# TABLE OF CONTENTS

## SESSION 1: THEME 11: RESERVES, ECONOMICS, AND FIELD STUDIES II

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mapping the Barnett Shale Gas With Probabilistic Physics-Based Decline Curve Models and the Development of a Localized Prior Distribution</td>
<td>1</td>
</tr>
<tr>
<td>The Use of the Bimodal Production Decline Curve for the Analysis of Hydraulically Fractured Shale/Tight Gas Reservoirs</td>
<td>17</td>
</tr>
<tr>
<td>Hindcasting Production in Four Shale Gas Basins Using a Physics-Based Approach</td>
<td>37</td>
</tr>
<tr>
<td>Montney Versus North America</td>
<td>Completions Comparison</td>
</tr>
</tbody>
</table>

## SESSION 2: THEME 13: STAKEHOLDER MANAGEMENT AND SOCIAL PERFORMANCE (HSSE)

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using Drone Magnetic and LiDAR Surveys to Locate Unmarked, Abandoned Wells Prior to Unconventional Oil and Gas Development</td>
<td>54</td>
</tr>
<tr>
<td>Advanced Characterization and Novel Waste Management for Drill Cuttings From Marcellus Shale Energy Development</td>
<td>63</td>
</tr>
<tr>
<td>Estimating Carbon Intensity of Unconventional Plays</td>
<td>Meehan, D. Nathan</td>
</tr>
</tbody>
</table>

## SESSION 3: UNIVERSITY LANDS SPECIAL SESSION I

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wolfcamp Geologic Reservoir Modeling Challenges</td>
<td>Casey, Brian; Richards, Benjamin; Moore, Connor; Wehner, Matthew</td>
</tr>
<tr>
<td>Additional Applications of Optimal Artificial Lift Strategies in the Permian Basin</td>
<td>Pradhan, Yogashri; Xiong, Hongjie; Forrest, James; Zhu, Jane</td>
</tr>
<tr>
<td>Additional Applications on Determining Optimal Lateral Lengths and Trajectories on University Lands’ Delaware Basin</td>
<td>Pradhan, Yogashri; Xiong, Hongjie</td>
</tr>
</tbody>
</table>

## SESSION 4: THEME 03: FORMATION EVALUATION – INTEGRATED WORKFLOWS AND INTERPRETATION METHODS I

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Montney Key Drivers: An Integration of Multidisciplinary Data Analytics in a Low-Permeability Reservoir</td>
<td>Hermanson, Kay-Cee; Kwan, Morgan</td>
</tr>
<tr>
<td>Porosity and Organic Content Analysis, Bone Spring and Wolfcamp Formations</td>
<td>Walls, Joel; Driskill, Brian; Durand, Melanie; Davalos, Gabriela; Rider, Tiffany</td>
</tr>
<tr>
<td>Water Saturation Interpretation Model for Organic-Rich Shale Reservoir: A Case Study of North Sumatra Basin</td>
<td>Akbar, Muhammad Nur Ali; Musu, Junita Trivianti; Milad, Benmadi</td>
</tr>
</tbody>
</table>

## SESSION 5: THEME 04: GEOMECHANICS AND PORE PRESSURE

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Novel Pore Pressure Prediction Technique for Unconventional Reservoirs</td>
<td>Yale, David P.; Perez, Adriana; Rancey, Robert</td>
</tr>
<tr>
<td>Using Traditional Methods to Predict Pore Pressure in Devonian Black Shale Basins of North East British Columbia</td>
<td>Green, Sam; Loeffler, Joel; Clarke, Shona; Thurston, David</td>
</tr>
<tr>
<td>Impact of Pore Pressure Depletion on Stress Reorientation and Its Implications on the Growth of Child Well Fractures</td>
<td>Agrawal, Shiva; Sharma, Mukul M.</td>
</tr>
</tbody>
</table>

## SESSION 6: THEME 07: AUGMENTED INTELLIGENCE FOR RESERVOIR CHARACTERIZATION AND PERFORMANCE PREDICTION

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spider Bots: Database Enhancing and Indexing Scripts to Efficiently Convert Raw Well Data Into Valuable Knowledge</td>
<td>Saini, Gaurav; Chun, Hong-Chih; Ashok, Pradeepkumar; van Oort, Eric; Behounek, Michael; Thetford, Taylor; Shahri, Mojtaba</td>
</tr>
</tbody>
</table>
Integrated Workflow for the Characterization of a Type Well Using Probabilistic Methods .................................................. 203
  Jones, David S.
Toward a Management Science for Unconventional Wells: A Methodological Approach .................................................. 219
  Battell, Richard R.; Paranji, Sanjay; Mintz, Jason S.

SESSION 7: THEME 08: GEOCHEMISTRY – RESERVOIR CHARACTERIZATION

Reliable Solid Organic Matter Thermal Maturity Assessment Using Surface Enhanced Raman Spectroscopy and
Case Studies ........................................................................................................................................................................ 231
  Jiang, Raymond; Gao, Li; Bishop, Andrew; Tung, Yongchun
Integrated Inorganic and Organic Geochemistry Approach in the Petroleum Systems Analysis of Permain Shale
Plays .................................................................................................................................................................................. 235
  Gong, Changrui; Rodriguez, Lucia; Coffey, Brian; Donohue, Casey
Geochemical Characterization of the Eagle Ford Formation in Northeast Mexico .................................................. 242
  Orteaga-Lucach, Sandra; Gutierrez-Caminero, Leopoldo; Torres-Vargas, Ricardo; Murillo-Muñeton, Gustavo

SESSION 8: THEME 12: INTERNATIONAL EMERGING PLAYS

Emerging Shale Oil Plays in Hypersaline Lacustrine Qianjiang Formation, Jianghan Basin, Central China ................. 246
  Li, Maowen; Ma, Xiaoxiao; Li, Ziming; Jiang, Qigui; Wu, Shiqiang
Unconventional Reservoir Development in Egypt's Western Desert: Lessons Learned From the First Appraisal
Wells .................................................................................................................................................................................. 264
  Salah, Mohamed; Ibrahim, Mazher

SESSION 9: THEME 14: DRILLING AND COMPLETIONS OPTIMIZATION I

Mechanism Study of Casing Deformation in Multistage Hydraulic Fracturing Shale Reservoir..................................... 282
  Xu, Zyo; Tan, Fei; Han, Lihong; Yang, Shangyu; Wu, Xingru
Optimization and Drilling of Horizontal Wells Using a Bayesian Network ................................................................. 290
  Fierstien, John; Winkler, Hugh; Strauss, Phillip; Klokov, Alexander
TST3D: Automated Structural Interpretation in Horizontal Wellbores .......................................................................... 296
  Zhang, Taunfeng; McCormick, David; Nandjil, Allan; LeFranc, Marie

SESSION 10: OPERATORS' FORUM – COMPLETION OPTIMIZATION

New Mexico Delaware Basin Horizontal Well Heel Frac and Refrac Program and Hydraulic Fracture Diagnostics .......... 311
  Han, Mei; Tanakov, Ivan; Bunker, Estevan; Vulgamore, Travis
Optimization of Completion and Well Spacing for Development of Multi-Stacked Reservoirs Using Integration of
Data Analytics, Geomechanics and Reservoir Flow Modeling ...................................................................................... 332
  Min, Kyuong Suk; Sen, Vikram; Li, Lujun; Sullivan, Richard B.
Accelerated Stimulation Optimization via Permanent and Continuous Production Monitoring Using Fiber Optics .......... 343
  Ugueto, Gustavo A.; Wojtaszek, Magdalena; Huckabee, Paul T.; Reynolds, Alan; Brewer, Jim; Acosta, Luis
Multivariate Study of the Utica: Marrying the Rock to the Completion ........................................................................ 355
  Trumbo, Amanda; Bowman, Jeff; Lasecki, Leo

