TABLE OF CONTENTS

BOOK 1

SESSION 3: AR/VR I: DISPLAY SYSTEMS

3-1: Invited Paper: VR Standards and Guidelines ................................................................. 1
    Matthew S. Brennesholtz

3-5: RGB Superluminescent Diodes for AR Micro-Displays ............................................ 5
    Carlin Viere, Grace Lee, Nikhil Balram, Sang Hoon Jung, Joon Young Yang, Soo Young Yoon, In Byeong Kang

3-3: Distinguished Student Paper: Resolution Enhanced Light Field Near-to-Eye Display Using E-shifting Method with Birefringent Plate .............................................................. 9
    Kwei-Ee Peng, Jia-Yi Wu, Yi-Pai Huang, Hsin-Hsiang Lo, Chuan-Chung Chang, Fu-Ming Chuang

3-4: Doubling the Pixel Density of Near-eye Displays ....................................................... 13
    Tao Zhan, Yun-Han Lee, Shin-Tson Wu

3-5: RGB Superluminescent Diodes for AR Micro-Displays ............................................ 17
    Marco Rossetti, Antonio Castiglia, Marco Malinverni, Christian Mounir, Nicolai Matuschek, Marcus Duelk, Christian Vélez

SESSION 4: QUANTUM-DOT AND EMISSIVE MATERIALS SYNTHESIS

4-1: Invited Paper: Role of Phosphorus Oxidation in Controlling the Luminescent Properties of Indium Phosphide Quantum Dots ................................................................. 21
    Brandy M. Cossairt, Jennifer L. Stein, William M. Holden, Gerald T. Seidler

4-2: From the Synthesis of High-Quality InP-based Quantum Dots to the Development of Efficient QD Light-Emitting Diodes ............................................................... 25
    Armin Wedel, Yohan Kim, Benjamin Heyne, André Géfner

4-3: Solution Synthesis of High-Quality Indium-Nitride Quantum Dots ........................ 28
    Junki Nagakubo, Masaaki Hirakawa, Takahiro Sawada, Tsutomu Nishihashi, Kazumasa Horita, Hirohiko Murakami

4-4: High Stability Green Luminescent Microspheres based on Quantum Dot ........ 32
    Lei Yang, Rui Lu, Junjie Hao, Zhibin Yang, Dun Bian, Dan Wu, Kai Wang, Xiao Wei Sun

SESSION 5: INTEGRATED DRIVERS

5-1: Invited Paper: Low Power and Narrow Border UHD LTPS Notebook Display ................... 36
    Won-Ching Tsai, Hei-Io Wei Cheng, Kang-Cheung Chu, Shu-Hao Huang, Peng-Bo Yi, Song Yu Su

5-2: Gate Driver Circuits for Internal Compensation Type OLED Display with High Mobility Oxide TFT ................................................................. 40
    Dae Hwan Kim, Hyung Joon Koo, Min-Gu Kang, Kwang Il Chun, Uhyun Choi, Younghyun Ko, Jeyong Jeon, Chanyong Jeong, Yong Ho Jung, Jong Uk Bae, Kwon-Shik Park, Soo Young Yoon, In Byeong Kang

5-3: OLED Display Device Mounted with a Novel External Compensating Circuit ...... 44
    Kouhei Toyotaka, Kei Takahashi, Roh Yamamoto, Saitsu Kawashima, Daihi Nakamura, Nozomu Sugisawa, Masayoshi Dobashi, Chieko Misawa, Masaki Nagakura, Shunpei Yamazaki

SESSION 6: OLED MATERIALS I

6-1: Distinguished Paper and Invited Paper: Design Strategies for Materials Showing Thermally Activated Delayed Fluorescence and Beyond: Towards the Fourth-generation OLED Mechanism ......................................................... 48
    Hartmut Verrin, Larissa Matarranga-Popa, Shu-Wei Li, Rafal Czerwieniec

6-3: Distinguished Paper: Highly Efficient Fluorescent Blue Materials and Their Applications for Top Emission OLEDs ................................................................. 52
    Tetsuya Masuda, Tuki Nakano, Yoshiaki Takahashi, Hirokatsu Ito, Keiji Okinaka, Emiko Kambé, Yuichiro Kawamura, Hirotoshi Kuma

6-4: Highly Efficient Deep Blue Thermally Activated Delayed Fluorescent Emitter .... 56
    Dae Hyun Ahn, Ji Su Moon, Si Woon Kim, Hyuna Lee, Ja Young Lee, Jung Hyuk Kwon

SESSION 7: 3D HOLOGRAPHIC AND VOLUMETRIC DISPLAYS

7-1: Computer Generated Hologram Accelerated by using Hybrid Iterative Fourier Transform Algorithm (HIFTA) on Phase Modulator LCOS ................................................................. 60
    Shang-Ting Wu, Shang-Hao Huang, Huang-Ming Philip Chen, Yi-Pai Huang

7-2: High-contrast Encoding Method for Amplitude-only Computer Generated Hologram ................................................................. 64
    Jungkwun An, Bongyu Shin, Chang-Kun Lee, Chul-Sang Choi, Chorong Yoo, Greeryoung Sung, Heoyang Kim, Hoon Song, Joo-Eseung Chang, Jawon Seo, Kanghee Won, Sang-Hoon Lee, Sunil Kim, Wontae Seo, Yonggyu Kim, Young Kim, Yun-Tae Kim, Hong-Seok Lee, Duckyung Lee

7-3: A Large-scale Multi-projection Light-field Display based on Multi-view Sampling Calibration ................................................................. 68
    Lixia Ni, Zhenxing Li, Haiqian Li, Rui Wang, Xu Liu
SESSION 8: IMAGE-ARTIFACT CHARACTERIZATION

8-1: Standardization of Sparkle Measurement: A Solid Basis ................................................................. 72
   Michel E. Becker
8-2: Sparkle Characterization of Anti-glare Layers on Displays with a Grey Value Histogram Analysis ................................................................. 75
   Valeriano Ferreruza Paz, Stephan Kohlenbecker, Efstathios Persidis
8-3: An Evaluation Methodology for Display Retention Measurement .................................................. 80
   Jiman Kim, Kyuha Chung, Seongwoong Jung, James Langeheneg, Dongbue Lee, Byungseok Min

SESSION 9: EMERGING FLEXIBLE ELECTRONICS AND DISPLAYS

   Traoyoshi Sekitani, Shinsuke Yoshimoto, Tepppei Araki, Yuki Noda, Tatsuhumi Uemura
9-3: Flexible Mutual-capacitive Fingerprint Sensor with Hard and Flexible Overlaid Dielectric Layer for Biometrics Application ......................................................................................... 87
   Seung Hee Lee, Gu-Jin Jeon, Young Ho Kim, Il-Suk Kang, Hongchae Kim, Byeong-Soo Bae, Sang-Hee Ko Park
9-4: Low Leakage Organic Backplanes for High Pixel Density Optical Sensors ..................................... 90
   Mike Banach, Steve Markham, Rozzet Agaiby, Patrick Too

SESSION 10: AR/VR II: LIGHT-FIELD HMDS

10-1: Towards Varifocal Augmented Reality Displays using Deformable Beamsplitter Membranes ................................................................. 92
   David Dunn, Pranee Prachavathula, Qian Dong, Kaan Akhis, Henry Fuchs
10-2: A Deep Depth of Field Near Eye Light Field Displays Utilizing LC Lens and Dual-layer LCDs ................................................................. 96
   MaLi Liu, Haiying Li, Xu Liu
10-3: Design of a High-performance Optical See-through Light Field Head-mounted Display .................. 100
   Hejun Huang, Hong Huang
10-4: Stereoscopic / Light Field Hybrid Head-mounted Display by Using Time-multiplexing Method ................................................................. 104
   Chun-Ping Wang, Ping-Yen Chou, Eng-Sik Yee, Hsin-Hsueh Lee, Hsu-Sheng Shu, Tsung-Hong Wang, Li-Wei Shih, Jiun-Jou Lih, Jui-Yi Wu, Po-Yuans Hsieh, Yi-Pai Huang

SESSION 11: EMERGING QUANTUM-DOT APPLICATIONS

11-1: Bright Organic—Inorganic Perovskite Quantum Dots Fabricated With Simple Ultrasonic Treatment ................................................................. N/A
   Kaisu Yuan, Fushan Li, Peimou Lu, Yang Liu, HaiLong Hu, JinTang Lin, TzuiJiang Guo
11-2: Methylammonium Iodide (MAI) Enhanced, Solution Processed High-Performance Photodetector Based on Lead Sulfide Quantum Dots .................................................................................. 108
   HaoDong Tang, Jialin Zhong, Kai Wang, Xiao Wei Sun
11-4: Novel Switching Display using R/G/B Quantum Rods for Wide Color Gamut .................................. 112
   Byunggeol Kim, KyuNam Kim, Sungil Woo, KunYungkook Jang, Taeyang Lee, Wyyong Kim
11-5: Late-News Paper: Quantum Rods — Smart Choice for Future Display Generations ................................. 115
   Jan Niehaus

SESSION 12: OXIDE TFTS I

12-1: An Advanced LTPS TFT-LCD using Top-Gate Oxide TFT in Pixel .................................................. 117
   Masahiro Tada, Kazuhito Mochizuki, Takanori Tsumashima, Hisashi Tanaka, Tomoyo Yto, Hajime Watakebe, Akihiro Hanada, Ryotaro Kuma, Yoshihito Iishi
12-2: Development of Top-Gate Oxide TFTs for Plastic-Film LCDs .......................................................... 121
   Yohei Yamaguchi, Kazufumi Watanabe, Hiroshi Kawanago, Isao Suzuki
12-3: A 55 inch FFS-LCD Driven by Soluble-metal-oxide and Implementation in Production Line through BCE TFT Structure ........................................................................................................... 125
12-4: Late-News Paper: Reliability Improvement of IGZO and LTPS Hybrid TFTs Array Technology ................................................................. 128
   Jia-Hong Ye, Ching-Liang Huang, Ming-Yao Chen, Hao-Zhi Hong, Ju-Chun Luo, Kuo-Yu Huang, Chia-Tien Peng, Mau-Song Chen, Wei-Ming Huang, Yang-An Wu

SESSION 13: OLED MATERIALS II

   Hyoung Yun Oh, Ockhee Kim
   Tien-Lung Chiu, Jau-Jian Huang, Po-Cheng Tseng, Yu-Hsiang Huang, Huan-Jie Gau, Juan-Haw Lee, Man-Kit Leung
Yasuke Takeda, Naoaki Hashimoto, Kyosuke Takeda, Shihou Nomura, Shogo Uesaka, Tranonori Suzuki, Harue Nakashima, Satoshi Seo, Shunpei Yamazaki

13-4: Progress of Highly Efficient Blue TADF Emitter Materials Towards Mass Production ................................................................. 142
Thomas Baumann, Matthias Budziesky

SESSION 14: BACKLIGHT SYSTEMS

14-1: Patterned Holey Glass LGP Based Ultra-Thin 2D Local Dimming Backlight ......................................................................................... 145
Xiang-Dong Mi, Kirk R Allen, Dmitri V Kuksenkov, Joshua Tokar, Andrew J Sullivan, Steven S Rosenblum

14-2: Monolithic Glass Light-Guide Plate with Built-In Prism Structure for 1D Dimming Large-Area LCD ........................................................................... 149
Masaomita Ishikawa, Yauke Arai, Masahiro Inoue, Takashi Sasaki, K. Kalliantär

14-3: High Efficiency and Thin Backlight System Using an Advanced Light-guide with a Multi-prism Array .................................................. 153
Shugo Yagi, Hidekaza Miyata, Naoko Kondo, Takeshi Ishida

14-4: Optical Characteristics of Flexible Display Light Sources with Arbitrary Curvatures ................................................................. 157
K Kalliantär, Shuichi Mueda

SESSION 15: TOPICS IN DISPLAY MEASUREMENT

Dirk Hertel

15-2: Metrology for Field-of-Light Displays ........................................................................................................................................... 165
Abhishek Bichai, Thomas Burnett

15-3: New IC.Ca, and J.a.b Color Spaces to Analyze the Color Viewing-Angle Dependence of HDR and WCG Displays ......................................................................................... 169
Pierre Boher, Thierry Leroux, Pierre Blanc

Kyuya Choi, Sangyoon Seo, Byungseok Min

SESSION 16: EMERGING TECHNOLOGIES AND APPLICATIONS

16-1: Invited Paper: Holographic Volumetric 3D Displays .......................................................................................................................... 177
Javid Khan, Christopher Blackwell, Chi Can, Ian Underwood

Hanning Mai, Istvan Gyongy, Neale A. W. Dutton, Robert K. Henderson, Ian Underwood

16-3: Study on Enhancement of the Sound Quality by Improvement of Panel Vibration in OLED TV .......................................................................................................................... 185
Sangtae Lee, Kwanho Park, Kyuseongkun Jung, Changho Oh

16-4: Study of Anti-reflection Thin Polarizer for POLED Display .......................................................................................................................... 188
Jin Han, Won-Jong Che, Won-Ki Park, Dae-Heung Lee, Tae-Woon Ke, Joong-Hee Lee, Hong-Seok Heo, Joon-Gun Lee, Sung-Jin Kim, Sang-Gui Lee, Myung-Chul Jun, In-Byeong Kang

SESSION 17: AR/VR III: WAVEGUIDE OPTICS

17-1: A Flat-panel Holographic-optical-element System for Holographic Augmented Reality Display with a Beam Expander .......................................................................................................................... 192
Pengcheng Zhou, Yan Li, Shuxin Liu, Quanming Chen, Yanfeng Wang, Sida Li, Yueda Liu, Yikai Su

17-2: Shearing Bragg Gratings for Slim Mixed Reality ........................................................................................................................................... 196
Adrian Travis, James Clegg, Jonaso Jeong, Andreas Georgiou

