marketing and Distribution Program .......................................................... 247
Ronald A. Alexander, Chris Peot

SESSION 5

Business Case Concept Portfolio Supporting a 90 dtpd Biosolids Reuse Program .......................................................... 251
Alicia Gilley, Steve Rogowski

Biosolids on Trial -- Recent Litigation Wins for Land Application .......................................................... 264
James B. Slaughter

Creating Cost-Effective Centralized Solids Management .......................................................... 269
Perry L. Schafer, Natalie Sierra, Steve Wilson

High-Tech Analysis of Low-Cost,Low-Tech Methods for Sustainable Class A Biosolids Production: Set up and Initial Pilot-Scale Data .......................................................... 280
Christa L. Meingast, Jennifer Becker, Eric Seagren

Bay Area Biosolids to Energy (BAB2E) Coalition: The San Francisco Bay Area’s Regional Approach to Biosolids Management .......................................................... 292
Sarah A. Deslauriers

SESSION 6

Developing Biosolids Based Bioretention Soils for Green Stormwater Infrastructure .......................................................... 297
Julia G. Jay, Sally Brown

Biosolids Reuse: Continuous Flow-Through Column Testing of Biosolids-Derived Biochar to Sorb Micropollutants .......................................................... 302
Lee K. Kimbell, Yiran Tong, Anna Avila, Brooke K. Mayer, Patrick J. McNamara

SESSION 7

Trace Organic Contaminants in Biosolids: Recent Survey, Risk Analysis and Communication Tools .......................................................... 306
Kate Kurtz, Roberta King, Ashley Mihle, Sally Brown, Mark Cullington, Heather Brunelle, Laura Kennedy, Dana Devlin-Clarke, Maile Lono-Batura

PBDEs in Class A Biosolids Produced from Thermal Hydrolysis and Anaerobic Digestion Processes .......................................................... 318
Xuanzhao Wang, Natasha A. Andrade, Alba Torrents, Mark Ramirez, Chris Peot

Hydrothermal Processes For Simultaneous Bioenergy Recovery And Destruction Of Bioactive Microconstituents From Biosolids .......................................................... 329
Young Hwan Shin, Lance Schideman, Yuanhui Zhang, Peng Zhang, Michael Plewa, John Scott

SESSION 8

Can Autocatalytic Pyrolysis of Wastewater Biosolids be Energy Neutral and Generate Value-added Products? .......................................................... 360
Zhongzhe Liu, Simcha Singer, Daniel Zitomer, Patrick McNamara

How the City of Lebanon TN Implemented Gasification for Biosolids Disposal and Power Generation .......................................................... 365
Jeff Snyder

Innovative Technology Reduces Mercury Emissions to Keep Ohio’s Sewage Sludge Incinerators Hot and Costs Cool .......................................................... 371
Connor Smith, Scott D. Reed, Robin Rupe, Sara Cramer
Triple Bottom Line Analysis of Energy Recovery from Thermal Oxidation of Wastewater Solids Compared to Coal
Anna J. Munson, Webster F. Hoener, Robert P. Dominak, James E. Welp

Sewage Sludge Gasification as an Alternative to Incineration
Andrew Jones

Duffin Creek and Cleveland Experience - Two New Fluid Bed Sewage Sludge Incinerators Equipped with State of the Art Equipment
Euan Ferguson, Brad Dobson, Ky Dangtran, Levent Takmaz

SESSION 9
Can We Overcome Hydrolysis Limitation by Better Understanding the Impacts of Physics Within Anaerobic Digestion?
Elizabeth Manning, Adrian Romero, Baoqiang Li, Ahmed Al-Omari, Matthew Higgins, Rumana Riffat, Sudhir Murthy, Haydee De Clippeleir

A Review of Rapid Volume Expansion Research and Development of Design Methodologies for Mitigation in Full-Scale Digesters
Steven J. Krugel, Thomas Chapman, William Persich

Making Room for Energy Neutrality
Michael Theodoulou, Dorian Harrison, Nicholas Bonkoski

Application of Rheological Data for Non-Newtonian Sludges; Use of the “Differential Viscosity” for Mixing Simulations and System Friction Calculations
Marilyn Pine, Kent Keeran, Glenn Dorsch

Digester Cover Selection and Safety: Balancing Risk and Reward
John Maley, Benjamin Miller, Matthew J. Williams

Parameters Influencing Anaerobic Digestion Of Sewage Sludge
Stefano Giacalone, Peter Winter, Stephen Smith

Extracting Energy from Sludge in the UK: Recent Experience
Keith M. Panter, Bill Barber

SESSION 10
Innovative Biosolids Conditioning Ahead of Belt Filter Presses to Improve Cake Solids Dewatering
John H. Rickermann, Charles Volk

