McGraw, John; Johnson, Jeremy; Leber, Karen; Srinivasan, Rangesh; Heller, Bo
Development of Synthesis Reports on Drinking Water and Wastewater Pipeline Condition Assessment
Technologies and Methodologies ........................................................................................................... 729
Thabay, Nisha

A Framework for Real-Time Process Control ...................................................................................... 738
Bilyk, Katya; Rohrbacher, Joe; Balzer, Bill; Latimer, Ron; Pitt, Paul; Stone, Alan; Bott, Charles; Baumer, Rick

Successful Clarifier Rehabilitation: from CFD modeling, to Performance Specifications, to Compliance - While Saving Money .................................................................................................................. 761
Griborio, Alonso; Martinez, Felipe; Stanley, Eric; Koroshec, John; Coates, Dennis

SimuWorks™: A Cost-Effective Model-Based Wastewater Treatment Plant “Flight Simulator” and Training Tool for WWT Operators ........................................................................................................... 769
Andres, Hank; Snowling, Spencer; McKinnon, Dan; Bainbridge, Mark; Schraa, Oliver; Richarz, Darren

Development of Process Models for Planning, Design, and Operations .................................................. 781
Gellner, W.; James; Kutcher, T.; Riess, R.; Sayler, E.; Latimer, R.; Schraa, O.; Belia, E.

Calibrating Process and Hydraulic Models to Re-Rate the Big Creek WWTF ............................................ 799
Philips, Heather M.; Johnson, Mike; Perkins, Lel; Bragler, Kent; Groeters, Steve; Woodard, Tim

Comparison of Colorimetric and Chromatography Methods for the Determination of Volatile Fatty Acids in Biological Phosphorus Removal Plants ........................................................................................................ 824
Dabrowski, Bob; Holt, Tony; Baar, Rob

Hice, Brad; Johnson, Gary R.; Everett, Rickie; Racey, Lisa; Gebremedhin, Leedu

Beer: It is Not Just for Drinking Anymore Brewery Waste as a Supplemental Carbon Source for Biological Nutrient Removal ........................................................................................................................................ 842
Graham, J.; Mueller, L.; Trigillo, S.; Brode, K.

Why Aren’t H₂S Concentrations Logical? (What We Are Missing In Daily H₂S Patterns) ........................ 853
Holsstad, Mark S.

City of Los Angeles: Closing the Curtain on Sewer Ventilation .................................................................. 883
Lorenzo, Vlad; Ghanam, Ahmad; Martinez, Carmelo; Berggren, Barry; Hagekhahl, Adel

Characterization of Methane Generation and Emissions from a Wastewater Force Main ................. 897
Ward, Matthew; Bott, Charles; Sparks, Jeffrey; Easter, Chris

Use of Pure Oxygen to Control Odors and Corrosion and Improve Safety in the Milford, Connecticut Sewer System ........................................................................................................................................... 926
Bradstreet, Kenneth A.; Smith, Charles N.; Bowker, Robert P. G.

Air Flow in Sewers .................................................................................................................................. 949
Brodac, Dominique; McMasters, Foster; Thomas, Devan

How Does My Hydraulic Retention Time Affect Odor and Corrosion? .................................................. 956
Jacobs, Kevin

Ventilation Dynamics and Pressurization in Deep Tunnels ...................................................................... 966
Humford, Christopher; Loepky, Chris; Suda, Yuki

WAS Pretreatment to Boost Volatile Solids Reduction and Digester Gas Production – Market and Technology Assessment ......................................................... 980
Long, J. Hunter; Bullard, C. Michael

Application of Ultrasonication to High Strength Organic Wastes for Hydrogen and Methane Production ..................................................................................................................................... 999
Elbashishi, Elsayed; Elajee, Hafez; Hisham; Elady, Ahmed; Nakla, George

Successful Application of the First EXELYS™ Continuous Thermal Hydrolysis System in an Operational WWTP in Denmark ........................................................................................................................................ 1011
Boyd, Jason; Adeler, Ole Fritz; Hoejgaard, Soeren; Nielsen, Bente; Klene, Michele

Modeling the Potential Impact of Sludge Pre-treatment Technologies .................................................. 1025
Bye, Christopher M.; Jones, Richard M.; Dold, Peter L.