17-3: Distinguished Paper: A Plastic Holographic Waveguide Combiner for Light-weight and Highly-transparent Augmented Reality Glasses .......................................................................................................................... 200
Takaji Yoshida, Katsuzato Tooyama, Yuichi Takai, Daizuke Tsukada, Tatsuyoshi Kameko, Nobuhiro Suzuki, Takafumi Anzai, Akira Yoshikai, Katsumi Akatsu, Akio Machida

17-4: DigiLens AR HUD Waveguide Technology ........................................................................................................................................... 204
Jonathan David Waldern, Aliastair John Grant, Milan Momcilo Popovich

17-5: High Efficiency Polarization Volume Grating for Waveguide-based AR Displays .......................................................................................................................... 208
Kun Yin, Yun-Han Lee, Shin-Youn Wu

SESSION 18: PEROVSKITE MATERIALS AND DEVICES

18-1: Invited Paper: Color Tunable, Flexible, and Efficient Light Emitting Diodes Composed of Metal Halide Perovskites .......................................................................................................................... 212
Barry P. Rand, Zhengguo Xiao, Lianfeng Zhao, Ross A. Kerner

18-2: Ultrapure Green Light-Emitting Diodes using Colloidal Quantum Wells of Hybrid Lead Halide Perovskites .......................................................................................................................... 214
Chih-Jen Shih, Sudhir Kumar, Jakub Jagielski
SESSION 24: FLEXIBLE BARRIER MATERIALS

24-1: Invited Paper: Foldable AMOLED with Advanced Gas Barrier by Solution Coating .................................................. 299
Yung-Hui Yeh, Shu-Tang Yeh, Kuan-Ting Chen, Glory Chen, Jia-Chong Ho, Jianglin Chen, Cheng-Chung Lee

24-2: Stress-minimized and Robust Thin Film Encapsulation based on Mechanically Improved Nanolamine and Organic Layers .......................................................... 302
Jeong Hyon Kwon, Youngmin Jeon, Kyung Cheol Choi

24-3: Hot-Melt-Type Face-Sealing Encapsulation for Flexible OLEDs .................................................................................. 306
Hiroyasu Iinuma, Naoki Murata, Kenichi Harai, Motofumi Kasahagi

24-4: Foldable AMOLED Display Utilizing Novel COE Structure .................................................................................. 310
Chuan X. Xu, Shi Shu, Jiang N. Lu, Guang C. Yuan, Qi Yao, Lei Wang, Zhi Q. Xu, Zhong Y. Sun

SESSION 25: DIGITAL SIGNAGE

25-1: Invited Paper: Progress in Active Pixel Technology for LED Video Walls .......................................................... 314
Douglas B. Dykaar, Rooshollah Samadzadeh Tarighat, Feng Chen, Graham Hill, John Vieth, Siva Sivaththaman

25-2: On the Support of Light Field and Holographic Video Display Technology .................................................. 318
Jon Karafin, Brendan Bevensee

25-3: HDR Solution; Dynamic Drive on LED Video Screens .................................................................................. 322

25-4: Visibility Evaluation of Direct-Bonded Signage Display for Outdoor Use .................................................. 324
Kenta Kasuya, Hiroshi Sakamoto, Hitoshi Tsuchima, Shinichi Uehara, Yukio Endo, Takashi Fukui

SESSION 26: OLED DEVICES I

26-1: Invited Paper: High Efficiency and High Stability Exciplex-Based OLEDs .......................................................... 328
Monima Sarma, Ken-Tsung Wong, Shun-Wei Liu, Wen-Yi Hung

26-2: Extremely High-Efficient OLED Achieving External Quantum Efficiency over 40% by Carrier Injection Layer with Super-Low Refractive Index .................................. 332
Takeyoshi Watanabe, Ryohi Yamaoka, Nohbuharu Ohtsawa, Atto Tomida, Satoshi Seo, Shunpei Yamazaki

26-3: Difference in Optical and Hole-injection Properties between Organic Material/Molybdenum Oxide Composite (OMOx) Layer and Hole-injection Layer with Organic Acceptor .................................................. 336
Harue Nakashima, Yusuke Takita, Naoaki Hashimoto, Shinya Nomura, Tsunenori Suzuki, Satoshi Seo, Shunpei Yamazaki

26-4: Computer-Aided Optimization of Multilayer OLED Devices .................................................................................. 340
Franz Symalla, Pascal Friederich, Simon Kaiser, Timo Strunk, Tobias Neumann, Wolfgang Wenzel

SESSION 27: ADVANCES IN AUTOMOTIVE DISPLAYS

27-1: Invited Paper: O LCD: Manufacturing Glass-free Vehicle Displays .................................................................................. 343
Vincent Barlier, Francesca Bottacchi, Josephine Socratus

27-2: Distinguished Paper: Active Polarizer Dimmable Lens System .................................................................................. 347
Paul Wendtmoor, Quin Sharif, Brian Hayden, Eliyah Auger, Jon Bay

27-3: High Performance Fringe Field Switching Mode Liquid Crystal Display with Photo-alignment Technology for Vehicular Application .................................................. 351
Masanobu Mizusaki, Hiroshi Tsuchiya, Kiyoshi Minoura, Katsuya Ogawa, Koshiro Tanikê, Yoshiaki Fujihara

27-4: Material and Design Optimization to Improve Color Performance of Automobile Displays .................................................. N/A
Bo Shi, Xiongcan Zuo, Rui Xue, Kuo-chang Yen, Xiaoqiang Qi, Junrui Zhang, Ni Jiang, Yuanming Feng

SESSION 28: INTEGRATED GATE DRIVERS

28-1: A Robust Bidirectional Gate Driver on Array with Oxide TFTs .................................................................................. 355
Zhichong Wang, Haoliang Zheng, Seungwoo Han, Guangliang Shang, Lijun Yuan, Mingfu Han, Xing Yao, Dawei Shi, Yunsik Im, Xiaojing Qi, Junrui Zhang, Ni Jiang, Yuanming Feng

28-2: A Novel OLED Display Panel with High-Reliability Integrated Gate Driver Circuit using IGZO TFTs for Large-Sized UHD TVs .......................................................... 358
Hong-Jae Shin, Shini Ji, Takaaki Ishii, Ben Samadzadeh, Min-Kyu Chang, Jae-Yi Choi, Seong-Ho Yun, Hee-Whan Park, Jin-Mok Kim, Han-Seop Kim, Chang-Ho Oh

28-3: World’s First 85-in. 120Hz-Driven 8K x 4K BCE IGZO GOA VA-LCD .................................................................................. 362
Ying-Chun Zhao, Feng Zhou, Chao Yang, Chao-Yi Chiu, Lin Ray, Long-Qiang Shi, Shi-Min Gu, Zeng-Jie Kong, Tong-Shuai Deng, Feng-Cheng Xu, Peng Fu
SESSION 29: NEW ALIGNMENT TECHNOLOGIES I

29-1: Invited Paper: Novel Alignment Layer, Insulation Materials and Color Photo Lithography Materials for Advanced LCD
Hiroaki Tokuhisa

29-2: Advanced Photo-alignment Material for Both Photo and Rubbing-alignment Methods

29-3: Highly Versatile and Stable Photoalignment Process for AMLCDs
Colin McGinty, Junren Wang, Valerie Finnemeyer, Robert Reich, Harry Clark, Shaun Berry, Philip Bos

29-4: PI-less IPS/FFS Liquid Crystal Displays Utilizing Reactive LC with Cinnamate Moiety
Rui He, Pushun Wen, Chang Suk Lee, Yuki Kim, Shin-Woong Kang, Seung Hee Lee, Myong-Hoon Lee

SESSION 30: INPUT TECHNOLOGIES FOR AR/VR

30-1: Cyclopean Eye based Binocular Orientation in Virtual Reality
Zhenping Xia, El Peli

30-2: Implementation of a Real-time Eye Gaze Tracking Solution for ASIC Based on VR Display
Quan Yang, Gaoming Sun, Yang Gao, Hongzhen Xue

30-3: Ultra-High-Speed 6DOF SLAM using Optical Compression
Kloni Lieberman, Daniel Greenspan, Ouriel Moses, Gilad Barach

30-4: Semantic Simultaneous Localization and Mapping for Augmented Reality
Bing Yu, Yang Li, Chao Ping Chen, Nizamuddin Maitlo, Juai Chen, Wenbo Zhang, Lantian Mi

SESSION 31: FLEXIBLE MATERIALS AND SUBSTRATES

31-1: Invited Paper: Green Printing Technology for Manufacturing Functional Devices
Yanlin Song, Xiaotian Hu

31-2: Invited Paper: Silver Nanowire Transparent Conductive Films for Flexible/Foldable Devices
Haixia Dai, Michael Spaid

31-4: Ultra-Thin Chemically Strengthened Cover Glass with High Impact Failure Resistance for Foldable Devices
Yuusuke Fujisawa, Izuru Kashima, Shunsaku Akiba

SESSION 32: EMISSIVE DISPLAY MATERIALS

32-1: On-chip Red Quantum Dots in White LEDs for General Illumination
Daniel Estrada, Ken Shimizu, Marcel Bohmer, Sumit Gangwal, Thomas Diedicher, Stefan Grabowski, Greg Tashjian, Danielle Chamberlin, Oleg B. Shchekin, Jyoti Bhardwaj

32-4: Potential Red Phosphors for LEDs: Replacing Eu³⁺ Activators in LiEu(WO₄)₂ with Al³⁺ Cations
Jack Silver, Mohammed. M. Fatmidddin, George R. Fern, Terry G. Ireland, Roni Stone

SESSION 33: OLED DEVICES II

33-1: Invited Paper: Exploring the Formation and Growth of Organic Semiconductors with mm-Scale Grains
Barry P. Rand, Michael A. Fusella, Komron Shayanfar, Jordan T. Dull

33-2: Flexible OLED Panels with Pixilated Graphene Anode
Jin-Wook Shin, Hyoung-Chul Cho, Byoung-Hwa Kwon, Jun-Han Han, Kang Me Lee, Jong-Heon Yang, Chun-Won Byun, Jeong-Jik Lee, Jae Hyun Moon, Nam Sang Cho

33-3: Systematic Optimization for Achieving Indistinguishable Color Shift of RGB OLED Displays
Guanyun Tan, Jian-Hao Lu, Sheng-Chieh Lin, Baidong Zhu, Sang-Hun Choi, Shin-Tson Wu

33-4: Enhanced Adhesion and Stability of Silver Nanowire Transparent Electrode for OLED by Compositing with a Biocompatible Polymer without High Temperature Treatment
Lu Lian, Dan Dong, Donggu Feng, Guofeng He

SESSION 34: AUTOMOTIVE DISPLAY SYSTEMS AND FUNCTIONAL SAFETY

34-1: Invited Paper: Performance Optimization for Display Solutions by Smart System Integration
Kai Hohmann, Markus Weber

34-2: The Benefit of Extensive Testing for the Development of Automotive Display and Head-up Display Components
Pascal Booher, Sebastian Koester, David Kuhn, Tobias Renz, Andreas Wittko
SESSION 35: OLED DRIVING AND COMPENSATION

35-1: Strategy for Developing an Ultra-High-Luminance AMOLED Display ................................................. 433
Shingo Eguchi, Daiki Nakamura, Kei Katunuki, Susumu Kawashima, Yasuke Takeda, Satoshi Shio, Masayoshi Dobashi, Chieko
Mitsuiwa, Masataka Nakada, Shunpei Yamazaki

35-2: 40x Current Variation Reduction Enabled by an External VT-Compensation Scheme for AMOLED Displays
using a 3T2C-Pixel Circuit with Dual-Gate TFTs ................................................................................................................................. 437
Lynn Verschuuren, Marc Amey, Florian De Roose, Soeren Steudel, Jan-Laurens Steen, Gerwin Gelinck, Auke Jisk Kronemeijer,
Chien-Hai Huang, Chi-Chang Tsai, Yen-Yu Huang, Mung Hua Yeh, Paul Heremans, Kris Myhy, Win Dehaene, Jan Genoe

Artifacts ................................................................................................................................................................................................. 441
Xingqiong Jiang, Chihao Xu

35-4: A Compensation Algorithm for Degradation in AMOLED Displays ................................................................. 445
Jaechin Kim, Junhan Ko, Jongwoong Park, Geunyoung Jeong, Hosuk Maeng, Seungho Park, Wonjun Choe

SESSION 36: NEW ALIGNMENT TECHNOLOGIES II

36-1: Invited Paper: The Evolution of the Vertically Aligned Liquid Crystal Display ............................................. 449
Edward Alan Plummer, Melanie Klase-Meemmer, Rocco Fortte, Helmut Haensel, Graziano Archetti

36-2: Invited Paper: Self-Alignment of Liquid Crystal for Multi-Domain Liquid-Crystal Display ................................. 453
Song Lan, Xingya Chen, Hongyu Sun, Wei Lu, Te-Jen Tseng, Chuang-Ching Hoeh, Hsiao-Hsien Chen, Hsien-Chien Lin, Yang
Hai Lee

Masanobu Mizusaki, Hristi Tschiyaia, Tomonori Itou, Kiyoshi Minoura

36-4: The Correlation of Liquid Crystal Alignment and the Amount of Photo-Fragmented Surface Morphology ............ 459
In Hye Lee, Jong Sun Choi, Dong Myoung Shin

SESSION 37: ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING (AI/ML)

37-1: Invited Paper: 3D Computer Vision Based on Machine Learning with Deep Neural Networks .................... 463
Kaias Vodrahalli, Achintya K. Bhownik

Tao Zhang, Achintya K. Bhownik

Applications ................................................................................................................................................................................................. 471
Harsh Menon, Aashik Ramachandrappa, Jake Kesinger

37-4: Invited Paper: Intelligent Virtual-Reality Head-Mounted Displays with Brain Monitoring and Visual
Function Assessment .................................................................................................................................................................................... 475
John K. Zuo, Yu-Yi Chien, Fang-Cheng Lin, Yu-Te Wang, Masaki Nakanishi, Felipe A. Medeiros, Tzyy-Ping Jung, Yi-Pai Huang

SESSION 38: STRETCHABLE AND PRINTABLE ELECTRONICS/DISPLAYS

38-1: Invited Paper: Stretchable Oxide TFTs with PI/PDMS Substrate .......................................................................... 479
Suhui Lee, Xiuling Li, Chanju Park, Jinh Jung

