2018 IEEE International Conference on Software Testing, Verification and Validation Workshops (ICSTW 2018)

Vasteras, Sweden
9-13 April 2018
# Table of Contents

- Message from the ICST 2018 Program Chairs  xi
- Message from the Mutation 2018 General Chairs  xiii
- Mutation 2018 Committees  xiv
- Message from the ITEQS 2018 Workshop Chairs  xv
- ITEQS 2018 Committees  xvi
- Message from the VVIoT 2018 Chairs  xvii
- VVIoT 2018 Committees  xviii
- Welcome Message and Committees for NEXTA 2018  xix
- Message from the A-MOST 2018 General Chairs  xxii
- A-MOST 2018 Committees  xxiii
- Message from the InSTA 2018 Chairs  xxiv
- InSTA 2018 Committees  xxv
- Message from the IWCT 2018 Workshop Chairs  xxvi
- IWCT 2018 Committees  xxviii
- Message from the TAIC PART 2018 Chairs  xxix

## MUTATION 2018

A Systematic Review of Cost Reduction Techniques for Mutation Testing: Preliminary Results  1  

*Fabiano Cutigi Ferrari (Federal University of Sao Carlos), Alessandro Viola Pizzoleto (Federal University of Sao Carlos), and Jeff Offutt (George Mason University)*

To Detect Abnormal Program Behaviours via Mutation Deduction 11

*Jie Zhang (Peking University), Dan Hao (Peking University), Lingming Zhang (University of Texas at Dallas), and Lu Zhang (Peking University)*

If You Can't Kill a Supermutant, You Have a Problem 18

*Rahul Gopinath (CISPA), Björn Mathis (CISPA), and Andreas Zeller (CISPA)*

Mull It Over: Mutation Testing Based on LLVM 25

*Alex Denisov (Independent researcher) and Stanislav Pankevich (Independent researcher)*
Mutant Quality Indicators 32

Papadakis Mike (University of Luxembourg), Thierry Titcheu Chekam (University of Luxembourg), and Yves Le Traon (University of Luxembourg)

MUSIC: Mutation Analysis Tool with High Configurability and Extensibility 40

Duy Loc Phan (KAIST), Yunho Kim (KAIST), and Moonzoo Kim (KAIST)

An Industrial Application of Mutation Testing: Lessons, Challenges, and Research Directions 47

Goran Petrovic (Google), Marko Ivankovic (Google), Bob Kurtz (George Mason University), Paul Ammann (George Mason University), and René Just (University of Massachusetts)

ITEQS 2018

A Testability Analysis Framework for Non-functional Properties 54

Michael Felderer (Blekinge Institute of Technology), Bogdan Marculescu (Blekinge Institute of Technology), Francisco Gomes de Oliveira Neto (Chalmers and the University of Gothenburg), Robert Feldt (Chalmers and the University of Gothenburg), and Richard Torkar (Chalmers and the University of Gothenburg)

Model-Based Mutation Testing of Real-Time Systems via Model Checking 59

Florian Lorber (Aalborg University), Kim G. Larsen (Aalborg University), and Brian Nielsen (Aalborg University)

Identifying Useful Mutants to Test Time Properties 69

Birgitta Lindström (University of Skövde), Jeff Offutt (George Mason University), Loreto Gonzalez-Hernandez (University of Skövde), and Sten F. Andler (University of Skövde)

Learning-Based Self-Adaptive Assurance of Timing Properties in a Real-Time Embedded System 77

Mahshid Helali Moghadam (RISE SICS Västerås/Mälardalen University), Mehrdad Saadatmand (RISE SICS Västerås), Markus Borg (RISE SICS Lund), Markus Bohlin (RISE SICS Västerås), and Björn Lisper (Mälardalen University)

Scan Code Injection Flaws in HTML5-Based Mobile Applications 81

Phi Tuong Lau (University of Information Technology)