Effect of Microwave, Microwave Peroxide, Ultrasound, Protease Pretreatment on Secondary Sludge Solubilization and Anaerobic Digestion ...................................................................................................... 1027
Yi, Weigang; Miles; Lo, Kwang Victor; Luo, Ping; Huang; Mavinic, Donald S.

Enhancing Volatile Solids Reduction by Application of Sludge Ozonation using the Lyso™ Process to Aerobic Digesters ...................................................................................................................................... 1047
Ohadi, Malcolm; Colletti, Alessio

Thermal Hydrolysis Considerations for Pre-digestion Solids Processing ................................................ 1055
Schafer, Perry; Newman, Gary; Kragel, Steve; Steigers, Tracy; Chapman, Tom; Multer, Chris; Braswell, Philip

Money Saved! How to Effectively Inspect Sewer Laterals .................................................................. 1064
Griffiths, Jeff; Pendleton, George

No House Left Behind: Combined Sewer Separation Building Clean Water Disconnection Means, Methods, and Effectiveness ....................................................................................................................................... 1071
Recos, Melissa; Sreeraj, Preethi; Uzelac, Damir; Chabot, Joshua; Thompson, Adam

Inflow and Infiltration is Not Supposed to Occur in New Subdivisions .................................................. 1087
Robinson, Barbara A.; Miller, Randall R.

USEPA Sewer Electro Scan Field Demonstration Revisited .................................................................... 1100
May, Terry; Wilmot, Charles G.; Harris, Robert J.

Private Property Programs: Just the Facts ............................................................................................... 1132
Davidson, Jaime M.; Chase, Laurie; McLamarrah, June

Lateral Inspection and Database Development Program ........................................................................ 1133
Behe, Mark; Mercedes, Mike; Carpenetti, Edward; Flinn, Elaine
Successful Implementation of a Comprehensive Private Sewer Lateral Program: Lessons from the Trenches ................................................................. 1150
A Tale of Two Programs - A Comparison of Two Regional Private Property I/I Abatement Programs ................................................................. 1168
Hubbard, Phil; Fogel, Jerome; Stueh, Richard; Scarrano, Jeff; Lukas, Andy
Tulsa's Storage Solution to SSO Reduction .................................................................................................................................................. 1182
Shelton, Robert; Barton, Tanner; Teasch, Joseph; David; Ray
Continuous Calibration Promises Significant Savings in Meeting Wet Weather Compliance Requirements .......................................................... 1208
Kocarek, Dale; Fallara, Tim; Yang, Lome; Barton, John; Tangrala, Ali; Adams, Alicia
You Can Model That? Modeling a Large Sanitary Sewer System with Thousands of Grinder Pumps ................................................................. 1227
Garcia, David; Jackson, Daniel; Mallett, Steve
Easy and Efficient CSO Monitoring through a Flap Gate ................................................................................................................................. 1241
Charron, Alain; Wiebe, Cynthia; Laliberte, Jean-Philippe
Where Vision Meets Dollars and Cents: Comprehensive Plan Impacts to a Sanitary Sewer System ................................................................. 1253
Maldonado, Stephen; Miller, Sharon; Whitfield, Tina
Leveraging SCADA Data to Enhance Collection System Model Reliability .................................................................................................. 1270
Burgess, Edward; Hoyoh, Edward; Kelly, Hunter; Bukovac, David; Zhuang, Li; Barden, Gregory
An Enhanced Multiple Regression Model for Predicting Rainfall-Derived Infiltration/Inflow (RDII) ................................................................. 1295
Graham, Edward; Yang, Jason; Nishat, Shazia
Simulating Antecedent Moisture Conditions to Calibrate Rainfall Derived Inflow and Infiltration for Sanitary Systems ........................................ 1296
Gamble, Ben; Saylor, Eric; Koran, Joseph; Moisio, Susan; Schultz, Nancy; Sahni, Nalin
Protecting Stormwater Utilities From Lawsuits ........................................................................................................................................ 1318
Cooperwasser, Vic; Dowling, Jon