SESSION 11: THEME 02: INTEGRATED CHARACTERIZATION OF UNCONVENTIONAL RESERVOIRS – FROM OUTCROPS TO GEOMODELS I

An Integrated View of the Petrology, Sedimentology, and Sequence Stratigraphy of the Wolfcamp Formation,
Delaware Basin, Texas ......................................................................................................................................................... 363
  Slatt, Roger M.; Galvis-Porillo, Henry; Becerra-Rondon, Daniella; Ekoumifie, Hunanya C.; Brito, Richard; Zhang, Jing;
  Molinares, Carlos; Torres, Emilio; Duarte, David; Milad, Bennadi
Outcrop and Subsurface Geology Applied to Drilling, Sweet Spot and Target Zone Detection of Resource Shales:
The Woodford Example ....................................................................................................................................................... 371
  Slatt, Roger M.; Galvis-Porillo, Henry; Becerra-Rondon, Daniella; Ekoumifie, Hunanya C.; Brito, Richard; Zhang, Jing;
  Molinares, Carlos; Torres, Emilio; Duarte, David; Milad, Bennadi
Geological Facies Prediction Using Computed Tomography in a Machine Learning and Deep Learning
Environment ........................................................................................................................................................................ 388
  Odo, Uchenna; Nguyen, Thomas
Recent - Pleistocene Immature Mudrocks of Anoxic Basins of Venezuela and West Africa: Analogs for
Unconventional Shale Oil/gas Reservoirs? ......................................................................................................................... 399
  Hammes, Ursula; Grammer, G. Michael; Gregg, Jay M.
Integration of Core Fracture and Lithofacies Descriptions in the Wolfcamp Shale: Implications for Mechanical
Stratigraphy and Production ............................................................................................................................................... 407
  Salem, Anthony; Solano, John; Narwik, Steve; Minisini, Daniel; Desjardins, Patricia; Ihnat, James
Integrated Geocellular Static Model for Geomechanical and Dynamic Simulations in the Vaca Muerta Formation .......... 418
  Lazzari, Victoria; Bernhardt, Carolina; Hryb, Damian E.
Advanced Downhole Measurements and 3D Model Based Geosteering Improves Wellbore Placement Accuracy ...........................................428
Viens, Christopher; Tomlinson, Mark

SESSION 12: THEME 03: FORMATION EVALUATION – INTEGRATED WORKFLOWS AND INTERPRETATION METHODS II

Developing Predictive Power in the Permain: Leveraging Advanced Petrophysics to Deliver Cash to the Business ..............................................437
Blount, Aidan; Croft, Tyler; Driskill, Brian; McMullen, Adam; Durand, Melanie
Integrated Reservoir Characterization Aids Target Selection, Production Fluid Prediction and Completions Optimization in the Southern Delaware Basin Resource Plays ...........................................................................................................447
Tittlemier, Troy; Speight, John; Hager, Charles; Chinwuala, Barzin; Martocchia, Alberto; Easow, Isaac
Integrated Rock Characterization of a Shale Gas Field in the Horn River Basin, Canada 462
Tekla, Tadesse W.; Park, Daejin; Jung, Hoseok; Miskimins, Jennifer L.
Quantifying Nanoporosity: Insights Revealed by Parallel and Multiscale Analyses ..........................................................493
Reynolds, Amanda C.; Bonnie; Ron J. M.; Kelly, Shaina; Krumm, Robert; Howard, James
Quantifying the Mechanisms Contributing to Surface Relaxation of Protons in Kerogen Pores of Organic-Rich Mudrocks ..............................................505
Tandon, Saurabh; Heidari, Zeyn; Jagadisan, Archana
Development of Raman Spectroscopy as a Thermal Maturity Proxy in Unconventional Resource Assessment 523
Myers, Grant A.; Kehoe, Kelsey; Hackley, Paul
Spatial Characterization of Organic Matter Maturity by Raman Microscope Mapping ..............................................................535
Krukowsk, Elizabeth; Howard, James

SESSION 13: THEME 04: AAPG’S PETROLEUM STRUCTURE AND GEOMECHANICS DIVISION (PSGD)

3D Anisotropic Damage Mechanics for Modeling Interaction Between Hydraulic and Natural Fracture Planes in a Layered Rock- Application to Eagle Ford and Wolfcamp ...............................................................544
Aimene, Yamina; Hammerquist, Chad; Nairn, John A.; Ouenes, Ahmed
Origin, Detection, Involvement in Hydraulic Stimulation and Consequences for Field Development of Large-Scale Structural Lineaments in the Marcellus and Duvernay Plays ..............................................................................................................564
Stephenson, Ben; Galan, Earl; Fay, Matthew; Savitski, Alexei; Bai, Tai-Tai
A Method of Fracture Prediction Across Multiple Stratigraphic Horizons in the Midland Basin, Texas, USA 583
Pollock, Caleb; Seiler, Christian; Valcarcel, Manoel; Macaulay, Euan
Can Seismic Inversion Be Used for Geomechanics? A Casing Deformation Example ..............................................................597
Meyer, Jeremy J.; Gallop, Jeremy; Chen, Alvin; Reynolds, Scott; Mildren, Scott
Elk Hills Monterey Formation - Challenge of Incorporating Complex Natural Fractures to Improve Production Understanding ..................................................................................................................604
Gales, Robert; Sobczyk, Rad; Harvey, Nicholas
Reservoir Geomechanic Heterogeneity Index (RGHI): Concept, Methodology, and Application ...........................................................621
Zhau, Jie; Mandal, Subhajit; Ang, Xian; Quest, Martin; Hume, David
Polygonal Fault System in the Paleogene of the Magallanes Foreland Basin, Southern Chile ............................................................630
Pinto, Jesus A.; Gonzalez, Danilo L.; Gonzalez, Angel P.; Zapata, Ricardo A.; Mella, Pablo E.

SESSION 14: THEME 04: BEYOND BRITTLENESS: GEOMECHANICAL CHARACTERIZATION II

Identifying Volcanic Ash Beds and Lamina-Scale Stratigraphy Using Rock Mechanical Properties ..................................................646
Hildick, Alice M.; Havens, Jesse
Compressibility, Porosity, and Permeability of Shales Involving Stress Shock and Loading/Unloading Hysteresis ..............652
Civan, Faruk
Rigorous Estimation of the Initial Conditions of Flowback Using a Coupled Hydraulic Fracture/Dynamic Drainage Area Leakoff Model Constrained by Laboratory Geomechanical Data 672
Zhang, Z.; Yuan, B.; Ghanizadeh, A.; Clarkson, C. R.; Williams-Kovacs, J. D.

SESSION 15: THEME 05: FRACTURING FLUID, FRACTURE, AND MATRIX INTERACTIONS

Modeling and Experimental Investigations of Fluid-Related Damage to Hydraulic Fractures .................................................................703
Abin, Patrice; Prabhu, Rashka; Khvostichenko, Daria; Hilliard, Case; Nelson, Chris; Kuo, Tsu-Chi; Li, Yongfu; Shukla, Priyavrat; Maharychye-Mikhailov, Sergey
Impact of Natural Fractures Beyond the Hydraulic Fracture Complexity in Unconventional Reservoirs - A Permian Case Study ..................................................................................................................716
Pankaj, Piyush; Li, James
Near Fracture Capillary End Effect on Shale Gas and Water Production ..................................................................................739
Elputranto, Riza; Akhathu, I. Yuce
Theoretical Investigation of Water Blocking in Unconventional Reservoirs Due to Spontaneous Imbibition and Water Adsorption ........................................................................................................................................753

Dionisio, Chi-Chi; King, Michael J.

Diagnosis Fracture-Wellbore Connectivity Using Chemical Tracer Flowback Data ..........................................................................................................................................................771

Kumar, Ashish; Sharma, Atul K.

