2018 IEEE International Conference on Healthcare Informatics Workshop (ICHI-W 2018)

New York, New York, USA
4-7 June 2018
2018 IEEE International Conference on Healthcare Informatics Workshop

ICHI-W 2018

Table of Contents

Welcome Message from the General Co-Chairs x
Organizing Committee xi
Program Committees xiii

Divider - Healthcare Knowledge Discovery and Management

Identification of Genetic Causality Statements in Medline Abstracts Leveraging Distant Supervision 1
Liwei Wang (Mayo Clinic), Majid Rastegar-Mojarad (Mayo Clinic), Ravikumar Komandur Elayavilli (Mayo Clinic), Yanshan Wang (Mayo Clinic), and Hongfang Liu (Mayo Clinic)

Transformation from Publications to Diabetes Ontology using Topic-based Assertion Discovery 9
Rohithkumar Nagulapati (University of Missouri - Kansas City), Mayanka Chandrashekar (University of Missouri - Kansas City), and Yugyung Lee (University of Missouri - Kansas City)

Comparative Analysis of Graph and Relational Databases using HerbMicrobeDB 19
Suganya Chandrababu (University of Nebraska at Omaha) and Dhundy R Bastola (University of Nebraska at Omaha)

Constructing Node Embeddings for Human Phenotype Ontology to Assist Phenotypic Similarity Measurement 29
Feichen Shen (Mayo Clinic), Sijia Liu (Mayo Clinic), Yanshan Wang (Mayo Clinic), Liwei Wang (Mayo Clinic), Andrew Wen (Mayo Clinic), Andrew H. Limper (Mayo Clinic), and Hongfang Liu (Mayo Clinic)

Ontology Mapping Framework with Feature Extraction and Semantic Embeddings 34
Mayanka Chandrashekar (University of Missouri - Kansas City), Rohithkumar Nagulapati (University of Missouri - Kansas City), and Yugyung Lee (University of Missouri - Kansas City)

Characterizing Treatment Strategies of Intrahepatic Bile Duct Cancer by Literature Mining 43
Hongmei Guo (National Science Library, Chinese Academy of Sciences), Ning Zhang (302 Military Hospital), Na Hong (Department of Health Sciences Research, Mayo Clinic), Lixia Yao (Department of Health Sciences Research, Mayo Clinic), Wenfei Duan (The First Affiliated Hospital, Henan University), and Zhixiong Zhang (The Wuhan Branch of National Science Library, Chinese Academy of Sciences)
Predicting Substance Use Disorder in ADHD Patients using Long-Short Term Memory Model
Sajjad Fouladvand (Institute for Biomedical Informatics, University of Kentucky, Lexington, KY), Emily R. Hankosky (Department of Pharmaceutical Sciences, University of Kentucky, Lexington, KY), Darren W. Henderson (Department of Pharmacy Practice and Science, University of Kentucky, Lexington, KY), Heather Bush (Department of Biostatistics, University of Kentucky, Lexington, KY), Jin Chen (Institute for Biomedical Informatics, University of Kentucky, Lexington, KY), Linda P. Dwoskin (Department of Pharmaceutical Sciences, University of Kentucky, Lexington, KY), Patricia R. Freeman (Department of Pharmacy Practice and Science, University of Kentucky, Lexington, KY), Kathleen Kantak (Department of Psychological and Brain Sciences, Boston University, Boston, MA), Jeffery Talbert (Department of Pharmacy Practice and Science, University of Kentucky, Lexington, KY), Shiqiang Tao (Institute for Biomedical Informatics, University of Kentucky, Lexington, KY), and Guo-Quang Zhang (Institute for Biomedical Informatics, University of Kentucky, Lexington, KY)