VVIoT 2018

A Framework for Threat-Driven Cyber Security Verification of IoT Systems 89

Tomas Kulik (Aarhus University), Peter W. V. Tran-Jørgensen (Aarhus University), Jalil Boudjadar (Aarhus University), and Carl Schultz (Aarhus University)

Architectures and Experiences in Testing IoT Communications 98

Teemu Kanstrén (VTT), Jukka Mäkelä (VTT), and Pekka Karhula (VTT)

A Brief Overview of Existing Tools for Testing the Internet-of-Things 104

João Pedro Dias (INESC TEC), Flávio Couto (University of Porto, Portugal), Ana C.R. Paiva (University of Porto, Portugal), and Hugo Sereno Ferreira (INESC TEC)
Requirements for Testing and Validating the Industrial Internet of Things 110
   Liliana Antão (University of Porto), Rui Pinto (University of Porto),
   João Reis (University of Porto), and Gil Gonçalves (University of
   Porto)

NEXTA 2018

Test Automation - Automation of What? 116
   Yvan Labiche (Carleton University)

Challenges in Automated Testing Through Graphical User Interface 118
   Pekka Aho (Open Universiteit) and Tanja Vos (Universitat Politecnica
   de Valencia)

Assessing Technical Debt in Automated Tests with CodeScene 122
   Adam Tornhill (Empear)

Evaluating Test Data Generation for Untyped Data Structures Using Genetic Algorithms 126
   Ralf Gerlich (BSSE System and Software Engineering) and Christian R.
   Prause (Sankt Augustin)

Feature-Based Testing by Using Model Synthesis, Test Generation and Parameterizable Test
Prioritization 130
   Martin Reider (ifak e.V. Magdeburg), Stephan Magnus (ifak e.V.
   Magdeburg), and Jan Krause (ifak e.V. Magdeburg)

Introducing Automated GUI Testing and Observing Its Benefits: An Industrial Case Study in the
Context of Law-Practice Management Software 138
   Vahid Garousi (Wageningen University) and Erdem Yildirim (Innova IT
   Solutions A.S.)

Automatically Generating Test Scripts for GUI Testing 146
   Muneyoshi Iyama (NTT Laboratories), Hiroyuki Kirinuki (NTT
   Laboratories), Haruto Tanno (NTT Laboratories), and Toshiyuki
   Kurabayashi (NTT Laboratories)

Maintenance of Android Widget-Based GUI Testing: A Taxonomy of Test Case Modification Causes 151
   Riccardo Coppola (Politecnico di Torino), Maurizio Morisio
   (Politecnico di Torino), and Marco Torchiano (Politecnico di Torino)

The Next Level of Test Automation: What About the Users? 159
   Kristian Wiklund (Ericsson AB) and Monika Wiklund (Polar Cape
   Consulting AB)

Design of High Confidence Embedded Software Hardware-in-Loop Simulation Test Platform Based on
Hierarchical Model 163
   Fei Deng (China Academy of Engineering Physics) and Feng Gao (China
   Academy of Engineering Physics)

Software Metrics for Policy-Driven Software Development Life Cycle Automation 169
   Leonid Borodaev (University of Groningen), Alexandru Telea (University
   of Groningen), Rix Groenboom (Parasoft), and Rein Smedinga (University
   of Groningen)
## A-MOST 2018

A Model-Based Test Case Management Approach for Integrated Sets of Domain-Specific Models  
*Reinhard Proll (University of Augsburg) and Bernhard Bauer (University of Augsburg)*

Generation of C++ Unit Tests from Abstract State Machines Specifications  
*Silvia Bonfanti (University of Bergamo), Angelo Gargantini (University of Bergamo), and Atif Mashkoor (Software Competence Center Hagenberg GmbH)*

SPYH-Method: An Improvement in Testing of Finite-State Machines  
*Michal Soucha (The University of Sheffield, UK) and Kirill Bogdanov (The University of Sheffield, UK)*