A Laboratory Based Method for Predicting Dewaterability
Zwelani Ngwenya, Matthew Higgins, Steven Beightol, Sudhir Murthy

Paradigm Shift if Dewatering Operations Moved to the Center of the Plant Universe
William Wehner, Murthy Kasi, Mario Benisch, Anthony Perriera, James Wodrich

Dewatering Biosolids with a Volute Press at Two Biological Nutrient Removal Wastewater Treatment Plants in Montana
Rickey Schultz

Piloting to Establish Performance Criteria at Miami’s South District WWTP
Charles T. Goss, Brian Stitt, Manuel Moncholi, Mohammad Abu-Orf, Ismael Diaz

Reducing Dewatering Costs Through an Optimization Program
Rashi Gupta, Steve Walker, Mike Brehm, Bryan Stevenson, Ken Tagney, Matthew Verosik

VOLUME 2
Screw Press Maximum Dewaterability and Energy Consumption
Edward W. Fritz, Dieter Weinert, Harald Neumann

SESSION 11
Challenges and Opportunities for Approaching Net Zero Energy and Improving Resiliency of a Unique Solids Handling Facility in California
Irina Lukicheva, Dan Frost, Nitin Goel, Peter Burrowes, Summer Bundy, Jamie Pigott

State of the Art Review of Digester Gas Treatment and Upgrading Technologies
Christine A. Polo, Kevin Jankowski, Cary Solberg, Jay Kemp, Greg Knight, Dave Long
**SESSION 12**

- **Update on Biogas Upgrading Project for City Of Portland**
  Vu Han, Paul Suto, Jeremy Holland, Mariel Gueissaz-Teufel
  762

- **A Greener Future for The City Of Raleigh Turning Biosolids Into Vehicle Fuel**
  Greg Knight, Michael Bullard, Kent Lackey, Christine Polo, Jay Kemp, Aaron Brower, TJ Lynch
  780

- **What's The Best Use Of Your Digester Gas? Well, It Depends**
  Ian McKelvey, Eron Jacobson, Peter Zemke, John Smyth
  795

- **Biogas Testing: Critical Techniques To Minimize Capital And Operating Costs**
  Jeremy Holland
  817

- **Next Generation Resource Recovery: Co-Digestion to Renewable Natural Gas (RNG) Pipeline Injection at the Des Moines WRF**
  Dustin L. Craig, Larry Hare, Laurel Schaich
  827

- **Power or Fuel: Renewable Natural Gas a Feasible Alternative**
  Trung Le, Joseph Marino, Trent Montemayor, Jacob Klosinski
  834

**SESSION 13**

- **Using a Chemically Hydrolyzed Biosolids for Co-digestion**
  Joshua Registe, Josh Perez, Jeanette Brown, Robert Sharp, George Nakhla, Ajay Singh
  839

- **Kenosha’s Energy-Optimized Resource Recovery System**
  Joseph Hughes, Andreas Duennebeil
  850

- **Reducing Sludge Viscosity and Improving Dewaterability through a Thermochemical Hydrolysis Process**
  Peiyu Tan, Zhongtian Li
  862

- **The Sludge Ozonation for Different Types of Mixed Liquor Under High and Low pH Conditions by a Plug-flow Reactor**
  Xiaoyu Zheng, Eric R. Hall
  872

- **A Tale of Two Cities: How Climate, Drivers, and Budget Affect Thermal Hydrolysis Design**
  Thomas Nangle, Kristina Warren
  883

**SESSION 14**

- **Planning Your Class A Biosolids Program: Design Considerations And Lessons Learned In Pierce County, Washington**
  Melissa Newell
  905

- **Beginning a Complete Renewal of San Jose-Santa Clara Regional Wastewater Facility's Biosolids Processing Facilities**
  Adam Ross, Mariana Chavez-Vazquez, Lloyd Slezk, Alicia Alba
  911

- **Sustainable and Cost Effective Biosolids Management Planning at OCSD**
  Daniel F. Bahringer, James H. Clark, Tom Chapman, Natalie Sierras, Sharon Yin, Tom Meregillo
  931

- **Comprehensive Biosolids and Bioenergy Planning**
  Cameron Clark, Irina Lakicheva, Anna James, Kathy Rosinski, Dave Parry
  957

- **Biosolids Trends In Tennessee: A Roadmap For The Future?**
  Robert G. Odette
  972
A Big Picture Approach to Addressing Multiple Improvement Triggers for both Short- and Long-term Multi-Facility Master Planning

