Preface vii
Executive Committee ix
Committee Members x
Program Schedule xv
Sponsors, Vendors, and Exhibitors xix

Technical Session A

So You Bought Smart Meters - Now What? How to Manage the Data from and Maintenance of Smart Meters after an AMI deployment 3
Andrew Tickle (Eastern Maine Electric Cooperative)

Overcoming Cultural Challenges to Distribution Automation 8
Jesse Zellmer (Stanley Consultants Inc.)

Correlating Protective Relay Reports for System-Wide, Post-Event Analysis 13
Jared Bestebreur (Schweitzer Engineering Laboratories), Eric McCollum (Blue Ridge Electric Cooperative), John Town (Schweitzer Engineering Laboratories), and Andy Gould (Schweitzer Engineering Laboratories)

Considerations for Accepting Large-Scale Distributed Energy Resources on Distribution Systems 20
Keith Clapp (UC Synergetic), Cristin Reid (UC Synergetic), Neil Shepard (UC Synergetic), and Nikala Wickstrom (UC Synergetic)

Technical Session B

Impact of the Proposed IEEE 1584 Empirical Model in Comparison to Existing Arc-Flash Hazard Assessment Calculation Methods 27
Justin McCann (MidSouth Utility Consultants), Joseph Johnson (MidSouth Utility Consultants), and David Bobbitt (MidSouth Utility Consultants)

Distributed Energy Resources and Power Quality 37
Tom Chambers (Power System Engineering)

Grid Voltage Control Using Hybrid Control Technologies during Changing Weather Conditions 42
Davis Montenegro and Mobolaji Bello (Electric Power Research Institute)

Rate Considerations Related to Solar Distributed Generation 50
Adam L. Toth (Toth & Associates), Craig R. Woycheese (Toth & Associates), and Jeffrey B. Chapman (Toth & Associates)
A Renewable Solution Approach for Center Pivot Irrigation System 61
Vishwajit Roy (Texas Tech University Lubbock), Subrina Sultana Noureen (Texas Tech University Lubbock), Stephen Bayne (Texas Tech University Lubbock), Argenis Bilbao (Texas Tech University Lubbock), and Michael Giesselmann

The Wye-Delta Center Tapped Transformer Bank 67
W. H. Kersting (Consultant to Milsoft Utility Solutions) and Wayne Carr (Milsoft Utility Solutions)

Technical Session C

Distribution Automation Doesn’t have to be Automated to Produce Big Benefits 77
Jesse Zellmer (Stanley Consultants Inc.)

Solutions to Common Distribution Protection Challenges 81
Jeremy Blair (Schweitzer Engineering Laboratories), Greg Hataway (Schweitzer Engineering Laboratories), and Trevor Mattson (Schweitzer Engineering Laboratories)

Solving Power Quality Issues from Large Motor Starts Using Fast-Acting Capacitor Bank Assistance 92
James (Toby) Landes (Valquest Systems)

Effects of Natural Sunlight on Fiberglass Reinforced Polymers for Crossarms 101
Jiayi Jenny Zhu (GEOTEK, LLC) and Michael S. Schoenoff (GEOTEK, LLC)

Improvements in Rural Load Management by Electric Cooperatives through an Effective SCADA System, and Distribution Connected Generation 106
Srikanth Madala (Bluestem Energy Solutions Omaha), Adam Herink (Bluestem Energy Solutions Omaha), Matt Robinette (Bluestem Energy Solutions Omaha), Tim Ramaekers (Loup River Public Power District Columbus), Roy Palk (New Horizons Consulting Bradenton), and Dan Brewer (RBC Consulting Sarasota)