Impact of Authigenic Surface Roughness on Water Invasion and Flowback in Fractured Media: A Micromodel Study ..................................................................................................................................................781

Mehmani, Ayaz; Kelly, Shaina; Torres-Ferdin, Carlos; Balhoff, Matthew

Effects of Hydraulic Fracturing Fluid Chemistry on Shale Matrix Permeability .................................................................................................................................................791

Ali, Abul; Abdullah; Li, Qingyun; Jew, Adam D.; Kohli, Arjun; Bargar, John R.; Zoback, Mark; Kovscek, Anthony

SESSION 16: THEME 08: INORGANIC GEOCHEMISTRY OF UNCONVENTIONAL PLAYS/FLUID ROCK INTERACTIONS

Bench-Top Experiments Evaluating Simulated Hydraulic Fracturing Fluid Interactions With Marcellus Shale Core ........................................................................................................................................801

Moore, Johnathan; Xiong, Wei; Lopano, Christina; Phan, Thai; Yankwuren, Amelia; Sharma, Shihba; Pilewski, John; Jarvis, Karl; Brown, Sarah; Crandall, Dustin; Hakala, Alexandra

Barium Sources in Hydraulic Fracturing Systems and Chemical Controls on Its Release Into Solution ...........................................................................................................................................812

Li, Qingyun; Jew, Adam D.; Kiss, Andrew M.; Kohli, Arjun; Ali, Abdul; Abdullah; Kovscek, Anthony R.; Zoback, Mark D.; Cercione, David; Maher, Katherine; Brown, Gordon E. Jr.; Bargar, John R.

Imaging Pyrite Oxidation and Barite Precipitation in Gas and Oil Shales .................................................................................................................................................824

SESSION 17: THEME 09: EOR APPLICATIONS FOR UNCONVENTIONAL RESERVOIRS

Chemical Stimulation With Driving Process to Extract Oil From Tight Formation ........................................................................................................................................834

Zhang, Jin; Wang, Dongmei

Phan, Tien N.; Crouch, Bradley R.; Almasoodi, Mohin M.; Reza, Zulfiqar A.

Scaling for Wettability Alteration Induced by the Addition of Surfactants in Completion Fluids: Surfactant Selection for Optimum Performance ..................................................................................................................................................866

Zhang, Fan; Saputra, I. W. R.; Adel, Imaad A.; Schecter, David S.

SESSION 18: THEME 10: FLOWBACK AND ARTIFICIAL LIFT FOR UNCONVENTIONAL RESERVOIRS I

Flowback in Shale Wells: Proppant Placement and Distribution in the Wellbore ........................................................................................................................................883

Putri, Kamalita; Lu, Haidan; Kwok, Chun Ka; Moncada, Katharine

Evaluating Fracture Volume Loss During Flowback and Its Relationship to Choke Size: Fastback Versus Slowback ...........................................................................................................................................895

Phan, Tien N.; Crouch, Bradley R.; Almasoodi, Mohin M.; Reza, Zulfiqar A.

Defining the Optimal Drawdown Strategy in the Vaca Muerta Formation .................................................................................................................................................905

Lerza, Alejandro; Rojas, Daniela; Liang, Baosheng

SESSION 19: THEME 11: RESERVES, ECONOMICS, AND FIELD STUDIES I

Unconventional Field Development Optimization - Fit for Strategy Designs to Realize Your Corporate Goals ........................................................................................................................................917

Is GOR Truly Affecting Recovery? A Multi-Variate Case Study in the Delaware Basin .................................................................................................................................................932

Dutta, Riteja; Davison, Sam; Maler, Michael

A New Look at Reserves Estimation of Unconventional Gas Reservoirs .................................................................................................................................................943

Braham, Mazher; Mahmoud, Omar; Pieprzica, Chester

Global Competitiveness of the US Tight Oil Cost Curve .............................................................................................................................................................957

Clarke, Robert; Paton, Harry

Reserve Estimation With Unified Production Analysis ..................................................................................................................................................962

Mehani, Mohamed; Callard, Jeff

New Analysis of EUR Probability Plots Yields Better Uncertainty Assessment and Better Type Wells ..............................................................................................................................................968

Freeborn, Randy

The Value of Building a Multiscale, Regional Geomodel for Reserves Assessment of the Midland Basin .................................................................................................................................................980

Domnisse, Robin; Sivilia, Livisa; Male, Frank; Hamlin, H. Scott

SESSION 20: THEME 14: DRILLING AND COMPLETIONS OPTIMIZATION IV

A Unified Model to Predict Flowing Pressure and Temperature Distributions in Horizontal Wellbores for Different Energized Fracturing Fluids ........................................................................................................................................991

Xu, Zhengming; Wu, Kan; Song, Xianzhi; Li, Gensheng; Zhu, Zhaopeng; Pang, Zhouyu
SESSION 21: THEME 05: UNCONVENTIONAL WELL PRODUCTIVITY

Alternative Production Mechanisms in Unconventional Reservoirs
Jiang, Li; Chen, Benjamin; Abruna, Benjamin; Terracina, John

Chen, Tianhong; Casillas, Rebecca; Jain, Vivek; Liu, Hope; Li, Ruijian; Bai, Taixu; Yeh, Tzu-hao; Cakici, Deniz; Jennings, James; Will, Johannes; Guerra, Jose Chavarria; Durand, Melanie; Williams, Britt L.; Muralidharan, Vivek; Joshi, Krunal

SESSION 22: UNIVERSITY LANDS SPECIAL SESSION II

Lessons Learned From Existing Horizontal Fractured Wells on University Lands in the Midland Basin: Rate Transient Analyses vs Completion and Field Development Optimization
Kumar, Ashish; Seth, Puneet; Shrivastava, Kaustubh; Manchanda, Ripudaman; Sharma, Mukul M.

The Effect of Initial Conditions and Fluid PVT Properties on Unconventional Oil and Gas Recoveries in the Wolfcamp Formation in the Midland Basin
Wood, Tanner; Leonard, Richard; Senter, Chad; Squires, Chris; Perry, Matthew

A Practical Way to Prepare Physical-Based Type Well Performance Curves for Unconventional Reservoirs in the Permian Basin
Pradhan, Yogashri; Forrest, James; Zhu, Jane; Spath, Jeff

Evaluating Underperforming Wells on Permian Basin University Lands
Abbas, Ahmed K.; Flori, Ralph E.; Ababa, Mortadha

SESSION 23: HYDRAULIC FRACTURE TEST SITE (HFTS) SPECIAL SESSION I

Hydraulic Fracturing Test Site (HFTS) - Project Overview and Summary of Results
Ciezobka, Jordan; Courtier, James; Wicker, Joe

Hydraulic Fractures in Core From Stimulated Reservoirs: Core Fracture Description of HFTS Slant Core, Midland Basin, West Texas
Nagarajan, Narayana R.; Orangi, Abdollah

Assessment of In-Situ Proppant Placement in SRV Using Through-Fracture Core Sampling at HFTS
Kahn, Charles; Cottingham, Byron; Kashkar, Sadhendu; Senften, Scott; Coenen, Erica

Well Interference Diagnosis Through Integrated Analysis of Tracer and Pressure Interference Tests
Kumar, Ashish; Seth, Puneet; Shirvastava, Kaustubh; Manchanda, Ripudama; Sharma, Mukul M.