Assessing Mental Health Signals Among Sexual and Gender Minorities using Twitter Data
Yunpeng Zhao (Department of Health Outcomes and Biomedical Informatics, University of Florida), Yi Guo (Department of Health Outcomes and Biomedical Informatics, University of Florida), Xing He (Department of Health Outcomes and Biomedical Informatics, University of Florida), Jinhai Huo (Department of Health Services Research, Management and Policy, University of Florida), Yonghui Wu (Department of Health Outcomes and Biomedical Informatics, University of Florida), Xi Yang (Department of Health Outcomes and Biomedical Informatics, University of Florida), and Jiang Bian (Department of Health Outcomes and Biomedical Informatics, University of Florida)

Detecting Signals of Associations Between Dietary Supplement Use and Mental Disorders from Twitter
Yefeng Wang (University of Minnesota), Yunpeng Zhao (University of Florida), Jiang Bian (University of Florida), and Rui Zhang (University of Minnesota)

Exploring Temporal Patterns of Suicidal Behavior on Twitter
Jianhong Luo (Zhejiang Sci-Tech University, China), Jingcheng Du (The University of Texas School of Biomedical Informatics), Cui Tao (The University of Texas School of Biomedical Informatics), Hua Xu (The University of Texas School of Biomedical Informatics), and Yaoyun Zhang (The University of Texas School of Biomedical Informatics)

Comparing Pharmacovigilance Outcomes Between FAERS and EMR Data for Acute Mania Patients
Xinyuan Zhang (University of Texas Health Science Center at Houston), Rui Duan (University of Pennsylvania), Jingcheng Du (University of Texas Health Science Center at Houston), Jing Huang (University of Pennsylvania), Yong Chen (University of Pennsylvania), and Cui Tao (University of Texas Health Science Center at Houston)
Fang Li (University of Texas Health Science Center at Houston), Guozheng Rao (Tianjin University), Jingcheng Du (University of Texas Health Science Center at Houston), Yang Xiang (University of Texas Health Science Center at Houston), Yaoyun Zhang (University of Texas Health Science Center at Houston), Salih Selek (University of Texas Health Science Center at Houston), Jane Elizabeth Hamilton (University of Texas Health Science Center at Houston), Hua Xu (University of Texas Health Science Center at Houston), and Cui Tao (University of Texas Health Science Center at Houston)

Predicting Practice Setting Using Topic Modeling

Liwei Wang (Mayo Clinic), Yanshan Wang (Mayo Clinic), Feichen Shen (Mayo Clinic), Majid Rastegar-Mojarad (Mayo Clinic), and Hongfang Liu (Mayo Clinic)

Automatic Extraction of Major Osteoporotic Fractures from Radiology Reports using Natural Language Processing

Yanshan Wang (Mayo Clinic), Saeed Mehrabi (Mayo Clinic), Sunghwan Sohn (Mayo Clinic), Elizabeth Atkinson (Mayo Clinic), Shreyasee Amin (Mayo Clinic), and Hongfang Liu (Mayo Clinic)

Numerical Age Variations within Clinical Notes: The Potential Impact on De-Identification and Information Extraction

David Hanauer (University of Michigan), Qiaozhu Mei (University of Michigan), V.G. Vinod Vydiswaran (University of Michigan), Karandeep Singh (University of Michigan), Zach Landis-Lewis (University of Michigan), and Chunhua Weng (Columbia University)

Chinese Clinical Entity Recognition via Attention-Based CNN-LSTM-CRF

Zengjian Liu (Harbin Institute of Technology Shenzhen), Xiaolong Wang (Harbin Institute of Technology Shenzhen), Qingcai Chen (Harbin Institute of Technology Shenzhen), and Buzhou Tang (Harbin Institute of Technology Shenzhen)

Clinical Text Classification with Rule-based Features and Knowledge-guided Convolutional Neural Networks

Liang Yao (Northwestern University), Chengsheng Mao (Northwestern University), and Yuan Luo (Northwestern University)

Mining Adverse Reactions of Hypolipidemic Drugs from Chinese Adverse Event Reports