Modelling Hand Gestures to Test Leap Motion Controlled Applications  
*Thomas D. White (The University of Sheffield), Gordon Fraser (University of Passau), and Guy J. Brown (The University of Sheffield)*

Temporal Logic Falsification of Cyber-Physical Systems: An Input-Signal-Space Optimization Approach  
*Arend Aerts (Bosch Rexroth), Bryan Tong Minh (Alten Mechatronics), Mohammad Reza Mousavi (University of Leicester), and Michel A. Reniers (Eindhoven University of Technology)*

Lightweight Model-Based Testing for Enterprise IT  
*Bernard Elodie (FEMTO-ST Institute), Ambert Fabrice (FEMTO-ST Institute), Legeard Bruno (FEMTO-ST Institute), and Bouzy Arnaud (Smartesting)*

## InSTA 2018

Testing of Big Data Analytics Systems by Benchmark  
*Mingang Chen (Shanghai Key Laboratory of Computer Software Testing and Evaluating), Wenjie Chen (Shanghai Key Laboratory of Computer Software Testing and Evaluating), and Lizhi Cai (Shanghai Key Laboratory of Computer Software Testing and Evaluating)*

Test Case Reduction Based on the Join Condition in Pairwise Coverage-Based Database Testing  
*Yuper Lay Myint (Waseda University), Hironori Washizaki (Waseda University), Yoshiaki Fukazawa (Waseda University), Hideyuki Kanuka (Hitachi), and Hiroki Ohbayashi (Hitachi)*

Model-Based Security Testing - Deriving Test Models from Artefacts of Security Engineering  
*Armin Lunkeit (OpenLimit SignCubes GmbH) and Ina Schieferdecker (Fraunhofer Institute for Open Communication Systems FOKUS)*

Software Test Architectures and Advanced Support Environments for IoT  
*Jon D Hagar (Grand Software Testing)*

Extending the UML Testing Profile with a Fine-Grained Test Logging Model  
*Marc-Florian Wendland (Fraunhofer Institut FOKUS), Niels Hoppe (Fraunhofer Institut FOKUS), Martin Schneider (Fraunhofer Institut FOKUS), and Steven Ulrich (Fraunhofer Institut FOKUS)*
Proposal for Enhancing UTP2 with Test Aspects ......................................................... 267
Makoto Nakakuki (TEF-Do), Koki Abe (Tosei Systems Co.), Hitoshi Ando (TEF-Do), Shizuka Ban (NPO ASTER), Hiroki Iseri (NPO ASTER), Kumiko Iseri (TIS Inc.), Noriyuki Mizuno (TEF-Do), Tomohiro Odan (Mamezou Co.), and Akiharu Satoh (Hitachi Information Academy Inc.)

A Test Architecture for Machine Learning Product .................................................... 273
Yasuharu Nishi (The University of Electro-Communications), Satoshi Masuda (IBM Research), Hideto Ogawa (Hitachi Ltd.), and Keiji Uetsuki (Association of Software Testing Engineering Japan)

A Survey of Software Quality for Machine Learning Applications .......................... 279
Satoshi Masuda (IBM Research - Tokyo), Kohichi Ono (IBM Research - Tokyo), Toshiaki Yasue (IBM Research - Tokyo), and Nobuhiro Hosokawa (IBM Research - Tokyo)

IWCT 2018

A Satisfiability-Based Approach to Generation of Constrained Locating Arrays ........ 285
Hao Jin (Osaka University), Takashi Kitamura (National Institute of Advanced Industrial Science and Technology(AIST)), Eun-Hye Choi (National Institute of Advanced Industrial Science and Technology(AIST)), and Tatsuhiro Tsuchiya (Osaka University)

Optimal Scheduling for Combinatorial Software Testing and Design of Experiments .... 295
Robert V. Binder (Software Engineering Institute)

Enumerator: An Efficient Approach for Enumerating all Valid t-tuples ..................... 302
Hanefi Mercan (Sabanci University), Kamer Kaya (Sabanci University), and Cemal Yilmaz (Sabanci University)

Combinatorial Test Design – A Smarter Way to Connect with the Business ............. 306
Saritha Route (IBM India Pvt. Ltd.) and Sudheer Pendela (IBM India Pvt. Ltd.)