SESSION 24: OPERATORS' FORUM – PERFORMANCE PREDICTION AND RESERVOIR CHARACTERIZATION

Integrated Stochastic Workflow for Optimum Well Spacing With Data Analytics, Pilots, Geomechanical-Reservoir Modeling, and Economic Analysis
Cao, Richard; Chen, Chaohui; Li, Ruijian; Pirincigilo, Tuba; Ozgen, Chet; Croft, Tyler; Kathel, Prateek; Girardi, Alejandro

Myths and Facts of Forecasting Horizontal Well Production in Unconventional Reservoirs - Are We Complicating a Simple Analysis?
Muralidharan, Vivek; Joshi, Krunal

An Integrated Geomechanics-Reservoir Simulation Workflow for Completion Design Optimization
Yeh, Tzu-hao; Cakeci, Demir; Jennings, James; Will, Johannes; Guerra, Jose Chavarria; Durand, Melanie; Williams, Britt L.; Chen, Tammong; Casillas, Rebecca; Jain, Vivek; Liu, Hope; Li, Ruijian; Bai, Taixu
SESSION 25: THEME 02: INTEGRATED CHARACTERIZATION OF UNCONVENTIONAL RESERVOIRS – FROM OUTCROPS TO GEOMODELS II

Seismic to Simulation: Woodford Shale Case Study in Oklahoma, USA ................................................................. 1285
Torres-Parada, Emilio J.; Sinha, Sunabhad; Infante-Paez, Lemon E.; Slatt, Roger M.; Marfurt, Kurt J.
The Importance of Overburden and Pore Pressure on Horizontal Stress Magnitude Determination; an Example
From the Delaware Basin ........................................................................................................................................... 1302
Kozlowski, Kristen; Da Silva, Melia; Brown, David; Taylor, Jack; Willems, Heather; Watson, Tim; Burch, Don; Hutton, Trevor; Christensen, Chris; Manohar, Mohan
A Strategy for De-Risking the Upper Vaca Muerta as a Dual-Layer Development .................................................. 1317
Boyal, Kristen; Notta, Raúl; Cahki, Denis; Thomas, Mark A.
Geological Controls on Fluid Compositional Variations in Unconventional Hybrid Plays: Insight From Gas
Geochemistry (Montney Play, Western Canada). ........................................................................................................ 1323
Exzen, Tristan; Chateliers, Jean-Yves; Mort, Andy
Outlier Analysis: A Systematic Method for Distinguishing Between Sub-Surface and Engineering Influence on
Well Performance in the Montney ............................................................................................................................ 1328
Todea, Felix; Stephenson, Ben; Tomlinson, Alexa; Pratt, Heidi; Williams, Will; Acosta, Luis; Eggendorf, Irma; Speidel, Brad
Upscaled DFN Models to Understand the Effects of Natural Fracture Properties on Fluid Flow in the Hunton
Group Tight Limestone .......................................................................................................................................... 1343
Milad, Benmadi; Ghosh, Sayantan; Suliman, Mohamed; Slatt, Roger M.
Sedimentological Characterization of the Pimienta Formation in the Central Part of the Tampico-Misantla Basin,
Veracruz, Mexico ........................................................................................................................................... 1359
Abascal-Hernández, Griselda; León-Francisco, Juan; Torres-Vargas, Ricardo; Garduño-Martínez, Diana; Franco-Navarrete, Sonia; Méndez-Falize, Josefin; Ortego-Lucach, Sandra; Gutiérrez-Camino, Leopoldo; Murillo-Millén, Gustavo

SESSION 26: THEME 04: GEOMECHANICS – HYDRAULIC FRACTURE SIMULATION I

Increase Net Present Value and Reduce Completion Cost by Using an In-House Automated Fracture Design,
Reservoir Simulator and Optimization Workflow for Well Spacing and Completions Design ....................................... 1365
Bhattacharya, Srimoyee; Lake, Ed; Liu, Xin; Dombrowski, Robert; Cao, Richard; Girardi, Alejandro
Numerical Study of Stress Shadowing Effect on Fracture Initiation and Interaction Between Perforation Clusters .......... 1382
Damjanac, Branko; Maxwell, Shawn; Pirayeshgar, Atena; Torres, Maurilio
An Integrated Field and Numerical Study of the Impact of Formation Anisotropy on Stage Spacing in Horizontal Wells ........................................................................................................................................ 1388
Sesetty, Varahanaresh; Ghassemi, Ahmad; Gil, Ivan

VOLUME 3

Effect of Interbeds on Hydraulic Fracture Characteristics and Formation Pressure Response ..................................... 1408
Profit, Matthew; Dudlo, Martin; Berc, Adam; Matul, Uno
A Coupled Three-Dimensional Hydraulic Fracture Propagation Model Considering Multiple Bedding Layers .............. 1428
Tang, Jizhou; Wu, Kan; Zuo, Lihua; Elijk-Economides, Christine
The Impact of Natural Fracture Thickness on Hydraulic Fracture Interaction Mechanics ........................................ 1449
Wang, Weiwei; Olson, Jon E.; Prodanovic, Milan; Schulz, Richard A.
Field Scale Proppant Transport Simulation and Its Application to Optimize Stimulation Strategy .............................. 1467
Kou, R.; Moridis, G. J.; Blasingame, F. A.

SESSION 27: THEME 05: TRANSIENT ANALYSIS, HISTORY MATCHING, AND RESERVOIR MODELING

A Methodology to Characterize Well Performance in the Delaware Basin: A Wolfcamp Case Study ......................... 1481
Mohanty, Shruti; Marzullo, Steve; Lussard, Benjamin
Pressure and Rate-Transient Behavior of a Horizontal Well Intercepting Multiple Vertical Fractures Within a
Fractal Reservoir ..................................................................................................................................................... 1492
Valdes-Perez, Alex R.; Larsen, Leif; Blasingame, Thomas A.
Improved Rate-Transient Analysis for Heterogeneous Fractured Liquid-Rich Tight Reservoirs With Non-Static
Properties ............................................................................................................................................................. 1516
Yuan, B.; Zhang, Z.; Handi, H.; Clarkson, C. R.
Transient Linear Flow Analysis of Multi-Fractured Horizontal Wells Considering Three-Phase Flow and
Pressure-Dependent Rock Properties .................................................................................................................... 1540
Understanding Production Drivers in the Vaca Muerta Shale Using an Integrated Reservoir Simulation Approach .... 1560
Altman, Raphael; Pederiva, Dario; Mehranfar, Reza; Frydman, Marcelo
Reservoir Characterization to Understand Optimal Well Spacing – A Wolfcamp Case Study .................................. 1579
Bansal, Neha; Han, Jichao; Shin, Yonghui; Blasingame, Tom
Modeling Well Performance in Piceance Basin Niobrara Formation Using Embedded Discrete Fracture Model ......... 1596
Xu, Yiwei; Yu, Wei; Li, Ningning; Lolom, Ely; Sepehrnoori, Kamy
SESSION 28: THEME 06: GEOPHYSICS IN THE PERMIAN BASIN

Predicting Pore-Pressure From On-Shore Seismic Data in the Delaware Basin ................................................................. 1618
Rauch-Davies, Marianne; Schmicker, Bob; Smith, Steven W.; Green, Sam; Meyer, Jeremy

Production Metric Analytics in the Wolfcamp Formation .................................................................................................. 1624
Ross, Christopher P.

Integration of Geophysics and Engineering for Geomechanical Earth Modeling in a Midland Basin Development
Project, Midland/Ector Counties, Texas .................................................................................................................................. 1629
Singleton, Scott

Revealing Geologic Features in the Midland Basin Through Frequency Decomposition .................................................. 1635
Moore, Rachael

Strategies for Improving the Performance of Child Wells in the Permian Basin ................................................................. 1639
Manchanda, Rupi; Hwang, Jongsoo; Bhadriraj, Prateek; Sharma, Mukul M.; Maguire, Matt; Greensward, Jason

Estimation of Seismic Attenuation in the Delaware Basin Using Peak Frequencies ...................................................... 1651
Dwirma, Malgorzata; Etzner, Leo; Jechmtulová, Zuzana; Anisiey, Denis; Keller, Randy

SESSION 29: THEME 07: NANOINORGANIC CHEMISTRY, AND MACHINE LEARNING: TOOLS FOR ENHANCING OIL RECOVERY

Nanoparticle-Encapsulated Acids for Stimulation of Calcite-Rich Shales ........................................................................ 1661
Singh, Robin; Tong, Songyang; Panthi, Kristina; Mohanty, Kishore K.