Yongtaek Hong, Byeongmoon Lee, Junghwan Byun, Eunho Oh, Jaeyoung Yoon, Hyunjong Kim, Seongdak Choi, Hyun Cho

38-3: Clothing-shaped Organic Light-emitting Devices (OLEDs) for Wearable Displays ........................................ 486
Seunghyeop Choi, Seonil Kwon, Myung Sub Lim, Yongmin Jeon, Hyuncheol Kim, Yong Min Kim, Jeong Hyun Kim, Kyung Cheol
Choi

SESSION 39: NOVEL TFT APPLICATIONS

39-2: Highly Sensitive a-Si:H PIN Photodiode Gated LTPS TFT for Optical In-Display Fingerprint Identification ........ 490
Xiaodong Zhou, Meng Zhang, Yitong Xu, Wei Zhou, Kai Wang, Arockia Nathan, Man Wong, Hoi Sing Kwok, Hai Ou, Jun Chen,
Shaohui Deng, Ningzheng Xu

39-3: Printed Organic Photodetector Arrays and their use in Palmprint Scanners .......................................................... 494
Hyde Akkerman, Bart Peeters, Albert Breemen, Sanjosh Shankumagam, Daniel Vorderas, Jan-Laurens Steen, Auke Jisk
Kronemeier, Pawel Malinowski, Florian De Roose, David Chyex, Jan Genoe, Win Dehaene, Paul Heremans, Gerwin Gelinck

39-4: TFT Integrated Microelectromechanical Shutter for Display Application .............................................................. 498
Sheikh Abdullah Al Nasayer, Patrick Schalberger, Holger Baur, Norbert Fruehauf

SESSION 40: OLED AR/VR

40-1: Invited Paper: Next Generation Virtual Reality Displays: Challenges and Opportunities .............................. 502
Kanjal Puri, Jiao Zhuang, Kim Pullister, Jun Jiang, Marshall Smith

40-2: Invited Paper: Microdisplays for Augmented and Virtual Reality ............................................................................ 506
Gunther Haas
SESSION 41: QUANTUM-DOT LCDS

41-1: Tri-stable Cholesteric Liquid Crystal Smart Window ................................................................. 543

41-2: Structured PDLCS for Controlling LCD Viewing-Angle .............................................................. 546
Takahiro Ishinabe, Yuya Horii, Shoji Ueda, Hideaki Fujikake

41-3: Distinguished Paper: Brilliant Cosmetic Film for Ambient Displays, with Cholesteric Liquid Crystal ................................................................. 550
Makoto Ishiguro, Nobuhiko Ichihara, Yuiiro Yanai, Michio Nagai, Katsuyuki Takada, Yoichi Suga, Yoji Ito

41-4: Self-Shading with Optically- and Thermally-Switchable Liquid Crystals .................................... 554
Seung-Won Oh, Sang-Hyeok Kim, Jong-Min Bae, Tae-Hoon Yoon

SID 2018 Executive and Program Committee .................................................................................. 557

SID 2018 Speaker Contact Information .......................................................................................... 557

SESSION 42: NOVEL DISPLAY CIRCUITS

42-1: A Promising Strategy of Low-Power Circuit Design for Integrated Display Driver Using Charge-Trap Memory and Oxide Thin Film Transistors ........................................................................ 528
Chuan-Wu Byun, Yeow-Myoung Kim, Byung-Chang Yu, Jong-Heon Yang, Chi-Sun Huang, So-Jung Kim, Seung-Hyuck Lee, Seung-Woo Lee, Nam Sung Cho, Jeong-Il Lee, Sung-Min Yoon

Yuiichiro Itoby, Ryo Shirai, Shoji Ueda, Taichi Fukamachi, Mayu Yamashita, Takao Ono

42-3: Invited Paper: A 4Gbps/lane Column Driver for 8K UHD 120Hz Display Larger than 85-inches ........ 536
Hyun-Wook Lim, Dong-Hoon Baek, Tae-Ho Lee, Eun-Young Jin, Kyoungho Kim, Jin-Ho Kim, Young-Min Choi, Bup-Hee Kim, Jun-Hyung Seong, Seong-Jong Yoo, Tae-Yong Kim, Hyung-Sik Cho, Joo-Youl Lee, Jin-Soo Kang

42-4: A Novel De-Mux and 120Hz Driving Technology for High Resolution OLED Displays ............... 540
Soondong Kim, Junwook Yang, Changhoon Yoon, Eungyoung Choe, Juhee Moon, Gyunseo Park, Yeonhong Kim, Myungho Lee, Bonghyun Yu

SESSION 43: SMART WINDOWS WITH LC TECHNOLOGY

43-1: Novel Thinnest Free Form QD Film with Honeycomb Structure ................................................. 518
Yuge Huang, Ziqian He, Shin-Tson Wu

43-2: Distinguished Paper: Motion-blur-free LCD for High Resolution Virtual Reality Displays ............ 577
Fangwang Gou, Haiwei Chen, Ming-Chun Li, Seok-Lyul Lee, Shin-Tson Wu

43-3: Large Area Multi-Layer Liquid Crystal Phase Modulators Enabled by Two-Photon Polymerization ................................................................................ 585
Daniel Franklin, Yun-Han Lee, Ziqian He, Debasish Chanda, Shin-Tson Wu

Ernest Lee, Ravi Tangedala, Austin Smith, Amanda Carpenter, Charlie Hotz, Hee Jae Kim, Jeff Yurek, Takayuki Miki, Sunaoo Yoshihara, Takeo Kizaki, Aya Ishizuka, Hurgo Kyoto
SESSION 46: ULTRA-HIGH RESOLUTION I

46-1: Invited Paper: Large-area Ultra-high Density 5.36” 10Ks6K 2250 ppi Display .................................................................607
  Hyeon Sup Lee, Sanghee Jung, Hyungil Jeon, Byang-Seok Choi, Seong Heon Cho, Won Tae Kim, Keunkyu Song, Hye Yong Chu,
  Sungchul Kim, Sang-Chan Jo, Jinoh Kwag

46-2: Invited Paper: Ultimate Resolution Active Matrix Display with Oxide TFT Backplanes for Electronic
  Holographic Display .................................................................................................................................610
  Chi-Sun Hwang, Yong-Hae Kim, Jong-Heon Yang, Ji Hun Choi, Jae-Eun Pi, Gi Heon Kim, Chi-Young Hwang, Kyunghhee Choi,
  Hee-Ok Kim, Won-Jae Lee, Sang-Hee Ko Park, Jiwonsoong Kim

46-3: Distinguished Paper: 4032ppi High-Resolution OLED Microdisplay ............................................................................613
  Takuma Fujii, Chieki Kon, Yosuke Motoyama, Kan Shimizu, Tsutomu Shimayama, Takashi Yamazaki, Takayoshi Kato, Seijiro
  Sakai, Koichi Hashikaki, Koji Tanaka, Yasuhiro Nakano

46-4: 513-ppi Hybrid Display with Stacked Transistors .................................................................................................................617
  Hidenori Mori, Yukinori Shina, Yasuharu Hosaka, Kenichi Okazaki, Koji Kusunoki, Hideaki Shishido, Ryo Hatsumi, Shuhir
  Yoshitomi, Shunpei Yamazaki

SESSION 47: OLED PROCESSES

47-2: Invited Paper: Highly Transparent AMOLED for Augmented Reality Applications ........................................................621

47-3: High Efficiency and High PPI AMOLED with Cavity Tuned by Inkjet Printed Hole Injection Layer ..................................624
  Meng-Ting Lee, Kun-Ta Lu, Yi-Hong Chen, Kuan-Heng Lin, Wen-Pin Chen, Tsa-Wei Chen, Kuo-Kuang Chen, Hsueh-Hsing Lu,
  Yu-Hein Lin, Daniel Walker, Matthew Creully, Gaëlle Bealle, Hsing-Ju Wang, Hsin-Rong Tweng, Mark Goulding, Edgar Boehm,
  Herwig Buchholz

47-4: Effects of Fine-Metal-Mask Wrinkling on OLED Patterning Defects ..................................................................................627
  Haibin Zhu, Weijie Wang, Fengjie Zhang, Xia Jin, Xiaohu Li, Xincing Wang, Bin Zhang, Guangcai Yuan

SESSION 48: E-PAPER AND REFLECTIVE DISPLAYS

48-2: Electronic Paper 2.0: Frustrated eTIR as a Path to Color and Video ....................................................................................630
  Robert Fleming, Sri Peruvemba, Robert Holman, Scott Ferguson, Bram Sadlik, Thomas Johansson

  Displays Using Saturation-Based Tone-Mapping Method .........................................................................................633
  Yi-Wen Chen, Zong Qin, Fang-Cheng Lin, Han-Feng D. Shieh, Yi-Pai Huang

48-4: Colorful Active-matrix Reflective Display by Using Proprietary Surface Anchoring Liquid Crystal and High
  Performance Front-light Module ...........................................................................................................................637
  Chien-Hua Chen, Tai-Lu Lin, Jan-Tien Lien

SESSION 49: IMAGE PROCESSING

49-1: Visual Quality Improvement of Scattering-Mode Reflective Display Utilizing Color-Purifying and
  Sharpening Algorithms .................................................................................................................................................640
  Chia-Cheng Liao, Jan-Tian Lian, Jang-Jeng Liang

49-2: Hierarchical Logo Detection and Image Processing Algorithm for Preventing OLED Image Sticking .........................643
  Euiyol Oh, Jeisung Lee, Jinyoung Oh, Jhooon Park, Jongsoang Baek, Yoonsik Choe

49-3: PMNet: Passive Matrix Electrochromic Display Driving Scheme Using Neural Networks .............................................647
  Seok-Jeong Song, Ki-Hyuk Seol, Hyoungik Nam

49-4: A Low-power Reflective LCD System with Adaptive Compression Algorithm of Grey Scale ........................................650
  Feng Long, Yu Zhang, Zongye He, Lingyu Sun, Xiuyuan Chen, Dkyoon, Ming Chen, Shao Li, Jianquang Yang, Liang Zhang,
  Zhenghua Lu, Yuxuan Chen, Pin Xiao, Fei Liang, Tingxiao Hou, Liyu Fang, Jingjun Du

SESSION 50: TFT MANUFACTURING TRENDS

50-1: Invited Paper: Integration of Key Components into the Panel: Adding Value and Increasing Performance of
  FPDs ...........................................................................................................................................................................653
  Charles A. Annis
50-2: Accelerating Advanced Display Fab Yield Ramp with Innovative Autonomous Inline Electron Beam Review System ........................................................................................................................................ 656
Soohun Choi, Xizhuo Zhang, Shengli Wu, Changjun Wan, Ben Han, Wei Liu, Gang Wu, Kaiyao Du, Sheng Miao, Zhihui Han, Daobin Lin, Bernhard Mueller, Lingjia Li, Lin Meng, Yinqiao Feng, Junyu Sun, Kalpreet Singh Virdi, Volker Daiker, Bernhard Schueller, Robert Trauner, Peter Staffansson, Ludwig Ledl, Max McDadiel, Peter Nunan

50-3: Formation of Source and Drain Regions in Top-Gate Self-Aligned Oxide Semiconductor Field-Effect Transistor ..................................................................................................................................... 660
Kenichi Okazaki, Toshimitsu Ohonai, Yukitomi Shimizu, Seiji Yasumoto, Junichi Koezuka, Noritaka Ishihara, Yosichi Kurosawa, Shunpei Yamazaki

50-4: Novel Large-size Process for Organic Thin-Film Transistor Fabrication .................................................. 664
Chia-Hung Tsai, Kuan-Hsien Liu, An-Ju Wu, Shih-Hua Hsu, Wei-Han Chen, Chun-Hao Tu, Chiu-Yu Liu, Ming-Feng Chiang, Yu-Chieh Lin

SESSION 51: FAST-SWITCHING LCDS FOR AR/VR II

51-1: Optimal Fast-Response LCD for High-Definition Virtual Reality Head Mounted Display ............................. 667
Toshiharu Matsubara, Kenji Seki, Shunichi Kimura, Yasushi Iwakabe, Tatsuya You, Yoshihiro Watanabe, Shinsuke Komura, Makoto Uchida, Takashi Nakamura

51-2: Development of In-Plane Super-Fast Response (ip-SFR) LCD for VR-HMD ...................................................... 671
Tatsuki Katayama, Shinpei Higashida, Atsuko Kanashima, Kazutaka Hanaoka, Hidefumi Yoshida, Shinji Shimada

51-3: High-birefringence Liquid Crystal for Phase-only Spatial Light Modulators .............................................. 674
Ran Chen, Yuge Huang, Jian Li, Minggang Hu, Juanli Li, Shin-Tson Wu, Zhongwei An

Chang-Hung Li, Siu-Hui Lu, Szu-Yen Lin, Tung-Ying Hsieh, Ko-Shun Wang, Wei-Hung Kuo

51-5: Late-News Paper: Fast Motion Picture Response Color Filter LCOS for Wearable Applications ..................... 681
Yuet-Wing Li, Wen-Hua Chen, Chi-Wen Lin, Kuan-Hsu Fan-Chiang, Hung-Chien Kuo, Hsien-Chang Tsai

SESSION 52: MICROLED DEVICE PROCESSING AND HETERO-INTEGRATION

52-1: Invited Paper: Nanostructures on Silicon to Solve the Active Display Paradigms ............................................. 684
Philippe Gillet, Ivan-Christophe Robin

52-3: Invited Paper: Combining Engineered EPI Growth Substrate Materials with Novel Test and Mass-Transfer Equipment to Enable MicroLED Mass-Production .................................................. 688
François J. Henley

52-4: Laser-Enabled Extremely-High Rate Technology for µLED Assembly ......................................................... 692
Val R. Marinov

52-5: Late-News Paper: The Future of MicroLED Displays using Next-generation Technologies ............................... 696
Keith Strickland