Yu Zhang (Institution of Medical Information, Peking Union Medical College, Chinese Academy of Medical Sciences), Xuwen Wang (Institution of Medical Information, Peking Union Medical College, Chinese Academy of Medical Sciences), Liu Shen (Institution of Medical Information, Peking Union Medical College, Chinese Academy of Medical Sciences), Zhen Hou (Institution of Medical Information, Peking Union Medical College, Chinese Academy of Medical Sciences), and Jiao Li (Institution of Medical Information, Peking Union Medical College, Chinese Academy of Medical Sciences)
A Comparison of Lifestyle Interventions for Alzheimer's Disease Extracted from Clinical Notes and Literature

Xin Zhou (Mayo Clinic), Hongfang Liu (Mayo Clinic), and Yanshan Wang (Mayo Clinic)

A Natural Language Processing Approach to Acquire Accurate Health Provider Directory Information

Matthew Cook (Center for Quantitative Medicine, University of Connecticut Health Center, Farmington, CT), Lixia Yao (Mayo Clinic, Rochester, MN), and Xiaoyan Wang (Center for Quantitative Medicine, University of Connecticut Health Center, Farmington, CT)

A Two-Site Survey of Medical Center Personnel's Willingness to Share Clinical Data for Research: Implications for Reproducible Health NLP Research

Chunhua Weng (Columbia University), Carol Friedman (Columbia University), Casey Rommel (University of Utah), and John Hurdle (University of Utah)

Parsing Clinical Text: How Good are the state-of-the-art Deep Learning Based Parsers?

Yaoyun Zhang (University of Texas Health Science Center at Houston), Firat Tiryaki (University of Texas Health Science Center at Houston), Min Jiang (University of Texas Health Science Center at Houston), and Hua Xu (University of Texas Health Science Center at Houston)

Towards Identifying Peer Expertise in Online Health Forums

Manoj Reddy (University of California, Los Angeles) and V.G.Vinod Vydisharwaran (University of Michigan)

Using Natural Language Processing to Extract Health-Related Causality from Twitter Messages

Son Doan (Kaiser Permanente), Elly W. Yang (Kaiser Permanente), Sameer Tilak (Kaiser Permanente), and Manabu Torii (Kaiser Permanente)

Portable Phenotyping System: A Portable Machine-Learning Approach to i2b2 Obesity Challenge

Himanshu Sharma (Cyberinfrastructure, University of Illinois at Chicago), Chengsheng Mao (Northwestern University), Yizhen Zhang (Northwestern University), Haleh Vatani (University of Illinois at Chicago), Liang Yao (Northwestern University), Yizhen Zhong (Northwestern University), Luke Rasmussen (Northwestern University), Guoqian Jiang (Biomedical Informatics Mayo Clinic), Jyotishman Pathak (Cornell University), and Yuan Luo (yuan.luo@northwestern.edu)
Problem List Clustering for Improved Patient-Based Disease Perception

Markus Kreuzthaler (Institute for Medical Informatics, Statistics and Documentation, Medical University of Graz, Austria; CBmed GmbH-Center for Biomarker Research in Medicine), Bastian Pfeifer (Institute for Medical Informatics, Statistics and Documentation, Medical University of Graz, Austria), José Antonio Vera Ramos (Institute for Medical Informatics, Statistics and Documentation, Medical University of Graz, Austria), Diether Kramer (KAGes - Steiermärkische Krankenanstaltengesellschaft m.b.H.), Victor Grogger (KAGes - Steiermärkische Krankenanstaltengesellschaft m.b.H.), Sylvia Bredenfeldt (KAGes - Steiermärkische Krankenanstaltengesellschaft m.b.H.), Markus Pedevilla (KAGes - Steiermärkische Krankenanstaltengesellschaft m.b.H.), Peter Krisper (Division of Nephrology and Dialysis, Department of Internal Medicine, Medical University of Graz, Austria), and Stefan Schulz (Institute for Medical Informatics, Statistics and Documentation, Medical University of Graz, Austria)