Post-Frac-Hit Mitigation and Well Remediation of Woodford Horizontal Wells With Solvent/Surfactant Chemistry Blend ................................................................................................................ 1676
Swanson, Corey; Hill, W. A.; Nilson, Gary; Griman, Christian; Hill, Randal; Sullivan, Phil; Aften, Carl; Jimenez, Jose C.; Pietrangelo, Gianna; Shedd, Daniel C.; Pursley, John

Ion Tuned Water Can Greatly Enhance Alteration of Carbonate Surface to Water-Wet ............... 1692
Ding, Hongna; Mettu, Srivivas; Daggustine, Raymond R.; Rahman, Sheik H.

Synthetic Well Log Generation Using Machine Learning Techniques ................................................................. 1704
Akinsilaje, Oyenwande; Lyne, Stacey; Roberts, Jon

SESSION 30: THEME 11: WELL SPACING OPTIMIZATION

Development of the Stacked Pay in the Delaware Basin, Permian Basin ........................................................................... 1720
Alimahomed, Farhan; Malpani, Raj; Jose, Rohaan; Defau, Cyril; Arteaga, Edgar Ignacio Velez; Haddad, Elia

Material-Balance Approach for Determining Drainage Volume of Multifracture Unconventional Oil Wells .............................................. 1749
Gherabati, S. Amin

Characterizing Well Spacing, Well Stacking, and Well Completion Optimization in the Permian Basin: An Improved and Efficient Workflow Using Cloud-Based Computing ................................................................. 1764
Pankaj, Piyush

Advanced Modeling of Production Induced Stress Change Impact on Wellbore Stability of Infill Well Drilling in Unconventional Reservoirs ........................................................................................................... 1793
Zheng, Wei; Xu, Lili; Pankaj, Piyush; Ajinafi, Foluke; Li, James

Understand the Early Indicators for Long-Term Performance of Unconventional Wells ........................................................................ 1806
Cao, Richard; Liu, Chunlei; Brennan, Coleman

Depth of Investigation for Linear Flow: Theory and Practice .......................................................................................... 1815
Ravishumar, Arjun; Lee, John

Rapid Field-Scale Well Spacing Optimization in Tight and Shale Oil Reservoirs Using Fast Marching Method ....................................................................................... 1829
Iino, Atsushi; Onishi, Tsutaba; Odaito-Tawada, Fuyi; Dutta-Gupta, Akhil

SESSION 31: THEME 04: GEOMECHANICS: FROM LAB TO FIELD

Physics-Driven Optimization of Drained Rock Volume for Multistage Fracturing: Field Example From the Wolfcamp Formation, Midland Basin ........................................................................................................ 1846
Parsenov, Sergey G.; Nandial, Kiran; Schechter, David S.; Weijermars, Ruud

Experimental and Numerical Investigation of Fracture Toughness of Anisotropic Shale Rocks .................................................................................................................. 1877
Suo, Yu; Chen, Zhixi; Rahman, Sheik

The Elastic Moduli Change After Carbon Dioxide Flooding Into Limestone: An Experimental Study .................................................................................................................. 1887
Zhang, Yihsai; Lebedev, Maxim; Sarmandalvah, Mohammad; Yu, Hongyan; Iglauser, Stefan

Pulsed Power Plasma Stimulation Technique - Experimental Study on Single Pulse Test for Fractures Initiation .................................................. 1894
Xiao, Yue; House, Waylon; Unal, Ebru; Soltman, M. Y.

SESSION 32: THEME 05: NANOSCALE PVT AND IOR

An Integrated Geological Modeling Approach to Assess Potential of Field Wells for Application of a Surfactant
Imbibition Process in an Ultra-Tight Rock Formation ............................................................................................................. 1912
Detwiler, Stephen L.; Wang, Dongmei
SESSION 33: THEME 10: COMPLETION TO RESERVOIR OPTIMIZATION AND DIAGNOSTICS

Fracture Closure Determination From Two Successive DFITs (Diagnostic Fracture Injection Test) in One Formation .............................................................................................................................................. 1966
Rizwan, Taywar; Liu, Guoqing

Well Testing Model of Fractured Horizontal Wells in Shale Reservoirs with Continuum and Discrete Fracture Networks ........................................................................................................................................ 1974

SESSION 34: THEME 07: FROM MACHINE LEARNING TO CT SCANNING – NOVEL APPROACHES TO OLD PROBLEMS

Novel Monitoring Technology Helps to Make Informed Decisions and Maximize the Efficiency of Completion Strategy ........................................................................................................................................... 1990
Parkhonyuk, Sergey; Korkin, Roman; Kabannnik, Artem; Fedorov, Andrey; Nikolaev, Max; Litvinets, Fedor

High-Quality 3-D MicroCT Imaging of Source Rocks - Novel Methodology to Measure and Correct for X-Ray Scatter ...................................................................................................................................................................................... 2009
Tian, Xiao; Daigle, Hugh; Jiang, Han

SESSION 35: OPERATORS’ FORUM – WELL SPACING AND FIELD DEVELOPMENT

Integrating Microseismic, Geomechanics, Hydraulic Fracture Modeling, and Reservoir Simulation to Characterize Parent Well Depletion and Infill Well Performance in the Bakken .................................................................................................................................................. 2043
Cipolla, Craig; Motiee, Monet; Kechemir, Aicha

An Integrated Approach to Optimizing Completions and Protecting Parent Wells in the Montney Formation, N.E.B.C. ............................................................................................................................................. 2055
Nieto, John; Janega, Graham; Batlai, Bogdan; Martinez, Hugo

Tank Development in the Midland Basin, Texas: A Case Study of Super-Charging a Reservoir to Optimize Production and Increase Horizontal Well Densities ........................................................................................................................................... 2070
Thompson, Jill; Francisco, Nick; Schutt, Marc; Hartig, Kate; McKenna, Jon

SESSION 36: THEME 03: NMR AND ELECTRICAL MEASUREMENTS

Investigation of the Shale Electrical Resistivity Reversal Commonly Observed at the Wet- to Dry-Gas Transition ........................................................................................................................................ 2086
Cumella, Stephen; Byrnes, Alan; Sonnenfeld, Mark

VOLUME 4

Observations of Induction Dielectric Measurements and Their Role in Determining Thermal Maturity of Organic Mudrocks ......................................................................................................................................................... 2105
Rasmussen, John C.; Homan, Dean; Wang, Gong Li; Uschner, Natalie

Quantifying the Influence of Rock Fabric, Composition, and Electrical Double Layer on the Broadband Dielectric Dispersion of Organic-Rich Mudrocks ..................................................................................................................................... 2127
Garcia, Artur Posenato; Heidari, Zoya

Multiscale Pore Systems in Shales and Their Effect on Laboratory Measurements and Transport Properties ........................................................................................................................................... 2146
Daigle, Hugh; Jiang, Chubin; Tian, Xiao; Jiang, Han

NMR Considerations in Shales at Elevated Temperature .................................................................................................................................................................................. 2160
Chakravarty, Aditya; Tian, Ali; Bai, Chandra S.; Sonderegger, Carl H.