SESSION 53: ULTRA-HIGH RESOLUTION II

53-1: Distinguished Student Paper: A Novel Low Power Gate Driver Architecture for Large 8K 120Hz LCD Display Employing IGZO Technology .................................................. 698
Yasuaki Iwase, Akira Tagawa, Yohei Takeuchi, Takaya Watanabe, Satoshi Horiuchi, Yoshihiro Asai, Kaoru Yamamoto, Tohru Matsuo

53-2: Development of Cu BACE MicroLED IGZO TFT for High-ppi 85-89 8K x 4K 120Hz GOA LCD ..................... 702
Shi-Min Ge, Shan Li, Shu-Jih Chen, Xiao Wang, Yan-Hong Meng, Wei Shi, Wei Wu, Feng Zhu, Yue Wu, Hong-Tai Li, Jing-Jing Liu, M.Jiang, Long-Qiang Shi, Feng Zhao, Huyan-Sik Seo, Chang-Yi Chiu, Chi-Ya Vu, Tatsuki Takeyoshi

53-3: Distinguished Paper: IGZO-TFT Technology for Large-screen 8K Display .................................................. 706
Yoshiki Hara, Tetsuo Kitakawa, Hideki Kitagawa, Junichi Mominaga, Hiroyuki Ohgami, Hajime Imai, Tohru Daitoh, Takaya Matsuo

SESSION 54: FLEXIBLE OLED DISPLAYS

54-1: Distinguished Paper: World 1st Large Size 77-inch Transparent Flexible OLED Display .................................. 710
Chan Il Park, Myun Seong, Mr. Ae Kim, Dong Kim, Hyunja Jung, Mingu Cho, Sang Hoon Lee, HyoKang Lee, Sungsoon Min, Jaehyeong Kim, Mineok Kim, Jong-Hyun Park, Seoyoul Kwon, Binn Kim, Se-Jane Kim, Weonseok Park, Joong-Young Yang, Sooyoung Yoon, Inbyeong Kang

54-2: Flexible a-IGZO TFT for Large Sized OLED TV ....................................................................................... 714
Won Beom You, Chanki Ha, Jinwoo Kwon, Jeewon Jeon, Heungso Lee, Seooual Kwon, Weonseok Park, Rongchul Kim, Wooseup Shin, Jongwoon Kim

54-3: Distinguished Paper: High Temperature Glass Barriers for Foldable AMOLED Displays ................................. 717
Hylke Akkerman, Raghu Pendyala, Pradeep Panditha, Ahmed Salem, Jie Shen, Peter Weijer, Piet Bouten, Suzanne Winter, Karin Diesen-Tempeliers, Gerard Haan, Soeren Steudel, Ching-Yu Huang, Ming-Hasiang Lai, Yen-Tu Huang, Ming-Hua Teh, Auke Jisk Kronemeijer, Paul Poole, Gerwin Gelincck
SESSION 55: AUTOMOTIVE HEAD-UP DISPLAYS

55-1: Invited Paper: Superiority of Monocular Augmented Reality when Continuous Viewing is Required ........................................... 721
Akiko Kato, Kazumori Kimura, Takashiki Kimura, Kazumitsu Shinohara, Takashi Satoh, Haruhiko Okamura, Ake Hotta

55-2: Invited Paper: Volume Optimized and Mirror-less Holographic Waveguide Augmented Reality Head-up Display ................................................................. 725
Pablo Richter, Wolf Spiegel, Jonathan Waldern

55-3: Holographic Grating to Improve the Efficiency of Windshield HUD ............................................................................................... 729
Philippe Coni, Jean-Luc Bardon, Natacha Damamme, Seth Coe-Sullivan, Fedor J. Dimov

SESSION 56: NOVEL DISPLAY TECHNOLOGIES

56-1: Invited Paper: Volumetric Displays using Holographic Laser Drawing ........................................................................................................ 733
Yoshiro Hayasaka, Kose Kamagai

56-2: Seamless Scalable Large Format Display ................................................................................................................................. 737
Roger A. Hajjar

56-3: New Process to Fabricate Hybrid Display ................................................................................................................................. 740
Shuhei Yoshibori, Ryo Hatsumi, Shingo Eguchi, Tomoya Aoyama, Hisao Ikeda, Takaaki Nagata, Kazunori Watanabe, Masayoshi Dobashi, Chieko Misawa, Masataka Nakada, Masahiro Katayama, Hiroki Adachi, Shunpei Yamazaki

56-4: Key Technologies for Assembling Kawara-type Multidisplays ........................................................................................................ 744
Yasutaka Nishihara, Daisuke Nakamura, Shingo Eguchi, Naozumi Sagisawa, Tomoya Aoyama, Yui Suetatsu, Hitomi Sato, Kouhei Toyotaka, Satoshi Kawashima, Masayoshi Dobashi, Chieko Misawa, Masataka Nakada, Shunpei Yamazaki

SESSION 57: ADVANCE TFT MANUFACTURING PROCESSES

57-1: Invited Paper: Application of Rapid Thermal Annealing Process to the Display Technology ............................................................... 748
Sang-Hee Ko Park, Sanghwan Ji, Pi-seong Jeong, Yanyong Nam, Jong-Heon Yang, Chi-Sun Hwang

57-2: Scalable Crystallization of a-Si Film on a Glass Substrate by Using a Blue Laser .................................................................................. 751

57-3: Folded Pixel Circuit Design in Grain-Boundary Free (100) Oriented LTPS Stripes Fabricated by Selective CW-Laser Lateral Crystallization .................................................................................. 755
Nobuo Sasaki, Muhammad Arif, Yoshikazu Uraoka

57-4: Experimental Demonstration of Quasi-CW SBC of Si Films Using Ultra-High-Frequency UV Fiber Lasers ........................................................................ 759
Ruo-shing Song, Insung Choi, Wenkai Pan, Miao Yu, James S. Im

57-5: Invited Paper: Excimer Laser Annealing and Spot-Beam Crystallization of Si Films for Advanced Displays ................................................... 762
James S. Im, Ruo-shing Song, Vernon K. Wong, Wenkai Pan, Insung Choi, Miao Yu

SESSION 58: HIGH-RESOLUTION LCDs FOR AR/VR

58-1: Invited Paper: High Resolution IPS-LCDs Fabricated with Transparent Polyimide Substrates ............................................................... 764
Shinsichtiro Oku, Youtate Hiyato, Lu Jin, Yohsei Yamaguchi, Genki Asozu, Eri Higano, Toshnyuda Higano, Shinsite Komuzara

58-2: Invited Paper: High-Performance Displays for Wearable and HUD Applications ...................................................................................... 768
Akheesh K. Abelluck, Andrew Iversen, Howard Guetz, Edmund Passon

58-3: Sub-KHz 4000-PPi LCOS Phase Modulator for Holographic Displays ................................................................................................. 772
Jhau-Fu Yang, Huang-Ming Philip Chen, Yuge Huang, Shin-Tson Wu, Cynthia Hsu, Lily Ting, Ron Hua

58-4: Distinguished Student Paper: Active Matrix Field Sequential Color Electrically Suppressed Helix Ferroelectric Liquid Crystal for High Resolution Displays ........................................................................ 776
Liangyu Shi, Abhishek Kumar Srivastava, Alex Cheung, Tz, Kin Ho, Chao-Ting Hsieh, Ching-Lung Hung, Ching-Hsiang Lin, Ching-Huan Lin, Nito Sagisawa, Chia-Wei Kuo, Vladimir, G. Chigrinov, Hoi Sing Kung

SESSION 59: MICROLED MICRODISPLAYS

Chih-Hao Lin, Chun-Fu Lee, Akta Verma, Huang-Yu Lin, Chien-Chung Lin, Chin-Wei Sher, Hao-Chung Kao

59-2: Invited Paper: Ultra-Fine Pitch Thin-Film Micro LED Display for Indoor Applications ................................................................................... 782
Chien-Chung Lin, Yen-Hsiang Fang, Ming-Jer Kao, Ping-Kai Huang, Feng-Pin Chang, Li-Chang Yang, Chih-J Wu

59-3: Distinguished Paper: Wafer Scale Hybrid Monolithic Integration of Si-based IC and III-V Epilayers - a Mass Manufacturable Approach for Active Matrix micro-LED Displays ........................................................................ 786
Lei Zhang, Fang Gu, Wing Cheung Chong, Yijie Chen, Yuan-Tsun Zhu, Qinhong Li

Anis Daami, François Olivier, Ludovic Dupré, Frantcy Henry, François Templier
SESSION 60: FLEXIBLE TFTS

60-2: Direct Patternning of Fine Electrodes by Wettability Control of a Novel Photocrosslinkable Polymer Insulator for Solution-based OTFTs .......................................................... 794
Shinya Oka, Tomohide Kaminaga, Ken Akai, Shoki Takeuchi, Hiroshi Watanabe, Hiroshi Yamakawa, Masao Tanahashi

60-3: High-Performance MoS2 Thin-Film Transistors for Flexible OLED display .............................................. 797
Youngjin Woo, Woonggi Hong, Sang Yoon Yang, Taeyoung Kang, Sung-Yool Choi

60-4: Mechanically Robust High-Performance Flexible Oxide TFTs with Imbedded Buried CNT Electrode for Bendable Displays .......................................................... 800
Mohammad Masum Billah, Min Sang Park, Jewel Kumari Saha, Md Mehedi Hasan, Ji-Ung Han, Mungyu Hwang, Jin Jung

SESSION 61: NOVEL OLEDS

61-1: Form Birefringence-Based Achromatic Quarter-Wave Film for Anti-Reflection of OLEDs .......................... 804
Masanari Goto, Goro Suzuki, Shigetaka Toriyama

61-2: Weakening Micro-Cavity Effects in White Top-Emitting WOLEDs with Semitransparent Metal Top Electrode .......................................................... 808
Zhiqiang Jiao, Qingsong Huang, Hongsheng Zhan, Xin Jia, Lu Wang, Guangcai Yuan

61-3: Demonstration of Long-Term Stable Emission from Inverted OLED with Imperfect Encapsulation .................. 811
Tsubasa Saneki, Hiroshi Fukagawa, Takahiro Oono, Kenji Kawada, Munehiro Hayakawa, Katsuyuki Mori, Takahisa Shimizu

SESSION 62: AUTOMOTIVE HMI TRENDS FOR CONNECTED AND AUTONOMOUS CARS

62-1: Invited Paper: HMI Concept For Autonomous Car .......... 815
Hervé Drezet, Sébastien Colombel

Toshihisa Sato

SESSION 63: PROJECTION: IMAGE IMPROVEMENT

63-1: Speckle Reduction for Laser Pico-projector with Dynamic Deformable Mirrors ............................................ 823
Che-Wei Tsao, Huan-An Chen, Jui-Jen Pan, Zu-Po Yang

63-2: Distinguished Paper: Dependency of Speckle Reduction by Wavelength Diversity on Angular Diversity in Laser Projection System .................................................. 827
Hiroyuki Yamada, Kenji Moriyasu, Hiroto Sato, Hidekazu Hatamura

63-3: Real-time Spatial-based Projector Resolution Enhancement .......................................................................................... 831
Avery Ma, Ahmed Gaswah, Mark Lamm, Alexander Wong, Paul Fieguth

63-4: Q-View Technology - Approach to Achieving High Resolution and Low Power in Small Pixel Micro-Display ...... 835
Craig Walter, Eric Eisenbrandt, Ken Fang, Hiap L. Ong, Timothy Rost, Daniel Wong

SESSION 64: INK-JET PRINTING FOR DISPLAY MANUFACTURING

64-1: Invited Paper: Ultra-high Precision Inkjet Printing Technology for Display ............................................. 839
Seong Soon Kim, Hyun Suk Kim, Jong Gun Lee, Chang Wook Seo

64-2: Fabrication of Auxiliary Electrodes using Ag Inkjet Printing for OLED Lighting ............................................. 843
Jae Ho Yu, Kwan-Hyun Cho, Kang-Tae Kang, Young-In Cho, Chang-Soo Lee, Sang-Ho Lee

64-3: Photo Aligned Quantum Rod films by Inkjet Printing ...................................................................................... 847
Sudesh Kumar Gupta, Wanlong Zhang, Maxym Prodanov, Valerii Vashchenko, Vladimir G. Chigrinov, Hoi Sing Kwok, Abhishek Kumar Srivastava

64-4: Manufacturing and Encapsulation Process of Bottom Gate Bottom Contact Thin-Film Transistors with a Printed Oxide Semiconductor ............................................. 850
Nesrine Kamoun, Yvonne Krieg, Guy Williams Ngulea, Ralf Asselmann, Gerhard Renner, Norbert Freihauf

SESSION 65: HUMAN FACTORS IN AR/VR SYSTEMS

65-1: Maximum Comfortable Luminance of Head Mounted Display under Various Surround Illuminances .............. 854
Hyeysung Ha, Youngsin Kwak, Hyunae Kim, Young-Jun Seo, Seunghee Lee, Sung-Chan Jo

65-2: Sensitivity to Peripheral Artifacts in VR Display Systems ..................................................................................... 858
David M. Hoffman, Zoe Meraz, Eric Turner

65-3: The Quantization of Cybersickness Level Using EEG and ECG for Virtual Reality Head-Mounted Display ........ 862
Yi-Tian Lin, Yu-Yi Chien, Hsiao-Han Wang, Fang-Cheng Lin, Yi-Pai Huang

65-4: Invited Paper: Ergonomic Approaches to Stereoscopic and 360° Images .............................................................. 866
Takashi Kawai
SESSION 66: MICROELODED SYSTEM INTEGRATION AND APPLICATIONS

66-2: Invited Paper: PiexLED Display for Transparent Applications
Yong-Tsung Liu, Kuan-Yang Liao, Ching-Liang Lin, Yun-Li Li

66-3: Micro-LED Display with Simultaneous Visible Light Communication Function
Xianbo Li, Wai Keung Cho, Babar Hussain, Hoi Sing Kwok, Chik Patrick Yue