Migrating Combinatorial Interaction Test Modeling and Generation to the Web ......... 308
Angelo Gargantini (Univeristy of Bergamo) and Marco Radavelli (University of Bergamo)

CAMETRICS: A Tool for Advanced Combinatorial Analysis and Measurement of Test Sets ......................................................... 318
Manuel Leithner (SBA Research), Kristofer Kleine (SBA Research), and Dimitris E. Simos (SBA Research)

Combinatorial Testing with Constraints for Negative Test Cases ............................. 328
Konrad Fögen (RWTH Aachen University) and Horst Lichter (RWTH Aachen University)

The Effect of Time-Between-Events for Sequence Interaction Testing of a Real-Time System ......................................................... 332
Chek Pin Yang (WMG), Gunwant Dhadyalla (WMG), James Marco (WMG), and Paul Jennings (WMG)

Practical Amplification of Condition/Decision Test Coverage by Combinatorial Testing .... 341
Artur Andrzejak (Heidelberg University) and Thomas Bach (Heidelberg University)

Combining Combinatorial Testing and Metamorphic Testing for Testing a Logic-Based Non-monotonic Reasoning System ......................................................... 348
Franz Wotawa (Technische Universität Graz)
Adapting Unit Tests by Generating Combinatorial Test Data 352
Hermann Felbinger (Graz University of Technology), Franz Wotawa (Graz University of Technology), and Mihai Nica (AVL List)

TAIC PART 2018

Support for Finding Presentation Failures by Using Computer Vision Techniques 356
Haruto Tanno (NTT Laboratories) and Yu Adachi (NTT Laboratories)

Applying Automated Test Case Generation in Industry: A Retrospective 364
Rudolf Ramler (Software Competence Center Hagenberg), Claus Klammer (Software Competence Center Hagenberg), and Georg Buchgeher (Software Competence Center Hagenberg)

On the Automation of Testing a Logic-Based Diagnosis System 370
Franz Wotawa (Technische Universität Graz)

Effects of an Economic Approach for Test Case Selection and Reduction for a Large Industrial Project 374
Thomas Bach (Heidelberg University), Ralf Pannemans (SAP), and Sascha Schwedes (SAP)

Paulo Eira (EPMQ - Engineering Process Maturity and Quality; CCG/ZGDV Institute), Pedro Guimarães (EPMQ - Engineering Process Maturity and Quality; CCG/ZGDV Institute), Mónica Melo (EPMQ - Engineering Process Maturity and Quality; CCG/ZGDV Institute), Miguel A. Brito (ALGORITMI Center), António Silva (ITU - Innovation and Technology Unit; F3M – Information Systems), and Ricardo J. Machado (ALGORITMI Center)

Verification of Cyber-Physical Automotive Systems-of-Systems: Test Environment Assignment 390
Hermann Kaindl (TU Wien), Franz Lukasch (Robert Bosch AG), Matthias Heigl (Robert Bosch AG), Sevan Kavaldjian (Robert Bosch AG), Christoph Luckeneder (TU Wien), and Sebastian Rausch (Robert Bosch AG)

A Topic Model and Test History-Based Test Case Recommendation Method for Regression Testing 392
Hirohisa Aman (Ehime University), Takashi Nakano (Toshiba Corporation), Hideto Ogasawara (Toshiba Corporation), and Minoru Kawahara (Ehime University)

Risk-Driven Model-Based Testing of Washing Machine Software: An Industrial Case Study 398
Abdülhadi Kirkici (Vestel Electronics), Ceren Sahin Gebizli (Vestel Electronics), and Hasan Sözer (Ozyegin University)

Author Index 405