Measurement of Natural Gas Isotherms and Imaging Gas in Shale Using NMR ................................................................................................................................................................. 2171
Veselinovic, Dragun; Dick, Michael; Mur, Colleen; Green, Derrick

High-Frequency (400 MHz) T2 Measurements Using a Custom-Built NMR Probe, Eagle Ford Shale, Gonzales and La Salle Counties, Texas ........................................................................................................................................ 2179
McDowell, Bryan; Tutuncu, Azra; Yang, Yuan
SESSION 37: THEME 04: FRACTURE MONITORING AND DIAGNOSTICS

Geomechanical Simulation of Different Conceptual Models for Microseismic Interpretation .......................................................... 2198
Maxwell, Sharon C.; Pirayehgar, Atefa

Modeling Distributed Fiber Optic Sensor Signals Using Computational Rock Mechanics ................................................................. 2207
Sherman, Christopher S.; Mellors, Robert J.; Morris, Joseph P.; Ryerson, Frederick J.

Estimation of Fracture Geometries From Poropore Pressure Responses in Offset Wells ................................................................. 2213
Spicer, Sean; Coenen, Erica

SESSION 38: THEME 05: FLUID FLOW – NANOSCALE COMPOSITIONAL AND DIFFUSION PROCESSES

In-Situ Fractionation in Liquids-Rich Shales and Its Implications for EOR: Experimental Verification and Modeling Study .......... 2233
Tomi, Ali; Perez, Felipe; Devegowda, Deepak; Truong, Tu; Dang, Son; Sondergeld, Carl; Rai, Chandra

Minimum Miscibility Pressure Calculation for Oil Shale and Tight Reservoirs With Large Gas-Oil Capillary Pressure .......................................................... 2244
Zhong, Katiy; Nojibaei, Bahareh; Ahmadi, Kaveh; Johns, Russell T.

Solution Gas Drive in Tight Oil Reservoirs: New Insights From Capillary Condensation and EvaporationExperiments .............................................................................................................................................................................. 2259
Barsotti, Elizabeth; Piri, Mohammad; Althaus, Stacey; Chen, Jin-Hong

Flow Behavior From Organic and Mineral-Hosted Porosity Systems — From Pores to Production ............................................................................................................. 2268
MacDonald, Richard M; Geetan, Steve Isaac; Klemis, Denis; Hilt, Barbara

Experimental and Theoretical Investigation of the Confinement Effect on Gas Properties in Nano-Scale Porous Media ............................................................................................................................................................................. 2285
Salahshoor, Shadi; Fahi, Mashhad

The Effect of Mineral Composition on Shale Oil Recovery ................................................................................................................................. 2304
Fakhr, Andrew; Hoffman, Todd

Determining the Impact of Mineralogy Composition for Multiphase Flow Through Hydraulically Induced Fractures ................................................................. 2324
Santer, Jennifer E.; Prodanovic, Maja; Landry, Christopher J.; Ju, Hongyan

SESSION 39: THEME 05: WELL-SCALE MODELING AND SIMULATION

Applications of a Novel Hybrid Model for Unconventional Reservoirs ................................................................................................................................. 2339
Ayoub, J. A.; Blakey, B.; Krishnamurthy, S.; Thambayuthagam, R. K. M.

Multiscale Modeling to Evaluate the Mechanisms Controlling CO2- Based Enhanced Oil Recovery and CO2 Storage in the Bakken Formation ............................................................................................................................................................................. 2355
Torres, Jose A.; Jin, Lu; Bosshart, Nicholas W.; Pekot, Lawrence J.; Sorensen, James A.; Peterson, Kyle; Anderson, Parker W.; Hazwhorne, Steven B.

Impact of Cluster Spacing on Infill Completions in the Eagle Ford ................................................................................................................................. 2375
Evans, Shea; Siddiqua, Shameem; Magnes, Jeremy

Numerical Modeling and Optimization of Condensate Banking Treatment in the Hydraulic-Fractured Shale Gas Condensate Reservoir ............................................................................................................................................................................. 2388
Liu, Wendi; Ganjidasheh, Reza; Varavei, Abdoljalil; Yu, Wei; Sepehrnoori, Kamy

SESSION 40: THEME 06: THE USE OF GEOPHYSICAL TECHNOLOGIES IN UNCONVENTIONAL PLAYS

Novel 3D Field-Scale Characterization of Reservoir Fractures Using Surface Seismic Data by the Double-Beam Method and Field Applications ............................................................................................................................................................................. 2406
Zheng, Yingcai; Hu, Hao; Fang, Xinding; Stewart, Robert

Improving Marcellus Imaging Through the Use of FWI and Joint Tomographic Inversion for Velocity and Epsilon ............................................................................................................................................................................. 2417
McCann, Dave

Quantitative Interpretation Efforts in Seismic Reservoir Characterization of Utica-Point Pleasant Shale - A Case Study ............................................................................................................................................................................. 2429
Chopra, Satinder; Sharma, Ritesh; Nemati, Hossein; Keay, James

SESSION 41: THEME 09: CHEMICAL EOR AND NOVEL TECHNIQUES

A Chemical Blend for Stimulating Production in Oil-Shale Formations ................................................................................................................................. 2440
Miller, Chammi; Tong, Songyang; Mohanty, Kishore K.

Comprehensive Workflow for Laboratory to Field-Scale Numerical Simulation to Improve Oil Recovery in the Eagle Ford Shale by Selective Testing and Modelling of Surfactants for Wettability Alteration ............................................................................................................................................................................. 2449
Saputra, I. W. R.; Schechter, D. S.

Comprehensive Study of Gas Cycling in the Bakken Shale ............................................................................................................................................................................. 2471
Sanaei, Ali Reza; Abouie, Ali; Tagavifar, Mohsen; Sepehrnoori, Kamy
An Industrialized Approach to Stage-by-Stage Completion Designs

Using Machine Learning in Bakken Shale

Paradigm Shift in Wolfcamp Shale Improves Well Performance by 70%

Produced Water Treatment R&D: Developing Advanced, Cost-Effective Treatment Technologies

Tailoring Treated Brines for Reuse Scenarios

The Water Challenge Program - Permian Basin Pilot Results

Replacing the Use of Freshwater With Seawater: Problems, Solutions, and Applications

Modeling of Azimuthal Gamma Ray Tools for Use in Geosteering Unconventional Reservoirs

Monitoring Wellbore Quality in Real-Time Using a Geometrically Derived Tortuosity Metric

Cement Placement in Severe Doglegs and Its Impact on Well Integrity: A Numerical Assessment

SESSION 42: THEME 13: WATER MANAGEMENT

Systematic Approach for Developing a “Fit-for-Purpose” Treatment for Produced Water Reuse in Hydraulic Fracturing

Produced Water Treatment R&D: Developing Advanced, Cost-Effective Treatment Technologies

Tailoring Treated Brines for Reuse Scenarios

The Water Challenge Program - Permian Basin Pilot Results

Replacing the Use of Freshwater With Seawater: Problems, Solutions, and Applications

SESSION 43: THEME 14: DRILLING AND COMPLETIONS OPTIMIZATION II

Modeling of Azimuthal Gamma Ray Tools for Use in Geosteering Unconventional Reservoirs

Monitoring Wellbore Quality in Real-Time Using a Geometrically Derived Tortuosity Metric

Cement Placement in Severe Doglegs and Its Impact on Well Integrity: A Numerical Assessment

SESSION 44: INDUCED SEISMICITY SPECIAL SESSION

Integrating Poroelastic Effects of Wastewater Injection and Rupture Dynamics to Understand Induced Seismicity

Induced Seismicity Near Fox Creek, Alberta: Interpretation of Source Mechanisms

Case Study: Casing Deformation Caused by Hydraulic Fracturing-Induced Fault Slip in the Sichuan Basin