66-4: High Brightness Active Matrix Micro-LEDs with LTPS TFT Backplane
Hyo-Min Kim, Jea Gwang Um, Sahai Lee, Duk Young Jeong, Younghun Jung, Sang Hern Lee, Tuk Jeong, Jae Young Joo, Jeongwook Hur, Jung Hwa Choi, Joos Seop Kwak, Jin Jung

SESSION 67: FLEXIBLE ACTIVE-MATRIX DEVICES

67-1: Invited Paper: Doped Organic Transistors - Increased Stability and Reproducebility for Active Matrix Displays
Shiyi Liu, Abram Al-Shadareed, Vikash Kaphe, Björn Lüssem

67-2: Requirement of a Polyimide Substrate to Achieve High Thin-film-transistor Reliability
Tomotsu Kinoshita, Yuichiro Ishiyama, Takashige Fujimori, Kenta Masuda, Kenichi Takahashi, Masanobu Tanaka, Toshiaki Arai

67-3: Invited Paper: Flexible Substrate Engineering to Enhance Bending Stability
Seongmin Park, Hyuk Park, Yoosung Yang

67-4: Distinguished Paper and Late News-Paper: 5.8-inch QHD Flexible AMOLED Display with Enhanced Bendability of LTPS TFTs
Jaeseob Lee, Thanh Tien Nguyen, Joonwoo Bae, Gyuochul Jo, Yongsu Lee, Sunghoon Yang, Hyeyong Chu, Jinho Kwag

SESSION 68: OLEO DISPLAYS

68-1: Invited Paper: Reliability and Failure Mode Analysis of Foldable AMOLED Display Module
Li Lin, Yalong Li, Kun Hu, Bo Yuan, Genmao Huang, Xiaoyu Gao, Xiuli Huang

68-2: Invited Paper: Challenges for High-Resolution AMOLED Displays
DE Peng, Changho Tseng, Tsungyi Su

68-3: Study on Relation Between Fluorescent Dye Combination and Process Temperature as Photoresist
Seungbeom Lee, Sojin Kim, Wonrae Kim, Younghoon Kim, Masun Kwak, Joonho Lee, Mike Jun, Inhyeong Kang

68-4: Top-emission OLEO Kawara-type Multidisplay with Auxiliary Electrode
Daiki Nakamura, Shingo Eguchi, Nocoma Sugitaawa, Tomoya Aoyama, Sho Kato, Takeru Sasaki, Tatsuke Kamada, Kazunori Watanabe, Masayoshi Dobashi, Chieko Misawa, Masataka Nakada, Shunpei Yamazaki

SESSION 69: CAPACITIVE-TOUCH DISPLAYS

69-1: 43 Inch UHD Digital Kiosk System Using Advanced In-cell Touch Technology
Jaehun Jun, Yongwool Choi, Hongiu Lee, Hyongyoon Kang, Myungsoo Shin, Junyoun Huang, Hyunkyu Park, Kyungjin Jung, Jongho Baek

69-2: Overcoming an Abnormal Horizontal Dim Lines of an In-cell Touch Display
Wei Xue, Jian Tao, Lei Li, Zhifu Dong, Shilin Feng, Dong Wang, Hongmin Li, Xianjie Shao, Junsheng Chen, Seungkyun Lee

69-3: Distinguished Paper: Development of Middle Size Full In-Cell LCD Module for PC with IGZO
Masayuki Hata, Kohie Tanaka, Takuya Watanabe, Mikihiro Noma, Akira Tagawa, Keisuke Yoshida, Kaoru Yamamoto, Konuke Nagata, Shinichi Miyazaki, Daiki Kitagawa

Gerald D. Morrison, Patrick Troy Gray, Rick Seger

SESSION 70: SCREEN TECHNOLOGY

70-1: “Unphotogenic Light”: Evaluation and Detail of the High-Speed Projection Method to Prevent Secret Photography with Small Cameras
Ippei Suzuki, Shinnosuke Ando, Yoichi Ochiai

70-2: Projection-based Multi-view Three-dimensional Display with Angular Steering Screen
Xinxing Xia, Xiangyu Zhang, Lei Zhang, Phil Sarman, Yuanjin Zheng

70-3: Distinguished Student Paper: Novel Directional Projection Screen using Diverted Curved Surfaces Cube
Corner Reflector (D-CR)
Ryosuke Ohtera, Kazuhiko Wako, Yumiko Ishioka, Mitsuaki Kan, K Kälinäntä, Tatsumi Uchida

70-4: Higher-Contrast and Lower-Haze Transparent Screen Using Waving Cholesteric Liquid Crystals
Yujiro Yamai, Shunuke Arina, Akira Yamamoto, Makoto Ishiguro, Michio Nagai, Katuyuki Takada, Yoichi Saga, Yoji Ito
SESSION 71: HIGH IMAGE QUALITY

71-1: Invited Paper: A Color Conversion Film with High Quantum Yield and Operational Stability .......................................................... 946
Ho Yang Lee, Doy Hyeon Lee, Jaeyon Song, Sang Po Moon, Nari Kim, Hyemi Oh, Jihwa Kim, Sung Yong Min, Dong Mok Shin, Sehwan Son

71-3: A New Solution without Quantum Dots for LCD to Achieve More Than 90% BT.2020 ................................................................. 949
Jack Fan, Ken Hsiao, Yang-Jui Lee, Bay Chang Chien, Chia-Yu Lee, Shin-Ih Huang, Chen-Chun Chen

71-4: New LCD with 97.3% Rec.2020 Color Gamut .......................................................................................................................... 953
Haiwei Chen, Ruiqiang Zhu, Juan He, Ming-Chun Li, Seok-Lyul Lee, Taeje Dong, Shin-Tson Wu

SESSION 72: MEASUREMENT CHALLENGES FOR NEAR-TO-EYE DISPLAYS

72-1: Requests to Lenses in Measuring Units Evaluating Near-Eye Displays .................................................................................... 957
Norbert Schuster, Udo Krüger, Tobias Pareck

Russell S. Draper, John Penczek, Bupal Varshneya, Paul A. Boynton

72-4: Head Movement-based Motion Blur Measurement System for Head Mounted Displays .......................................................... 965
Keon-Woo Kang, Min-Woo Seo, Sang-Lyun Lee, Ho-Chul Lee, Eui-Yeol Oh, Jong-Sang Baek, Suk-Ju Kang

SESSION 73: OD ELECTROLUMINESCENCE I

73-2: Invited Paper: High-Performance Quantum Dot Light Emitting Diodes and their Challenges ...................................................... 969
Krishna P. Acharya, Alexandre Ito, Chen Y. Ying, Jake Hyomen, Paul H. Holloway

73-3: Distinguished Student Paper: Full Color Quantum Dot Light-Emitting Diodes Patterned by Photolithography Technology ........... 973
Tingting Ji, Shuang Jin, Bingwei Chen, Yucong Huang, Ziying Huang, Zinan Chen, Shuming Chen, Xiaowei Sun

73-4: Tandem Red Quantum-Dot Light-Emitting Diodes with External Quantum Efficiency over 34% ................................................. 977
Qiang Su, Heng Zhang, Fengtian Xia, Xiantao Wei, Shuming Chen

SESSION 74: HIGH AMBIENT CONTRAST RATIO I

74-1: Invited Paper: Can LCDs Outperform OLED Displays in Ambient Contrast Ratio? ................................................................. 981
Haiwei Chen, Guanjun Tan, Shin-Tson Wu

74-2: Sunlight-Readable Low-Reflection FFS-LCD .......................................................................................................................... 985
Yuichi Kawahara, Koji Murata, Takako Nakai, Masahiro Hanegawa, Akira Sakai, Kiyoshi Minoura, Aya Nakatani, Hidekazu Miyata, Youzou Kyoukane, Hisashi Watanabe, Nathan Smith

SESSION 75: Distinguished Paper: High-Performance Quantum Dot Light Emitting Diodes and their Challenges .............................. 993

74-5: Late-News Paper: High Dynamic Range Incell LCD with Excellent Performance ................................................................. 996
Zhao Meng, Binyi Zheng, Jianping Zheng, Ling Wu, Wenbin Yang, Zongwei Lin, Poping Shen, Junyi Li

SESSION 76: FINGERPRINT SENSING AND OPTICAL SENSING DISPLAYS

76-1: Invited Paper: A New Full Screen Flexible AMOLED Solution with Fingerprint Recognition .................................................... 1014
Wei-Feng Zhu, Li-Qiang Chen, Yan-Liu Sun, Ling Shi, Zheng Liu, Feng Guan, David Wang

76-2: Invited Paper: Optical Fingerprint Sensor Based on a-Si:H TFT Technology ................................................................................. 1017
Sanghoon Bae, Yan Ling, Weiping Lin, Hong Zhu

76-3: A New Photosensitive Oxide Diode ............................................................................................................................................. 1021
Myeongho Kim, Soyang Choi, Haguun Oh, Jongun Kim, Duk-Kyun Choi
SESSION 83: INTERACTIVE DISPLAYS

83-1: Enhancing the Performance of Display-Integrated NFC Antenna by Magnetic Resonance Coupling for Secure Contactless Payment Transactions and for IoT ......................................................... 1120
Jean B. Mogiraneza, Yasuhiro Sugita, Kazutoshi Kida, Takenori Maryama, Shinji Yamagishi

83-2: Liquid Crystal Display Panel with Piezoresistive Sensors Integrated ................................ 1124
Feng Lu, Qijun Yao, Liang Liu, Shaoliang Ma, Conghua Ma, Zaiwen Zha, Kerong Wu, Yong Yuan, Jun Ma

83-3: Capacitive Touchscreen Integrated Electrostatic Tactile Display with Localized Sensation .......................................................... 1127
Hiroshi Haga, Daisuke Sagimoto, Yiping Yang, Harue Sasaki, Takuya Arai, Koji Shigemura

83-4: Investigation on Quantitative Simulation Method of ITO Index Matrix .................................. 1131
Bao-Ran Li, Hong Yang, Xi-Bin Shao, Zong-Jie Guo, Tao-Feng Xie, Wen-Jin Fan, Qing-Pu Wang, Ling-Yan Wu

SESSION 84: OLED FOR LIGHTING AND IMAGING

84-1: Invited Paper: Advances in High Efficacy and Flexible OLED Lighting .................................. 1135
Jeffrey Spindler, Martina Konkakova, Michael Bioso, Michael Bischel, Jürgen Eser, Jürg Knipping

84-2: Invited Paper: High Refractive Index Light Extraction for OLED Lighting ................................ 1139
Gregory D. Cooper, Selina Monickam

Feifei Ma, Markus Präkel, Peng Yuan, Ang, Simone Iriek, Sebastian Reinke

84-4: Invited Paper: Near-Infrared Organic Upconversion Device with High Image Sensing Quality ......................................................... 1147
Shan-Wei Liu, Saijil Birong, Ya-Ze Li, Ken-Tsung Wong

SESSION 85: IMAGE QUALITY

85-1: Visually Lossless Compression of High Dynamic Range Images: A Large-Scale Evaluation .......................................................... 1151
Aishwarya Sudhamma, Matthew D. Cutone, Yuqian Hou, James Goel, Dale Stolitzka, Nathan Jacobson, Robert S. Allison, Laurie M. Wilcox

85-2: Subjective Evaluation of Moving Picture Quality on 4K OLED and LCD TVs for Analyzing Device Response in Detail .......................................................... 1155
Issa Kawahara, Satoru Kubota

Ying-Ju Lin, Zong Qin, Fang-Cheng Lin, Han-Ping D. Sheieh, Yi-Pai Huang

85-4: A Subpixel-based Objective Image Quality Metric with Application to Visually Lossless Image Compression Evaluation .......................................................... 1163
Gregory W. Cook, Javier Ribera, Dale Stolitzka, Wei Xiong

SID 2018 Speaker Contact Information ......................................................................................... 1167

SID 2018 Executive and Program Committee ............................................................................. 1177

BOOK 3

ACTIVE-MATRIX DEVICES POSTERS

P-1: A New Method of Verifying Charging Compensation in 8K4K 120Hz Large LCDs by Using Small Panel ......................................................... 1193
Guangliang Shang, Xue Dong, Peng Liao, Yifang Chu, Haoliang Zheng, Seungwoo Han, Yunsi Im, Xiaochuan Chen, Yinglong Huang, Jieunok Jun

P-2: The Improved Photosensitivity of Amorphous In-Ga-Zn-O TFTs with Gap-type Structure .......................................................... 1197
Po-Chun Chan, Yu-Hsiang Tai, Han-Wen Liu

P-3: TCAD Modeling of Ion Transport for Simulation of Degradation in an Amorphous InGaZnO Thin Film Transistor .......................................................... 1201
Sungwoon Kong, E. C. Hylin, Derek Kimpton, Eric Guichard

P-4: Reliability Analysis and Improvement of Self-aligned Coplanar a-IGZO TFTs for OLED Display .......................................................... 1205
Zhen Song, Guoying Wang, Doni Xie, Janghieh Chen, Pengfei Gu, Juan Ye Zhang, Hongda Sun, Young Suk Song, Liangchen Yan, Zhongyuwan Wu
P-5: The Effect of Light-shield Metal Layer on the IV Performance of the P-type LTPS TFT .................................................. 1209

P-6: Development of Advanced Etch-Stop Structures Oxide TFT .......................................................................................... 1212
Fei Shuang, Yong Xiang, Rui Wang, Xiaolin Wang, Zhongbao Huang, Zhuo Xu, Shaorui Li, Zelin Liu, Haijun Qiu, Jianfeng Yuan, Taiye Min, Xiaofeng Ma, Yongliang Zhao

P-8: The Analysis of Effective Channel Length in a-IGZO TFTs with the Top IGZO layer .......................................................... 1215
Won Il Han, Dong Hyuk Choi, Hyun Wook So, Wa Ryong Lee, Jung Woong Baeck, Hoon Choi

P-10: A Study on Bending Tolerance of Hybrid IGZO TFTs Fabricated on PEN Films .............................................................. 1219
Yu-Hung Liang, Wan-Chen Huang, Hsiu-Hua Wang, Chun-Cheng Cheng, Chu-Yu Liu, Min-Feng Chiang