VOLUME 3

Simultaneously Addressing CSO & MS4 Requirements Through Integrated Wet Weather Management ................................................................. 1330
Geffroy, Leah; Neutz, Mary; Duffy, Sean
Gwinnett County's Stormwater Utility: 6 Years Down .................................................................................................................................. 1340
Leo, Steve
Tailoring a Stormwater Ordinance to Accommodate the Needs of St Tammany Parish, Louisiana ................................................................. 1362
Schenk, Sabrina
Evaluation of the TMDL of the East Canyon Reservoir Using Remote Sensing ............................................................................................ 1367
Borup, M. Brett; Fayol, David
Development of an Environmental Sampling and Monitoring Program as a Mitigation Tool to reduce Indirect and Cumulative Impacts ........................................................................................................................................ 1374
Sadler, Mary; Buchan, Ed; Waldroup, Kenneth
Multispectral Remote Sensing of Harmful Algal Blooms in Lake Champlain, USA ................................................................. 1393
Isenstein, Elizabeth; Prescott, Adam; Park, Mi-Hyun
Up a Creek with a Paddle: Performance of a Visual Stream Assessment in a Non-Wadeable River ................................................................. 1403
Hatcher, Michelle
Lu, Ting; Kapoor, Vikram; Wendell, David; Johnston, Rachel; Linn, Donald; Biju, George
Measure Twice, Act Correctly: The Components and Benefits of a Comprehensive Watershed-Wide Monitoring Strategy ................................................................. 1424
Scott, Mandy; Wootten, Matt; Frye, Craig; Gibbons, Jim; Moskwa, Penelope; Turner, Carrie
Physical, Chemical, and Biological Factors Affect methyl mercury in Lake Pontchartrain Louisiana ................................................................. 1452
Saleh, Khalid; Reimers, Robert; Abdelghani, Assaf
The Do's and Don'ts of Vendor Cooperation ........................................................................................................................................ 1464
N/A
Implementing an Intelligent Operations and Asset Management System that Integrates DCS, SCADA, CMMS and Process Models for Activated Sludge, IFAS and Biofilms to Improve Compliance and Optimize ENR Plants in Real Time ........................................................................................................................................ 1468
An Alternative Delivery Approach for the Long-Term Performance Contracting of Enterprise-Level Control System ........................................................................................................................................ 1488
Pooosti, Ali; Perciavalle, Pete; Alavi, Sam; Irvin, Robert; Vargouj, Abhian
WebPM: East Bay Municipal Utility District's Innovative Software That Closely Tracks Projects and Assets and Saves Money ........................................................................................................................................ 1496
Gray, Donald M. D.; Wilcox, Eric; Coke, Kent B.
Integrated Utility Master Planning—"Eyeing the Bottom Line" ........................................................................................................................................ 1504
Walch, Marc; Immanneni, Rishi; Mellinger, C. B. Flip; Burton, Michael
How to Deliver Los Angeles Wastewater Capital Improvement Program in Challenging Economic Times ................................................................. 1533
Ali-Ahmad, Samara; Mowery, Lisa
Program Management: A Springboard to Evolution ........................................................................................................................................ 1539
Pier, David; Costanzo, Mitchell A.; Rogowski, Steven M.
Behind the $740M: Building a Technical Consensus for Indianapolis Consent Decree Amendment No. 2 ........................................ 1551
Shayman, David; Ranch, Christopher J.; Jacob, Mark; Nelson, Steve; Reichlin, Doug; Mashbaum, Brian;

Corralling Cowtown?: Comprehensive CIP Development for one of the Nation’s Fastest Growing Large Cities ........................................ 1575
Hastier, Thomas; Brown, Jessica; Kawasaki, Mazen; Cronberg, Andrew; Donzari, Novez

Proposed Guidance for Implementation of Renewal Engineering Technologies for Drinking Water and Wastewater System Pipelines ........................................ 1581
Steiner, Kristi; Sinha, Sunil; Jung, Jai K.; Graf, Walter

South Carolina’s Apprenticeship Initiative for Water and Wastewater Operators ........................................ 1607
Gomez, John; Lunn, Karen; Setzko, Dennis; Meserve, Erik; Robinson, Stephen; Umphries, Margaret