Statistical Controls on Induced Seismicity

SESSION 45: THEME 02: INTEGRATED CHARACTERIZATION OF UNCONVENTIONAL RESERVOIRS – FROM OUTCROPS TO GEOMODELS III

SCOOP/STACK Periphery Plays: A Multidisciplinary Approach

Using Data Analytics to Maximize Value in the Denver-Julesburg Basin

Using Data Analytics to Maximize Value in the Denver-Julesburg Basin

SESSION 46: THEME 04: FROM PERFORATION TO PERFORMANCE: GEOMECHANICAL APPLICATIONS

Paradigm Shift in Wolfcamp Shale Improves Well Performance by 70%

Production Optimization Using Machine Learning in Bakken Shale

An Industrialized Approach to Stage-by-Stage Completion Designs
SESSION 53: THEME 05: PERMEABILITY MEASUREMENT AND MODELING

A Novel Method for Experimental Characterization of the Poroelastic Constants in Unconventional Formations ..........................................................3066
Ghahfarokhi, Payam Kavousi; Carr, Timothy; Bhattacharya, Shuvajit; Elliott, Justin; Shahkarami, Alireza; Martin, Keithan

Layered Modulus Effect on Fracture Modeling and Height Containment ..............................................................................................................3080
Gokaraju, Deepak; Aftosmis, Munir; Thamburaj, Abhijit; Govindarajan, Sudarshan; Patterson, Robert

Stimulation Mechanisms in Unconventional Reservoirs .................................................................................................................................3100
Ye, Zhi; Ghassami, Ahmad; Riley, Spencer

Hydraulic Fracture Propagation in a Vertically and Laterally Heterogeneous Stress Media in the Permian Basin ........................................3109
Cruz, Leonardo; Elliott, Brendan; Izadi, Ghazali; Barton, Colleen; Hoenik, Tobias

SESSION 54: THEME 06: GEOPHYSICAL RESERVOIR CHARACTERIZATION IN UNCONVENTIONAL PLAYS

Considerations in Azimuthal Processing and Velocity Inversion for Unconventional Plays .................................................................3211
Perz, Mike; Keller, William; Kriechbaum, Victor

Unconventional Play Fracture Characterization Through Orthorhombic Depth Model Building ..........................................................3231
Hilburn, Guy; Pendashekar, Amit; Keller, William; Mott, Rene; Peinado, Jorge; Jumper, Austin; Kriechbaum, Victor

Steps for Improving the Utility of Land Seismic Data for Unconventional Reservoirs .................................................................3238
Stork, Christof

Coherence Attribute Applications on Seismic Data in Various Guises ..................................................................................................3252
Chopra, Satinder; Marfurt, Kurt J.

Fracture Productivity Prediction Considering Natural Fracture Formation Proximal to Fault Damage Zone ......................................................3261
Ramsay, Travis; Hernandez, Luisalic; Li, Jennifer; Erdogan, Meftun

Time-Lapse Petro-Elastic and Seismic Modeling to Evaluate Fracturing Efficiency in Low-Permeability Reservoirs .........................................................3273
Alfi, Moustafa; Chai, Zhi; Pradhan, Anshuman; Ramsay, Travis; Barnafot, Maria; Killough, John

First Unconventional Play From Peruvian Northwest: Muerto Formation ........................................................................................................3287
Morales, Walter; Porlles, Jerjes; Rodriguez, Jose; Taipe, Heraud; Arguedas, Americo

SESSION 55: THEME 07: BIG DATA AND ARTIFICIAL INTELLIGENCE ARE RAPIDLY CHANGING THE OILFIELD – DON’T BE LEFT BEHIND

Rate of Penetration (ROP) Modeling Using Hybrid Models: Deterministic and Machine Learning .................................................................3301
Hegde, Chiranth; Soares, Cesar; Gray, Ken

Identification and Evaluation of Viscoelastic Surfactants Including Smart Viscoelastic Systems for Generation and Stabilization of Ultra-Dry Nitrogen and CO2 Foam for Fracturing Fluids ........................................3320
Alzbotahdi, Shehab; Loflohaloh, Mohammad; Lu, Congwenn; Bloom, Michael; Zhang, Xuan; Prodanovic, Masa; Johnston, Keith; DiCarlo, David

Degradation Study on Materials for Dissolvable Frac Plugs .................................................................................................................3336
Takahashi, Shinya; Shitsukawa, Aki; Okura, Masayuki

Accelerating Well Construction Using a Digital Twin Demonstrated on Unconventional Well Data in North America ........................................3345
Satun, Gurtej; Ashok, Pradeepkumar; van Oort, Eric; Isbell, Matthew R.

Oilfield Data Analytics: Linking Fracturing Chemistry and Well Productivity ..............................................................................................3358
Khristochenko, Duria; Makarychev-Mikhailov, Sergey

A Fiber-Optic Assisted Multilayer Perceptron Reservoir Production Modeling: A Machine Learning Approach in Prediction of Gas Production From the Marcellus Shale ....................................................................................3372
Ghabhiaroohi, Payam Kavousi; Carr, Timothy; Bhattacharya, Shuvajit; Elliott, Justin; Shahkarami, Alireza; Martin, Keithan
SESSION 56: THEME 09: GAS INJECTION PROJECTS

Field Test of CO₂ Injection in a Vertical Middle Bakken Well to Evaluate the Potential for Enhanced Oil Recovery and CO₂ Storage .......................................................... 3397
Sorensen, James A.; Pekst, Lawrence J.; Torres, José A.; Lin, Lu; Hawthorne, Steven B.; Smith, Steven A.; Jacobson, Lonny L.; Doll, Thomas E.

Miscible EOR Process Assessment for Unconventional Reservoirs: Understanding Key Mechanisms for Optimal Field Test Design .................................................................................................................. 3415
Sahni, Vinay; Liu, Shunhua

Huff-N-Puff Gas Injection Performance in Shale Reservoirs: A Case Study From Duvernay Shale in Alberta, Canada ........................................................................................................................ 3427
Hamdi, H.; Clarkson, C. R.; Ghanizadeh, A.; Ghaderi, S. M.; Vahedian, A.; Biazi, N.; Esmail, A.

Laboratory Investigation of EOR Techniques for Organic Rich Shales in the Permian Basin .......................................................................................................................... 3452
Liu, Shunhua; Sahni, Vinay; Tan, Jiasen; Beckett, Derek; Vo, Tuan

Gas Injection for EOR in Organic Rich Shales, Part II: Mechanisms of Recovery .......................................................................................................................... 3461
Tovar, Francisco D.; Barrufet, Maria A.; Schechter, David S.

The Influence of Organics on Supercritical CO₂ Migration in Organic-Rich Shales .......................................................................................................................... 3482
Kurz, Bethany A.; Sorensen, James A.; Hawthorne, Steven B.; Smith, Steven A.; Sanei, Hamed; Aridakis, Omid; Walls, Joel; Lin, Lu; Butler, Shane K.; Beddoe, Christopher J.; Milbeck, Blaise A. F.

Ethane Flooding as an Alternative to CO₂ Injection in Tight Formations: A Bakken Case Study .................................................................................................................. 3498
Yolo, Barco N.; Agbor, Yannick; Pu, Hui

SESSION 57: THEME 11: DECLINE CURVE ANALYSIS AND RESERVOIR MODELS I

A Physical Decline Curve for Fractured Horizontal Wells .......................................................................................................................... 3515
Artus, Vincent; Houzé, Olivier

Variation of Hyperbolic-B-Parameter for Unconventional Reservoirs, and 3-Segment Hyperbolic Decline .................................................................................................................. 3534
Varma, Suvraj; Tabatabaei, S. Hamed; Evert, James; Mattar, Louis

Criteria for Proper Production Decline Models and Algorithm for Decline Curve Parameter Inference .......................................................................................................................... 3552
Zhou, Peng; Pan, Yuewei; Sang, Huiyan; Lee, W. John

Variable Exponential Decline - Modified Arps to Characterize Unconventional Shale Production Performance .................................................................................................................. 3569
Gupta, Ishank; Rai, Chandra; Sonderegger, Carl; Devegowda, Deepak

A Model-Based Diagnostic Workflow for Time-Rate Performance of Unconventional Wells .......................................................................................................................... 3586
Fulford, David S.