P-12: Novel 1-to-N Architecture of Bidirectional Gate Driver for Ultra-Narrow-Border Display ............................................. 1223
Zhijun Wang, Hongtao Huang, Chao Dai, Di Xua

P-13: Electrical Characteristics and Stability of Double-Gate a-IGZO Thin Film Transistors with Self-Aligned Top-Gate ......................................................................................................................... 1227
Xiaodong Zhang, Xuan Deng, Huan Yang, Xiaoliang Zhou, Letao Zhang, Shengdong Zhang

P-14: Transient Response Properties of Nitrogen-Doped Amorphous InGaNzO Thin Film Transistors ............................................. 1231
Chengyuan Dong, Xianya Teng, Haiting Xie, Lei Zhang, Guoshao Liu, Yan Zhou

P-15: The Use of Fluorination to Enhance the Performance and the Reliability of Elevated-Metal Metal-Oxide Thin-Film Transistors ........................................................................................................................................... 1235
Zhihe Xia, Lei Lu, Jiapeng Li, Hoi-Sing Kwok, Man Wong

P-16: The impact of Deposition Rate and Hydrophobicity of Passivation Layer on The Stability of Back-Channel-Etch Amorphous InGaNzO Thin-Film Transistors .................................................................................................. 1239
Gongtian Li, Wei Wu, Shumin Ge, Shuai Li

P-17: Three-Mask Elevated-Metal-Oxide Thin Film Circuit with Inverted Structure Based on a-IGZO TFT for Blue-Phase Liquid Crystal Displays ................................................................................................................. 1242
Chih-Lung Lin, Po-Cheng Lai, Fu-Hsing Chen, Chia-Chie Huang, Bo-Shu Chen

P-18: Improvement of Reliability in Coplanar a-IGZO TFTs by Multilayer SiO2 Gate Insulator ...................................................... 1246
Se Hee Park, Jae Yoon Park, Pil Sang Yun, Jong Uk Bae, Kwon-Shik Park, SooYong Tae, Inbyoung Kang

P-19: Effect of RTP Annealing Using UV and DUV Light on the Properties of the Al-IZTO TFTs .......................................................... 1249
Yunyong Nam, Jong-Heon Yang, Pilsang Jeong, Oh-Sang Kwon, Jae-Eun P. Hie-Ok Kim, Sung Haeng Cho, Chi-Sun Hwang, Sanghyun Jr., Sang-Hee Ko Park

P-20: Towards High-Performance and Cost-Effective Top-Gated Oxide TFTs with Hybrid-Phase Microstructural Channels .......................................................................................................................... 1252
Sambin Dang, Rongsheng Chen, Guijun Li, Meng Zhang, Zhihe Xia, Man Wong, Hoi-Sing Kwok

P-21: Three-Mask Elevated-Metal-Oxide Thin-Film Transistor Technology for High-Resolution AMOLED Application .................................................................................................................................................. 1256
Jiapeng Li, Lei Lu, Zhihe Xia, Sist Wang, Zhaoyun Peng, Hoi-Sing Kwok, Man Wong

P-22: Fabrication of Oxide-Based Phototransistors for Visible Light Detection via Nanowire Interfaces ........................................................................................................................................................................ 1260
Dongwoo Kim, Yeong-gyu Kim, Jusung Chung, Byung Ha Kang, Jin Hyoek Lee, Hyeon Jeak Kim

P-23: Fabrication of Eco-Friendly Solution-Processed Indium Zinc Oxide Thin-Film Transistors through Recycling Based on Photocatalytic Reactions of TiO2 ......................................................................................................................... 1264
Jun-Ki Kang, Sung Pyo Park, Jae Won Na, Jin Hyoek Lee, Dongwoo Kim, Jong Sun Choi, Hyeon Jeak Kim

P-24: Integrated Gate Driver for 2000-ppi 8K 120Hz Displays using a-IGZO TFTs .................................................................................... 1268
Yuanfeng Chen, Di Geng, Jin Jang

P-25: OLED Displays with a Specialized Pixel Circuit for Automotive Applications ............................................................................. 1272
Sunbin Deng, Rongsheng Chen, Guijun Li, Meng Zhang, Zhihe Xia, Man Wong, Hoi-Sing Kwok

Byung Ha Kang, Won-Gi Kim, Jusung Chung, Jin Hyoek Lee, Hyeon Jae Kim

P-196: Late-News Poster: Off Current Reduction of DG poly-Si TFT by PLAS Process ............................................................................. 1284
Ryosuke Mochii, Mami N. Fujii, Yasuaki Ishikawa, Yuta Sugawara, Takao Matsumoto, Yukiharu Uraoka

P-197: Late-News Poster: Selective Laser Activation Process for Indium Gallium Zinc Oxide Thin Film Transistors .................................................. 1288
Jeong Woo Park, Won-Gi Kim, Byung Ha Kang, I Sak Lee, Hyeon Jae Kim

APPLIED VISION POSTERS

P-26: Reconstruction of Wide Range Exposure and Diverse High Dynamic Range Image Styles for Displays ................................................. 1292
Jae Woon Soh, Jae Sung Park, Nam Ik Cho

P-27: Hue-Preserving Color Enhancement Algorithm based on Detail Feedback in RGB Color Space .................................................. 1296
Yunnan Chen, Yiying Pu, Shen-Shian Syu, Ming-Jong Jou

P-28: A Gamut Mapping Algorithm Based on Partition Mapping Method ................................................................................................................................. 1300
Yang Bao, Yiying Pu, Shen-Shian Syu, Ming-Jong Jou

P-29: Mitigating Color Deficiency in Graphical Display ................................................................................................................................. 1304
Greg Ward, Mina Rafi Nazari, Afsoon Soudi, Tara Akhavan, Hyunjin You, Jeremy Gerhardt, James J. Clark

P-30: Surface Treatment on High Resolution Display with no Visual Sparkle and Excellent Optical Property .................................................................................. 1308
Yong Yang, Yanhong Zhang, Hangqing Cui, Yinghao Yang

P-31: A Statistical Paradigm for Assessment of Subjective Image Quality Results .................................................................................. 1312
Matthew D. Cutone, Marc Dalecki, James Guel, Laurie M. Wilcox, Robert S. Allison
DISPLAY MANUFACTURING AND APPLICATIONS POSTERS

P-59: Improving TFT Structure Uniformity in G8.5 LCDs ................................................................. 1421
Xiao Di Liu, Liang Sun, Hsi Chien Lin, Yi Fang Chou, Shu-jhuh Chen, Wen Ying Li, Li Mei Zeng, Tian Hong Wang, Hong Yuan Xu, Chia Yu Lee, Chia Chung Yi

P-60: Analysis of Mura Related to TFT Design .................................................................................. 1425
Szechen Mi, Tong Yang, Zhou Rui, Fengxian Lu, Rui Ma, Zhangtao Wang, Xibin Shao

P-61: Investigation of IC Position for Reducing Chip-on-Glass Mura by Quantified Model .................. 1429
Qian Jia, Jaegeon You, Hongmin Li, Zhifu Dong, Xinxing Wang, Yucheng Zhan, Bin Zhang, Xuexi Sun, Xiaona Xu, Jikai Yao

P-62: The Process and Characteristic of new High Thickness Negative Photoresist ......................... 1433
Jixiang Zhang, Yanjiang Wang, Shao Tong, Yongshan Zhou, Longjiang Feng, Yifeng Qing, Kai Lu, Dongsheng Huang, Si Chen, Witsang Lin

P-63: Improving Peeling Force for Cover Glass Lamination to Display Panels ...................................... 1436
Guanghua Hu, Lei Jin, Zhonglin Jin, Xiaowen Wang, Min You, Cai Xu, Zhaoshuang Jiang

P-64: Research for Large Size Reflective LCDs ................................................................................... 1440
Yuqiong Chen, Xiaona Liu, Ming Zhu, Qi Sang, Mengjie Wang, Shuai Yuan, Ziyi Zheng, Jiazhai Su, Yi Ma, Weitao Chen

P-65: High-flatness OC Material for M+ Model applying Siloxane Binder ......................................... 1444
HyeYoung Jung, SangPyo Hong, DongWoo Kang, YoungSeok Choi, HwanMyeong Kim

P-66: Calculation of the Column Spacer Density and Liquid Crystal Injection Quantity for Optimal Panel Assembly .................................................................................................................... 1446
Shuo-Hong Wang, Chun-Nan Lin

P-69: Optical Diode Effect for the Shutter Glass Application by Plasma-Treated Surface ..................... 1449
Jinyoung Jeong, Hojin Choi, Seung-Guk Hyeon, Ji-Hoon Lee

P-70: Improving Defect Repair Rate in Automatic Repair Process of Color Filter Manufacturing ............... 1452
Peng Li, Tingting Liu, Meng Feng, Jian Li, Pingli Li, Heewoon Kim, Yunchun Liu

P-71: On the Origin and Significance of Melting Dimensionality in ELA of Si Films ............................... 1456
Wenkai Pan, Vernon Wang, Miao Xu, Ruihong Song, Jiaosong Chai, James S. Jin

P-77: Area-Selective Atomic Layer Deposition Using Inkjet-printed Fluorocarbon Patterns as Mask Layers ............................................................................................................................................... 1478
Young-In Choi, Jun-Ho Yu, Dai Geon Yoon, Jin-Geon Park, Kyung Hyun Chai, Sang-Ho Lee

P-78: A Novel HVA Curing Wires Design Using Switch TFT to Reduce Curing Pads for Gate Driver on Array Liquid Crystal Display .................................................................................................................. 1482
Xiaowen Lv, Po-Jen Chiang, Wenying Li, Jing Zhu, Yifang Chou, Shujih Chien, Long-Qiang Shi, Chung-Yi Chiu, Chia-Yu Lee

P-79: Research and Development of Reflective Display Technology ................................................... 1485
Shoukun Wang, Huibin Guo, Yongzhi Song, Hao Han, Fangbin Fu, Yihe Jia, Youngtae Hong, Weitao Chen, HaiLin Xue, Xibin Shao

DISPLAY MEASUREMENT POSTERS

P-80: Analysis of the Light Diffraction through a LCD Panel of an Autostereoscopic Display .................. 1489
Seonedo Hong, Kihyang Kang, DaeKeun Yang

P-81: Image Sticking Analysis by Microscopic Intensity Difference in Multi-domain Pixels ..................... 1493
Shing-Ping Lo, Li-Min Chen, Yi-Fung Hsu, Chao-Yung Lin, Wei-Ting Hsu, Lin Hsuan Chiu

P-82: Improved Methodology for Testing Edge Strength for Ultra-Thin Panels ...................................... 1496
Gabriel Agnello, Amber Tremper, Weidong Li, Peter Knowles

P-83: Evaluation Scheme for Transparent Properties of AR See-Through Eyewear Display ....................... 1499
Kosei Oshima, Hiroyuki Sano, Shinichiro Uehara, Hisao Oka, Manabu Ishimoto, Mitsuru Sugawara, Yoshihiko Sato, Makio Karashige, Katsutoshi Tsurutani, Kei Hyodo, Masayuki Yamada, Ryoji Kondo, Kazutaka Inoguchi, Hirofumi Wakimoto, Michio Cho, Ryoji Uki, Satoshi Ouchi
DISPLAY SYSTEMS POSTERS: 3D - AUTOSTEREOSCOPIC

P-85: Multiview Full-Resolution Autostereoscopic Imaging with Alternating Polarization-Coded Image Pairs: Front Active Amplitude Parallax Barrier and Rear Passive Polarization Parallax Barrier
Vasily A. Ezhov

P-86: Multi-view-zone 3D Display System Based on Integral Imaging
Han-Le Zhang, Min-Yang He, Huan Deng, Da-Hai Li, Qing-Hua Wang

P-87: Glassless 3D Head Up Display using Parallax Barrier with Eye Tracking Image Processing
Takuya Matsutomo, Kaoru Kasafuka, Goro Hamagishi, Hideya Takahashi

P-88: Time-Division Multiplexing Parallax Barrier with Sub-Subpixel Phase Shift
Ayuki Hayashi, Hidetoshi Kakeya

DISPLAY SYSTEMS POSTERS: 3D - HOLOGRAPHIC

P-89: Wavefront Aberration Compensation Method for Holographic Optical Element
Chanhyung Yoo, Changwon Jang, Gang Li, Kiseung Bang, Byoungbu Lee

DISPLAY SYSTEMS POSTERS: 3D – LIGHT FIELD

P-91: Light Field Display Simulator for Experience and Quality Evaluation
Matthew Hamilton, Chuck Rambolt, Thomas Buryn, Donovan Benoit, Robert Lockyer, Matthew Troke

P-92: Viewing Light-field Displays
Ronald Lurcom, Thomas Burnett

P-93: Optimization of Multi-Projector Light-Field Display Based on Convex Display Properties
Yi Teng Xiao, Huang Yan Lin

DISPLAY SYSTEMS POSTERS: AR/VR

P-94: Free-form Micro-optical Design for Enhancing Image Quality (MTF) at Large FOV in Light Field Near Eye Display
Jui-Yi Wu, Yu-Ching Cheng, Yi-Pai Huang, Hsin-Hsiang Lo, Chuan-Chung Chang, Fu-Ming Chuang

P-95: Study of AR Optical Design with Lightweight Optical Waveguide
Naifu Wu, Bingchuan Shi, Xitong Ma, Xiangyang Liu, Qi Zeng, Wei Wei

P-96: Augmented Reality Holographic Display System Free of Zero-order and Conjugate Images
Chun-Chi Chan, Chih-Hao Chuang, Chien-Yu Chen, Hong-Yan Lin

DISPLAY SYSTEMS POSTERS: 3D – AR/VR

P-97: Optical Configuration of VR Systems for Slim and Light Head Mounted Displays
Sung-Min Jung, Keong-Jun Lee, Sung-Woo Kim, Han-Seok Kim, Hoon Kang, Bu-Yeol Lee, Soo-Young Yoon, In-Byeong Kang

DISPLAY SYSTEMS POSTERS: AR/VR

P-98: Incorporating Space-variant Holographic Grating in Waveguide Display
Chao Yu, Yifan Peng, Rui Wang, Haojiao Li, Xiu Lin