Vera Gouchev, Paul Knowles, Robert Sharp, Emanuel Psaltalkis, Thomas Lauro

SESSION 15

Mechanistically Understanding the Dewatering Fundamentals: Impact of Biological Systems and Thermal Hydrolysis on Cake Total Solids & Polymer Demand

Mahmudul Hasan, Qi Zhang, Rumana Riffat, Ahmed Al-Omari, Sudhir Murthy, Matthew J. Higgins, Haydee De Clippeleir

Phosphorus Release and Thermal Hydrolysis Pretreatment Effects on the Dewatering Properties of a Bio-P Biosolid in Anaerobic Digestion

Jeffrey D. Nicholson, Steven Beightol, Matthew J. Higgins, Charles B. Bott

The Role of Soluble P & EPS on Dewatering Performance

Ester Rus, Paul Fountain, Nick Mills, Achame Shana, Obinna Molokowu, Manocher Assaadi

SESSION 17

Development of Kodiak Alaska's Successful Composting Program

Todd O. Williams, Bud Alto, Floyd Dumron, Mark Kozak, Lori Aldrich

Using Lime to Beneficially Manage Wastewater Treatment Plant Residuals: A Review and Assessment of the Practice for Producing an Exceptional Quality Product

James E. Smith Jr, A. R. Rubin, Harry L. Francis, Robert S. Reimers

Producing High Value Carbon Products From Municipal Solids Generated From Chemically Enhanced Primary Treatment

Wendell Khunjar, Eirene Pavlakis, Kartik Chandran, Christopher Wilson

Class B Land Application: A Long-term, Highly Successful Public-Private Partnership

Jake Finlinson, Dave Raud, Andrew Barry, Maile Lono-Batura

Biosolids Products for Urban Agriculture

Sally Brown, Kristen McIvor, Dan Thompson

The Effect of External Substrate (Pure Glycerol), SRT, pH and Mixing Intensity on VFA Production in Bench-Scale Prefermenters

Marzieh Ghasemi, Andrew A. Randall

Vermicomposting of Biosolids and Beneficial Reuse - New Zealand Commercial Case Studies from 4 Communities over 8 Years

Michael Quintern, Max Morley

SESSION 18

Know What You Don’T Know - Using Social Media And Market Research To Inform Loop Communication Strategies

Ashley Mihle

Class "A" Part Two. After Achieving Class A Designation, Our Path ToBuilding A Sustainable Class A Program

Shannon Ostendorff, Scott Thompson, Tim Truax

A Strong Network: The Success of Regional Biosolids Groups in North America

Maile Lono-Batura, Ned Beecher

Not All Dryer Products are Created Equal

Lisa Boudeman

Merging Innovation and Resource Recovery into Daily Operations

Manon Fisher, Natalie Sierra, Ben Jordan, Karri Ving

SESSION 20

Anaerobic Codigester Feeding Pattern Drives Long-chain Fatty Acid Bioconversion Kinetics and Syntrophic Community Structure

Ryan M. Ziels, David A. Beck, H. David Stensel

Resource Recovery Cooperative for the Security of Consistent, High Quality Codigestion Feedstock

David E. McNeil
Codigestion Study Helps Turn Industrial Pre-Treatment Problem to Renewable Energy Benefit ................................. 1209
   Scott Hardy, David Ornelas, Edward Keenan, Brandt Miller, Michelle Brown, Chamindra Dassanayake, Spyros Pavalostathis, Mohammad Abu-Orf

Effects of Biosolids Addition and Alkalinity Sources on High-Solids Anaerobic co-Digestion (HS-AcD)
of Food Waste and Green Waste ............................................................................................................................... 1219
   Phillip Dixon, Paula Bittencourt, Eunyoung Lee, Meng Wang, Eduardo Jimenez, Qiong Zhang, Sarina Ergas

Lifting the Fog from FOG Receiving ............................................................................................................................. 1236
   Rashi Gupta, Daniel Meacham, Phil Parkins, Travis A. Peacock, Anthony L. Montoya

Synergistic Effects of Codigesting Preprocessed Food Waste Slurry .............................................................................. 1255
   Michael P. Keleman, Mingu Kim, Mohammad M. Chowdhury, George Nakhla

ADDITIONAL PAPERS

Cleveland Experience - Three New Fluid Bed Municipal Sludge Incinerators and a Steam Turbine to Generate Power............................................................................................................................... 1259
   D. Hancock, T. Shively, T. Vasel, K. Dangtran, L. Takmaz

Detailed Market Analysis Helps Focus Capital Decisions for Orange County Sanitation District ......................... 1270
   Natalie Sierra, Ron Alexander, Steve Wilson, Deirdre Bingman, Tom Meregillano, Sharon Yin, Jeff Mohr, Daniel Buhrmaster

Author Index