Straightforward Representative Fluid Flow Models for Complex Fracture Networks in Unconventional Reservoirs .................................................................................................................. 3638
Acuña, Jorge A.

A Production Decline Model Based on Anomalous Diffusion Stemming From Complex Fracture Network .................................................................................................................. 3651
Liu, Shuai; Li, Han; Valkó, Peter

SESSION 58: HYDRAULIC FRACTURE TEST SITE (HFTS) SPECIAL SESSION II

Downhole Microseismic Mapping of More Than 400 Fracturing Stages on a Multiwell Pad at the Hydraulic Fracturing Test Site (HFTS): Discussion of Operational Challenges and Analytic Results .......................................................................................................................... 3671
Wang, Iris Haihong; Kovscek, Andrew R.; Tingey, Brady E.

Using Stage Level Microseismic Analysis to Gain Insight Into Fracture Efficiency and Completion Effectiveness .......................................................................................................................... 3699
Wang, Iris Haihong; Fairfield, Ryan; Courtier, James; Gray, Danny; Lin, Lu

Using Stage Level Microseismic Analysis to Correlate and Ground Truth Cored Hydraulic Fractures .......................................................................................................................... 3709
Wicker, Joe; Courtier, James; Campbell, Tammy; Lee, Shawn; Fairfield, Ryan; Trowbridge, Stacy

Surface Seismic Monitoring of Hydraulic Fracturing Test Site (HFTS) in the Midland Basin, Texas .......................................................................................................................... 3716
Kumar, Abhish; Chao, Kevin; Hammad, Richard; Harbert, William

Microseismicity Analysis for HFTS Pad and Correlation With Completion Parameters .......................................................................................................................... 3727
Maiti, Debayan

Environmental Impact Analysis on the Hydraulic Fracture Test Site (HFTS) .......................................................................................................................... 3739
Eisenlord, Sarah; Hayes, Thomas; Perry, Kent

SESSION 59: THEME 03: QUANTIFICATION AND EVALUATION OF RESERVOIR QUALITY IN UNCONVENTIONAL RESERVOIRS

Advances in Borehole Imaging in Unconventional Reservoirs .......................................................................................................................... 3759
Morris, Marlan; Knizhnik, Sergei; Duncan, Andrew R.; Tingey, Brady E.

Laboratory Evaluation of Apparent Conductivity of Ultra-Fine Particulates .......................................................................................................................... 3769
Cortez-Montalvo, Janette; Iyung, Ubon; Dusterhoff, Ron; Hu, DanDan; Apostolopoulou, Maria
Lessons Learned
SEM-EDS Mineralogical Mapping
Implications for Well Productivity and Integrity

Insights From Stable Isotope Geochemistry Surveillance in the Unconventional Horn River Basin Play

Permian Basin Petroleum Systems - Geochemical Insight Into Hydrocarbon Generation, Migration and Well Production of Migrated Oil From Horizontal Wells Landed in the Eagle Ford Formation on the San Marcos Arch

Fluid Heterogeneity on a Well-Box Scale in Tight Unconventional Reservoirs

SESSION 60: THEME 04: GEOMECHANICS – HYDRAULIC FRACTURE SIMULATION II

Microscale Laboratory Studies for Determining Fracture Directionality in Tight Sandstone and Shale During Hydraulic Fracturing

Decoding Positives or Negatives of Fracture-Hits: A Geomechanical Investigation of Fracture-Hits and Its Implications for Well Productivity and Integrity

Micromechanical Modeling of Multi-Cluster Hydraulic Fracturing in Horizontal Well

SESSION 61: THEME 05: FLUID FLOW – FRACTURE SIMULATION AND GEOMECHANICS

Simulation of Proppant Transport in Foam Fracturing Fluid Based on Experimental Results

Multi-Physics Pore-Scale Modeling of Particle Plugging Due to Fluid Invasion During Hydraulic Fracturing

Understanding the Mechanism of Interwell Fracturing Interference Based on Reservoir-Geomechanics-Fracturing Modeling in Eagle Ford Shale

Modeling of Fluid Injection in Depleted Parent Wells to Minimize Damage Due to Frac-Hits

SESSION 62: THEME 07: ADVANCED MATERIALS AND CHEMISTRY

Quantitative Mineralogy of Vaca Muerta and Alum Shales From Core Chips and Drill Cuttings by Calibrated SEM-EDS Mineralogical Mapping

Development of a Mixed Polymer Hydraulic Fracturing Fluid for High Temperature Applications

Enhancing Friction Reducer Performance in High Salt Conditions

Can Friction Reducers Transport Sand During Fracturing Treatment?

SESSION 63: THEME 07: SURVEILLANCE OF UNCONVENTIONAL PRODUCTION AND ROCK PHYSICS

Rapid Reservoir Modeling With Automated Tops Correlation

Machine-Learning Based Analytics Applied to Stimulation Performance in the Utica Shale: Case Study and Lessons Learned

Unlocking Reservoir Potential With a Multilayer Inversion Technique From a Directional Resistivity Tool

Novel Diversion Case Studies for Improved Near-Wellbore Connection Between Wellbore and Hydraulic Fracture

SESSION 64: THEME 08: PRODUCED FLUID GEOCHEMICAL SURVEILLANCE – DRAINED ROCK VOLUME

Fluid Heterogeneity on a Well-Box Scale in Tight Unconventional Reservoirs

Production of Migrated Oil From Horizontal Wells Landed in the Eagle Ford Formation on the San Marcos Arch

Permi Basin Petroleum Systems - Geochemical Insight Into Hydrocarbon Generation, Migration and Well Performance

Insights From Stable Isotope Geochemistry Surveillance in the Unconventional Horn River Basin Play
SESSHON 65: THEME 10: FLOWBACK AND ARTIFICIAL LIFT FOR UNCONVENTIONAL RESERVOIRS II

Diagnosing the Health of Your Well With Rate Transient Analysis ................................................................. 4095
Anderson, D. M.; Thompson, J. M.; Behmanesh, H.

Artificial Lift Selection and Its Applications for Deep Horizontal Wells in Unconventional Reservoirs.................. 4106
Pankaj, Piyush; Patron, Katherine Escobar; Lu, Haidan

Use of Chemical Gas Tracers Reveals Details of the Cleanup of an Unconventional Gas Well in the Vaca Muerta Formation .................................................................................................................. 4127
Ramirez, Joaquin; Garcia, Daniel; Ceccon, Daniela; Ferlaza, Carlos

Multifunctional Surfactant Provides Superior Post Frac Production by Enhancing Polymer and Load Fluid Recovery .................................................................................................................................................. 4148
Plasier, Ronald; Delorey, John; Cooney, Kevin; Leguizamón, Javier; Thomson, Corey

SESSHON 66: THEME 12: EMERGING PLAYS IN NORTH AMERICA

Review of the First Bone Spring Hybrid Play in the Delaware Basin, West Texas and Southeast New Mexico ................ 4163
Schwartz, Kenneth M.; Meier, Holly; Star, Allison; Stolte, Natasha

Predicting Success in the Haynesville Shale: A Geologic, Completion, and Production Analysis .................................. 4168
Johnston, Brad; Volkner, Nick

The Niobrara Formation in the Southern Powder River Basin, Wyoming: An Emerging Giant Continuous Petroleum Accumulation ................................................................................................................. 4175
Sonnenberg, Stephen A.

Regional Appraisal of Shale Resource Potential Within the Permian, Anadarko, and Arkoma Basins: How Does the Alpine High Stack Up? .................................................................................................................. 4190
Bromhead, Alex; Butt, Thomas

Author Index