P-99: Optical Methods for Tunable-Focus in Augmented Reality Head-Mounted Display
Yu-Chen Lin, Chih-Hao Chuang, Chien-Yu Chen, Bohr-Ran Huang

P-100: Ultra-Large Field-of-View Retinal Projection Display with Vision Correction
Wenbo Zhang, Yuangang Wu, Lantian Mi, Chao Peng Chen, Lin Zhong, Bing Yu, Yang Li, Nizamuddin Maitlo

P-101: Micro-Optical Systems for Micro-LED Displays
Graham J. Woodgate, Jonathan Harrold

DISPLAY SYSTEMS POSTERS: 3D – BACKLIGHT SYSTEMS

P-102: Switchable Privacy Display Design and Optimisation
Michael G. Robinson, Graham J. Woodgate, Jonathan Harrold, Benjamin Ihas, Robert Ramsey
DISPLAY SYSTEMS POSTERS: NOVEL DISPLAY TECHNOLOGIES

P-103: Polarizers with Continuously Variable Absorption Axis as Smart Windows ................................................................. 1571
   Cai Ling Meng, Man Chun Tseng, Shu Tuen Tang, Hoi Sing Kwok

E-PAPER AND FLEXIBLE DISPLAYS POSTERS

P-126: Thin Film Stress Optimization for Bending Resistance Improvement of Flexible AMOLED Display ........................................... 1574
   Huijuan Zhang, Xiaolong Li, Liangjian Li, Dong Li, Zhao Li, Zheng Liu, Shunchen Kao, Dawei Wang

P-127: Dual-Gate Self-Aligned IGZO TFTs Monolithically Integrated with High-Temperature Bottom Moisture Barrier for Flexible AMOLED ................................................................. 1577

P-128: Ultralow Temperature Solution-processed A12O3 Gate Dielectrics using Photochemically Activated Nanocluster Precursors ........................................................................................................... 1581
   Jeong-Wan Ju, Yong-Hoon Kim, Joohyung Park, Min Uk Lee, Yoon Jeong Kim, Jong Seung Park, Myung-Seok Choi, Myung-Gil Kim, Sang Kyu Park

P-129: Planarization Effect on Electrical Performances of Organic Thin Film Transistors .................................................................................. 1584
   An-Ju Wu, Shih-Hua Hsu, Wei-Han Chen, Kuan-Hsien Liu, Chia-Hsiang Tsai, Chan-Hao Tu, Chu-Yu Liu, Ming-Feng Chiang, Yu-Chieh Lin

P-130: Reliable Flexible Elevated Metal-Oxide IGZO TFTs ........................................................................................................ 1587
   Sarah Bebic, Sini Wang, Li Lei, Man Wong, Hoi-Sing Kwok

P-131: Development of Short-Channel OTFTs with High Mobilities and Stability .................................................................................. 1590
   Takashi Fukuda, Shinya Oka, Jangho Lee, Hiroshi Makishima, Makoto Watanabe, Masao Tanahashi

P-133: Improved Stability of Organic TFTs by Polydimethylsiloxane Passivation ............................................................................. 1593
   Xiaoling Li, Jackson Jeon, Jonghyun Choi, Mengqian He, Robert Mantley, Juemyung Chang, Nikolay Zhelley, Karan Mehrpura, Jun Jang

P-134: Lamination Contact Bonding and Mechanical Detaching of PI Film for Manufacturing of Flexible OLED Displays ........................................................................................................ 1597
   Seung-Yeol Yang, Chun-Soo Kim, Jong-Sung Choi, Yong-Seog Kim

P-135: Concept of e-Tile and its Prototyping ..................................................................................................................... 1601
   Makoto Omodani, Shuki Isi, Yama Adachi

P-215: Organic-Inorganic Hybrid Thin-film Photo-detector for Fingerprint Recognition .............................................................. 1604
   Yunki Qin, Haisheng Wang, Yingming Liu

DISPLAY SYSTEMS POSTERS: EMERGING TECHNOLOGIES AND APPLICATIONS

P-104: Application of Photonic Crystals in Display ..................................................................................................................... 1607
   Weipin Hu, Jun Wu, Lianjie Qu, Dan Wang, Yun Qiu, Xiao Sun, Qianqian Bu, Mingxiao Jiang, Congcong Wei, Chun Wang, Qiang Zhang

P-105: Collimating Optical System Made by Band Pass Filter ........................................................................................................ N/A
   Lianjie Qu, Yongtian Qiu, Yunkai Yu, Weipin Hu, Ruxu Yang, Xiaoling Xu, Yingqiang Gu, Hebin Zhao, Yun Qiu, Dian Wang

P-106: Zoom Holographic Display Using Liquid Lens .............................................................................................................. 1614
   Dan Xiao, Su-Juan Liu, Qiong-Hua Wang

P-107: Titanium Dioxide Thin Film Coated ZnO Nanorods for Sensitivity Improvement Applying for Displays ........................................................................... 1616
   Chaoyang Li, Qiang Zhang

P-202: Late-News Poster: Dynamic Obstacle Detection to Improve BVI Pedestrian’s Navigation Decision using CNNs .................................................................................................................. 1619
   Borin Yun, Jangwook Kwon

DISPLAY SYSTEMS POSTERS: EMISSIVE DISPLAYS

P-108: Positive Aging Mechanisms for High-efficiency Blue Quantum Dot Light-emitting Diodes .................................................. 1622
   Wen-Cheng Ding, Chia-Hsun Chen, Li-Jen Huang, Ming-Cheng Kuo, Yu-Pei Kuo, Peng-Ya Chen, Hsueh-Hsing Lu, Yu-Hein Lin, Nathan Tiere, Christopher J. Bardeen, Jin-Haw Lee

P-110: Efficient InP-based Quantum Dot Light Emitting Diodes Utilizing a Crosslinkable Hole Transport Layer ........................................ 1625
   Yohan Kim, Benjamin Heyne, André Gefner, Yongwook Park, Moonsoo Kang, Seoungho Ahn, Bumsung Lee, Armin Wedel

P-111: Black Photoreisit Bank for Inkjet-Printed Quantum Dot Light-Emitting Diodes ................................................................. 1629
   Donghyun Ko, Jongsook Han, Heebum Roh, Yesoul Park, Joon Lee, Juho Kim, Hunsik Kim, Hyungjin Kim, Jongsoo Lee, Wan Ki Bae, Changhee Lee

   Sun-Kyo Kim, Jong-Hoon Kim, Hee-Sun Yang, Yong-Seog Kim

P-113: Improving the Carrier Balance with Hybrid Hole Transporting Layer and Electron Blocking Layer in Quantum Dot Light-Emitting Diodes .............................................................................. 1636
   Dan Dong, Lu Lian, Dongyu Feng, Han Wang, Gufeng He

P-114: Green Quantum Dot Light-Emitting Diodes with High Color Purity and Their Efficiency Improvement .............................................. 1640
   Jaeeyn Kim, Jeonghun Kwak
P-115: Effect of Solvents and Pressure on the Performance of Quantum Dot light Emitting Diodes Fabricated with Soft-Contact Transfer Printing
Kyunghwan Kim, Heeyeong Jung, Wan Ki Bae, Changhee Lee ..........................1643

P-116: Field Assisted Unidirectional Alignment of Quantum-Rods with Polarized Light Emission
Sandeep Kaur, G. Murali, Ramesh Manda, Yuiki Kim, Sang Guk Lee, Yun Jin Heo, Seung Hee Lee 1647

P-117: Sol-Gel Derived and Thermally Cured Siloxane Encapsulated Quantum Dot Hybrid Material with Excellent Stabilities
Junho Jang, Hwee Yoon Kim, Hyundwan Lee, Byeong-Soo Bae ..................................................1651

P-118: Quantum Dots - Silica Monolith: From Alcohol Soluble Quantum Dots to High Performance Light Emitting Diodes
Yong Ge, Zelong Bai, Jingyu Deng, Shiyu Zhu, Ran Bi, Feng Jiang, Haizheng Zhong ..........................1654

P-119: Low Cost Perovskite Quantum Dots Film Based Wide Color Gamut Backlight Unit for LCD TVs
Naijun Chen, Zelong Bai, Zengmin Wang, Honglei Ji, Ruika Liu, Chaowei Cao, Hui Wang, Feng Jiang, Haizheng Zhong 1657

P-120: Development of Bottom Emission Display with Excellent Image Visibility under Bright Ambient Light using Quantum Dot Color Filter and In-Cell Polarizer
Norio Koma, Masaharu Hashizume, Hiroki Kato, Takahiro Inahata, Hideo Fujikake ..................................1660

P-121: Successive and Scalable Synthesis of Highly Stable Cs4PbBr6 Perovskite Microcrystal by Microfluidic System and Their Application in Backlight Display
Hung-Chia Wang, Zhen Bao, Ru-Shi Liu ........................................................................................................1664

P-122: Stable, Cost-Effective Perovskite-Polymer Composites as Tunable Downconverters for Tailored Lighting
Juan He, Caicui Zhang, Eric Calkins, Yaman Wang, Hao Chen, Shin-Tson Wu, Yajie Dong ......................1667

P-123: Preparation of CsPbBr3/PbS Core/Shell Perovskite Quantum Dot for Enhanced Stability in Polar Solvent
Ho-Yong Kim, Yong-Song Kim .......................................................................................................................1670

P-124: Photo Emissive Nanorods Display
Wanlong Zhang, Julian Schneider, Abhishek K. Srivastava, Andrey L. Rogach, Vladimir G. Chigrinov, Hoi Sing Kwok 1674

P-125: Monochromatic Active Matrix Micro-LED Micro-displays with >5,000 dpi Pixel Density Fabricated using Monolithic Hybrid Integration Process
Fang Ou, Wing Cheung Chong, Qunchao Xu, Yijing Chen, Qiming Li, Lei Zhang ........................................1677

P-203: Late-News Poster: Novel Techniques for Highly Stable Luminescent Perovskite Halide Quantum Dots
Lutfan Sinatra, Marat Lafjalilin, Abdullah Saud Abbas, Jan Pan, Osman M. Bake ........................................1681

P-204: Late-News Poster: Enhanced Brightness and Stability of Blue-emitting Perovskite Quantum Dots
Jian-Yi Lien, Michael Chang, Chih-Jung Chen, Ray-Kuang Chang ..............................................................1685

LIQUID-CRYSTAL TECHNOLOGY POSTERS: FAST SWITCHING

P-139: The Investigation of Field Sequence Color Liquid Crystal Display with New Polymer Stabilized Vertical Alignment Mode
Xingwu Chen, Jian Gao, Yonyuan Qiu, Jian Zhou, Song Lan, Te-Jen Tseng, Hsiao-Hsien Chen, Chung-Ching Hsieh, His-Chien Lin, Yang-Jui Lee .................................................................1688

P-140: New Nematic LCD with Submillisecond Response Time
Hairwei Chen, Yuge Huang, Faming Gou, Javed Rehman, Meng-Chun Li, Sook-Lyul Lee, Shin-Tson Wu ..........1691

P-141: Sub-millisecond Switching of Vertically-Aligned Liquid Crystals Aided by Two-Dimensional Confinement with Virtual Walls
Tae-Hoon Choi, Byoung-Gyu Jeon, Jae-Hyeon Woo, Tae-Hoon Yoon ................................................................1695

LIQUID-CRYSTAL TECHNOLOGY POSTERS: FLEXIBLE AND CURVED LCDS

P-142: High Performance Optically Isotropic Liquid Crystal Display using Twisted Liquid Crystals for Flexible LCDs
Seong Min Song, Srinivas Pagidi, Hyesun Yoo, Chang Suk Lee, Young Jin Lim, Ramesh Manda, Eo Jin Seo, Tae Hyung Kim, Gi-Dong Lee, Seung Soo Lee ......................................................1699

P-143: The Investigation of Improvement Transmittance with PSVA LC Curing Method in Curved Design Structure
Wei Ben, Chung-Ching Hsieh, Yan-Jun Song, Yong-Chao Zhao, Ben-Tang Zhao, Xiang Li, Yu Zhang, Chun-Ge Yuan, Fu Yuan, His-Chien Lin .................................................................1703

LIQUID-CRYSTAL TECHNOLOGY POSTERS: LC FFS

P-144: A Systematic Research of Image Sticking in Fringe Field Switching Liquid Crystal Displays
Jhong-Ciao Ke, Te-Chen Chang, Chia-Te Liao, Chia-Min Yu, Yan-Bing Qiao .................................................1707

P-145: A Turning Method to Minimizing Flicker Shift Phenomenon in Positive FFS Mode LCD Panel and Improve DC Image Sticking
Kun-Tao Huang, Yu-Yen Hung, Bi-Xen Fang, Yuan-Te Chao, Conrad Lee, Sung-Chin Lin, Chia-Hua Yu, Chris Kao, Ting-Shian Jen .................................................................1711

P-146: Effect of Stretching Condition on the In-plane and Out-of-Plane Birefringence of Negative A-plate Polyimide Film
Hee Jung Ryu, Ji-Hoon Lee ..........................................................................................................................1715
P-147: Diffractive Optical Elements Based on Rewritable Photoalignment for Transparent Display and Smart Windows
Cheauxiang Zhao, Fan Fan, Alvin Tam, Martin Schadi, Vladimir Chigrinov, Hoi-Sing Kwok

P-148: A Continuous Variable Lens System to Address the Accommodation Problem in VR and 3D Displays
Afsoon Jamal, Comrun Yousefzadeh, Colin McGinty, Douglas Bryant, Philip Bas

P-149: A Polarization-independent Blue Phase Liquid Crystal Lens Array with Multi-electrode
Fan Chu, Li-Lan Tian, Hu Dou, Lei Li, Qiong-Hua Wang

LIQUID-CRYSTAL TECHNOLOGY POSTERS: LC SYSTEMS & COMPONENTS

P-150: Influence of Illumination on Vcom Distortion
Zhihua Zhang, Xinyuan Yang, Xi Chen, Honglin Zhang, Xianqian Yun, Hongjiang Wu, Junfeng Yuan, Hongtao Lin

P-151: Giant Flexoelectro-Optic Effect with Bimesogen in Vertical Standing Helix
Vinay Joshi, Kai-Han Chang, Andrii Varanytsia, Daniel A. Paterson, John M.D. Storey, Corrie T. Imrie, Liang-Chy Chien

P-152: Analysis and Comparison of Display Defects of Rugged LCDs in high temperature environment
Feng Qibin, Hu Zhang, Li Junjun, Yuan Yuan, Zhang Yu, Lv Guoqiang

P-153: High Contrast Ratio LCD with an In-cell Polarizer
Haiwei Chen, Guanjun Tan, Ming-Chun Li, Seok-Lyul Lee, Shin-Tson Wu

P-154: Retardation Free Polarizer for IPS Display
Kyoung Suk Min, Jin Ho Kim, Sang Min Lee, Tae Woon Ko, Ki Kyung Park, Kyoung Hoon Kim, Hyung Seung Kim, Jong Dae Kim, Jeom Jae Kim, Mike Jun, In Byeong Kang

P-155: 17 inch High Performance Transparent Display using Newly Scattering-type Surface Anchoring LC
Shao-Huai Wu, Chien-Hua Chen, Jin-Tian Lian

P-156: Flicker Effect Depending on the Density of Charge Impurities in the Cell
Min Soo Park, Hyung-Jun Yuan, Cheol-Soo Lee, Sang-Ho Youn

P-157: Formulation of Jones Matrix for the General Reflective Birefringent Medium
Shao-Chik Alan Lien

P-158: Study on Dispersant Influence of Color Characteristic Degradation of colorant Material for Wide Color Gamut
Ahn-Ki Kim, Seung-Hoon Ji, Byung-Gun Ahn, Sang-Hun Han, Mu-Sun Kwak, Joun-Ho Lee, Mike Jun, In-Byeong Kang

P-159: Color Smart Window Based on Polymer-sustained Conical Helix of Cholesteric
Vinay Joshi, Daniel A. Paterson, John M.D. Storey, Corrie T. Imrie, Liang-Chy Chien

P-205: Late-News Poster: Augmented Reality Display Based on Polymer-Stabilized Blue Phase Liquid Crystal Combiner
Quanming Chen, Yan Li, Shuzin Liu, Pengcheng Zhou, Sida Li, Yunfeng Wang, Yuexia Liu, Yihai Su

P-206: Late-News Poster: The LCD Technology Development and Application with an Improved Black Photo Spacer Structure
Yihe Zhang, Minming Liu, Yanxi Ye, Zhuming Deng, Wu Cao, Xuan Li, Yungkin Lin, Chungyi Chiu, Hang Zhou

LIQUID-CRYSTAL TECHNOLOGY POSTERS: VIEWING ANGLE CONTROL

P-160: Viewing Angle Controllable LCD with Specified Array Structure for Ultra High Definition Display
Linlin Wang, Limei Jiang, Zijiang Su, Yanbin Qiao, Peter Liao, Smart Chung

P-161: Wide-view and Fast-response Uniform Standing Helix Cholesteric LCD
Ting Yu, Jun-Gui Zhou, Hong Meng, Man-Kuang Fang

P-162: Novel SFT Mode Pixel Design for High Viewing Angle of Contrast at Automotive Applications
Jun Zhou, Zong-cai Ding, Jiang-chuan Chen, Jian-hong Wang, Yu Zhang, Jun Li

LIQUID-CRYSTAL TECHNOLOGY POSTERS: OLEDs

P-163: Novel Design and Study of Anti-crack Dam for CVD Shadow Free
Jingkai Ni, Wei Wang, Zhongyuan Sun, Shizheng Zhang, XiaoFen Wang, Han Yue, Jinxiang Xue, Xiang Zhou, Kai Sui, Wenqi Liu, Chao Dong

P-164: Energy Transfer from Interface Exciplexes to Ultrathin Emissive Layers: A Path Way to Design Simplified Efficient White Tandem Organic Light-Emitting Diodes for Application
Yang Liu, Yuan-Chun Wu, Shibo Jiao, Wei Tan, Jinchuan Li, ChunHsiung Fang, Po-Yen Lu

P-165: High Resolution Black Color Patterns Fabricated by Photo-Lithography with a Novel High Adhesion Polymer for Pixel Defining Layer of OLED
Myangjun Lee, Jun Bae, Seonhong Ahn, Bumsung Lee

P-166: Optimization of OLED Microcavity Design and Fabrication for Light Field Display
Jordan Peckham, Jianguo Cheng, Andrew Ward, Jennifer Campbell, Katie Krause, Danny Bachman, Steve Rutledge, Tushar Biswas, Sarah Mohammadpour, Wally Haas

P-167: Low Temperature Curable Hole Injection Polymer for Flexible OLEDs
Ken-ichi Ishitaka, Tomotatsu Sagisaka, Tomomi Uchiyama, Tetsushi Murakami, Yuu Kurosawa, Yoshiyuki Suzuri

P-168: Top Emission WOLED for High Resolution OLED TV
Yang Liu, Yuan-Chun Wu, Shibo Jiao, Wei Tan, Jinchuan Li, ChunHsiung Fang, Po-Yen Lu

Self-aligned IGZO TFTs ........................................................................................................ 1796
Fang Mei Liu, Yue-Chun Wu, Yuan-Jun Hua, Ming Jue Yu, Jiang Soon In, Po Yeau Lu

P-170: Molecular Design of Sensitizer for High Efficiency in Hyper-fluorescent Organic Light-Emitting Diodes

Ji Seon Jang, Si Hyeon Han, Hye Won Choi, Kyoung Soo Yook, Jun Yeob Lee

P-171: Modulation of Dibenzothiophene and Carbazole Moieties in Host Material towards High Performance Blue Phosphorescent OLEDs

Soo Kyung Shin, Sang Yong Byeon, Si Hyeon Han, Jun Yeob Lee

P-172: Geometry Control and Chemical Bond Stabilization of Thermally Activated Delayed Fluorescent Emitter to Get Extended Lifetime in TADF OLEDs

Ho Jung Lee, Si Hyeon Han, Wan Pyo Hong, Ok-Keun Song, Jun Yeob Lee

P-173: Dual Anthracene Core Derivatives for Highly Efficient Blue OLED Emitters

Seokwoon Kang, Hyosoon Lee, Hyesook Jung, Junwook Jeong, Jongwook Park

P-174: Inkjet Printed OLEDs Based on Novel Cross-linkable Electron Transport Materials

Lining Xie, Jinyong Zhuang, Wennaing Su, Zheng Cui

P-175: High Triplet Energy Exciplex Forming Hole Type Host for High Performance in Deep-blue Phosphorescent Organic Light-emitting Diodes

Ha Lim Lee, Wook Song, Sun Yeob Lee

Nam Su Kim, Seon Hyeak Jung, Hyung Suk Kim, Min Chul Suh

P-177: Engineering Host Materials for High Efficiency and Long Operational Lifetime in Blue Phosphorescent Organic Light-emitting Diodes

............................................................ 1825

P-178: Synthesis of Reverse Intersystem Crossing Facilitating Host Material for High Efficiency in Red Thermally Activated Delayed Fluorescent Organic Light-emitting Diodes

............................................................ 1829

P-179: Color Tunable Thermally Activated Delayed Fluorescence Emitters with Changing Electron Withdrawing Characteristic of Acceptor

............................................................ 1832

A Ra Ko, Dong Ha Lee, Seung Bae Ji, Hye Won Choi, Kyoung Soo Yook

P-180: Efficiency Enhancement of the OLED by Direct Emission of Circular Polarization

............................................................ 1835

Dong-Myung Lee, Tae-Hyung Jung, Byung-Jun Kang, Younseok Choi, Chang-Jae Yu, Jae-Hoon Kim

P-181: The Analysis of Energy Transfer Mechanism According to Abnormal Host Mixing Composition by Using Solution-processed OLEDs

............................................................ 1838

JI-HO Kang, Hyung Suk Kim, Min Chul Suh

P-182: Actual Interpretation of Concentration Quenching Effect on Thermally Activated Delayed Fluorescence in a Solid Film

............................................................ 1842

P-183: Improved Device Stability for Solution-Processed Green Phosphorescent OLEDs via Interface Mixing Effect

............................................................ 1846

SeokJu Kim, So-Ra Park, Min Chul Suh

P-184: The Effect of Exciplex-Type Co-Host Emitting Layer Structure in the Lifetime of Organic Light-Emitting Diodes

............................................................ 1850

Jho Sohn, Donghyun Ko, Hyunho Lee, Junghyeok Han, Changhee Lee

P-185: Enhanced Light Extraction of Flexible Organic Light-emitting Diodes by Ag Nanoparticles as Scattering Layer

............................................................ 1853

Seonja Kim, Junhee Choi, Young Wook Park, Byeong-Kwon Ju

P-186: Extremely Long Length Electrosyn Ag Fiber Electrodes for Flexible Organic Light Emitting Diodes

Junhee Choi, Bong Han Bae, Young Wook Park, Byeong-Kwon Ju

P-187: Ultra-smooth Silver Nanowires Flexible Transparent Electrode for Organic Light Emitting Diodes

............................................................ 1859

Dong Jun Lee, Young Wook Park, Byeong-Kwon Ju

P-207: Late-News Poster: Efficient Emitter Aggregation Management Using High-Entropy Non-crystallizable Hosts

............................................................ 1862

Rajarshi Chakraborty, Mike F. Molaire, David S. Weiss, Tianhao Yu, Lewis J. Rothberg

P-208: Late-News Poster: Effective Use of Smartwatch Usage Data for OLED's Burn-in, Lifetime and Power Consumption Simulations

............................................................ 1865

Mika Antikainen, Wonju Shin, Bongsun Lee, Won-Jun Choe

P-209: Late-News Poster: Ordered and Coplanar Chain Conformation of Polyfluorenes by Adopting Solvent Vapor Treatment Process for Enhanced Color Purity in Polymer Light Emitting Diode

............................................................ 1868

Chi-Hoan Kim, Ji-suh Park, Byeongyoon Kim, Jeong-Hoon Ko, Dong Hoan Jung, Hak-Rin Kim

P-216: Late-News Poster: UHPD Technology for Enhanced User Experience of Near-Eye Applications

............................................................ 1872

Shih-Song Cheng, Hwei-Liou Chen, Yung-Ting Chen, Le-Jean Wei, Li-Min Huang, Long-Ming Lu

LIQUID CRYSTAL TECHNOLOGY POSTERS: TOUCH AND INTERACTIVE DISPLAYS

P-189: The Technological Study for Side Etch about ITO Stacked OC Layer on Touch Panel

............................................................ 1876

Ting Zeng, Xibin Shao, Zongjie guo, Ming Zhang, Xiaolin Ding, Qicheng Chen, Zhi Du, Liuyue Yin, Yiife qian, Yuzhao Zhang, Hong Yang
P-190: Investigation on the OGS Mura of Black Matrix after Sunlight Aging ............................................................... 1880
   Xiao-yue He, Hong Yang, Xi-bin Shao, Zong-jie Guo, Tao-feng Xie, Lei Zhang, Qiong-pu Wang, Wen-jin Fan, Lin-yuan Wu, Yao Tong

P-191: Testing and Preparation of White Matrix Resist for OGS Touch Panel .............................................................. 1884
   Zhi Du, Hong Yang, Xibin Shao, Zongjie Guo, Ming Zhang, Qicheng Chen, Xianlin Ding, Cui Chen, Ting Zeng, Liuyue Yin, Hai-feng Hu

P-192: Moire Research and Simulation of OGS Metal Mesh Touch Sensor ................................................................. 1889
   Xiao-dong Xie, Hong Yang, Xibin Shao, Zongjie Guo, Lei Zhang, Zuming Yu, Jinfang Xie, Min He, Shifeng Xu

P-193: High Force Sensing Accuracy in Piezoelectric Based Interactive Displays by Artificial Neural Networks .......... 1893
   Shuo Gao, Jifeng Duan, Zhicheng Wei, Arokia Nathan

P-210: Late-News Poster: Advances in Infrared and Projected Capacitive Touch Screens ........................................... 1897
   Robert D. McCulloch, Guy M. Duxbury, Albert M. David

P-211: Late-News Poster: A 5.5-inch FHD IGZO in Cell Touch LCD with High SNR ................................................... 1901
   Ping-Sheng Kuo, Chih-Yu Sa, Chang-Yeh Lee, Hung-Lang Liu, Shih-Jie Huang, Shih-Wei Chu, Shen-Yu Wu, Yuanhang Li,
   Sangsunp Ruan, Yuhuai Chen, Shuang Song, Shaofan Liu, Bozi Li, Chih-Yuan Tseng

LIQUID-CRYSTALL TECHNOLOGY POSTERS: WEARABLE DISPLAYS, SENSORS AND DEVICES

P-132: Mechanical Deformation-Aware TFT Modeling for Highly Flexible Wearable Electronics Design ..................... 1905
   Slobodan Mijalkovic, Ahmed Nejim, Pedro Barquinha, Ian Scott

P-136: Resistive Type 2D Mapping Positional Strain Sensor Array for Advanced Tactile Displays ................................. 1909
   Jun Ho Lee, Jae Sang Heo, Sang Hui Moon, Min Uk Lee, Jae Hyun Kim, Sang Kyo Park

P-137: A Highly Sensitive Resistive Pressure Sensor with MWCNT Nanoparticles-Liquid Crystal-PDMS Composite .......................................................... 1913

   Jin Pan, Shiyu Liu, Yicheng Yang, Jiangang Lu

P-212: Late-News Poster: Flexible Cover Window for Foldable Display ................................................................. 1921
   Yong-Cheol Jeong

   Jaeyoung Yoon, Yun-wuk Joo, Byeongmoon Lee, Eunho Oh, Hyeon Cho, Yongtaek Hong

SID 2018 Speaker Contact Information ..................................................................................................................... 1929

SID 2018 Executive and Program Committee .............................................................................................................. 1939
